Chairman's Statement

I am pleased to present the annual results of the Company together with its subsidiaries (collectively, the “**Group**”) for the year ended 31 December 2020 (the “**FY2020**”).

The Group is a developer and major supplier of customised moulds in the People's Republic of China (the “**PRC**”), with a focus on moulds for the production of automotive parts which cater for the growing trend of automotive lightweight application, as well as electrical appliance parts and other parts. The Group seeks to offer comprehensive moulding services and solutions to the customers, covering product analysis, mould design and development; mould fabrication, assembling, testing and adjustment; trial production and aftersales services.

BUSINESS REVIEW

In early 2020, due to the global outbreak of the novel coronavirus disease 2019 (“**COVID-19**”), business and economic activities in the PRC and other countries have been severely affected. Domestic automobile production and sales in the PRC in the first half of 2020 decreased by 16.8% and 16.9% year-on-year, respectively. In the second half of 2020, with the gradual control of the domestic epidemic situation, production and operations resumed in an orderly manner. Driven by local policies to promote automobile consumption, the overall automotive market recovered gradually, with the sales volume of new energy vehicles growing rapidly. The Company also actively pursued in-depth development of automotive moulds for new energy vehicles. The annual domestic automobile production and sales in the PRC for 2020 decreased by 2% and 1.9% year-on-year, respectively. As the development of new vehicle models and the demand for automotive parts remained subdued and sluggish, the sales of automotive hot-pressing moulds, which have been the Group's focus, were adversely affected.

The electrical appliance market also experienced a similar situation as compared to that in the automobile manufacturing market. The outbreak of epidemic severely impacted the electrical appliance market in the first half of 2020, and yet the demand for electrical appliances recovered gradually in the second half of the year as the epidemic was gradually brought under control and various consumption policies were implemented.

On the other hand, against the backdrop of the epidemic outbreak, the demand for moulds for production of health protective appliances, such as masks, increased significantly in a short period of time. In view of this, the Group took an active move to develop relevant health protective appliances moulds. In the first half of 2020, the Group's revenue from the sales of health protective appliances moulds largely offset the decrease in revenue from the sales of automotive moulds. With the global shortage of masks supply gradually alleviated in the second half of 2020, demand for health protective appliances moulds of the Group declined significantly.

The revenue of the Group for FY2020 amounted to RMB203.4 million, representing a decrease of RMB26.8 million or 11.6% as compared with that of RMB230.2 million for the year ended 31 December 2019 (the “**FY2019**”). Such decrease was mainly due to the net effect of the decrease in revenue generated from the sales of automotive moulds and the increase in revenue generated from the sales of health protective appliance moulds. Profit attributable to the owners of the Company for FY2020 amounted to RMB28.3 million, representing an increase of 19.5% as compared with that of RMB23.7 million for FY2019. Such increase was mainly due to the listing expenses incurred in FY2019. Excluding the listing expenses, profit attributable to the owners of the Company for FY2020 amounted to RMB28.3 million, representing a decrease of 26.0% as compared with that of RMB38.3 million for FY2019. Such decrease was mainly due to the combined effects of the decrease in revenue, and the increase in administrative expenses during FY2020.

Chairman's Statement

OUTLOOK

In 2021, with uncertainties surrounding the changes in the outbreak and unclear prospects for global trade, it is expected the external environment will remain complex and changing. While the epidemic has been effectively contained in the PRC and the Chinese economy has recovered steadily at present, the impact of the epidemic continues and there are still many challenges for economic development.

The Group expects the implementation of measures to relax restriction of automotive purchase and promote consumption of new energy vehicles across the PRC, as well as the acceleration of the replacement of old vehicles and the promotion of localised manufacturing of automotive parts, will further help the recovery of automotive market in the PRC, and bring opportunities to the automotive mould industry.

With a high retention rate of traditional electrical appliances in the PRC, there is limited new demand and competition in the electrical appliance market is fierce. On the other hand, consumption upgrades, rising demand of health related electrical appliances and increase in overseas demand are expected to be new drivers of growth in the upstream and downstream electrical appliance industry.

In 2021, the Group will pay close attention to global economic trends and market changes, and formulate business strategies based on the current status of the automotive, electrical appliances and other mould markets. The Group will actively explore domestic and overseas markets to seize development opportunities. At the same time, the Group will strive to enhance its competitive advantages and strengthen the credit risk assessment of customers in order to meet future challenges. The Group will also continue to implement the strategies and expansion plans as set out in its prospectus dated 17 June 2019 (the "**Prospectus**").

DIVIDEND

Taking into account the Group's business development needs and the Shareholders' investment returns, the board (the "**Board**") of directors (the "**Directors**") of the Company proposed a Final Dividend of HK0.371 cents (equivalent to RMB0.309 cents) per share for FY2020.

APPRECIATION

On behalf of the Board, I would like to extend our gratitude to all of our employees and management team for their effort and contribution, and also thank our Shareholders and business partners for their trust and support. Going forward, the Group will strive to achieve a stable growth and create higher value for our Shareholders.

Management Discussion and Analysis

FINANCIAL REVIEW

Revenue

The revenue of the Group amounted to RMB203.4 million for FY2020, representing a decrease of RMB26.8 million or 11.6% as compared with that of RMB230.2 million for FY2019.

The following table sets forth a breakdown of the revenue of the Group by business segment:

	For the year ended 31 December		
	2020 RMB'000	2019 RMB'000	Change %
Sales of moulds			
Automotive moulds	78,361	162,102	-51.7
Electrical appliance moulds	65,278	55,235	18.2
Health protective appliances moulds	40,823	–	–
Other moulds	3,573	1,254	184.9
Sub-total	188,035	218,591	-14.0
Parts processing services	14,319	9,328	53.5
Other sundry income	1,091	2,309	-52.8
Total	203,445	230,228	-11.6

(a) Sales of moulds

The Group principally engages in the design, development, manufacture and sales of customised hot-pressing moulds, hydroforming moulds and injection moulds which are used in auto manufacturing. Apart from automotive moulds, the Group also engages in the design, development, manufacture and sales of customised plastic moulds for the production of electrical appliance and health protective appliance. Sales of moulds accounted for 92% of the Group's revenue for FY2020.

The revenue generated from sales of automotive moulds for FY2020 amounted to RMB78.4 million, representing a decrease of RMB83.7 million or 51.7% as compared with that of RMB162.1 million for FY2019. Such decrease was primarily due to the decrease in revenue generated from one of the Group's major customers, whose orders had decreased in the second half of 2019. The Directors believe that this customer decreased its business with the Group as a result of the decrease in sales of automobiles and introduction of new passenger vehicle models due to the weakened global economy as well as fierce competition in the industry.

Management Discussion and Analysis

The revenue generated from sales of electrical appliance moulds for FY2020 amounted to RMB65.3 million, representing an increase of RMB10.1 million or 18.2% as compared with that of RMB55.2 million for FY2019. Such increase was mainly attributable to the increase in revenue generated from new customers of the Group.

Due to the outbreak of COVID-19, the Group had developed health protective appliances moulds during the first half of 2020 which were mainly used for the production of masks. The revenue generated from sales of health protective appliances moulds for FY2020 amounted to RMB40.8 million.

(b) Parts processing services

Parts processing services principally include services provided to the customers for (i) modification of moulds the Group manufactured and sold; and (ii) processing machine parts that are used in automotive moulds, electrical appliance moulds and health protective appliances moulds. The revenue generated from parts processing services for FY2020 amounted to RMB14.3 million, representing an increase of RMB5.0 million or 53.5% as compared with that of RMB9.3 million for FY2019. Such increase was primarily due to the increase in demand for processing services for automotive parts and parts processing services for health protective appliances moulds from the Group's new customers.

Cost of sales

The Group's cost of sales primarily consists of direct materials, direct labour, manufacturing overhead and subcontracting expenses. The major raw materials used by the Group in the production of moulds include, among others, mould steel, mould parts, hot runner and mould base.

The cost of sales of the Group for FY2020 amounted to RMB132.2 million, representing a decrease of RMB20.5 million or 13.4% as compared with that of RMB152.7 million for FY2019. Such decrease was mainly due to the decrease in the demand of automotive moulds and the cost of production of health protective appliances moulds was relatively lower when comparing to the production of automotive moulds and electrical appliance moulds.

Gross profit and gross profit margin

The gross profit of the Group for FY2020 amounted to RMB71.2 million, representing a decrease of RMB6.4 million or 8.2% as compared with that of RMB77.6 million for FY2019. The gross profit margin increased from 33.7% for FY2019 to 35.0% for FY2020, which was mainly due to (a) the increase in the gross profit margin from sales of automotive moulds mainly due to the fact that the Group had received a larger proportion of acceptance reports from one of the Group's major customers which had a relatively higher gross profit margin when comparing to other customers; and (b) the higher gross profit margin from health protective appliances moulds as the Group was able to charge a higher mark-up in this business segment mainly due to (i) the high demand of masks as a result of the outbreak of COVID-19; (ii) the request of urgent delivery of moulds from the new customers; and (iii) the relatively short production cycle.

Other income and gains

The other income and gains of the Group mainly consisted of government grants, interest income, gain on disposal of assets and foreign exchange differences. The amount increased from RMB2.0 million for FY2019 to RMB3.6 million for FY2020 which was mainly due to the increase in government grants and the increase in interest income for the year.

Management Discussion and Analysis

Selling and distribution expenses

The selling and distribution expenses of the Group mainly consisted of staff costs for sales staff, provision for warranty and logistics expenses for delivery of moulds to customers. The amount decreased from RMB8.1 million for FY2019 to RMB6.5 million for FY2020, representing a decrease of RMB1.6 million or 20.1%. Such decrease was mainly due to the decrease in moulds maintenance costs.

General and administrative expenses

The general and administrative expenses of the Group for FY2020 amounted to RMB33.4 million, representing a decrease of RMB5.5 million or 14.2% as compared with that of RMB38.9 million for FY2019. The listing expenses in relation to the Listing recognised for FY2019 was RMB14.6 million. Excluding the listing expenses, the general and administrative expenses of RMB33.4 million for FY2020 would have increased by RMB9.1 million or 37.3% as compared with that of RMB24.3 million for FY2019. Such increase was mainly due to the increase in impairment losses for trade receivables of RMB9.0 million. The increase in impairment loss was mainly attributable to provision relating to one of the Group's customers which was not able to settle its trade receivables with the Group as agreed, and the Group increased the provision for the expected credit loss. As at the date of this report, the Group is applying to the court for execution of property for the customer and the Group considered that such trade receivables may or may not be fully collected. However, a full impairment losses for trade receivables was provided for this customer for prudent purpose. The Directors further believe that the COVID-19 pandemic may have negative impact on some of its customers' businesses and/or liquidity. As such, the Group has reviewed and analysed its trade receivables profiles and increased the provision for the expected credit losses as considered appropriate.

Finance costs

The finance costs of the Group mainly consisted of interest expenses on lease liabilities and discounted notes receivable. The amount remained relatively stable at RMB1.1 million for FY2019 and RMB0.8 million for FY2020.

Income tax expenses and effective tax rate

The income tax expenses of the Group decreased from RMB7.7 million for FY2019 to RMB5.8 million for FY2020. The effective tax rate, representing income tax expense divided by profit before taxation, were 24.4% and 16.9% for FY2019 and FY2020, respectively. Excluding the listing expenses, the effective tax rate would have remained relatively stable at 16.7% for FY2019 and 16.9% for FY2020.

Net profit and net profit margin

The Group recorded net profit of RMB23.7 million and RMB28.3 million for FY2019 and FY2020, with a net profit margin of 10.3% and 13.9%, respectively. Excluding the listing expenses, the adjusted net profit margin of the Group would have decreased from 16.6% for FY2019 to 13.9% for FY2020, which was mainly due to the increase in general and administrative expenses as mentioned above.

Management Discussion and Analysis

Capital expenditure and commitments

The Group's capital expenditure in FY2020 primarily comprised expenditure on machinery and furniture, fixtures and equipment and amounted to a total of RMB20.7 million (31 December 2019: RMB4.8 million).

