CHAPTER III MANAGEMENT DISCUSSION AND ANALYSIS

3.1 REVIEW OF THE ECONOMIC, FINANCIAL AND POLICY ENVIRONMENT

During the Reporting Period, China becomes the first major economy to recover from Covid-19 pandemic due to the effective and efficient measures taken to fight the pandemic. Against the backdrop of the pandemic's economic impact, the economy picked up overall in 2021. According to the National Bureau of Statistics, in the first half of 2021, China's GDP was RMB53.2167 trillion, representing a year-on-year increase of 12.7% at comparable prices, and 5.6 percentage points lower than that of the first quarter; and the average two-year growth was 5.3%, 0.3 percentage points faster than that of the first quarter. By quarter, the year-on-year GDP growth for the first quarter was 18.3%, with an average two-year growth of 5.0%; for the second quarter 7.9%, with an average two-year growth of 5.5%. The national economy continued to recover steadily with the sound growth momentum consolidated. As of the end of the Reporting Period, the balance of broad money (M2) was RMB231.78 trillion, representing a year-on-year increase of 8.6%; the balance of loans in domestic currency was RMB185.5 trillion with year-on-year increase of 12.3%; the balance of deposits in domestic currency was RMB226.62 trillion, representing a year-on-year increase of 9.2%; and the size of social financing was RMB301.56 trillion with year-on-year increase of 11%.

During the Reporting Period, the economy of Jiangxi Province where the Bank operates its principal business sustained a steady recovery, realizing the growth goal of "more than half the time and more than half the tasks" and achieving "increase in quantity and improvement in quality". Jiangxi witnessed continuous improvement of ecological environment and continuous protection of people's livelihood, and positive factors that lead to steady recovery with growth momentum consolidated were accumulating, and the growth rate of major economic indicators continued to remain in a reasonable range. In the first half of 2021, the GDP of Jiangxi Province increased by 12.9% year on year at comparable prices, higher than the average rate of China; the value added of industrial enterprises above designated size and investments in fixed assets increased by 18.5% and 20.2%, respectively, with an average two-year growth of 9.4% and 12.8% respectively.

3.2 GENERAL OPERATION SUMMARY

During the Reporting Period, in the midst of a complex economic and financial situation and increasingly fierce market competition, Jiangxi Bank, guided by the Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, with the correct leadership of Jiangxi Provincial Party Committee and Jiangxi Provincial Government, under the scientific supervision of the higher supervision authorities, and in accordance with the decision and deployment of the Party Committee and the Board of Directors of the Bank, and with the effective supervision of the Board of Supervisors, took the responsibility of being the "pacesetter of Jiangxi financial army", closely focused on the objectives and key tasks set at the beginning of the year, forged ahead with determination, and vigorously implemented precise measures to lay a solid foundation for the achievement of the annual targets.

CHAPTER III MANAGEMENT DISCUSSION AND ANALYSIS

The following table sets forth the changes in interest income and interest expense resulting from the changes in the Group's volume and interest rates during the reporting periods indicated. Changes in volume are measured by the change in average balance of interest-bearing assets and interest-bearing liabilities, while changes in interest rates are measured by changes in the average interest rates of interest-bearing assets and interest-bearing liabilities. The combined effect of changes in volume and interest rate is embedded in the change in interest rate.

CHAPTER III MANAGEMENT DISCUSSION AND ANALYSIS

3.3.2 Interest Income

In the first half of 2021, the Group's interest income amounted to RMB9.571 billion, representing a year-on-year decrease of RMB637 million, or 6.24%. The decrease in interest income was mainly due to the effect of the market interest rates and asset structural adjustment, resulting in an decrease of 0.44 percentage point in the average yield of the Group's interest-bearing assets from 4.84% for the six months ended June 30, 2020 to 4.40% for the six months ended June 30, 2021.

1 Interest income from loans and advances to customers

In the first half of 2021, the Group achieved interest income of loans and advances to customers of RMB6.090 billion, representing a year-on-year increase of RMB112 million, or 1.87%. The main reason was that the average balance of the Group's loans and advances to customers increased from RMB212.603 billion in the first half of 2020 to RMB235.029 billion in the first half of 2021, and partially offset by a year-on-year decrease of 0.44 percentage point in the average yield of the loans and advances to customers. The decrease of the average yield was mainly due to the active respond to the national policies by the Group and effect of the market interest rates, as well as the continuous enhancement of releasing of inclusive finance and support for small and micro and medium-sized enterprises by measures such as lowering borrowing costs.

