Custodian:	Citibank, N.A. 花旗銀行
PRC Custodian:	Citibank (China) Co., Limited 花旗銀行(中國)有限公司
Registrar:	Computershare Hong Kong Investor Services Limited 香港中央證券登記有限公司
Ongoing charges over a year[#]:	0.83%
Tracking difference of the last calendar year^{##}:	0.04%
Underlying Index:	CSI 300 Index
Trading Currency:	Renminbi (RMB) – RMB counter Hong Kong dollars (HKD) – HKD counter
Base Currency:	Renminbi (RMB)
Distribution Policy:	The Manager intends to distribute income to Unitholders at least annually (usually in July) having regard to the Sub-Fund's net income after fees and costs. All Units (whether RMB or HKD traded Units) will receive distributions in RMB only.
Financial Year End of this Fund:	31 December
ETF Website:	3188EN.chinaamc.com.hk

[#] The ongoing charges figure is based on expenses for the year ended 31 December 2018. This figure may vary from year to year. It represents the sum of the ongoing expenses chargeable to the Sub-Fund expressed as a percentage of the average Net Asset Value.

^{##} This is the actual tracking difference of the calendar year ended 31 December 2018. Investors should refer to the website of the Sub-Fund for more up-to-date information on actual tracking difference.

What is this product?

- ChinaAMC CSI 300 Index ETF (the “**Sub-Fund**”) is a sub-fund of ChinaAMC ETF Series, an umbrella unit trust established under Hong Kong law. The Sub-Fund is a passively-managed ETF falling within Chapter 8.6 and Appendix I of the Code on Unit Trusts and Mutual Funds issued by the SFC. Units of the Sub-Fund (the “**Units**”) are traded on The Stock Exchange of Hong Kong Limited (the “**SEHK**”) like stocks.
- The Sub-Fund is a physical ETF which invests directly in the PRC’s domestic securities markets through the Manager’s status as a renminbi qualified foreign institutional investor (“**RQFII**”).

Objective and Investment Strategy

Objective

The investment objective is to provide investment results that, before fees and expenses, closely correspond to the performance of the CSI 300 Index (the “**Index**”).

Strategy

In seeking to achieve the Sub-Fund’s investment objective, the Manager will primarily use a full replication strategy through investing directly in securities included in the Index in substantially the same weightings in which they are included in the Index, through the RQFII investment quota granted to the Manager by the State Administration of Foreign Exchange of the PRC (the “**SAFE**”) and the “Stock Connect”, a securities trading and clearing linked programme with an aim to achieve mutual stock market access between mainland China and Hong Kong, which consists of the Shanghai-Hong Kong Stock Connect and the Shenzhen Stock Connect. The Manager may invest up to 100% of the Sub-Fund’s NAV through either RQFII and/or the Stock Connect.

The Manager may also use a representative sampling strategy where it is not possible to acquire certain Securities which are constituents of the Index due to restrictions or limited availability. This means that the Sub-Fund will invest directly in a representative sample of securities that collectively has an investment profile that aims to reflect the profile of the Index. The securities constituting the representative sample may or may not themselves be constituents of the Index.

The Sub-Fund may also invest not more than 5% of its NAV in money market instruments and in cash deposits for cash management purpose.

As a result of corporate actions of constituent companies of the Index, securities that are not constituents of the Index, including but not limited to equity securities, debt securities, convertible bonds and other derivative instruments, may be held by the Sub-Fund. Holdings of such securities will not exceed 10% of the NAV.

Apart from those received in corporate actions as described above, currently the Manager has no intention to invest the Sub-Fund in any financial derivative instruments (including structured products or instruments) for hedging or non-hedging (i.e. investment) purposes. There is no current intention for the Sub-Fund to engage in securities lending, repurchase transaction or other similar over-the-counter transactions, but this may change in light of market circumstances. The Manager will seek the prior approval of the SFC and provide at least one month’s prior notice to Unitholders before engaging in any such investments.