As at 31 December 2020, the Group had capital commitments of RMB3.8 million (31 December 2019: Nil).

Liquidity and financial resources

The Group's operations were primarily financed through its operating activities for FY2020. The Group derived its cash inflow from operating activities primarily through the receipt of payments from the customers in relation to the sales of moulds and parts processing services. The Group's cash outflows from operating activities primarily comprised payments for purchases of raw materials, direct labour costs, subcontracting fees to third-party contractors and operating expenses such as staff costs.

As at 31 December 2020, the Group's total current assets and current liabilities were RMB378.0 million (31 December 2019: RMB330.6 million) and RMB176.7 million (31 December 2019: RMB137.5 million), respectively, while the current ratio was 2.1 times (31 December 2019: 2.4 times). The increase in total current assets as at 31 December 2020 was mainly attributable to the increase in inventories. The increase in total current liabilities as at 31 December 2020 was mainly attributable to the increase in contract liabilities. As at 31 December 2020, the Group had cash and cash equivalents of RMB95.9 million (31 December 2019: RMB86.9 million).

As at 31 December 2020, the Group's gearing ratio was 6.2% (31 December 2019: 5.8%), which was calculated based on interest-bearing liabilities divided by total equity.

Going forward, the Group expects to fund its future operations and expansion plans primarily with listing proceeds, cash generated from operations and borrowings.

Reserves and capital structure

As at 31 December 2020, the Group's total equity was RMB284.5 million (31 December 2019: RMB262.7 million), which represented share capital of RMB5.8 million (31 December 2019: RMB5.8 million), reserves of RMB278.4 million (31 December 2019: RMB256.9 million) and non-controlling interests of RMB0.3 million (31 December 2019: nil). The increase in total equity was primarily due to the net profit for the current year.

Property, plant and equipment

The Group's property, plant and equipment mainly comprised of buildings, machinery, furniture, fixtures and equipment, leasehold improvements and motor vehicles. As at 31 December 2020, the Group's property, plant and equipment amounted to RMB74.0 million (31 December 2019: RMB62.9 million).

Management Discussion and Analysis

Inventories

The Group's inventories comprised (i) raw materials and low-value consumables used in production, (ii) work-in-progress for products being manufactured in the production plants, and (iii) finished goods which comprised moulds that had only passed the customers' initial inspection for which the Group had not received their final acceptance reports. As at 31 December 2020, the Group's inventories amounted to RMB185.6 million (31 December 2019: RMB138.4 million). Such increase was mainly due to the fact that some of the Group's customers had delayed the issuance of final acceptance reports for the Group's moulds, mainly finished automotive moulds, as a result of the outbreak of COVID-19.

Trade and notes receivables

The Group's trade and notes receivables represented amounts receivable from the customers in relation to the sales of moulds and provision of parts processing services. The Group's notes receivables were issued by the customers with which the Group could receive the amount at a fixed future date, or could readily be discounted into cash at an expense of finance charge. As at 31 December 2020, the Group's trade and notes receivables amounted to RMB84.5 million (31 December 2019: RMB103.4 million). Such decrease was mainly due to (i) the increase in revenue from sales of health protective appliances moulds which customers in this business segment usually settle their trade receivables in a shorter period of time; and (ii) impairment losses for trade receivables of one of the Group's customers as mentioned in "General and administrative expenses" section above. Due to the outbreak of COVID-19, the Group had strengthened the internal control measures on its assessment of expected credit losses on trade receivables, which include the following:

- (i) reviewed the trade receivables ageing regularly and assessed the customers individually for provision for expected credit loss allowance which take into account the historical settlement pattern, correspondence with the customers, and evidence from external sources including the relevant public search results relating to the financial circumstances of the relevant customers; and
- (ii) increased the expected credit losses rates which were determined based on the Group's historical credit loss experience and rates used by the Group's comparable companies, with an adjustment to reflect current and forward-looking information such as macroeconomic factors affecting the ability of the customers to settle the receivables.

Based on the Group's assessment, the impairment losses for trade and notes receivables increased from RMB0.03 million for FY2019 to RMB9.02 million for FY2020. As at the date of this report, other than the legal proceedings against one of the Group's customers as mentioned in "General and administrative expenses" section above, the Group was not aware of any significant financial difficulties in its major debtors or significant doubt on collectability of its material trade receivables.

Trade and notes payables

The Group's trade and notes payables primarily consisted of payable to the suppliers in relation to the purchase of the raw materials for the manufacture of moulds, and subcontracting fees payable to third-party contractors. As at 31 December 2020, the Group's trade and notes payables amounted to RMB43.8 million (31 December 2019: RMB50.2 million). Such decrease was mainly due to the decrease in purchase volume of raw materials in the fourth quarter of 2020 resulting from the decrease in orders received in the fourth quarter of 2020 compared with the corresponding period.

Management Discussion and Analysis

Contract liabilities

The Group's contract liabilities consisted of the short-term advances received to deliver moulds. Pursuant to the contract, the Group generally requires the customers to pay around 30% of the total fee when they place a purchase order and around 40% to 50% of the total fee when the moulds have been fabricated and are ready for delivery to the customers. Such payments from the customers were recorded as contract liabilities and the moulds related to these contract liabilities were recorded as work-in-progress for products being manufactured in production plants and finished goods in the Group's inventories.

After the moulds have passed the customers' final inspection and examination, the customers would issue final acceptance reports to the Group, at which time, the Group would recognise the sales and reverse the related contract liabilities and record the remaining balance of around 20% to 30% of the total fee as trade receivables.

As at 31 December 2020, the Group's contract liabilities amounted to RMB108.3 million (31 December 2019: RMB65.9 million), most of which represented payments from the customers for moulds that had passed their initial inspection but for which the Group had not received their final acceptance reports.

EMPLOYEES, TRAINING AND REMUNERATION POLICIES

As at 31 December 2020, the Group had 345 employees (31 December 2019: 358 employees), all of whom were in the PRC. To promote employees' knowledge and technical expertise, the Group offers training programmes to employees from time to time according to their job duties. Employees' remuneration packages are determined with reference to the market information and individual performance and will be reviewed on a regular basis. The remuneration policy will be reviewed by the Board from time to time. In addition to basic remuneration, the Group also makes contributions to mandatory social security funds for the benefit of the PRC employees that provide for retirement insurance, medical insurance, unemployment insurance, maternity insurance, occupational injury insurance and housing funds.

The total staff cost including remuneration, other employee benefits and contributions to retirement schemes for the Directors and other staff of the Group for FY2020 amounted to RMB35.0 million (FY2019: RMB38.3 million). The decrease in staff cost was mainly due to the decrease in direct labor cost and pension scheme contributions.

MATERIAL ACQUISITIONS AND DISPOSALS

During FY2020, the Group had no acquisitions or disposals of subsidiaries and associated companies.

CONTINGENT LIABILITIES

As at 31 December 2020, the Group had no material contingent liabilities (as at 31 December 2019: nil).

PLEDGES OVER GROUP'S ASSETS

As at 31 December 2020, none of the assets of the Group were pledged.

SIGNIFICANT INVESTMENTS HELD

The Group did not have any significant investments held as at 31 December 2020.

Management Discussion and Analysis

FOREIGN CURRENCY EXPOSURE

Since the Group generated most of the revenue and incurred most of the costs in Renminbi for FY2020, there was no significant exposure to foreign exchange rate and the Group did not maintain any hedging policy against foreign exchange risk. The management will consider hedging significant currency exposure should the need arise.

USE OF PROCEEDS

The net proceeds from the Listing (the “**Net Proceeds**”), after deducting the underwriting fees and other related expenses in connection with the Listing, was approximately HK\$95.6 million. The Company intends to apply the Net Proceeds in accordance with the proposed application as set out in the section headed “Future Plans and Use of Proceeds” in the Prospectus.

The following table sets out the utilisation of the Net Proceeds as at 31 December 2020:

	Percentage of Net Proceeds	Net Proceeds from the global offering HK\$' million	Utilised up to 31 December 2020 HK\$' million	Unutilised as at 31 December 2020 HK\$' million	Expected timeline for full utilisation
Lease the premises for new factory	4.0%	3.8	1.8	2.0	By the end of 2021

Corporate Governance Report

CORPORATE GOVERNANCE PRACTICES

The Board is committed to maintaining high corporate governance standards. The Board believes that high corporate governance standards are essential in providing a framework for the Group to safeguard the interests of Shareholders of the Company, enhance corporate value, formulate its business strategies and policies, and enhance its transparency and accountability.

The Company has adopted the principles and code provisions of the Corporate Governance Code (the “**CG Code**”) contained in Appendix 14 of the Listing Rules as the basis of the Company’s corporate governance practices.

The Board is of the view that throughout the year ended 31 December 2020 and up to the date of this report, the Company has complied with all the code provisions as set out in the CG Code, except for code provision A.2.1 as set out below.

Pursuant to code provision A.2.1 of the CG Code, the responsibilities between the chairman and the chief executive officer should be segregated and should not be performed by the same individual. However, the Group does not have a separate chairman and chief executive officer and Mr. Lin Wan-Yi currently performs these two roles. The Board believes that vesting the roles of both chairman and chief executive officer in the same person has the benefit of ensuring consistent leadership within the Group and enables more effective and efficient overall strategic planning for the Group. Given that (i) all material decisions are approved by the Board, which currently comprised of 4 executive Directors (including Mr. Lin Wan-Yi), 1 non-executive Director and 3 independent non-executive Directors; and (ii) the Directors proactively participate in all the board meetings and the relevant board committee meetings, and the chairman cum chief executive officer ensures all the Directors are duly informed of all the matters to be approved at the meetings, the Board considers that the balance of power and authority for the present arrangement will not be impaired and this structure will enable the Company to make and implement decisions promptly and effectively. The Board will continue to review and consider splitting the roles of chairman of the Board and chief executive officer of the Company at a time when it is appropriate and suitable by taking into account the circumstances of the Group as a whole.

The Company has also put in place certain recommended best practices as set out in the CG Code.

MODEL CODE FOR SECURITIES TRANSACTIONS BY DIRECTORS AND EMPLOYEES

The Company has adopted the Model Code for Securities Transactions by Directors of Listed Issuers (the “**Model Code**”) as set out in Appendix 10 to the Listing Rules.

Specific enquiry has been made of all the Directors and they have confirmed that they have complied with the Model Code for the year ended 31 December 2020 and up to the date of this report.

The Company has also adopted Model Code for securities transactions by employees who are likely to be in possession of unpublished price-sensitive information of the Company. No incident of non-compliance of the Model Code by the employees was noted by the Company for the year ended 31 December 2020 and up to the date of this report.

Corporate Governance Report

BOARD OF DIRECTORS

The Company is headed by an effective Board which oversees the Group's businesses, strategic decisions and performance and takes decisions objectively in the best interests of the Company.

The Board regularly reviews the contribution required from a Director to perform his/her responsibilities to the Company, and whether the Director is spending sufficient time performing them.

Board Composition

The Board currently comprises the following Directors:

Executive Directors

Mr. Lin Wan-Yi (*chairman and chief executive officer*)

Mr. Yung Chia-Pu

Mr. Cheng Ching-Long

Mr. Lu Jen-Chieh

Non-executive Director

Ms. Hsieh Pei-Chen

Independent Non-executive Directors

Mr. So George Siu Ming

Mr. Lin Lien-Hsing

Mr. Fan Chi Chiu

The biographical details of each Director are set out in the section headed "Biographies of Directors and Senior Management" on pages 16 to 20 of this annual report. The Directors have no financial, business, family or other material/relevant relationship with each other.

Board Meetings and Directors' Attendance Records

Pursuant to code provision A.1.1 of the CG Code, regular Board meetings should be held at least four times a year involving active participation, either in person or through electronic means of communication, of a majority of Directors. Four Board meetings were held for the year ended 31 December 2020.

Directors may participate in meetings either in person or through electronic means of communication. All Directors are given not less than fourteen days' notice for regular Board meetings. For other Board and Board committee meetings, reasonable notice will be given.

