REPORT OF THE MANAGER TO THE UNITHOLDERS

Introduction

The CSOP FTSE China A50 ETF (the “CSOP A50 ETF” or the “Sub-Fund”), a sub-fund of the CSOP ETF Series, is a unit trust authorized under the Securities and Futures Ordinance (Cap. 571) of Hong Kong. It was launched on 23 August 2012 and commenced trading in RMB under the stock code 82822 on The Stock Exchange of Hong Kong Limited (the “SEHK”) on 28 August 2012; following the SEHK’s dual counter model, the CSOP A50 ETF started trading in HKD under the stock code 02822 on the SEHK on 8 November 2012. The CSOP A50 ETF is benchmarked against the FTSE China A50 Index (the “A50 Index”) and adopts the full-replication strategy. The Manager and RQFII Holder of the CSOP A50 ETF is CSOP Asset Management Limited (the “Manager”). The trustee is HSBC Institutional Trust Services (Asia) Limited (the “Trustee”).

The CSOP A50 ETF is a physical ETF which invests directly in the A50 Index securities through the RQFII quotas of the Manager, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect. Under current regulations in the PRC, foreign investors can invest in the domestic securities market through certain qualified foreign institutional investors that have obtained status as a QFII or a RQFII from the CSRC and have been granted quota(s) by SAFE to remit foreign freely convertible currencies (in the case of a QFII) and RMB (in the case of a RQFII) into the PRC for the purpose of investing in the PRC’s domestic securities markets. Meanwhile, from November 17, 2014, foreign investors can trade eligible stocks listed in Shanghai Stock Exchange through Shanghai-Hong Kong Stock Connect. And from December 5, 2016, foreign investors can trade eligible stocks listed in Shenzhen Stock Exchange through Shenzhen-Hong Kong Stock Connect. The Manager has obtained RQFII status and the total RQFII quotas obtained by the Manager amount to RMB 46.1 billion as of 30 June 2020.

The FTSE China A50 Index (the “Index”) is compiled and published by FTSE International Limited. It comprises the top 50 A-Share companies from both the Shanghai and Shenzhen markets by market capitalisation. The Index operates under clearly defined rules published by the index provider and is a tradable index.

Capital Gains Tax (“CGT”) Treatment

Rules governing taxes on capital gains derived by QFIIs or RQFIIs from the trading of PRC Securities (including China A-Shares) were announced on 14 November 2014. According to the rules, investors are not required to pay capital gain tax from 17 November 2014. Therefore, the Manager did not make provision for any withholding tax after November 17, 2014.

Change to the type of the Underlying Index

The Sub-Fund has been using FTSE China A50 price return index as its Underlying Index since its inception in August 2012. Price return index does not include the reinvestment of dividends from the constituent securities of the index. Price return index only considers price movements of the constituent securities of the index but the net total return index assumes that dividends paid by the constituent securities of the index, net of any withholding taxes, are reinvested in additional shares of such index’s constituents. As such, an index’s net total return is usually considered to be a more accurate measurement of the actual investment return and performance. Therefore, it is proposed that the type of the Underlying Index of the Sub-Fund will change from price return index to net total return index with effect from 27 February 2015.

The Manager believes that the change to the type of the Underlying Index will not only reduce the cash dragging but also its tracking error of the Sub-Fund. The Manager considers that the change made to the type of the Sub-Fund’s Underlying Index would not materially prejudice unitholders’ rights or interests and does not anticipate adverse impact to the operation of the Sub-Fund.

REPORT OF THE MANAGER TO THE UNITHOLDERS (CONTINUED)

The Sub-Fund Performance

The CSOP A50 ETF seeks to provide investment results, before fees and expenses, which closely correspond to the performance of the Index. As of 30 June 2020, the dealing Net Asset Value (“NAV”) per unit of the CSOP A50 ETF was RMB 13.3610 and there were 814,500,000 units outstanding. The total asset under management was approximately RMB 10.9 billion.

For the period ended 30 June 2020, the FTSE China A50 net return index decreased by 1.79% while the dealing NAV decreased by 2.43%. The difference in performance between the NAV of the CSOP A50 ETF and the Index is mainly attributed to dividends, fees and expenses including tax on dividends. YTD Net total return of the RMB counter (stock code 82822) was -2.71%.