The following table sets forth the average balance, interest income, and average yield for each component of the Group's loans and advances to customers during the periods indicated.

Note: (1) According to the requirements of the Notice of Strict Implementation of Accounting Standards for Business Enterprises for Effective Improvement of the Work of 2020 Annual Report for Enterprises (Cai Kuai [2021] No.2) issued by the Ministry of Finance, Assets Supervision and Administration Commission of the State Council, CBIRC and CSRC, the Group reclassified the income of credit card installment business from fee and commission income to interest income in the first half of 2021. The comparative figures have been adjusted accordingly.

CHAPTER III MANAGEMENT DISCUSSION AND ANALYSIS

2 Net trading gains

In the first half of 2021, the Group's net trading gains were RMB101 million, representing a year-on-year increase of RMB71 million, which was mainly due to fluctuations in the price in debt securities market.

3 Net gains arising from financial investments

In the first half of 2021, the Group's net gains arising from financial investments were RMB689 million, representing a year-on-year increase of RMB92 million, or 15.41%, which was mainly due to the increase in fair value of financial assets at fair value through profit or loss of the Group in the first half of 2021.

4 Other operating income

In the first half of 2021, the Group's other operating income was RMB13 million, representing a year-on-year decrease of RMB9 million, or 39.50%, which was mainly due to the decrease in exchange gains and losses resulting from the fluctuations of exchange rate in the first half of 2021.

3.3.5 Operating Expenses

In the first half of 2021, the Group's operating expenses were RMB1.509 billion, representing a year-on-year increase of RMB46 million, or 3.14%.

	For the six months ended June 30,			Change rate(%)

Others	7.39	10.79	(3.40)	(31.51)
Total	874.13	855.03	19.10	2.23

In the first half of 2021, the Group's staff costs were RMB874 million, representing a year-on-year increase of RMB19 million, or 2.23%. It was mainly due to the cancellation of the the preferential policy of 50% reduction by large enterprises' social insurance contributions in Jiangxi in 2021, resulting in an increase of RMB63 million in social insurance and supplementary retirement benefits as compared with the corresponding period of last year.

CHAPTER III MANAGEMENT DISCUSSION AND ANALYSIS

3.3.6 Impairment Losses on Assets

In the first half of 2021, the Group's impairment losses on assets were RMB2.24 billion, representing a year-on-year decrease of RMB483 million, or 17.73%. It was mainly due to the year-on-year provided decrease of RMB786 million in impairment losses on loans and advances to customers as a result of the Group's increased efforts in the collection and disposal of non-performing assets and effective control of non-performing assets. Meanwhile, based on the principle of prudence, the Group increased the provision for impairment losses of financial investments and other assets, representing a year-on-year increase of RMB303 million which effectively enhanced the risk resistance capacity.

	For the six months ended June 30,			Change rate(%)
	2021	2020	Amount of change

CHAPTER VI CORPORATE GOVERNANCE

6.1 COMPLIANCE WITH THE CORPORATE GOVERNANCE CODE CONTAINED IN APPENDIX 14 TO THE LISTING RULES

During the Reporting Period, the Bank continued to improve the transparency of corporate governance to protect the interests of Shareholders and enhance corporate value.

The Bank has established a relatively comprehensive corporate governance structure pursuant to the provisions of the Listing Rules. The composition of the Board and the special committees under the Board complies with the requirements of the Listing Rules. The Bank clearly defines the responsibilities of the Shareholders' general meeting, the Board, the Board of Supervisors, and senior management. The Shareholders' general meeting is the highest authority of the Bank, and the Board is responsible to the Shareholders' general meeting. The Board has set up eight special committees that operate under the leadership of the Board and offer opinion on the Board's decision-making. The Board of Supervisors supervises the performance of duties by the Board and senior management as well as the Bank's financial activities, risk management, and internal control. Under the leadership of the Board, senior management is responsible for implementing the resolutions of the Board and for daily business and management of the Bank, and reports to the Board and the Board of Supervisors on a regular basis. The President of the Bank, appointed by the Board, is responsible for the overall business operation and management of the Bank.