Corporate Governance Report

The joint company secretaries of the Company (the “**Joint Company Secretaries**”) assist the chairman in preparing the agenda of regular Board meetings and circulate the draft Board meeting agenda to all Directors for their perusal and comment. Directors are invited to include any matters in the agenda which they think appropriate. The Board meeting agenda will be issued by the Joint Company Secretaries after incorporating all the comments of Directors (if any). Relevant meeting materials are provided to the Directors at least three days before the meetings to ensure that they are given sufficient review time and are adequately prepared for the meetings.

The minutes of the Board meetings and Board committees meetings are drafted and kept by the Joint Company Secretaries. All meeting minutes will set out in detail the matters discussed and considered at the meetings, including, among others, any queries made or views expressed by the Directors. The Joint Company Secretaries will distribute the draft meeting minutes to all Directors for their comment and final version of the meeting minutes to all Directors for their record within reasonable time after holding of the meetings.

Apart from regular Board meetings, the Chairman also held one meeting with the independent non-executive Directors without the presence of other Directors for the year ended 31 December 2020.

Corporate Governance Report

Chairman and Chief Executive Officer

The chairman and chief executive officer of the Company are held by Mr. Lin Wan-Yi who is the founder of the Company and has extensive experience in the industry.

The chairman provides leadership for the Board and ensures the effectiveness of the Board in fulfilling its roles and responsibilities and the establishment of sound corporate governance practices and procedures for the Company. The chairman is also responsible for formulating the overall strategies and policies of the Company and monitoring their implementation. Meanwhile, the chairman, acting as chief executive officer, shall be delegated the authority by the Board to lead the senior management of the Company for the daily operation and business management of the Group in accordance with the objectives, directions, and risk management and internal control policies laid down by the Board.

The Board believes that Mr. Lin Wan-Yi can provide the Company with strong and consistent leadership that allows for effective and efficient planning and implementation of business decisions and strategies/vesting the roles of chairman and chief executive officer in the same individual is beneficial to the business prospects and management.

Independent Non-executive Directors

Independent non-executive Directors play a significant role in the Board by virtue of their independent judgement and their views carry significant weight in the Board's decisions. They are experienced professionals in areas such as financial accounting and financial management. Their extensive experiences significantly contribute to enhancing the decision-making of the Board and achieving a sustainable and balanced development of the Group. In particular, they bring impartial views and opinions on issues of the Company's strategy, performance and control, and take the lead in solution where potential conflicts of interests arise. The Board believes that its culture of openness and debate facilitates the effective contribution of executive Directors, non-executive Director and independent non-executive Directors in particular, to the Board and ensures constructive relationship among executive Directors, non-executive Director and independent non-executive Directors.

During the year ended 31 December 2020, the Board has met the requirements of the Listing Rules relating to the appointment of at least three independent non-executive Directors, representing one-third of the Board, with at least one of whom possessing appropriate professional qualifications or accounting or related financial management expertise.

The Company has received written annual confirmation from each of the independent non-executive Directors in respect of his independence in accordance with the independence guidelines set out in Rule 3.13 of the Listing Rules. The Company is of the view that all independent non-executive Directors are independent.

Corporate Governance Report

Appointment and Re-election of Directors

The executive Directors and non-executive Director have entered into service agreements with the Company for a fixed term of three years commencing from the Listing subject to termination in certain circumstances as stipulated in the relevant service agreements or by not less than three months' (for executive Directors) and one month's (for non-executive Director) notice in writing sent by either party to the other. Each of the independent non-executive Directors has accepted his appointment with the Company with an initial term of three years commencing from the Listing subject to termination in certain circumstances as stipulated in the relevant letters of appointment.

The procedures and process of appointment, re-election and removal of Directors are set out in the Articles of Association and the nomination policy of the Company. The Nomination Committee is responsible for reviewing the Board composition, assessing the independence of independent non-executive Directors and making recommendations to the Board on the appointment or re-election of Directors and succession planning for Directors.

All Directors are subject to retirement by rotation and re-election at the annual general meetings. Under the Articles of Association of the Company, at each annual general meeting, one-third of the Directors for the time being, or if their number is not three of a multiple of three, the number nearest to but not less than one-third shall retire from office by rotation provided that every Director shall be subject to retirement by rotation at least once every three years. The Company's Articles of Association also provides that all Directors appointed to fill a casual vacancy shall be subject to election by Shareholders at the first general meeting after appointment. The retiring Directors shall be eligible for re-election.

Responsibilities, Accountabilities and Contributions of the Board and Management

The Board assumes responsibility for leadership and control of the Company; and is collectively responsible for directing and supervising the Company's affairs.

The Board leads and provides direction to management by laying down strategies and overseeing their implementation, monitors the Group's operational and financial performance, and ensures that sound internal control and risk management systems are in place.

All Directors have brought a wide spectrum of valuable business experience, knowledge and professionalism to the Board for its efficient and effective functioning. The independent non-executive Directors are responsible for ensuring a high standard of regulatory reporting of the Company and providing a balance in the Board for bringing effective independent judgement on corporate actions and operations.

All Directors have full and timely access to all the information of the Company and may, upon request, seek independent professional advice in appropriate circumstances for discharging their duties to the Company.

The Directors have disclosed to the Company details of other offices held by them.

Corporate Governance Report

The Board reserves for its decision all major matters relating to policy matters, strategies and budgets, internal control and risk management, material transactions (in particular those that may involve conflict of interests), financial information, appointment of directors and other significant operational matters of the Company. Responsibilities relating to implementing decisions of the Board, directing and co-ordinating the daily operation and management of the Company are delegated to the management.

Continuous Professional Development of Directors

Directors have kept abreast of regulatory developments and changes in order to effectively perform their responsibilities and to ensure that their contribution to the Board remains informed and relevant.

Every newly appointed Director has received a formal and comprehensive induction on the first occasion of his/her appointment to ensure appropriate understanding of the business and operations of the Company and full awareness of Director's responsibilities and obligations under the Listing Rules and relevant statutory requirements.

Directors have participated in appropriate continuous professional development to develop and refresh their knowledge and skills. During the year ended 31 December 2020, the Company organised training sessions conducted by the qualified professionals/legal advisers for all Directors. The Board has established four committees, namely, the Audit Committee, Remuneration Committee, Nomination Committee and Environmental, Social and Governance Committee (collectively, the “**Board Committees**”). All Board Committees are established with specific written terms of reference which deal clearly with their authority and duties. The terms of reference of Audit Committee, Remuneration Committee and Nomination Committee are posted on the Company’s website and the Hong Kong Stock Exchange’s website and are available to Shareholders upon request.

The list of the chairman and members of each Board committee is set out under “Corporate Information” on page 2.

Audit Committee

The Audit Committee consists of three independent non-executive Directors, namely Mr. So George Siu Ming, Mr. Lin Lien-Hsing and Mr. Fan Chi Chiu. Mr. So George Siu Ming is the chairman of the Audit Committee.

The terms of reference of the Audit Committee are of no less exacting terms than those set out in the CG Code.

The main duties of the Audit Committee are to (i) make recommendations to the Board on the appointment, re-appointment and dismissal of the external auditor; (ii) review the financial information of the Company; (iii) oversee the Company’s financial reporting system, risk management and internal control system and (iv) establish a whistleblowing policy and system for employees and those who deal with the Company or its subsidiaries to raise concerns.

For the year ended 31 December 2020, the Audit Committee held two meetings. A summary of work of the Audit Committee during the year is set out below:

- reviewed the annual financial results and report, interim financial results and reports and significant issues on the financial reporting;
- reviewed the operational and compliance controls, and the effectiveness of the risk management and internal control systems;
- monitored the external auditor’s independence and objectivity, and effectiveness of the audit process in accordance with applicable standard, and discussed with the independent auditor before the audit commenced, the nature and scope of the audit and the reporting obligation contained in them;
- provided recommendations to the Board for the proposal for re-appointment of the external auditor and approval of the remuneration and terms of engagement of the external auditor;
- established procedures for employees to raise concerns about possible improprieties.

The Audit Committee also met the external auditor twice without the presence of the executive Directors for the year ended 31 December 2020 to discuss matters relating to its audit fees, any issue arising from the audit and any other matters the auditor may wish to raise. The Board has not taken any different view from that of the Audit Committee regarding the re-appointment of the external auditor.

Corporate Governance Report

Board Diversity Policy

The Company has adopted a Board Diversity Policy which sets out the approach to achieve diversity of the Board. The Company recognises and embraces the benefits of having a diverse Board and sees increasing diversity at the Board level as an essential element in maintaining the Company's competitive advantage.

Pursuant to the Board Diversity Policy, the Nomination Committee will review annually the structure, size and composition of the Board and where appropriate, make recommendations on changes to the Board to complement the Company's corporate strategy and to ensure that the Board maintains a balanced diverse profile. In relation to reviewing and assessing the Board composition, the Nomination Committee of the Board is committed to diversity at all levels and will consider a number of aspects, including but not limited to knowledge, skills, professional experience, gender, age, cultural and educational background, ethnicity, length of service and any other factors that the Board may consider appropriate from time to time taking into account the Company's business model and specific needs.

The Company aims to maintain an appropriate balance of diversity perspectives that are relevant to the Company's business growth and is also committed to ensuring that recruitment and selection practices at all levels (from the Board downwards) are appropriately structured so that a diverse range of candidates are considered.

At present, the Nomination Committee considered that the Board is sufficiently diverse. The Nomination Committee will review the Board Diversity Policy, as appropriate, to ensure its effectiveness.

Director Nomination Policy

The Board has delegated its responsibilities and authority for selection and appointment of Directors to the Nomination Committee of the Board.

The Company has adopted a Director Nomination Policy which sets out the selection criteria and process and the Board succession planning considerations in relation to nomination and appointment of Directors and aims to ensure that the Board has a balance of skills, experience and diversity of perspectives appropriate to the Company and the continuity of the Board and appropriate leadership at Board level.

Corporate Governance Report

The Director Nomination Policy sets out the factors for assessing the suitability and the potential contribution to the Board of a proposed candidate, including but not limited to the following:

- whether the individual's educational background and qualification, skills and experience are relevant to the Company's business model and specific needs;
- the individual's character and reputation for integrity;
- whether the individual would be able to devote sufficient time to the Board;
- (in respect of appointment and re-appointment of independent non-executive Directors) independence of the individual with reference to the independence criteria set out in Rule 3.13 of the Listing Rules;
- how the individual would be able to contribute to the diversity of the Board with reference to the factors set out in the Board Diversity Policy of the Company from time to time in force; and
- Board succession planning considerations.

The Nomination Committee of the Board will review the Director Nomination Policy, as appropriate, to ensure its effectiveness.

Environmental, Social and Governance Committee

The Environmental, Social and Governance Committee consists of three members, namely Mr. Cheng Ching-Long, Mr. Fan Chi Chiu and Mr. Lu Jen-Chieh. Mr. Cheng Ching-Long is the chairman of the Environmental, Social and Governance Committee.

For the year ended to 31 December 2020, no meeting of the Environmental, Social and Governance Committee was held.

Corporate Governance Report

Corporate Governance Functions

The Board is responsible for performing the functions set out in the code provision D.3.1 of the CG Code.

During the year, the Board had reviewed the Company's corporate governance policies and practices, training and continuous professional development of directors and senior management, the Company's policies and practices on compliance with legal and regulatory requirements, the compliance of the Model Code and Written Employee Guidelines, and the Company's compliance with the CG Code and disclosure in this Corporate Governance Report.

RISK MANAGEMENT AND INTERNAL CONTROLS

The Board acknowledges its responsibility for the risk management and internal control systems and reviewing their effectiveness. Such systems are designed to manage rather than eliminate the risk of failure to achieve business objectives, and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Board has the overall responsibility for evaluating and determining the nature and extent of the risks it is willing to take in achieving the Company's strategic objectives, and establishing and maintaining appropriate and effective risk management and internal control systems.