Exchange Liquidity

Since inception, the CSOP A50 ETF has attracted great investor attention from investors across the globe. The trading value of the RMB counter (stock code: 82822) remained steadily at an average daily turnover of RMB 10.9 million in June 2020. The trading value of the HKD counter (stock code: 02822) remained steadily at an average daily turnover of HKD 323.8 million in June 2020. The Sub-Fund’s high liquidity often placed it in the most actively traded ETFs on the HKEx. The trading volume for the CSOP A50 ETF reflected strong interest in the CSOP A50 ETF.

8. FINANCIAL RISK MANAGEMENT

The objective of the Sub-Fund is to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the FTSE China A50 Index. The Sub-Fund's activities may expose it to a variety of risks including but not limited to: market risk (including market price risk, interest rate risk and currency risk), credit and counterparty risk and liquidity risk which are associated with the markets in which the Sub-Fund invests.

The following is a summary of the main risks and risk management policies.

(a) Market risk

(i) Market price risk

Market price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual instrument or factors affecting all instruments in the market.

The Sub-Fund is designated to track the performance of the FTSE China A50 Index, therefore the exposures to market risk in the Sub-Fund will be substantially the same as the tracked index. The Manager manages the Sub-Fund's exposures to market risk by ensuring that the key characteristics of the portfolio, such as security weight and industry weight, are closely aligned with the characteristics of the tracked index.

As at 30 June 2020 and 31 December 2019, the Sub-Fund's investments and derivative financial instruments were concentrated in the following industries:

	30 June 2020 (Unaudited)		31 December 2019 (Audited)

*The data of funded total return swap represents their underlying asset.

The Sub-Fund held 50 out of 50 (31 December 2019: 50 out of 50) constituent securities comprising the FTSE China A50 Index. The Sub-Fund is therefore exposed to substantially the same market price risk as the FTSE China A50 Index.

8. FINANCIAL RISK MANAGEMENT (Continued)

(a) Market risk (Continued)

(i) Market price risk (Continued)

Sensitivity analysis in the event of a possible change in the index by 25% as estimated by the Manager

As at 30 June 2020, if the FTSE China A50 Index were to increase by 25% (31 December 2019: 25%) with all other variables held constant, this would increase the operating profit for the period/year by approximately RMB2,702,987,148 (31 December 2019: RMB3,737,309,260). Conversely, if the FTSE China A50 Index were to decrease by 25% (31 December 2019: 25%), this would decrease the operating profit for the period/year by an equal amount.

(ii) Interest rate risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and liabilities and future cash flow.

As at 30 June 2020 and 31 December 2019, interest rate risk arises only from bank balances. As the bank balances held by the Sub-Fund is short term in nature and the interest arising from these interest bearing assets are immaterial, the Manager considers that changes in their fair value and future cash flows in the event of a change in market interest rates will not be material. As a result, the Manager considers sensitivity analysis of interest rate risk is not necessary to be presented.

(iii) Currency risk

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. The Sub-Fund is not exposed to currency risk arising from balances and transactions in foreign currencies as the majority of its assets and liabilities are denominated in RMB, the Sub-Fund's functional and presentation currency. As a result, the Manager considers sensitivity analysis of currency risk is not necessary to be presented.

(b) Credit and counterparty risk

Credit and counterparty risk is the risk that an issuer or counterparty will be unable or unwilling to meet a commitment that it has entered into with the Sub-Fund.

The Sub-Fund limits its exposure to credit and counterparty risk by carrying out the majority of its investment transactions and contractual commitment activities with well-established broker-dealers, banks and regulated exchanges with high credit ratings.

The Sub-Fund may invest in financial derivative instruments ("FDIs"), which is mainly funded total return swaps with one or more counterparties. The counterparties are transactions of over-the-counter FDIs or their guarantors must be substantial financial institutions. Collateral are received from the counterparty to reduce counterparty risk.

All transactions in listed securities are settled or paid for upon delivery using approved and reputable brokers. In addition, the Sub-Fund places bank balances with reputable financial institutions. As such, the Manager does not consider the Sub-Fund to be exposed to significant credit and counterparty risk.

As at 30 June 2020, the Sub-Fund placed bank balances of RMB51,410,010 (31 December 2019: RMB89,544,243) and investments of RMB8,686,647,481 (31 December 2019: RMB12,622,214,674) with The Hong Kong and Shanghai Banking Corporation Limited ("HSBC"), which is the custodian of the Sub-Fund. The S&P credit rating of HSBC is A- (31 December 2019: A).

