1.10 Accounting Treatment of the Share Options under the Scheme

(1) Accounting Treatment

According to the requirements of the *Accounting Standards for Business Enterprises No. 11 – Share-based Payments*, the Company will measure and audit the expense of the Scheme in accordance with the following accounting method:

(i) Grant Date

Since the Share Options cannot be Exercised on the Grant Date, no relevant accounting treatment is required. The Company shall determine the fair value of the Share Options on the Grant Date.

(ii) Vesting Period

On each balance sheet date during the Vesting Period, the services obtained in the current period shall, based on the best estimate of the number of the Share Options, be included in cost of the relevant assets or expenses and the other capital reserves in capital reserves at the fair value of the Share Options on the Grant Date.

(iii) Exercise Period

No adjustment shall be made to the relevant costs or expense, and the total amount of the owner's equities, which have been recognized.

(iv) Exercise Date

Share capital and share premium shall be recognized with reference to the actual exercise of the Share Options, and upon which, the amount recognized as "Capital Reserves – Other capital reserves" during the Vesting Period shall be transferred to "Capital Reserves – Capital premium".

(2) Calculation of the Fair Value of the Share Options

According to the relevant requirements on determination of fair value in the *Accounting Standards for Business Enterprises No. 22 – Recognition and Measurement of Financial Instruments*, the Company is required to select an appropriate pricing model to calculate the fair value of the Share Options. The Company has selected the Black-Scholes model ("**BS Model**") to calculate the fair value of the Share Options, and predict the fair value of the Share Options granted under the Initial Grant on 30 September 2019 as RMB3.40 per A share using this model (the fair value will be measured on the Grant Date) and arrived. Relevant parameters are set out below:

- (i) Price of the Underlying Shares:** RMB18.20 per share (assuming the Grant Date is 30 September 2019, on which the closing price of the Company was RMB18.20 per share);
- (ii) Exercise Price:** RMB18.41 per A share
- (iii) Validity Period:** 3.5 years (determined based on the weighted average Validity Period of Exercise)
- (iv) Volatility rate:** 27.46% (using the volatility rate of the Company for the last 3.5 years)
- (v) Risk-free interest rate:** 2.82% (using the 3.5-year deposit benchmark interest rate of financial institutions formulated by the People's Bank of China)
- (vi) Dividend rate:** 2.32% (using the dividend rate of the Company for 2018)

(3) Estimated Impacts on the Operating Performance of Each of the Period due to Implementation of the Share Options

The fair value of the Share Options on the Grant Date which is determined in accordance with the relevant valuation method, and the costs of payment of Shares under the Scheme which is determined finally, will be amortized in accordance with the percentage of Share Options exercised during the implementation of the Scheme. The incentive costs incurred from the Scheme will be charged to the recurring profit and loss.

According to the accounting standards of the PRC, the effects of the costs of Share Options under the initial Grant of the Scheme on each accounting period are as follows:

Year	2019	2020	2021	2022	2023	Total
Costs to be amortized (RMB 0'000)	8.64	3,152.93	3,148.95	1,695.08	725.61	8,731.20

According to the preliminary evaluation by the Company based on the information available, without taking into account the stimulus effects of the Scheme on the results of the Company, the amortization of the costs of Share Options shall affect the net profit of each year during the Validity Period, although the extent of such impact would not be substantial. Taking into consideration the positive impact of the Scheme on the development of the Company, such as motivating the management team, increasing the operational efficiency, and reducing agent costs, the benefits generated from the improvement in the Company's results due to the Scheme shall far exceed the increase in expenses.

The accounting treatment of the reserved Share Options are the same as the accounting treatment of the Share Options under the initial Grant of the Scheme.

Note: This incentive cost is calculated based on the price determined with the date of the Announcement in relation to the Share Option Scheme, i.e. 30 September 2019. The actual share and cost will be adjusted according to the relevant rules based on the Announcement in relation to the Share Option Scheme. Shareholders shall be aware that any calculation of the value of the Share Options as at the Latest Practicable Date is subjective and uncertain, subject to a number of assumptions and determination of the pricing model and the Grant Date.