The Audit Committee of the Board assists the Board in leading the management and overseeing their design, implementation and monitoring of the risk management and internal control systems.

The Company has developed and adopted various risk management procedures and guidelines with defined authority for implementation by key business processes and office functions, including project management, sales, financial reporting, human resources and information technology.

The Company's risk management and internal control systems have been developed with the following principles, features and processes:

The Board will cautiously review any material risk related to significant business decisions before making or approving such decisions.

Each department head and senior management of the Group monitor daily operations and any associated operational risks of the Group. They are also responsible for identifying and assessing potential market risks related to changes in macroeconomic environment and movements in market variables and report irregularities in connection with operational and market risks to the executive Directors for formulating policies to mitigate these risks.

The financial management center will closely monitor and track the ageing of trade receivables, and regularly update the status of outstanding/unpaid payments due to the Group to ensure that timely and necessary measures are taken to recover outstanding receivables.

Corporate Governance Report

The Internal Audit Department is responsible for performing independent review of the adequacy and effectiveness of the risk management and internal control systems. The Internal Audit Department examined key issues in relation to the accounting practices and all material controls and provided its findings and recommendations for improvement to the Audit Committee.

The Board, through the Audit Committee, has continuously monitored and annually reviewed the adequacy and effectiveness of the Group's risk management and internal control systems.

The Group has appointed Ballas Capital Limited as compliance adviser of the Company in compliance with the Listing Rules and appointed a PRC legal adviser to advise us on PRC laws and regulations related to the Group's business operations.

The management has confirmed to the Board and the Audit Committee on the effectiveness of the risk management and internal control systems for the year ended 31 December 2020.

The Board, as supported by the Audit Committee as well as the management report and the internal audit findings, reviewed the risk management and internal control systems, including the financial, operational and compliance controls and considered that such systems for the year ended 31 December 2020 are effective and adequate. The annual review also covered the financial reporting and internal audit function and staff qualifications, experiences and relevant resources.

Whistleblowing procedures are in place to facilitate employees of the Company to raise, in confidence, concerns about possible improprieties in financial reporting, internal control or other matters of the Company.

The Company has developed its disclosure policy which provides a general guide to the Company's Directors, senior management and relevant employees in handling confidential information, monitoring information disclosure and responding to enquiries. Control procedures have been implemented to ensure that unauthorised access and use of inside information are strictly prohibited.

DISCLOSURE OF INSIDE INFORMATION

The Group acknowledges its responsibilities under the SFO and the Listing Rules and the overriding principle that inside information should be announced immediately when it is the subject of a decision. The procedures and internal controls for the handling and dissemination of inside information are as follows:

- the Group conducts its affairs with close regard to the disclosure requirement under the Listing Rules as well as the "Guidelines on Disclosure of Inside Information" published by the Securities and Futures Commission of Hong Kong in June 2012;
- the Group has implemented and disclosed its policy on fair disclosure by pursuing broad, non-exclusive distribution of information to the public through channels such as financial reporting, public announcements and its website;

Corporate Governance Report

- the Group has strictly prohibited unauthorised use of confidential or inside information; and
- the Group has established and implemented procedures for responding to external enquiries about the Group's affairs, so that only the executive Directors, the Joint Company Secretaries and investor relations officers are authorised to communicate with parties outside the Group.

DIRECTORS' RESPONSIBILITY IN RESPECT OF THE FINANCIAL STATEMENTS

The Directors acknowledge their responsibility for preparing the consolidated financial statements of the Company for the year ended 31 December 2020.

The Directors are not aware of any material uncertainties relating to events or conditions that may cast significant doubt upon the Company's ability to continue as a going concern.

Policies relating to Shareholders

The Company has in place a Shareholders' Communication Policy to ensure that Shareholders' views and concerns are appropriately addressed. The policy is regularly reviewed to ensure its effectiveness.

Going forward, given the uncertainty of the business environment and to allow the Group to maintain flexibility in managing its financial resources for future business development, the Board has approved a revised dividend policy on 26 March 2021. Under the revised policy, the Company will not set any pre-determined dividend payout ratio and the Board has the sole discretion as to the declaration and payment of dividends. When proposing a dividend, the Company will take into account, among other things, the future operations and earnings, the business development, capital requirements and surplus, general financial conditions, contractual restrictions and such other factors as the Directors consider appropriate. There is no requirement or assurance that the Company will declare and pay any dividends. Any declaration and payment as well as the amount of dividends will be subject to the Articles of Association of the Company and the Cayman Companies Acts. Any declaration of final dividends will also require the approval of the Shareholders in general meeting. No dividend shall be declared or paid except out of distributable profit and lawfully available for distribution under the Cayman Companies Acts.

An analysis of the Group's performance during 2020 based on the financial key performance indicators is set out in the section headed "Five-Year Financial Summary" on pages 134 of this annual report.

Major Risks and Uncertainties

There are certain risks and uncertainties involved in the Group's operations, some of which are beyond the Directors' control. Save as disclosed in Note 34 to the Financial Statements of this annual report, the major risks and uncertainties the Group faces during the year are set out below:

- (i) the Group derives a significant portion of the revenue from its top five customers and any decrease or termination of the sales to any one of them may have a material adverse effect on the business and financial condition of the Group;
- (ii) the Group does not enter into long-term purchase contracts with its customers, and any disruption of the business relationships with its customers or fluctuations in their demand for the Group's products may have material adverse effect on the business, results of operations, financial condition and prospects of the Group;

Report of the Directors

- (iii) the financial performance may be affected by fluctuations in raw material prices, as the Group may not always be able to pass on the increase in raw material costs to its customers;
- (iv) the long examination period of the moulds by the Group's customers may affect the revenue recognition, cash flow position, and results of the operation, and may cause material fluctuation in the revenue in the future;
- (v) the Group is exposed to risks of obsolete and slow-moving inventory which may adversely impact the cash flow and liquidity;
- (vi) the Group is exposed to credit risk of its customers;
- (vii) any labour shortages, increased labour costs or other factors affecting labour supply for the production could adversely affect the business, financial condition, results of operations and prospects of the Group;
- (viii) if the Group is unable to adequately protect its proprietary technology and intellectual property rights, the business may be materially and adversely affected;
- (ix) if the Group fails to respond to technological changes in a timely manner, the Group may not be able to effectively compete with its competitors;
- (x) unsatisfactory performance of, or defects in, the Group's products may give rise to liability claim and additional expenses, damage to the reputation and decline in the sales of the Group;
- (xi) the Group may not be able to implement the business strategies and future plans successfully, which may have a material adverse effect on the profitability and prospects;
- (xii) there is no assurance that the Group will be able to continue to enjoy certain preferential enterprise income tax rates when the current preferential tax qualifications expire;
- (xiii) the Group's business, operation and group structure may be affected by changes to regulatory requirements in the PRC.

Report of the Directors

To properly manage these risks, the Group has established the following risk management structures and measures:

- the Board of Directors is responsible and has the general power to manage the direction of the Company, and is in charge of the overall risk control of the Group. Any significant business decision involving material risks, such as decisions to expand into new businesses or geographic regions or construction of facilities are reviewed, analysed and approved by the Board of Directors to ensure a thorough examination of the associated risks at the Group's highest corporate governance body; and
- the Group maintains insurance coverage which is believed to be in line with the customary practice in the PRC moulding industry.

The above is not an exhaustive list. For further details of risk management and internal control of the Group, please refer to the section headed "Risk Management and Internal Control" on pages 32 to 33 in this annual report. Investors are advised to make their own judgment or consult their own investment advisors before making any investment in the Shares.

ENVIRONMENTAL, HEALTH AND SAFETY AND COMPLIANCE WITH LAWS AND REGULATIONS

The Group's business is subject to certain health, work safety, social and environmental laws and regulations in the PRC. Ms. Shen, one of the Joint Company Secretaries, is responsible for monitoring compliance with legal and regulatory requirements and the internal standards in respect of such matters. The Group believes that sustainable development is crucial to the development of a corporate and actively implements the concept of sustainable development at every level of the operation so as to create a better future for the community and the corporate. So far as the Board and the Company's management are aware of, the Group is in compliance with the relevant laws and regulations that have a significant impact on the Group's businesses and operations in all material aspects. There was no material violation of or non-compliance with applicable laws and regulations by the Group during the year.

Report of the Directors

RELATIONSHIP WITH KEY STAKEHOLDERS

Employees

The Group believes that employees are valuable assets. Training and retaining good employees are always at top priorities. Besides on-the-job trainings and funding for continuous learning, the Group provides a competitive remuneration package to attract and motivate employees. The Group regularly reviews the remuneration package of employees and makes necessary adjustments to conform to the market standard. The Group is also passionately committed to developing staff and provides employees with rewarding career paths and a friendly working environment.

Customers

Keeping strong relationship with the customers is critical to maintain the competitiveness of the Group. The Group enhances the relationship by continuous interaction with customers to gain insight on the changing market demand for the Group's products and services so that the Group can respond proactively. The Group has also established procedures in place for handling customers' complaints to ensure customers' complaints are dealt with in a prompt and timely manner. In addition, the Group engages in market research and business development activities by attending product exhibitions and industry conferences from time to time to exploring market trends and discovering business opportunities with potential customers.

Suppliers

The Group maintains a list of approved suppliers and sub-contractors which are selected based on a number of factors including their product quality, price and ability to accommodate the production schedule. Some of the customers may require the Group to purchase particular raw materials that are only supplied by particular suppliers. In procuring raw materials, the Group usually obtains quotations from three approved suppliers and makes the decision on suppliers according to their product quality, price, delivery time, reputation and the customers' specifications. To ensure quality and timely delivery, the Group reinforces business partnerships with suppliers and sub-contractors by ongoing communication in a proactive and effective manner.

FINAL DIVIDEND AND AMENDMENT OF DIVIDEND POLICY

As disclosed in the Prospectus, the Group planned to maintain a dividend payout ratio of not less than 40% of the consolidated profit attributable to owners of the Company subject to, among other things, the Group's operations and earnings, business development, capital requirements and surplus, general financial conditions, contractual restrictions and such other factors as the Directors consider appropriate.

In 2020, due to the global outbreak of COVID-19, business and economic activities in the PRC and other countries have been affected. As a result of this negative impact, the Group's revenue and net profit (before listing expenses) decreased by approximately 11.6% and 26.1% for FY2020, respectively. Given the uncertainty of the development of COVID-19 and economic conditions, in order to maintain a stable financial condition, increase working capital reserves to tackle any unpredicted events, and maintain the competitiveness of the Group, the Board recommends the payment of final dividend (the "**Final Dividend**") of HK0.371 cents (equivalent to RMB0.309 cents) per share totalling approximately HK\$2.4 million (equivalent to approximately RMB2.0 million) for the year ended 31 December 2020 which is less than the planned dividend payout ratio of 40% as disclosed in the Prospectus. The proposed Final Dividend is subject to the approval of the Shareholders at the 2020 AGM to be held on Friday, 28 May 2021 and is expected to be payable by cash on Friday, 16 July 2021.

Report of the Directors

Going forward, given the uncertainty of the business environment and to allow the Group to maintain flexibility in managing its financial resources for future business development, the Board has approved a revised dividend policy on 26 March 2021. Under the revised policy, the Company will not set any pre-determined dividend payout ratio and the Board has the sole discretion as to the declaration and payment of dividends. When proposing a dividend, the Company will take into account, among other things, the future operations and earnings, the business development, capital requirements and surplus, general financial conditions, contractual restrictions and such other factors as the Directors consider appropriate. There is no requirement or assurance that the Company will declare and pay any dividends. Any declaration and payment as well as the amount of dividends will be subject to the Articles of Association of the Company and the Cayman Companies Acts. Any declaration of final dividends will also require the approval of the Shareholders in general meeting. No dividend shall be declared or paid except out of distributable profit and lawfully available for distribution under the Cayman Companies Acts.

