I. INTRODUCTION

This supplemental circular should be read together with the circular of the 2020 AGM and the 2021 First Class Meeting of H Shareholders of the Bank dated April 30 2021 and the notice of the 2020 AGM and the notice of the 2021 First Class Meeting of H Shareholders of the Bank dated April 21 2021.

LETTER FROM THE BOARD

The purpose of this supplementary circular is to provide you with relevant information about the engagement of convertible negotiated deposit business to replenish additional tier-one capital and issuance of shares under a special mandate by the Bank to enable you to make an informed decision on whether to vote for or against the proposed resolution at the AGM and the Shareholders' Class Meeting.

II. MATTERS TO BE HANDLED AT THE AGM AND THE SHAREHOLDERS' CLASS MEETINGS

10. Engagement of Convertible Negotiated Deposit Business to Replenish Additional Tier-one Capital and Issuance of Shares under a Special Mandate

In order to actively implement the government's special debt policy of RMB200 billion, enhance the Bank's capital strength and risk resistance level, the Bank intends to carry out the convertible negotiated deposit business to replenish other tier-one capital. The relevant plan is hereby formulated. The main contents are as follows:

(1) Background

At the executive meeting of the State Council presided by Premier Li Keqiang on July 1, 2020, a quota for new local government special bonds in 2020 was determined to be arranged for local governments to explore new reasonable ways to properly replenish the capital of small and medium-sized banks by subscribing convertible bonds in accordance with the laws and regulations to enhance their ability to serve small and micro businesses and support and guarantee employment.

According to the aforesaid policies and arrangements, the MOF has allocated RMB200 billion in the 2020 new local government special debt limit for local governments to subscribe for qualified capital instruments or to periodically replenish capital to small and medium-sized banks by means of capital injection. According to the unified deployment of the Jiangxi Provincial Department of Finance, the Bank intends to carry out a convertible negotiated deposit business of not more than RMB3.9 billion to coordinate with local government special bond funds, so as to replenish other tier-one capital in full.

(2) Meaning and Necessity of Convertible Negotiated Deposit

(1) Meaning of convertible negotiated deposit

Convertible negotiated deposit is an innovative capital tool to replenish the capital of small and medium-sized banks. It is to inject local government bond funds that can be used to replenish the capital of small and medium-sized banks into target banks in the form of deposits to replenish the target banks' capital. At the same time, the subscriber of the convertible negotiated deposit enters into an agreement with

LETTER FROM THE BOARD

the target banks to convert the deposit into ordinary Shares upon meeting the conditions for the conversion, or to repay the principal and interest by the target banks upon the maturity of the convertible negotiated deposit or when it becomes redeemable.

(II) Necessity of convertible negotiated deposit

With the deepening of interest rate liberalization, small and medium-sized banks are facing intensifying competition. After the COVID-19 epidemic in 2020, in particular, the external environment faced by small and medium-sized banks became more complicated. Therefore, it is an effective way to further improve financial service capacity by issuing the convertible negotiated deposit with special debt funds, replenishing other tier-one capital of the Bank and stabilizing long-term and core liabilities.

(3) Basic elements for convertible negotiated deposit

Targets of issuance: Jiangxi Provincial Department of Finance or its designated authorities.

Quota: not more than RMB3.9 billion.

Interest rate: Before the conversion, the interest rate of the convertible negotiated deposit shall match with the corresponding local government special bond issuance interest rate. According to the recent bond issuance interest rate by the local government of Jiangxi Province, the interest rate of the special bond is expected to range from 2.5% to 4.5%. If the interest rate of the special bond then exceeds such range, the Bank will submit to the shareholders' general meeting for approval separately.

Repayment of principal and interest: The maturity of the deposit shall be set in accordance with the maturity requirements of the convertible negotiated deposit in batches. Among them, RMB0.8 billion is for the six-year maturity, RMB0.8 billion for the seven-year maturity, RMB0.8 billion for the eight-year maturity, RMB0.8 billion for the nine-year maturity and RMB0.7 billion for the ten-year maturity. The interest is paid semiannually on the convertible negotiated deposit, and the interest rate shall match with the corresponding local government special bond issuance interest rate.

Purpose: to replenish other tier-one capital of the Bank¹.

¹ In accordance with the Administrative Measures for the Capital of Commercial Banks (for Trial) (《商業銀行資本管理辦法(試行)》) issued by the China Banking Regulatory Commission (now renamed as the China Banking and Insurance Regulatory Commission), the total capital of commercial banks includes core tier-one capital, other tier-one capital and tier-two capital. Other tier-one capital includes: other tier-one capital instruments and its premium as well as applicable portions of minority shareholders' capital that may be included.

LETTER FROM THE BOARD

Core conversion terms: When the core tier-one capital adequacy ratio of the Bank is lower than 5.125%, and other conditions as set out in the Agreement are met, the negotiated deposits will be converted into ordinary Shares periodically and included in the core tier-one capital.