The Bank has adopted Appendix 14 to the Listing Rules headed Corporate Governance Code (the "Code"). The Bank has met the requirements of the measures for the administration of domestic commercial banks and the corporate governance requirements and has established a sound corporate governance system. During the Reporting Period, the Bank has complied with all applicable Code provisions as set forth in Appendix 14 to the Listing Rules.

The Bank commits itself to maintaining high-standard corporate governance. The Bank will continue to strengthen its corporate governance, to ensure compliance with the Code and live up to the expectations of Shareholders and potential investors.

6.5 INTERNAL CONTROL AND INTERNAL AUDIT

6.5.1 Internal Control

During the Reporting Period, the Bank continued to improve its internal control management system:

CHAPTER VI CORPORATE GOVERNANCE

1. The internal control management structure was improved continually. The Bank revised the Working Rules of the Compliance Management Committee of the Board of Directors of Jiangxi Bank and the Working Rules of the Internal Control, Compliance, Case Prevention and Control Committee of Jiangxi Bank to perfect the top-level compliance architecture. At the same time, the Bank refined the vertical management architecture of the compliance line and ensured the independence and authoritativeness of compliance performance.
2. The Bank established the gridded management mechanism for case prevention. The Bank formulated the Working Plan of Jiangxi Bank for Gridded Management of Case Prevention, carried forward the gridded management of both personnel and business, and defined the area, personnel and responsibility of gridded management of case prevention. Meanwhile, the Bank implemented the exclusive responsibility system for gridded management of case prevention and forged a prevention mode featuring person-specific responsibility, function in place and full coverage.
3. The Bank refined the compliance evaluation system. The Bank established the dual line evaluation mechanism for case prevention and compliance, optimized the KPI evaluation indicators for the departments of the Head Office and different branches, and refined related contents of “veto by one vote” for case prevention to fully play the guiding role of evaluation.
4. The Bank continuously conducted internal control supervision and check. The Bank organized the formulation and chronic implementation of the 2021 Internal Control and Compliance Inspection Plan with a focus on those vulnerabilities in major business areas and internal control, strengthened the compliance management of key links and gave full play to the corrective role of supervision and inspection.

During the Reporting Period, no major deficiencies were found in the Bank’s internal control.

CHAPTER VI CORPORATE GOVERNANCE

6.5.2 Internal Audit

The Group has established an independent internal audit system and the Board assumes ultimate responsibility for the independence and effectiveness of internal audit. The Board has established an Audit Committee to guide and supervise the internal audit work of the Bank. The Board of Supervisors is responsible for supervising the internal audit work. The general manager of the audit department reports to the Board, Audit Committee and Board of Supervisors on a regular basis and informs the senior management. The audit department prepares annual audit plan and submits it to the Audit Committee and the Board for approval. In daily audit work, the audit department reviews the Bank's operation, information system, financial reporting and risk management through systematic and standardized internal audit methods, and evaluates the effectiveness of the Bank's internal control and corporate governance. The audit department conducts both on-site and off-site auditing and special targeted audits on various risks faced by the Bank, e.g. credit risk, market risk, operational risk and information technology risk, after which it issues an audit report on the audit results. To urge that the audited department take appropriate corrective actions according to audit suggestions, the audit department keeps track of the results of corrective actions on a regular basis, so as to ensure the rectification effect.

During the Reporting Period, adhering to the audit concept of “keeping a foothold by the spirit of auditing, establishing a career by innovation and standardization, and building up reputation by self-construction”, by focusing on the work goal of “consolidating and deepening the year”, the Group will accurately master the new requirements for the audit work in the new phrase of development, and seize the opportunity of digital transformation, the internal audit department of the Group continuously explored and innovated audit methods, effectively fulfilled its role of supervision and service, continuously optimized the audit system, refined the process of audit quality control, strictly implemented the problem rectification mechanism, attached importance to the effectiveness of achievement transformation, and effectively improved the internal control and management mechanism of the Bank.