The investment strategy of the Sub-Fund is subject to the investment and borrowing restrictions set out in Schedule 1 of the Prospectus.

Index

The Index is a free float adjusted, category-weighted index which measures the performance of A-Shares traded on the Shanghai Stock Exchange (“**SSE**”) or the Shenzhen Stock Exchange (“**SZSE**”). The Index consists of the 300 stocks with the largest market capitalisation and liquidity from the entire universe of listed A-Shares companies in the PRC. The Index is calculated and disseminated in RMB on a real-time basis and is maintained by China Securities Index Co., Ltd

("CSI"). The Index is quoted in RMB. The Index was launched on 8 April 2005 and had a base level of 1,000 on 31 December 2004.

The Index is a price return index. A price return index calculates the performance of the Index constituents on the basis that any dividends or distributions are not reinvested.

As of 22 February 2019 the Index had a total free-float market capitalisation of approximately RMB 10,974.49 billion and 300 constituents.

Top 10 constituents

As at 22 February 2019 the 10 largest constituents of the Index, representing approximately 24.53% of the market capitalisation of the Index, were as follows:

Rank	Constituent Name	Weighting (%)
1.	Ping An Insurance (Group) Company of China Ltd.	6.62
2.	Kweichow Moutai Co Ltd	3.32
3.	China Merchants Bank Co Ltd	2.88
4.	Gree Electric Appliances, Inc. of Zhuhai	1.95
5.	Midea Group Co., Ltd	1.93
6.	Industrial Bank	1.89
7.	CITIC Securities Co Ltd	1.61
8.	Bank of Communications Co Ltd	1.55
9.	Inner Mongolia Yili Industrial Group Co Ltd	1.41
10.	China Minsheng Banking Corp Ltd	1.37

You can obtain the most updated list of the constituents of the Index and additional information of the Index from the website of CSI at <http://www.csindex.com.cn>.

 Bloomberg Code: SHSZ300
 Reuters Code: CSI300

What are the key risks?

Investment involves risks. Please refer to the Prospectus for details including the risk factors.

1. Investment risk

- The Sub-Fund is an investment fund. There is no guarantee of the repayment of principal. Therefore your investment in the Sub-Fund may suffer losses.

2. Concentration risk

- The Sub-Fund is subject to concentration risk as a result of tracking the performance of a single geographical region (the PRC), and may likely be more volatile than a broad-based fund.

3. Risks relating to the RQFII regime

- In the event of any default of either a PRC broker or the PRC Custodian (directly or through its delegate) in the execution or settlement of any transaction or in the transfer of any funds or securities in the PRC, the Sub-Fund may encounter delays in recovering its assets which may in turn adversely impact the NAV.
- The RQFII policy and rules are subject to change and there may be uncertainty to their

implementation. The uncertainty and change of the PRC laws and regulations (including the RQFII policy and rules) may adversely impact the Sub-Fund and such changes may also have potential retrospective effect.

- Repatriations by RQFIIs in respect of fund such as the Sub-Fund conducted in RMB are permitted daily and are not subject to any lock-up periods or prior approval. There is no assurance, however, that PRC rules and regulations will not change or that repatriation restrictions will not be imposed in the future.
- The Sub-Fund will utilise the Manager's RQFII quota which is limited and may be used up, subject to the Manager's allocation across different public fund products and/or accounts under its management from time to time. It will not have exclusive use of a specified amount of RQFII investment quota. In the event the Manager is unable to obtain or allocate sufficient RQFII quota to the Sub-Fund, the Manager may suspend creations of Units. In such event the trading price of a Unit will be at a significant premium to the NAV of each Unit.