(b) Credit and counterparty risk (Continued)

As at 30 June 2020, the Sub-Fund placed bank balances of RMB36,766,904 (31 December 2019: RMB31,774,298) deposit reserve of RMB1,383,200 (2019: RMB1,383,200) and investments of RMB2,005,401,112 (31 December 2019: RMB2,875,300,224) with HSBC Bank (China) Company Limited (“HSBC China”), which is the PRC custodian of the Sub-Fund. The Moody’s credit rating of HSBC China is A1 (31 December 2019: A1).

As at 30 June 2020, the Sub-Fund invested in funded total return swap was as follows:

Counterparty	Credit rating	Swap value RMB	Collateral value RMB	Collateral ratio
UBS AG London	A-	119,900,000	119,326,017	99.52%

The Sub-Fund measures credit risk and expected credit losses using probability of default, exposure at default and loss given default. Management consider both historical analysis and forward looking information in determining any expected credit loss. As at 30 June 2020 and 31 December 2019, deposit reserve, interest receivable from bank deposits, interest receivable from derivative financial instruments and bank balances are held with counterparties with high credit ratings and are due to be settled within 1 month. Management consider the probability of default to be close to zero as the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12-month expected credit losses as any such impairment would be wholly insignificant to the Sub-Fund.

The maximum exposure to credit risk as at 30 June 2020 and 31 December 2019 is the carrying amount of the financial assets as shown on the condensed statement of financial position.

(c) Liquidity risk

Liquidity risk is the risk that the Sub-Fund may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Sub-Fund is exposed to daily redemptions of units in the Sub-Fund. The Sub-Fund invests the majority of its assets in securities that are traded in an active market which can be readily disposed of.

The table below analyses the Sub-Fund’s financial liabilities into relevant maturity groupings based on the remaining period at the reporting date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant.

(d) Fair value estimation

The Sub-Fund classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Sub-Fund can access at the measurement date (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

8. FINANCIAL RISK MANAGEMENT (Continued)

(d) Fair value estimation (Continued)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes “observable” requires significant judgment by the Sub-Fund. The Sub-Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following table analyses within the fair value hierarchy the Sub-Fund’s financial assets (by class) measured at fair value at 30 June 2020 and 31 December 2019:

	Level 1 <i>RMB</i>	Level 2 <i>RMB</i>	Level 3 <i>RMB</i>	Total <i>RMB</i>

Investments whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities and swap. The Sub-Fund does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. As at 30 June 2020 and 31 December 2019, there was no investment classified within level 2.

As at 30 June 2020 and 31 December 2019, there was no investment held by the Sub-Fund which has been suspended for trading.

8. FINANCIAL RISK MANAGEMENT (Continued)

(d) Fair value estimation (Continued)

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently or do not trade. As at 30 June 2020 and 31 December 2019, the sub fund did not hold any investments classified in level 3.

During the year ended 31 December 2019, the suspended equity investment of RMB448,585,791 has been transferred from level 2 to level 1 related to the security which was suspended for trading as at 31 December 2018 and has resumed trading during the year ended 31 December 2019.

Transfer between levels of the fair value hierarchy are deemed to have occurred at the beginning of the reporting period.

The assets and liabilities included in the condensed statement of financial position, other than investments and derivative financial instruments, are carried at amortised cost; their carrying value are approximation of fair value. There are no other assets and liabilities not carried at fair value but for which fair value is disclosed.

(e) Capital risk management

The Sub-Fund's capital is represented by the redeemable units outstanding. The Sub-Fund's objective is to provide investment results that correspond generally to the performance of the respective index. The Manager may:

- Redeem and issue new units on a daily basis in accordance with the constitutive documents of the Sub-Fund;
- Exercise discretion when determining the amount of distributions of the Sub-Fund to the unitholders; and
- Suspend the creation and redemption of units under certain circumstance as currently disclosed in the Prospectus of the Sub-Fund.

All the financial liabilities of the Sub-Fund are carried at amortised cost.

11. INVESTMENT LIMITATION AND PROHIBITIONS UNDER THE SFC CODE

The SFC Code allows the Sub-Fund to invest in constituent securities issued by a single issuer for more than 10% of the Sub-Fund's net asset value provided that the investment is limited to any constituent securities that each accounts for more than 10% of the weighting of the Index and the Sub-Fund's holding of any such constituent securities may not exceed their respective weightings in the Index (except as a result of changes in the composition of the Index and the excess is transitional and temporary in nature).