Report of the Directors

SHARE OPTION SCHEME

The Company has conditionally adopted the share option scheme on 6 June 2019 (the “**Share Option Scheme**”). The following is a summary of the principal terms of the Share Option Scheme:

(i) Purpose of the scheme

The purpose of the Share Option Scheme is to enable the Group to grant options to selected participants as incentives or rewards for their contribution to the Group.

(ii) Who may join

- (a) any employee of the Company, any of the subsidiaries or any entity (“**Invested Entity**”) in which any member of the Group holds an equity interest;
- (b) any non-executive directors (including independent non-executive directors) of the Company, any of the subsidiaries or any Invested Entity;
- (c) any supplier of goods or services to any member of the Group or any Invested Entity;
- (d) any customer of any member of the Group or any Invested Entity;
- (e) any person or entity that provides research, development or other technological support to any member of the Group or any Invested Entity;
- (f) any shareholder of any member of the Group or any Invested Entity or any holder of any securities issued by any member of the Group or any Invested Entity;
- (g) any adviser (professional or otherwise) or consultant to any area of business or business development of any member of the Group or any Invested Entity;
- (h) any other group or classes of participants who have contributed or may contribute by way of joint venture, business alliance or other business arrangement to the development and growth of the Group.

(iii) Maximum number of the Shares

- (a) The maximum number of Shares which may be issued upon the exercise of all outstanding options granted and yet to be exercised under the Share Option Scheme and any other share option scheme adopted by the Group must not in aggregate exceed 30% of the share capital of the Company in issue from time to time;
- (b) The total number of the Shares which may be allotted and issued upon the exercise of all options (excluding, for this purpose, options which have lapsed in accordance with the terms of the Share Option Scheme and any other share option scheme of the Group) to be granted under the Share Option Scheme and any other share option scheme of the Group must not in aggregate exceed 10% of the Shares in issue (i.e. not exceeding 66,000,000 Shares) on the date of the Listing.

Report of the Directors

(iv) Maximum entitlement of each participant

The total number of Shares issued and which may fall to be issued upon the exercise of the options granted under the Share Option Scheme and any other share option scheme of the Group (including both exercised or outstanding options) to each grantee in any 12-month period shall not exceed 1% of the number of Shares in issue for the time being.

(v) Grant of options to the Directors, chief executive or Substantial Shareholders of the Company or their respective associates

Any grant of options under the Share Option Scheme to a Director, chief executive or Substantial Shareholder of the Company or any of their respective associates must be approved by independent non-executive Directors (excluding the independent non-executive Director who or whose associates is the proposed grantee of the options).

Any change in the terms of options granted to a substantial shareholder or an independent non-executive Director of the Company or any of their respective associates must be approved by the Shareholders in general meeting. The grantee, his associates and all core connected persons of the Company must abstain from voting in favour at such general meeting.

(vi) Time of acceptance and exercise of option

An option may be accepted by a participant within 21 days from the date of the offer of grant of the option. An option may be exercised in accordance with the terms of the Share Option Scheme at any time during a period to be determined and notified by the Directors to each grantee, which period may commence from the date of the offer for the grant of options is made, but shall end in any event not later than 10 years from the date of grant of the option subject to the provisions for early termination thereof. Unless otherwise determined by the Directors and stated in the offer for the grant of options to a grantee, there is no minimum period required under the Share Option Scheme for the holding of an option before it can be exercised.

(vii) Performance targets

Unless the Directors otherwise determined and stated in the offer for the grant of options to a grantee, a grantee is not required to achieve any performance targets before any options granted under the Share Option Scheme can be exercised.

(viii) Subscription price for the Shares and consideration for the option

The subscription price for the Shares under the Share Option Scheme shall be a price determined by the Directors, but shall not be less than the highest of (i) the closing price of the Shares as stated in the Hong Kong Stock Exchange's daily quotations sheet for trade in one or more board lots of the Shares on the date of the offer for the grant, which must be a business day; (ii) the average closing price of Shares as stated in the Hong Kong Stock Exchange's daily quotations for the five business days immediately preceding the date of the offer for the grant; and (iii) the nominal value of a Share. A nominal consideration of HK\$1 is payable on acceptance of the grant of an option.

Report of the Directors

(ix) Period of the Share Option Scheme

The Share Option Scheme will remain in force for a period of 10 years commencing on the date on which the Share Option Scheme is adopted.

During FY2020, no share options have been granted, exercised or cancelled by the Company under the Share Option Scheme.

To the shareholders of
Shinelong Automotive Lightweight Application Limited
(Incorporated in the Cayman Islands with limited liability)

OPINION

We have audited the consolidated financial statements of Shinelong Automotive Lightweight Application Limited (the “**Company**”) and its subsidiaries (the “**Group**”) set out on pages 58 to 133, which comprise the consolidated statement of financial position of the Group as at 31 December 2020, and the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 31 December 2020, and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (“**IFRSs**”) issued by the International Accounting Standards Board (“**IASB**”) and have been properly prepared in compliance with the disclosure requirements of the Hong Kong Companies Ordinance.

BASIS FOR OPINION

We conducted our audit in accordance with Hong Kong Standards on Auditing (“**HKSAs**”) issued by the Hong Kong Institute of Certified Public Accountants (“**HKICPA**”). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report. We are independent of the Group in accordance with the HKICPA's *Code of Ethics for Professional Accountants* (the “**Code**”), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For the matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Independent Auditor's Report *(Continued)*

Key audit matter	How our audit addressed the key audit matter
<i>Revenue recognition of sales of moulds</i>	
<p>For the year ended 31 December 2020, revenue from sales of moulds amounted to approximately RMB188,035,000 and accounted for 92% of the total revenue of the Group. The Group produces moulds that are highly customised for particular customers with no alternative use to others and the moulds preliminarily accepted by the customers are subject to examination and testing before final acceptance, which creates complexity in determining the timing of satisfaction of performance obligations.</p>	<p>The following procedures were performed, among others, to address the identified key audit matter:</p>
<p>This matter is identified as a key audit matter as the determination of the timing of satisfaction of performance obligations requires judgement, which may have crucial impacts on the consolidated financial statements of the Group.</p>	<ul style="list-style-type: none">• We evaluated the design, implementation, and operating effectiveness of the key internal controls over the revenue recognition of sales of moulds;• We discussed with management and, on a sample basis, obtained and reviewed major revenue contracts effective during the year ended 31 December 2020 and assessed whether the Group's accounting policy adopted to recognise revenue from sales of moulds was in accordance with IFRS 15 "Revenue from Contracts with Customers";• We inspected, on a sample basis, the supporting documents (including, but not limited to, contracts, acceptance reports, shipment documents and invoices) for sales of moulds recognised during the year ended 31 December 2020 and assessed whether the related revenue had been recognised in accordance with the Group's revenue recognition accounting policy; and• We inspected the supporting documents (including, but not limited to, contracts, acceptance reports, shipment documents and invoices) for sales of moulds recognised during a certain period of time before and after 31 December 2020 and assessed whether the related revenue had been recognised in the correct periods.
<p>The Group's disclosures about revenue recognition of sales of moulds are included in notes 2.4, 3 and 4 to the consolidated financial statements.</p>

OTHER INFORMATION INCLUDED IN THE ANNUAL REPORT

The directors of the Company are responsible for the other information. The other information comprises the information included in the Annual Report, other than the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

RESPONSIBILITIES OF THE DIRECTORS FOR THE CONSOLIDATED FINANCIAL STATEMENTS

The directors of the Company are responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with IFRSs issued by the IASB and the disclosure requirements of the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the directors of the Company are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors of the Company either intend to liquidate the Group or to cease operations or have no realistic alternative but to do so.

The directors of the Company are assisted by the Audit Committee in discharging their responsibilities for overseeing the Group's financial reporting process.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Our report is made solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

Independent Auditor's Report *(Continued)*

As part of an audit in accordance with HKSA's, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Independent Auditor's Report *(Continued)*

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Lawrence K.W. Lau.

2.1 BASIS OF PREPARATION

These financial statements have been prepared in accordance with International Financial Reporting Standards (“**IFRSs**”), which comprise all standards and interpretations approved by the International Accounting Standards Board (the “**IASB**”), and the disclosure requirements of the Hong Kong Companies Ordinance. These financial statements have been prepared under the historical cost convention, except for notes receivable measured at fair value through other comprehensive income. These financial statements are presented in Renminbi (“**RMB**”) and all values are rounded to the nearest thousand except when otherwise indicated.

Basis of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries now comprising the Group for the year ended 31 December 2020. A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by the Company. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over investee (i.e., existing rights that give the Group the current ability to direct the relevant activities of the investee).

When the Company has, directly or indirectly, less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (a) the contractual arrangement with the other vote holders of the investee;
- (b) rights arising from other contractual arrangements; and
- (c) the Group’s voting rights and potential voting rights.

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. The results of subsidiaries are consolidated from the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases.

Profit or loss and each component of other comprehensive income are attributed to the owners of the parent of the Group. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control described above. A change in ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises (i) the assets and liabilities of the subsidiary, (ii) the carrying amount of any non-controlling interest and (iii) the cumulative translation differences recorded in equity; and recognises (i) the fair value of the consideration received; (ii) the fair value of any investment retained and (iii) any resulting surplus or deficit in profit or loss. The Group’s share of components previously recognised in other comprehensive income is reclassified to profit or loss or retained profits, as appropriate, on the same basis as would be required if the Group had directly disposed of the related assets or liabilities.

31 December 2020

2.2 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

The Group has adopted the *Conceptual Framework for Financial Reporting 2018* and the following revised IFRSs for the first time for the current year's financial statements.

Amendments to IFRS 3	<i>Definition of a Business</i>
Amendments to IFRS 9, IAS 39 and IFRS 7	<i>Interest Rate Benchmark Reform</i>
Amendment to IFRS 16	<i>COVID-19-Related Rent Concessions</i> (early adopted)
Amendments to IAS 1 and IAS 8	<i>Definition of Material</i>

The nature and the impact of the *Conceptual Framework for Financial Reporting 2018* are described below:

Conceptual Framework for Financial Reporting 2018 (the "**Conceptual Framework**") sets out a comprehensive set of concepts for financial reporting and standard setting, and provides guidance for preparers of financial statements in developing consistent accounting policies and assistance to all parties to understand and interpret the standards. The Conceptual Framework includes new chapters on measurement and reporting financial performance, new guidance on the derecognition of assets and liabilities, and updated definitions and recognition criteria for assets and liabilities. It also clarifies the roles of stewardship, prudence and measurement uncertainty in financial reporting. The Conceptual Framework is not a standard, and none of the concepts contained therein override the concepts or requirements in any standard. The Conceptual Framework did not have any significant impact on the financial position and performance of the Group.

Other than as explained below regarding the impact of Amendment to IFRS 16 *COVID-19-Related Rent Concessions*, the revised standards are not relevant to the preparation of the Group's financial statements. The nature and impact of Amendment to IFRS 16 *COVID-19-Related Rent Concessions* are described below:

Amendment to IFRS 16 provides a practical expedient for lessees to elect not to apply lease modification accounting for rent concessions arising as a direct consequence of the COVID-19 pandemic. The practical expedient applies only to rent concessions occurring as a direct consequence of the pandemic and only if (i) the change in lease payments results in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change; (ii) any reduction in lease payments affects only payments originally due on or before 30 June 2021; and (iii) there is no substantive change to other terms and conditions of the lease. The amendment is effective for annual periods beginning on or after 1 June 2020 with earlier application permitted and shall be applied retrospectively.

During the year ended 31 December 2020, certain monthly lease payments for the leases of the Group's factories and venues have been reduced or waived by the lessors as a result of the pandemic and there are no other changes to the terms of the leases. The Group has early adopted the amendment on 1 January 2020 and elected not to apply lease modification accounting for all rent concessions granted by the lessors as a result of the pandemic during the year ended 31 December 2020. Accordingly, a reduction in the lease payments arising from the rent concessions of RMB67,000 has been accounted for as a variable lease payment by derecognising part of the lease liabilities and crediting to profit or loss for the year ended 31 December 2020.