4. Risks associated with the Stock Connect

- The rules and regulations relevant to the Stock Connect are subject to change which may have potential retrospective effect. The Stock Connect is subject to quota limitations which may restrict the Sub-Fund's ability to invest in A-Shares through the programme on a timely basis. Where a suspension in the trading through the programme is effected, the Sub-Fund's ability to access the PRC market through the programme will be adversely affected. In the event that the Sub-Fund's ability to invest in A-Shares through the Stock Connect on a timely basis is adversely affected, the Manager will only be able to rely on RQFII investments to achieve the Sub-Fund's investment objective.

5. RMB trading and settlement of Units risks

- Not all stockbrokers or custodians may be ready and able to carry out trading and settlement of the RMB traded Units.
- The limited availability of RMB outside the PRC may also affect the liquidity and trading price of the RMB traded Units.

6. Dual counter risks

- If there is a suspension of the inter-counter transfer of Units between the HKD counter and the RMB counter for any reason, Unitholders will only be able to trade their Units in the relevant counter on the SEHK.
- The market price on the SEHK of Units traded in HKD and of Units traded in RMB may deviate significantly due to different factors, such as market liquidity, supply and demand in each counter and the exchange rate between the RMB and the HKD (in both the onshore and the offshore markets). As such investors may pay more or receive less when buying or selling Units traded in HKD on the SEHK than in respect of Units traded in RMB and *vice versa*.
- Investors without RMB accounts may buy and sell HKD traded Units only. Such investors will not be able to buy or sell RMB traded Units and should note that distributions are made in RMB only. As such, investors may suffer a foreign exchange loss and incur foreign exchange associated fees and charges to receive their dividend.
- Not all brokers and CCASS participants may be familiar with and able to buy Units in one counter and to sell Units in the other or to carry out inter-counter transfers of Units or to trade both counters at the same time. This may inhibit or delay an investor dealing in both HKD traded Units and RMB traded Units and may mean an investor can only trade in one currency.

7. Risks relating to the PRC

- Given that the A-Shares market is considered volatile and unstable (with the risk of suspension of a particular stock or government intervention), the creation and redemption of Units may also be disrupted. A Participating Dealer is unlikely to redeem or create Units

if it considers that A-Shares may not be available.

- Investing in emerging markets, such as in the PRC market and in PRC-related companies, involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity, legal and regulatory risks.
- The PRC imposes restrictions on foreign ownership or holdings. In such case the Sub-Fund may be required to use a representative sampling strategy which may increase tracking error.

8. PRC tax risk

- Pursuant to the relevant PRC tax laws, regulations and practice, taking into account professional and independent tax advice, the Manager does not currently make withholding income tax provision for gross realised or unrealised capital gains derived from trading of A-Shares (via RQFII or the Stock Connect).
- There are risks and uncertainties associated with the PRC tax laws, regulations and practice in respect of capital gains realised on investments in the PRC via RQFII quota or the Stock Connect (which may have retrospective effect). Any increased tax liabilities on the Sub-Fund may adversely affect the Sub-Fund's value and the resultant tax liability would be eventually borne by investors.

9. RMB currency risks

- The Sub-Fund is denominated in RMB. RMB is currently not freely convertible and is subject to exchange controls and restrictions.
- The base currency of the Sub-Fund is RMB. Non-RMB based investors in Units are therefore exposed to foreign exchange risk as a result of fluctuations in the RMB exchange rate against their base currencies. There is no guarantee that the value of RMB against the investors' base currencies (for example HKD) will not depreciate.

10. Trading differences risks

- As the SSE and the SZSE may be open when Units in the Sub-Fund are not priced, the value of the securities in the Sub-Fund's portfolio may change on days when investors will not be able to purchase or sell the Sub-Fund's Units.
- Differences in trading hours between PRC stock exchanges (i.e. the SSE and the SZSE) and the SEHK may increase the level of premium/discount of the Unit price to its NAV because if a PRC stock exchange is closed while the SEHK is open, the Index level may not be available.
- A-Shares are subject to trading bands which restrict increase and decrease in the trading price. Units listed on the SEHK are not. This difference may also increase the level of premium/discount of the Unit price to its NAV.