Specifically, in accordance with the Agreement, the conversion for convertible negotiated deposit into ordinary Shares of the Bank shall satisfy the following conditions at the same time: (i) the core tier-one capital adequacy ratio of the Bank is lower than 5.125%; (ii) Jiangxi Provincial Department of Finance consent to the conversion; and (iii) the class and number of the converted ordinary Shares and the shareholding structure of the Bank after the conversion shall satisfy the particular requirement of the Hong Kong Stock Exchange for the minimum public float, otherwise all or part of the Shares shall be held by the independent third parties or the conversion shall be terminated. In view of the fact that the Bank has applied for, and the Hong Kong Stock Exchange has granted, a waiver from strict compliance with the requirements under Rule 8.08(1) of the Listing Rules at the time of the listing of the Bank's H Shares, pursuant to which, the minimum public float shall be the higher of: (i) 20%; and (ii) such percentage of H Shares to be held by the public immediately after the whole or part of the over-allotment option is exercised. As at the Latest Practicable Date, the number of H Shares of the Bank held by the public accounts for approximately 22.33% of the total issued share capital of the Bank (the "**Minimum Public Float**"), which is the percentage of H Shares held by the public immediately after the whole or part of the over-allotment option is exercised at the time of the listing of the Bank's H Shares. In this case, in order to be in compliance with the requirements of the Listing Rules regarding the minimum public float, the ordinary shares of the Bank converted in accordance with the plan of convertible negotiated deposit and the Agreement can only be H Shares of the Bank that are issued overseas and listed on the main board of the Hong Kong Stock Exchange, with a par value of RMB1 per Share.

Conversion price: It is determined on the basis of the higher value of average trading price of H ordinary Shares of the Bank for 20 trading days preceding the date of the Board resolution approving the convertible negotiated deposit (i.e. March 26, 2021) and the net assets per Share attributable to the owners of the parent company based on the consolidated statement after asset and capital verification at the time of conversion of the convertible negotiated deposit. The adjustment rule for initial conversion price has been set (see "iv Conversion price" below for details).

Specifically, in accordance with the Agreement, the conversion price is determined on the basis of the higher value of average trading price of H ordinary Shares of the Bank for 20 trading days preceding the date of the Board resolution approving the convertible negotiated deposit (i.e. March 26, 2021) (the average trading price of H ordinary Shares of the Bank for the 20 preceding trading days = the total trading amount of H ordinary Shares of the Bank for the 20 preceding trading days/total trading volume of H ordinary Shares of the Bank for the 20 preceding trading days), which will be translated into the price of RMB with the central parity of the RMB against the Hong Kong dollars announced by State Administration of Foreign Exchange on the date of the Board

LETTER FROM THE BOARD

resolution (the “**Initial Conversion Price**”), i.e. 3.29 Hong Kong dollars, equivalent to RMB2.78, and the net assets per Share attributable to the owners of the parent company based on the consolidated statement after asset and capital verification at the time of conversion of the convertible negotiated deposit. The Bank’s net assets per Share attributable to the owners of the parent company based on the consolidated statement as of December 31, 2020 was RMB5.85, for reference only.

The basis for determining the Initial Conversion Price of the convertible negotiated deposit is based on the *Measures for the Administration on Securities Issuance of Listed Companies of the China Securities Regulatory Commission* and other relevant laws and regulations, as well as the conversion clauses of domestic and overseas preference shares issued by domestic banks (for replenishing other tier-one capital) with reference to the average trading price in the 20 trading days prior to the pricing base date.

The Initial Conversion Price of the convertible negotiated deposit is RMB2.78:

- ① It is equal to the average trading price of the Bank’s H shares in the 5 trading days prior to the date of the resolution of the Board (i.e. March 26, 2021);
- ② It is equal to the average trading price of the Bank’s H shares in the 10 trading days prior to the date of the resolution of the Board (i.e. March 26, 2021);
- ③ It represents a discount of approximately 0.36% to the average trading price of the Bank’s H shares in the 30 trading days prior to the date of the resolution of the Board (i.e. March 26, 2021);
- ④ It represents a discount of approximately 2.16% to the average trading price of the Bank’s H shares in the 90 trading days prior to the date of the resolution of the Board (i.e. March 26, 2021);
- ⑤ It represents a discount of approximately 0.72% to the average trading price of the Bank’s H shares on the date of the resolution of the Board (i.e. March 26, 2021);
- ⑥ It represents a premium of approximately 0.72% over the average trading price of the Bank’s shares as at the Latest Practicable Date (i.e. April 30, 2021);
- ⑦ It represents a discount of approximately 2.88% over the average trading price of the Bank’s H shares as at the Latest Practicable Date (i.e. April 30, 2021).