2.3 ISSUED BUT NOT YET EFFECTIVE INTERNATIONAL FINANCIAL REPORTING STANDARDS

The Group has not applied the following new and revised IFRSs, that have been issued but are not yet effective, in these financial statements.

Amendments to IFRS 3	<i>Reference to the Conceptual Framework²</i>
Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16	<i>Interest Rate Benchmark Reform — Phase 2¹</i>
Amendments to IFRS 10 and IAS 28	<i>Sale or Contribution of Assets between an Investor and its Associate or Joint Venture⁴</i>
IFRS 17	<i>Insurance Contracts³</i>
Amendments to IFRS 17	<i>Insurance Contracts^{3,5}</i>
Amendments to IAS 1	<i>Classification of Liabilities as Current or Non-current³</i>
Amendments to IAS 1	<i>Disclosures of Accounting Policies³</i>
Amendments to IAS 8	<i>Definition of Accounting Estimates³</i>
Amendments to IAS 16	<i>Property, Plant and Equipment: Proceeds before Intended Use²</i>
Amendments to IAS 37	<i>Onerous Contracts — Cost of Fulfilling a Contract²</i>
<i>Annual Improvements to IFRSs 2018–2020</i>	<i>Amendments to IFRS 1, IFRS 9, Illustrative Examples accompanying IFRS 16, and IAS 41²</i>

¹ Effective for annual periods beginning on or after 1 January 2021

² Effective for annual periods beginning on or after 1 January 2022

³ Effective for annual periods beginning on or after 1 January 2023

⁴ No mandatory effective date yet determined but available for adoption

⁵ As a consequence of the amendments to IFRS 17 issued in June 2020, IFRS 4 was amended to extend the temporary exemption that permits insurers to apply IAS 39 rather than IFRS 9 for annual periods beginning before 1 January 2023.

While the adoption of some of the new and revised IFRSs may result in changes in accounting policies, none of these IFRSs is expected to have a significant impact on the Group's results of operations and financial position.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Fair value measurement

The Group measures its notes receivable at fair value through other comprehensive income at the end of each reporting period. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — based on quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 — based on valuation techniques for which the lowest level input that is significant to the fair value measurement is observable, either directly or indirectly
- Level 3 — based on valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by reassessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Impairment of non-financial assets

Where an indication of impairment exists, or when annual impairment testing for an asset is required (other than inventories, deferred tax assets and financial assets), the asset's recoverable amount is estimated. An asset's recoverable amount is the higher of the asset's or cash-generating unit's value in use and its fair value less costs of disposal, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the cash-generating unit to which the asset belongs.

An impairment loss is recognised only if the carrying amount of an asset exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is charged to profit or loss in the period in which it arises in those expense categories consistent with the function of the impaired asset.

An assessment is made at the end of each reporting period as to whether there is an indication that previously recognised impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognised impairment loss of an asset other than goodwill is reversed only if there has been a change in the estimates used to determine the recoverable amount of that asset, but not to an amount higher than the carrying amount that would have been determined (net of any depreciation/amortization) had no impairment loss been recognised for the asset in prior years. A reversal of such an impairment loss is credited to profit or loss in the period in which it arises.

 - (vi) the entity is controlled or jointly controlled by a person identified in (a);
 - (vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); and
 - (viii) the entity, or any member of a group of which it is a part, provides key management personnel services to the Group or to the parent of the Group.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Property, plant and equipment and depreciation

Property, plant and equipment, other than construction in progress, are stated at cost less accumulated depreciation and any impairment losses. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to profit or loss in the period in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure for a major inspection is capitalised in the carrying amount of the asset as a replacement. Where significant parts of property, plant and equipment are required to be replaced at intervals, the Group recognises such parts as individual assets with specific useful lives and depreciates them accordingly.

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful life. The principal annual rates used for this purpose are as follows:

Type	Depreciation rate
Buildings	4.50%
Machinery	9.00%
Furniture, fixtures and equipment	18.00%
Leasehold improvements	Over the shorter of the lease terms and 20.00%
Motor vehicles	18.00%

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately. Residual values, useful lives and the depreciation method are reviewed, and adjusted if appropriate, at least at each financial year end.

An item of property, plant and equipment including any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on disposal or retirement recognised in profit or loss in the year the asset is derecognised is the difference between the net sales proceeds and the carrying amount of the relevant asset.

Construction in progress represents property, plant and equipment under construction, which is stated at cost less any impairment losses, and is not depreciated. Cost comprises the direct costs of construction and capitalised borrowing costs on related borrowed funds during the period of construction. Construction in progress is reclassified to the appropriate category of property, plant and equipment when completed and ready for use.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses.

The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are subsequently amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at each financial year end.

Intangible assets of the Group represent software which is amortised over an estimated useful life of 5 years.

Research and development costs

All research costs are charged to profit or loss as incurred.

Expenditure incurred on projects to develop new products is capitalised and deferred only when the Group can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of resources to complete the project and the ability to measure reliably the expenditure during the development. Expenditure which does not meet these criteria is expensed when incurred.

Deferred development costs are stated at cost less any impairment losses and are amortised using the straight-line basis over the commercial lives of the underlying products not exceeding four years, commencing from the date when the products are put into commercial production.

Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Notes to the Financial Statements *(Continued)*

31 December 2020

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Leases *(Continued)*

Group as a lessee *(Continued)*

(a) Right-of-use assets

Right-of-use assets are recognised at the commencement date of the lease (that is the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and any impairment losses, and adjusted for any remeasurement of lease liabilities incurred, and lease payments made at or before the commencement date less any lease incentives received. Unless the Group is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognised right-of-use assets are depreciated on a straight-line basis over the shorter of the estimated useful life and the lease term.

Factories and venues	2 to 10 years
Parking lots	10 years
Leasehold land	50 years
Vehicle	3 years

(b) Lease liabilities

Lease liabilities are recognised at the commencement date of the lease at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for termination of a lease, if the lease term reflects the Group exercising the option to terminate the lease. The variable lease payments that do not depend on an index or a rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in future lease payments arising from change in an index or rate, a change in the lease term, a change in the in-substance fixed lease payments or a change in assessment to purchase the underlying asset.

The Group's lease liabilities are presented separately in the statement of financial position.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Leases *(Continued)*

Group as a lessee *(Continued)*

(c) Lease modifications

The Group accounts for a lease modification as a separate lease if:

- (i) the modification increases the scope of the lease by adding the right to use one or more underlying assets; and
- (ii) the consideration for the leases increases by an amount commensurate with the stand-alone price for the increase in scope and any appropriate adjustments to that stand-alone price to reflect the circumstances of the particular contract.

For a lease modification that is not accounted for as a separate lease, the Group remeasures the lease liability based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

(d) Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (that is those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the recognition exemption for leases of low-value assets to leases of office equipment and laptop computers that are considered to be of low value. When the Group enters into a lease in respect of a low-value asset, the Group decides whether to capitalise the lease on a lease-by-lease basis. Lease payments on short-term leases and leases of low-value assets are recognised as an expense on a straight-line basis over the lease term.

Group as a lessor

When the Group acts as a lessor, it classifies at lease inception (or when there is a lease modification) each of its leases as either an operating lease or a finance lease.

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. When a contract contains lease and non-lease components, the Group allocates the consideration in the contract to each component on a relative stand-alone selling price basis. Rental income is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss and other comprehensive income due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Leases *(Continued)*

Group as a lessor *(Continued)*

Leases that transfer substantially all the risks and rewards incidental to ownership of an underlying asset to the lessee are accounted for as finance leases. At the commencement date, the cost of the leased asset is capitalised at the present value of the lease payments and related payments (including the initial direct costs) and presented as a receivable at an amount equal to the net investment in the lease. The finance income on the net investment in the lease is recognised in the statement of profit or loss so as to provide a constant periodic rate of return over the lease terms.

When the Group is an intermediate lessor, a sublease is classified as a finance lease or operating lease with reference to the right-of-use asset arising from the head lease. If the head lease is a short-term lease to which the Group applies the on-balance sheet recognition exemption, the Group classifies the sublease as an operating lease.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Investments and other financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost and fair value through other comprehensive income.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient of not adjusting the effect of a significant financing component, the Group initially measures a financial asset at its fair value, plus in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under IFRS 15. Refer to the accounting policies for revenue recognition.

In order for a financial asset to be classified and measured at amortised cost or fair value through other comprehensive income, it needs to give rise to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows, while financial assets classified and measured at fair value through other comprehensive income are held within a business model with the objective of both holding to collect contractual cash flows and selling. Financial assets which are not held within the aforementioned business models are classified and measured at fair value through profit or loss.

All regular way purchases and sales of financial assets are recognised on the trade date, that is, the date that the Group commits to purchase or sell the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Investments and other financial assets *(Continued)*

Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Financial assets at amortised cost (debt instruments)

Financial assets at amortised cost are subsequently measured using the effective interest (“**EIR**”) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

Financial assets at fair value through other comprehensive income (debt instruments)

For debt investments at fair value through other comprehensive income, interest income, foreign exchange revaluation and impairment losses or reversals are recognised in profit or loss and computed in the same manner as for financial assets measured at amortised cost. The remaining fair value changes are recognised in other comprehensive income. Upon derecognition, the cumulative fair value change recognised in other comprehensive income is recycled to profit or loss.

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group’s consolidated statement of financial position) when:

- the rights to receive cash flows from the asset have expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a “pass-through” arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Impairment of financial assets

The Group recognises an allowance for expected credit losses (“**ECLs**”) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

General approach

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

At each reporting date, the Group assesses whether the credit risk on a financial instrument has increased significantly since initial recognition. When making the assessment, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information that is available without undue cost or effort, including historical and forward-looking information.

For debt investments at fair value through other comprehensive income, the Group applies the low credit risk simplification. At each reporting date, the Group evaluates whether the debt investments are considered to have low credit risk using all reasonable and supportable information that is available without undue cost or effort. In making that evaluation, the Group reassesses the external credit ratings of the debt investments. In addition, the Group considers that there has been a significant increase in credit risk when contractual payments are more than 180 days past due.

The Group considers a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Impairment of financial assets *(Continued)*

General approach *(Continued)*

Debt investments at fair value through other comprehensive income and financial assets at amortised cost are subject to impairment under the general approach and they are classified within the following stages for measurement of ECLs except for trade receivables which apply the simplified approach as detailed below.

- Stage 1 — Financial instruments for which credit risk has not increased significantly since initial recognition and for which the loss allowance is measured at an amount equal to 12-month ECLs
- Stage 2 — Financial instruments for which credit risk has increased significantly since initial recognition but that are not credit-impaired financial assets and for which the loss allowance is measured at an amount equal to lifetime ECLs
- Stage 3 — Financial assets that are credit-impaired at the reporting date (but that are not purchased or originated credit-impaired) and for which the loss allowance is measured at an amount equal to lifetime ECLs

Financial liabilities

Initial recognition and measurement

The Group's financial liabilities include trade and notes payables, financial liabilities included in other payables and accruals and lease liabilities. The Group's financial liabilities are classified, at initial recognition, as loans and borrowings and payables.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Subsequent measurement

After initial recognition, trade and notes payables, financial liabilities included in other payables and accruals and lease liabilities, are subsequently measured at amortised cost using EIR method, unless the effect of discounting would be immaterial, in which case they are stated at cost. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortization process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of EIR. The EIR amortization is included as finance costs in the consolidated statement of profit or loss and other comprehensive income.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Financial liabilities *(Continued)*

Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in profit or loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

Inventories

Inventories are stated at the lower of cost and net realizable value. Cost is determined on a weighted average basis and, in the case of work in progress and finished goods, comprises direct materials, direct labor and an appropriate proportion of overheads. Net realizable value is based on estimated selling prices less estimated costs to be incurred to completion and disposal.

Cash and cash equivalents

For the purpose of the consolidated statements of cash flows, cash and cash equivalents comprise cash on hand and demand deposits, and short term highly liquid investments that are readily convertible into known amounts of cash, are subject to an insignificant risk of changes in value, and have a short maturity of generally within three months when acquired, less bank overdrafts which are repayable on demand and form an integral part of the Group's cash management.