11. Passive investments risks

- The Sub-Fund is not "actively managed" and therefore, when there is a decline in the Index, the Sub-Fund will also decrease in value. The Manager will not take defensive positions in declining markets. Investors may lose a significant part of their respective investments if the Index falls.

12. Trading risks

- Generally, retail investors can only buy or sell Units of the Sub-Fund on the SEHK. The trading price of the Units on the SEHK is driven by market factors such as the demand and supply of the Units. Therefore, the Units may trade at a substantial premium or discount to the NAV.
- The Manager appoints broker(s) in the PRC for each market (the SZSE and the SSE). In the event that the Manager appoints only one broker for each market (which may be the same broker), and should, for any reason, the Manager be unable to use the relevant

broker, the operation of the Sub-Fund would be adversely affected and may cause Units to trade at a premium or discount to the NAV or unable to track the Index.

13. Tracking error risk

- Due to fees and expenses of the Sub-Fund, liquidity of the market and different investment strategies adopted by the Manager, the Sub-Fund's return may deviate from that of the Index.

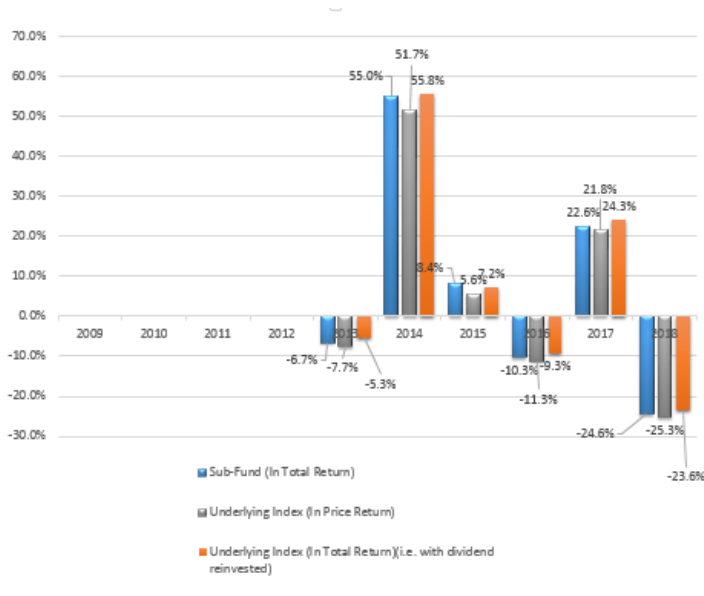

14. Reliance on market maker risks

- Although it is a requirement that the Manager ensures that at least one market maker will maintain a market for Units traded in each counter and that at least one market maker for each counter gives not less than 3 months prior notice before termination of market making under the relevant market maker agreement, liquidity in the market for the Units may be adversely affected if there is no market maker for the RMB or HKD traded Units. It is possible that there is only one SEHK market maker to each counter or the Manager may not be able to engage a substitute market maker within the termination notice period of a market maker, and there is also no guarantee that any market making activity will be effective.

15. Termination risk

- The Sub-Fund may be terminated early under certain circumstances, for example, where the Index is no longer available for benchmarking or if the size of the Sub-Fund falls below RMB150 million. Investors should refer to the section "Termination" in the Prospectus for further details. In case of termination of the Sub-Fund, the related costs will be borne by the Sub-Fund. The NAV may be adversely affected and Unitholders may suffer loss.

How has the fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividends reinvested.
- These figures show by how much the Sub-Fund increased or decreased in value during the calendar year shown. Performance data is calculated in RMB including ongoing charges and excluding expenses payable by investors on the SEHK.
- Where no past performance is shown there was insufficient data available in that year to provide performance.
- Underlying Index: CSI 300 Index.