REVIEW REPORT TO THE BOARD OF DIRECTORS

Review report to the Board of Directors of Jiangxi Bank Co., Ltd.

(A joint stock company incorporated in the People's Republic of China with limited liability)

INTRODUCTION

We have reviewed the interim financial report set out on pages 101 to 218 which comprises the consolidated statement of financial position of Jiangxi Bank Co., Ltd. (the “Bank”) and its subsidiaries (collectively the “Group”) as of 30 June 2021 and the related consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated cash flow statement for the six month period then ended and explanatory notes. The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of an interim financial report to be in compliance with the relevant provisions thereof and International Accounting Standard 34, *Interim Financial Reporting*, issued by the International Accounting Standards Board. The directors are responsible for the preparation and presentation of the interim financial report in accordance with International Accounting Standard 34.

Our responsibility is to form a conclusion, based on our review, on the interim financial report and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

SCOPE OF REVIEW

We conducted our review in accordance with the Hong Kong Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*, issued by the Hong Kong Institutes of Certified Public Accountants. A review of interim financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

REVIEW REPORT TO THE BOARD OF DIRECTORS

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the interim financial report as at 30 June 2021 is not prepared, in all material respects, in accordance with International Accounting Standard 34, *Interim Financial Reporting*.

NOTES TO THE UNAUDITED INTERIM FINANCIAL REPORT

(EXPRESSED IN THOUSANDS OF RMB, UNLESS OTHERWISE STATED)

1 BACKGROUND INFORMATION

Jiangxi Bank Co., Ltd. (the “Bank”), formerly known as Nanchang Bank Co., Ltd., headquartered in Nanchang, Jiangxi Province. On 31 December 1997, the Bank was established by Nanchang Municipal Bureau of Finance, several business entities and natural persons, on the basis of formerly 40 urban credit cooperatives located in Nanchang City, with the approval of the People’s Bank of China (“PBOC”). On 18 February 1998, the Bank was registered as Nanchang City Commercial Bank Co., Ltd., with the approval of Jiangxi Province Administration of Industry and Commerce.

On 6 August 2008, the Bank changed its name from Nanchang City Commercial Bank Co., Ltd. to Nanchang Bank Co., Ltd.. On 3 December 2015, the former China Banking Regulatory Commission (the “former CBRC”) promulgated Yinjianfu 2015 No.658 <Approval of the Acquisition of Jingdezhen City Commercial Bank by Nanchang Bank>. On 7 December 2015, Jiangxi Province State Council promulgated GanFuZi 2015 No. 85 <Notice on the Issuance of Establishment Plan for Jiangxi Bank Co., Ltd.>, Nanchang Bank Co., Ltd. acquired Jingdezhen City Commercial Bank Co., Ltd. by acquiring its entire equity interest and changed its name to Jiangxi Bank Co., Ltd. on 11 December 2015.

The Bank obtained its finance permit No. B0792H236010001 from the former CBRC. The principal activities of the Bank and its subsidiaries (collectively referred to as the “Group”) are deposit taking; granting of loans; domestic settlement; foreign exchange business, bill acceptances and discounting; issuing financial bonds; acting as agent to issue, settle and underwrite government bonds; trading of government bonds; inter-bank placement; providing guarantee; acting as agent on inward and outward payments, acting as insurance agent; safe-box service; entrusted loans based on local government fund and other business activities approved by the former CBRC. The Bank is regulated by China Banking Insurance Regulatory Commission (the “CBIRC”) authorized by the State Council.

In June 2018, the Bank’s H Shares were listed on the Main Board of the Stock Exchange of Hong Kong Limited (Stock code: 1916).

2 BASIS OF PREPARATION

This interim financial report has been prepared in accordance with the applicable disclosure provisions of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited, including compliance with International Accounting Standard (IAS) 34, Interim Financial Reporting, issued by the International Accounting Standards Board (IASB). It was authorized for issue on 27 August 2021.

The interim financial report has been prepared in accordance with the same accounting policies adopted in the 2020 annual financial statements, except for the accounting policy changes that are expected to be reflected in the 2021 annual financial statements. Details of any changes in accounting policies are set out in Note 3.