For the purpose of the consolidated statements of financial position, cash and cash equivalents comprise cash on hand and at banks, including term deposits, and assets similar in nature to cash, which are not restricted as to use.

Notes to the Financial Statements *(Continued)*

31 December 2020

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Provisions

A provision is recognised when a present obligation (legal or constructive) has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation.

When the effect of discounting is material, the amount recognised for a provision is the present value at the end of the reporting period of the future expenditures expected to be required to settle the obligation. The increase in the discounted present value amount arising from the passage of time is included in finance costs in the consolidated statement of profit or loss and other comprehensive income.

The Group provides for warranty in relation to the sale of moulds to certain customers for general repairs of defects occurring during the warranty period. Provisions for the assurance-type warranty granted by the Group are recognised based on expected warranty work to be performed for goods under the warranty period and labor changes expected to be incurred. Initial recognition is based on historical experience. The initial estimate of warranty-related costs is revised annually.

Income tax

Income tax comprises current and deferred tax. Income tax relating to items recognised outside profit or loss is recognised outside profit or loss, either in other comprehensive income or directly in equity.

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period, taking into consideration interpretations and practices prevailing in the countries in which the Group operates.

Deferred tax is provided, using the liability method, on all temporary differences at the end of the reporting period between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- (a) When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- (b) In respect of taxable temporary differences associated with investments in subsidiaries, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Notes to the Financial Statements *(Continued)*

31 December 2020

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Income tax *(Continued)*

Deferred tax assets are recognised for all deductible temporary differences, and the carryforward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward of unused tax credits and unused tax losses can be utilised, except:

- (a) When the deferred tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- (b) In respect of deductible temporary differences associated with investments in subsidiaries, deferred tax assets are only recognised to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at the end of each reporting period and are recognised to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of each year.

Deferred tax assets and deferred tax liabilities are offset if and only if the Group has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Government grants

Government grants are recognised at their fair value where there is reasonable assurance that the grant will be received, and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the costs, for which it is intended to compensate, are expensed.

Where the grant relates to an asset, the fair value is credited to a deferred income account and is released to profit or loss over the expected useful life of the relevant asset by equal annual instalments.

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of goods or services is transferred to the customers at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services.

When the consideration in a contract includes a variable amount, the amount of consideration is estimated to which the Group will be entitled in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

When the contract contains a financing component which provides the customer with a significant benefit of financing the transfer of goods or services to the customer for more than one year, revenue is measured at the present value of the amount receivable, discounted using the discount rate that would be reflected in a separate financing transaction between the Group and the customer at contract inception. When the contract contains a financing component which provides the Group with a significant financial benefit for more than one year, revenue recognised under the contract includes the interest expense accreted on the contract liability under the effective interest method. For a contract where the period between the payment by the customer and the transfer of the promised goods or services is one year or less, the transaction price is not adjusted for the effects of a significant financing component, using the practical expedient in IFRS 15.

(a) Sale of industrial products

Revenue from the sale of moulds is recognised at the point in time when control of the asset is transferred to the customer, generally when the customers have issued the final acceptance report.

(b) Rendering of services

The Group provides parts processing services, the control of which is transferred at the point in time when the processed parts are accepted by the customers.

(c) Interest income

Interest income is recognised on an accrual basis using the effective interest method by applying the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, when appropriate, to the net carrying amount of the financial asset.

Notes to the Financial Statements *(Continued)*

31 December 2020

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Contract liabilities

A contract liability is recognised when a payment is received or a payment is due (whichever is earlier) from a customer before the Group transfers the related goods or services. Contract liabilities are recognised as revenue when the Group performs under the contract (i.e. transfers control of the related goods or services to the customer).

Employee benefits

Defined contribution plans

The employees of the Group's subsidiaries which operate in Mainland China are required to participate in a central pension scheme operated by the local municipal government. These subsidiaries are required to contribute a certain percentage of their payroll costs to the central pension scheme. The contributions are charged to profit or loss as they become payable in accordance with the rules of the central pension scheme. Under the plans, the Group has no further obligation beyond the contributions made. No forfeited contributions may be used by the employer to reduce the existing level of contributions.

Employee leave entitlements

Employee entitlements to annual leave are recognised as a liability when they accrue to the employees. The estimated liability for leave is recognised for services rendered by employees up to the end of each year.

Borrowing costs

All borrowing costs of the Group are expensed in the period in which they are incurred.

Dividends

Final dividends are recognised as a liability when they are approved by the shareholders in a general meeting. Proposed final dividends are disclosed in note 11 to the financial statements.

Foreign currencies

These financial statements are presented in RMB, which is different from the Company's functional currency, the Hong Kong dollar ("HK\$"). As the major revenues and assets of the Group are derived from operations in the PRC, RMB is chosen as the presentation currency to present the financial statements. Each entity in the Group determines its own functional currency and items included in the consolidated financial statements of each entity are measured using that functional currency.

Notes to the Financial Statements *(Continued)*

31 December 2020

2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Foreign currencies *(Continued)*

Foreign currency transactions recorded by the entities in the Group are initially recorded using their respective functional currency rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rates of exchange ruling at the end of the reporting period. Differences arising on settlement or translation of monetary items are recognised in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured. The gains or losses arising on translation of a non-monetary item measured at fair value is treated in line with the recognition of the gains or losses on change in fair value of the item (i.e., translation difference on the item whose fair value gains or losses is recognised in other comprehensive income or profit or loss is also recognised in other comprehensive income or profit or loss, respectively).

In determining the exchange rate on initial recognition of the related asset, expense or income on the derecognition of a non-monetary asset or non-monetary liability relating to an advance consideration, the date of initial transaction is the date on which the Group initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, the Group determines the transaction date for each payment or receipt of the advance consideration.

As at the end of the reporting period, for entities whose functional currencies are different from the Group's presentation currency, the assets and liabilities of these entities are translated into RMB at the exchange rates prevailing at the end of the reporting period and their statements of profit or loss are translated into RMB at the average exchange rates for the year. The resulting exchange differences are recognised in other comprehensive income and accumulated in the exchange reserve. On disposal of these entities, the component of other comprehensive income relating to that particular entity is recognised in profit or loss.

3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES

The preparation of the Group's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and their accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect on the amounts to be recognised in the financial statements:

Revenue recognition — the timing of satisfaction of performance obligations

Sales of moulds

Revenue from domestic sales of moulds is recognised at the point in time when control over the moulds is transferred to the customers. Judgement is required to assess whether control is transferred over time or at a point in time. The Group creates moulds that are highly customised for particular customers with no alternative use to others but has no enforceable right to payment for its performance up to date. Judgement is also required to assess whether control is transferred when the customers preliminarily have accepted the moulds or when the customers have issued the final acceptance report after the moulds are examined and tested. The customers will only obtain the legal title of the completed moulds after they have issued the final acceptance report, of which the Group has present the right to the payment and the collection of the consideration is probable. Therefore, the Group concluded that the control over the domestic sales of moulds is transferred at the point in time, instead of over time, when the customers issue the final acceptance report.

For overseas sales of moulds, revenue is recognised at the point in time when the control over the moulds is transferred to the customers, that is when the customers obtain the physical possession or the legal title of the completed moulds based on respective shipping terms and the Group has the present right to payment and the collection of the consideration is probable.

Rendering of services

Revenue from the rendering of parts processing services is recognised when control over the processing services is transferred to the customers. Judgement is required to assess whether control is transferred over time or at a point in time. The customers cannot simultaneously receive and consume the benefits provided by the Group's parts processing services as the Group performs. The Group also has no enforceable right to payment for the processing services performed to date. The Group concluded that the control over the processing services is transferred to the customers at the point in time when the processed parts are accepted by the customers.

3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES *(Continued)*

Estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

Impairment of non-financial assets

The Group assesses whether there are any indicators of impairment for all non-financial assets (including the right-of-use assets) at the end of each reporting period. Other non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. An impairment exists when the carrying value of an asset or a cash-generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The calculation of the fair value less costs of disposal is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. When value in use calculations are undertaken, management must estimate the expected future cash flows from the asset or cash generating unit and choose a suitable discount rate in order to calculate the present value of those cash flows.

Net realizable value of inventories

Net realizable value of inventories is estimated based on the best available facts and circumstances, including but not limited to the inventory own physical conditions, their market selling prices and estimated costs to be incurred for their sales. The assessment is re-evaluated and adjusted as additional information received affects the amount estimated. The carrying amounts of the Group's inventories at the end of the reporting period is disclosed in note 18 to the financial statements.

Useful lives of property, plant and equipment

The Group's property, plant and equipment are depreciated on a straight-line basis over their respective useful lives. Management estimates the useful lives of these property, plant and equipment to be between 5 and 20 years. Changes in the expected level of usage and technological developments could impact the estimated useful lives and the residual values of these assets, therefore future depreciation charges could be revised. The carrying amounts of these property, plant and equipment at the end of the reporting period is disclosed in note 13 to the financial statements.

3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES *(Continued)*

Estimation uncertainty *(Continued)*

Warranty provision

The Group provides warranty to certain customers. The provision for warranty is estimated based on expected warranty work to be performed for goods under the warranty period and labor charges expected to be incurred. As historical maintenance and service record may not resemble the future maintenance and service of the products sold, differences between the actual amount and the estimated amount of this provision may affect future profit or loss. The carrying amount of the Group's warranty provision at the end of the reporting period is disclosed in note 23 to the financial statements.

Leases — Estimating the incremental borrowing rate

The Group cannot readily determine the interest rate implicit in a lease, and therefore, it uses an incremental borrowing rate ("IBR") to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Group "would have to pay", which requires estimation when no observable rates are available (such as for subsidiaries that do not enter into financing transactions) or when it needs to be adjusted to reflect the terms and conditions of the lease (for example, when leases are not in the subsidiary's functional currency). The Group estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates (such as the subsidiary's stand-alone credit rating).

4.2 Performance obligations

Information about the Group's performance obligations is summarised below:

Sales of moulds

The performance obligation is satisfied upon the customers' issue of the final acceptance report. Generally, customers are required to pay approximately 30% of the total fee as a deposit upon the signing of the agreements and approximately 40% to 50% of the total fee when the moulds have been fabricated and are ready for delivery to the customers. The remaining balance is generally due within 20 to 180 days from the issue of the final acceptance report.

Parts processing services

The performance obligation is satisfied at the point in time when the processed parts are accepted by the customers and payment is generally due within 20 to 180 days from the acceptance of processed parts, except for certain customers, where payment in advance is required.

There was only one performance obligation in each of the Group's contracts and all revenues were recognised at a point in time during the reporting period. The transaction prices related to the performance obligations in the existing contracts that were unsatisfied as at the end of the reporting period are as follows:

	Year ended 31 December	
	2020	2019
	RMB'000	RMB'000
Amounts expected to be recognised as revenue:		
Within one year	206,577	175,775
After one year	108,951	80,783
	315,528	256,558

The amounts of transaction prices related to the performance obligations which are expected to be recognised after one year mainly relate to the sales of automotive moulds due to the long inspection and examination period before the customers' final acceptance. All other amounts of transaction prices related to the performance obligations are expected to be recognised within one year. The amounts disclosed above do not include variable consideration which is constrained.

On 26 March 2021, the Directors proposed a final dividend of RMB0.309 cents (equivalent to HK\$0.371 cents) per ordinary share totalling approximately RMB2,039,400 (equivalent to HK\$2,449,000) for the year ended 31 December 2020, which is subject to the approval of the Company's shareholders at the forthcoming annual general meeting.

The proposed final dividend for the year ended 31 December 2019 was paid by the Company to its shareholders on 17 July 2020.

12. EARNINGS PER SHARE ATTRIBUTABLE TO ORDINARY EQUITY HOLDERS OF THE COMPANY

The calculation of the basic earnings per share amount is based on the profit for the year ended 31 December 2020 attributable to ordinary equity holders of the Company of approximately RMB28,347,000 and the weighted average number of ordinary shares of 660,000,000 (2019: 579,313,187) in issue during the year.