Launch date: 17 July 2012.

Is there any guarantee?

The Sub-Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?**Charges incurred by you when trading the Sub-Fund on the SEHK**

Fees	What you pay
Brokerage fee	Market rates
Transaction levy	0.0027% ¹
SEHK trading fee	0.005% ²
Stamp duty	Nil
Inter-counter transfer	HKD5 ³

1. Transaction levy of 0.0027% of the trading price of the Units, payable by each of the buyer and the seller.
2. Trading fee of 0.005% of the trading price of the Units, payable by each of the buyer and the seller.
3. HKSCC will charge each CCASS participant a fee of HKD5 per instruction for effecting an inter-counter transfer between one counter and the other counter. Investors should check with their brokers regarding any additional fees.

Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the NAV of the Sub-Fund which may affect the trading price.

Annual rate (as a % NAV)**Management fee***

0.70%

The Sub-Fund pays a management fee to the Manager.

Trustee's fee***Net Asset Value****Annual rate (as a % of NAV)**

The Sub-Fund pays a trustee's fee to the Trustee (out of which the Trustee will pay the Custodian, PRC Custodian and the Administrator).

Equals or is less than the RMB equivalent of US\$200 million

0.10%

Exceeds the RMB equivalent of US\$200 million up to and including US\$600 million

0.09%

Exceeds the RMB equivalent of US\$600 million

0.07%

(subject to a minimum of US\$4,000 per month)

* Please note that these fees may be increased up to a permitted maximum on giving 1 month's notice to unitholders. Please refer to the section of the prospectus entitled "Fees and Expenses" for further details of the fees and charges payable and the permitted maximum of such fees allowed as well as other ongoing expenses that may be borne by the Sub-Fund.

Performance fee

Nil

Administration fee

Nil

Other fees

You may have to pay other fees when dealing in the Units of the Sub-Fund. Please refer to the Prospectus for details.

Additional information

The Manager will publish important news and information with respect to the Sub-Fund (including in respect of the Index), both in the English and in the Chinese languages, on the Manager's website at 3188EN.chinaamc.com.hk including:

- (a) the Prospectus and this statement (as revised from time to time);
- (b) the latest annual and semi-annual financial reports (in English only);
- (c) any notices for material alterations or additions to the Prospectus or the Sub-Fund's constitutive documents;
- (d) any public announcements made by the Sub-Fund, including information with regard to the Sub-Fund and Index, the notices of the suspension of the calculation of the NAV, changes in fees and the suspension and resumption of trading;
- (e) the near real time estimated NAV per Unit throughout each dealing day in RMB and in HKD;
- (f) the last closing NAV of the Sub-Fund in RMB only and the last closing NAV per Unit in RMB and in HKD;
- (g) the composition of the Sub-Fund (updated on a daily basis); and
- (h) the latest list of the participating dealers and market makers.

The near real time estimated NAV per Unit in HKD and the last closing NAV per unit in HKD are for reference only. The near real time estimated NAV per Unit in HKD does not use a real time HKD:RMB foreign exchange rate – it is calculated using the estimated NAV per Unit in RMB multiplied by an assumed foreign exchange rate using the Tokyo Composite 3:00 p.m. Tokyo time (2:00 p.m. Hong Kong time) mid rate quoted by Bloomberg for offshore RMB (CNH) on the previous SEHK trading day. Since the estimated NAV per Unit in RMB will not be updated when the underlying A-Share market is closed, the change to the estimated NAV per Unit in HKD (if any) during such period is solely due to the change in the foreign exchange rate. The last closing NAV per Unit in HKD is calculated using the last closing NAV per Unit in RMB multiplied by an assumed foreign exchange rate using the Tokyo Composite 3:00 p.m. Tokyo time (2:00 p.m. Hong Kong time) mid rate quoted by Bloomberg for offshore RMB (CNH) as of the same Dealing Day. Please refer to the Prospectus for details.