The preparation of the interim financial report in conformity with IAS 34 requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses on a year to date basis. Actual results may differ from these estimates.

This interim financial report contains condensed consolidated financial statements and selected explanatory notes. The notes include an explanation of events and transactions that are significant to an understanding of the changes in financial position and performance of the Group since the 2020 annual financial statements. The condensed consolidated interim financial statements and notes thereon do not include all of the information required for a full set of financial statements prepared in accordance with International Financial Reporting Standards (“IFRSs”).

The interim financial report is unaudited, but has been reviewed by KPMG in accordance with Hong Kong Standard on Review Engagements 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity, issued by the Hong Kong Institute of Certified Public Accountants.

The financial information relating to the financial year ended 31 December 2020 that is included in the interim financial report as comparative information does not constitute the Bank’s statutory annual consolidated financial statements for that financial year but is derived from those financial statements.

NOTES TO THE UNAUDITED INTERIM FINANCIAL REPORT

3 CHANGES IN ACCOUNTING POLICIES

The Group has applied the following amendments to IFRSs issued by the IASB to this interim financial report for the current accounting period:

Amendment to IFRS 16, Covid-19-related rent concessions beyond 30 June 2021

The amendment extends the time limit in one of the qualifying criteria of the practical expedient for COVID-19-related rent concessions from 30 June 2021 to 30 June 2022. As such, the use of the practical expedient is available to more rent concessions, in particular those involving reduction in lease payments originally due after 30 June 2021 but before 30 June 2022.

Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16, Interest rate benchmark reform – phase 2

The amendments provide targeted reliefs from (i) accounting for changes in the basis for determining contractual cash flows of financial assets, financial liabilities and lease liabilities as modifications, and (ii) discontinuing hedge accounting when an interest rate benchmark is replaced by an alternative benchmark rate as a result of the reform of interbank offered rates.

None of these developments have had a material effect on how the Group's results and financial position for the current or prior periods have been prepared or presented in this interim financial report. The Group has not applied any new standard or interpretation that is not yet effective for the current accounting period.

36 FAIR VALUE

(a) Methods and assumptions for measurement of fair value

The Group adopts the following methods and assumptions when evaluating fair values:

(i) *Debt securities and equity investments*

The fair values of debt securities and equity investments that are traded in an active market are based on their quoted market prices in an active market at the end of the reporting period.

(ii) *Financial investments and other financial assets*

Fair values are estimated as the present value of the future cash flows, discounted at the market interest rates at the end of the reporting period.

(iii) *Debt securities issued and other financial liabilities*

Fair values of debt securities issued are based on their quoted market prices at the end of the reporting period, or the present value of estimated future cash flows. The fair values of other financial liabilities are valued at the present value of estimated future cash flows. The discount rates are based on the market interest rates at the end of the reporting period.

The Group has established policies and internal controls with respect to the measurement of fair values, specified the framework of fair value measurement of financial instruments, fair value measurement methodologies and procedures.

(EXPRESSED IN THOUSANDS OF RMB, UNLESS OTHERWISE STATED)

36 FAIR VALUE (Continued)

(b) Fair value measurement

(i) *Financial assets*

The Group's financial assets mainly consist of cash and deposits with the central bank, receivables with banks and other financial institutions, loans and advances to customers, and financial investments.

Deposits with the central bank and receivables with banks and other financial institutions are mostly priced at market interest rates and due within one year. Accordingly, the carrying amounts approximate the fair values.

Loans and advances to customers are mostly priced at floating rates close to the PBOC rates. Accordingly, the carrying amounts approximate the fair values. The fair values of loans and advances to customers measured at fair value through other comprehensive income are based on valuation techniques.

Financial investments at fair value through other comprehensive income and financial investments at fair value through profit or loss are stated at fair value. The carrying amounts of financial investments at amortized cost are the reasonable approximations of their fair values because, for example, they are short-term in nature or repriced at current market rates frequently.

(ii) *Financial liabilities*

The Group's financial liabilities mainly include payables to banks and other financial institutions, deposits from customers and debt securities issued.

The book value and the fair value of debt securities issued are presented in Note 36(d). The carrying amounts of other financial liabilities approximate their fair values.