The Board of Directors of the Bank believes that the Initial Conversion Price is based on the market price of the Bank’s H shares and is fair and reasonable.

LETTER FROM THE BOARD

Therefore, under the above conditions, as calculated by the estimated lower conversion price of RMB2.78, the conversion for the convertible negotiated deposit may have one of the following circumstances:

- (I) If the conversion conditions are triggered within 6 years (inclusive) after the issuance date of special bonds, the amount of conversion deposits involved will be RMB3.9 billion

Assuming in compliance with the Minimum Public Float requirement, under the circumstance of the converted H Shares (i.e., conversion into 152,126,221 H Shares in total of the Bank) being held only by Jiangxi Provincial Department of Finance or its close associates to the maximum extent, rather than being held by independent third parties in full or in part, the equity structures of the Bank immediately after the conversion set out as follows:

- ② Jiangxi Provincial Department of Finance consents to the conversion;

iv Conversion price

The conversion price is determined on the basis of the higher value of average trading price of H ordinary Shares of the Bank for 20 trading days preceding the date of the Board resolution approving the convertible negotiated deposit (i.e. March 26, 2021) (the average trading price of H ordinary Shares of the Bank for the 20 preceding trading days = the total trading amount of H ordinary Shares of the Bank for the 20 preceding trading days/total trading volume of H ordinary Shares of the Bank for the 20 preceding trading days), which will be translated into the price of RMB with the central parity of the RMB against the Hong Kong dollars announced by State Administration of Foreign Exchange on the date of the Board resolution

LETTER FROM THE BOARD

(the “**initial conversion price**”), and the net assets per Share attributable to the owners of the parent company based on the consolidated statement after asset and capital verification at the time of conversion of the convertible negotiated deposit.

If, after the date of the Board resolution to carry on the convertible negotiated deposit business (before the date of the trigger event of the conversion), the Bank issues bonus dividends of ordinary Shares, converts capital reserves to share capital and issues new Shares at a price lower than the audited net assets per Share in the year end prior to the issuance (excluding any additional share capital from the conversion of financial instruments issued by the Bank with a provision for conversion into ordinary Shares) and makes rights issue (whether at a price lower than the audited net assets per Share in the year end prior to the issuance or not), the Bank will adjust the initial conversion price on a cumulative basis in accordance with the sequence of occurrences of the foregoing events, provided that the distribution of cash dividend of ordinary Shares by the Bank will not result in the adjustment of the initial conversion price. The specific adjustment rules have been set as follow:

Bonus issue or conversion from capital reserves to share capital:
 $P1=P0 \times N / (N+n)$;

Issuance of new Shares at a price lower than net assets per Share or rights issue: $P1=P0 \times (N+k) / (N+n)$; $k=n \times A / M$;

In the aforesaid rules, “P0” denotes the effective conversion price before adjustment; “N” denotes the aggregate ordinary Shares of the Bank before the issuance of bonus dividends of ordinary Shares, conversion of capital reserves to share capital, issuance of new Shares or right issue; “n” denotes the number of new Shares created due to the issuance of bonus dividends of ordinary Shares, conversion of capital reserves to share capital, issuance of new Shares or right issue; “A” denotes the price of new Share issue or rights issue; “M” denotes audited net assets per Share in the year end prior to the completion date of new Share issue or rights issue; and “P1” denotes the effective conversion price after adjustment.

In the case of rights issue (whether at a price lower than the audited net assets per Share in the year end prior to the issuance or not), the total number of shares of capital of the Bank will increase and the equity interest per share will be diluted accordingly. Therefore, a corresponding discount shall be applied to the initial conversion price so as to ensure that all Shareholders’ rights and interests are protected.

The Bank undertakes that it will not issue new Shares at a price lower than net assets per Share during the term of the Agreement. As a state-owned enterprise, in order to ensure the appreciation and preservation of state-owned assets and protect the interests of original shareholders, in accordance with general market principles,

LETTER FROM THE BOARD

the Bank will not issue new shares at a price lower than the net assets per share. Besides, in addition to the issuance of new shares, the Bank may also adopt other methods including the issuance of capital bonds to raise funds. Therefore, the aforementioned undertaking of the Bank will not affect the Bank's ability to raise funds in the future, and is in the overall interest of the Bank and its shareholders.

The ordinary Shares to be issued as a result of the conversion of the convertible negotiated deposit will rank pari passu with the existing issued ordinary Shares, and all holders of ordinary Shares whose names appear on the register of members of the Bank on the record date for dividend entitlement shall be entitled to receive the dividend for the current dividend period.

All or part of the convertible negotiated deposit will be converted by Jiangxi Provincial Department of Finance to Shares held in the Bank ("Target Shares"), and the number of Shares converted = the principle amount of the convertible negotiated deposit/the conversion price, and the Target Shares are ordinary Shares.

v Implementation of the conversion