No adjustment has been made to the basic earnings per share amount presented for the year ended 31 December 2020 in respect of a dilution as the Group had no potentially dilutive ordinary shares in issue during the year ended 31 December 2020.

15. LEASES

The Group as a lessee

The Group has lease contracts for factories and venues, parking lots, a parcel of land and a vehicle in its operations. Lump sum payments were made upfront to acquire the leased land with a lease period of 50 years, and no ongoing payments will be made under the term of the land lease. Leases of factories and venues generally have lease terms between 2 and 10 years. Leases of parking lots generally have a lease period of 10 years, while a vehicle has a lease term of 3 years. Office equipment generally is individually of low value.

During the reporting period, the Group newly subleased to third parties part of the leased factories and venues that are not fully utilised, none of which is assessed to be a finance lease.

(a) Right-of-use assets

The carrying amounts of the Group's right-of-use assets and the movements during the reporting period are as follows:

	Factories and venues RMB'000	Parking lots RMB'000	Leasehold land RMB'000	Vehicle RMB'000	Total RMB'000

Note: Modifications, including the extension of lease terms, the increase in lease payments or the increase in lease areas, were made to two of the Group's leased factories and venues during the reporting period. The modifications that increased the leased areas, the consideration for which is commensurate with the stand-alone price for such increase, are accounted for as a separate lease. Lease liabilities were remeasured for the extension of lease terms and the increase in lease payments by discounting the revised lease payments using a revised discount rate, with corresponding adjustments made to the right-of-use assets.

(b) Lease liabilities

The carrying amount of lease liabilities and the movements during the reporting period are as follows:

	As at 31 December	
	2020	2019
	RMB'000	RMB'000
Carrying amount at 1 January 2020	15,292	16,585

Analysed into:		
Current portion	4,631	3,333
Non-current portion	12,043	11,959

The maturity analysis of lease liabilities is disclosed in note 34 to the financial statements.

As disclosed in note 2.2 to the financial statements, the Group has early adopted the amendments to IFRS 16 and applied the practical expedient to an eligible rent concession granted by a lessor for the lease of factory and venue during the year, which is a direct consequence of the COVID-19 pandemic as a lease modification.

16. DEFERRED TAX *(Continued)*

Deferred tax liabilities *(Continued)*

For the year ended 31 December 2020, the Group recognised deferred tax liabilities of approximately RMB252,000 (2019: RMB412,000) on earnings anticipated to be remitted by certain PRC subsidiaries in the foreseeable future. No withholding tax had been provided for the retained profits of approximately RMB29,871,000 (2019: RMB37,078,000) expected to be retained by the PRC subsidiaries and not to be remitted in the foreseeable future based on several factors, including the Company's dividend policy, the impact of the COVID-19 pandemic and management's estimation of overseas funding requirements. The aggregate amount of temporary differences associated with these retained profits for which deferred tax liabilities have not been recognised was approximately RMB137,921,000 (2019: RMB108,050,000) as at 31 December 2020.

For presentation purposes, certain deferred tax assets and liabilities have been offset in the statement of financial position. The following is an analysis of the deferred tax balances of the Group for financial reporting purposes:

	As at 31 December	
	2020	2019
	RMB'000	RMB'000
Net deferred tax assets recognised in the consolidated statement of financial position	3,645	1,785
Net deferred tax liabilities recognised in the consolidated statement of financial position	(252)	(412)
	3,393	1,373

The Group has tax losses arising in the Cayman Islands of RMB3,788,000 (2019: RMB17,074,000) that are available indefinitely for offsetting against future taxable profits of the companies in which the losses arose.

The Group also has tax losses arising in Mainland China of RMB83,000 (2019: Nil) that will expire in one to five years for offsetting against future taxable profits. Deferred tax assets have not been recognised in respect of these losses as they have arisen in subsidiaries that have been loss-making for some time and it is not considered probable that taxable profits will be available against which the tax losses can be utilised.

	84,504	103,395

The Group generally grant a credit period of 20 to 180 days to customers. Each customer has a maximum credit limit. The Group seeks to maintain strict control over its outstanding receivables to minimise credit risk. Overdue balances are reviewed regularly by management. The Group does not hold any collateral or other credit enhancements over its trade receivable balances. Trade and notes receivables are non-interest-bearing.

Details of the concentration of credit risk arising from the customers are set out in note 34 to the financial statements.

An ageing analysis of the trade receivables as at the end of the reporting period, based on the date of the final acceptance report and net of loss allowance for impairment, is as follows:

19. TRADE AND NOTES RECEIVABLES *(Continued)*

Set out below is the movements in loss allowance for impairment of trade and notes receivables:

	As at 31 December	
	2020	2019
	RMB'000	RMB'000
At the beginning of year	111	81
Impairment losses, net	9,019	30
At the end of year	9,130	111

The Group has applied the simplified approach to providing for ECLs prescribed by IFRS 9, which permits the use of the lifetime expected loss provision for all trade receivables. To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days of ageing. If there is objective evidence of impairment existing individually for financial assets that are individually significant, an impairment loss is recognised in the statement of profit or loss. The Group performs a collective assessment for all other trade receivables that are not individually significant or for which impairment has not yet been identified by including the asset in a group of financial assets with similar credit risk characteristics for impairment. The collective provision calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions. In response to COVID-19 and the Group's expectations of economic impacts, the forward-looking macroeconomic assumption underpinning the collective provision calculation has been revised. However, the fundamental credit model mechanics and methodology underpinning the Group's calculation of ECL have remained consistent with prior periods.

Generally, trade receivables are written off when there is no reasonable expectation of recovering additional cash. Indicators that there is no reasonable expectation of recovery, include, among others, the bankruptcy of the customer and a failure to make contractual payments for a period of greater than 36 months.

19. TRADE AND NOTES RECEIVABLES *(Continued)*

The gross carrying amount of trade receivables individually measured is RMB8,133,000 (2019: Nil) and the loss allowance for these trade receivables is RMB8,033,000 (2019: Nil). Set out below is the information about the credit risk exposure on the Group's trade receivables using the collective provision calculation matrix:

	Within 1 year RMB'000	1 to 2 years RMB'000	2 to 3 years RMB'000	Over 3 years RMB'000	Total RMB'000
31 December 2020					
Gross carrying amount	44,970	10,541	409	–	55,920
Expected credit loss rate	0.30%–0.50%	3.00%–5.00%	3.00%–5.00%	N/A	
Expected credit losses	293	647	157	–	1,097
31 December 2019					
Gross carrying amount	55,778	4,749	–	–	60,527
Expected credit loss rate	0.10%–0.11%	1.00%–1.09%	N/A	N/A	
Expected credit losses	60	51	–	–	111

The Group's notes receivable are recognised as debt investments at fair value through other comprehensive income and the Group applies the low credit risk simplification for the assessment of ECLs of notes receivable. At the end of the reporting period, the Group evaluated that the notes receivable are considered to have low credit risk and there has been a significant increase in credit risk when contractual payments are more than 180 days past due.

	1,625	1,478

None of the above assets is either past due or impaired. The financial assets included in the above balances relate to receivables for which there was no recent history of default.

The Group applies the general approach to provide for expected credit losses of the financial assets measured at amortised cost, for which the Group assesses the impairment individually based on the internal credit rating of these debtors. Based on the assessment, there has been no significant increase in credit risk since initial recognition. No impairment loss has been recognised under the 12-month ECLs based on the information about the exposure to credit risk for these financial assets which are assessed individually as at 31 December 2020.

FINANCIAL ASSETS				
Notes receivable	29,884	43,293	29,581	42,979

Management has assessed that the fair values of cash and cash equivalents, trade receivables, financial assets included in prepayments, other receivables and other assets, trade and notes payables, financial liabilities included in other payables and accruals and contract liabilities approximate to their carrying amounts largely due to the short-term maturities of these instruments.

The Group's finance management center is responsible for determining the policies and procedures for the fair value measurement of financial instruments. At each reporting date, the finance department analyses the movements in the values of financial instruments and determines the major inputs applied in the valuation.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

The fair values of notes receivable have been estimated using a discounted cash flow valuation model based on assumptions that are not supported by observable market prices or rates. The valuation requires the Directors to make estimates about the expected future cash flows of the notes receivable. The Directors believe that the estimated fair values resulting from the valuation technique, which are recorded in the consolidated statement of financial position, and the related changes in fair values, which are recorded in the consolidated statement of profit or loss and other comprehensive income, are reasonable, and that they were the most appropriate values at the end of the reporting period.

Notes receivable	–	42,979	–	42,979

34. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group's principal financial instruments comprise cash and cash equivalents. The main purpose of these financial instruments is to raise finance for the Group's operations. The Group has various financial assets and liabilities such as trade receivables and trade payables, which arise directly from its operations.

It is, and has been throughout the reporting period under review, the Group's policy that no trading in financial instruments shall be undertaken.

34. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES *(Continued)*

The main risks arising from the Group's financial instruments are foreign currency risk, credit risk and liquidity risk. The board of Directors reviews and agrees policies for managing each of these risks and they are summarised below:

Foreign currency risk

The Group has transactional currency exposures. Such exposures arise from sales or purchases by operating units in currencies other than the units' functional currencies.

The following table demonstrates the sensitivity at the end of the reporting period to a reasonably possible change in the foreign currency exchange rate, with all other variables held constant, of the Group's profit before tax.

	Increase/ (decrease) in foreign currency rate %	Increase/(decrease) in profit before tax As at 31 December	
		2020 RMB'000	2019 RMB'000
If RMB weakens against USD	5	540	115
If RMB strengthens against USD	(5)	(540)	(115)
If RMB weakens against HKD	5	(1,000)	(73)
If RMB strengthens against HKD	(5)	1,000	73

Credit risk

The Group trades only with recognised and creditworthy third parties. It is the Group's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. In addition, receivable balances are monitored on an ongoing basis and the Group's exposure to bad debts is not significant.

The credit risk of the Group's other financial assets, which comprise cash and cash equivalents and other receivables and deposits, arises from default of the counterparty, with a maximum exposure equal to the carrying amounts of these instruments.

34. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES *(Continued)*

Credit risk *(Continued)*

Since the Group trades only with recognised and creditworthy third parties, there is no requirement for collateral. Concentrations of credit risk are managed by analysis by customer/counterparty. The Group had certain concentrations of credit risk as the trade and notes receivables in terms of the following percentages were due from the five largest customers out of the Group's total trade and notes receivables:

	As at 31 December	
	2020	2019
	%	%
Due from the Group's five largest customers	43	76

The tables below show the credit quality and the maximum exposure to credit risk based on the Group's credit policy, which is mainly based on past due information unless other information is available without undue cost or effort, and year-end staging classification as at 31 December 2020 and 2019. The amounts presented are gross carrying amounts for financial assets.

34. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES *(Continued)*

Capital management

The primary objectives of the Group's capital management are to safeguard the Group's ability to continue as a going concern and to maintain healthy capital ratios in order to support its business and maximise shareholders' value.

The Group manages its capital structure and makes adjustments to it in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Group is not subject to any externally imposed capital requirements. No changes were made in the objectives, policies or processes for managing capital during the reporting period.

35. EVENTS AFTER THE REPORTING PERIOD

As at the date of approval of these financial statements, apart from the events elsewhere mentioned in these financial statements, there is no other significant event subsequent to 31 December 2020.

Notes:

- Adjusted net profit and adjusted net profit margin are not financial measures under IFRS. Adjusted net profit and adjusted net profit margin are calculated based on the net profit for the year after excluding the effect of (i) the listing expenses for the Listing; (ii) the listing expenses for the previous listing application for A-Share filed by the Company's subsidiary on 23 December 2016 ("A-Share Listing Application"); and (iii) the cash-subsidies granted by the local government in relation to the A-Share Listing Application.
- No earnings per share was presented for the years ended 31 December 2016, 2017 and 2018 as it was not considered meaningful due to the reorganisation of the Group for the Listing.