36 FAIR VALUE (Continued)

(c) Fair value hierarchy

The following table presents the fair value of financial instruments measured at the end of the reporting period on a recurring basis, categorized into the three-level fair value hierarchy as defined in IFRS 13, Fair Value Measurement. The level into which a fair value measurement is classified is determined with reference to the observability and significance of the inputs used in the valuation technique as follows:

- Level 1: Fair value measured using only Level 1 inputs i.e. unadjusted quoted prices in active markets for identical assets or liabilities at the measurement date;
- Level 2: Fair value measured using Level 2 inputs i.e. observable inputs which fail to meet Level 1 and not using significant unobservable inputs. Unobservable inputs are inputs for which market data are not available; and
- Level 3: Fair value measured using significant unobservable inputs.

Financial investments

If there is a reliable market quote for financial instruments, the fair value of financial instruments is based on quoted market prices. If a reliable quoted market price is not available, the fair value of the financial instruments is estimated using valuation techniques. Valuation techniques applied include reference to the fair value of another instrument that is substantially the same and discounted cash flow analysis. The inputs used in valuation techniques include risk-free and benchmark interest rates, and credit spreads. Where discounted cash flow analysis is used, estimated cash flows are based on the management's best estimates and the discount rate used is reference to another instrument that is substantially the same.

37 ENTRUSTED LENDING BUSINESS

The Group provides entrusted lending business services to customers. All entrusted loans are funded by entrusted funds from these customers. The Group does not take any credit risk in relation to these transactions. The Group acts as an agent to hold and manage these assets and liabilities at the direction of the entrustor and receives fee income for the services provided. The entrusted assets are not the assets of the Group and are not recognized in the statements of financial position. Surplus funding is accounted for as deposits from customers.

As at 30 June/31 December, the entrusted assets and liabilities were as follows:

38 COMMITMENTS AND CONTINGENT LIABILITIES

(a) Credit commitments

The Group's credit commitments take the form of approved loans with signed contracts, unused credit card commitments, bank acceptances, letters of credit and financial guarantees.

The contractual amounts of loans commitments represent the amounts should the contracts be fully drawn upon. The Group provides financial guarantees and letters of credit to guarantee the performance of customers to third parties. Acceptances comprise of undertakings by the Group to pay bills of exchange drawn on customers. The Group expects most acceptances to be settled simultaneously with the reimbursement from the customers.

	30 June 2021	31 December 2020
Loan commitments		
– Original contractual maturity within one year	4,000	5,000
– Original contractual maturity more than one year (inclusive)	138,000	140,000
Sub-total	142,000	145,000
Unused credit card commitments		
– Original contractual maturity within one year	6,418,930	5,954,494
Sub-total	6,418,930	5,954,494

(ii) Received pledged assets

As part of the reverse repurchase agreements, the Group has received securities as collateral that allowed to sell or repledge in the absence of default by their owners; the fair value of such collateral accepted by the Group was nil as at 30 June 2021 (31 December 2020: nil).

(f) Redemption obligations

As an underwriting agent of PRC government bonds, the Group has the responsibility to buy back its bonds if the holders decide to early redeem the bonds held. The redemption price for the bonds at any time before their maturity date is based on the coupon value plus any interest unpaid and accrued up to the redemption date. Accrued interest payable to the bond holders are calculated in accordance with relevant rules of the MOF and the PBOC. The redemption price may be different from the fair value of similar instruments traded in the markets at the redemption date. The redemption obligations below represent the nominal value of government bonds underwritten and sold by the Group, but not yet matured at the end of the reporting period:

	30 June 2021	31 December 2020
Redemption obligations	861	1,053

The Group expects that the amount of redemption before the maturity date of these government bonds through the Group will not be material.

39 INVOLVEMENT WITH UNCONSOLIDATED STRUCTURED ENTITIES

(a) Structured entities sponsored by third party institutions in which the Group holds an interest

The Group holds interests in certain structured entities sponsored by third party institutions through investments in the units issued by these structured entities. Such structured entities include investment management products managed by securities companies and trust plans and wealth management products issued by financial institutions. The nature and purpose of these structured entities are to generate fees from managing assets on behalf of third party investors. These vehicles are financed through the issue of units to investors.

The following table sets out an analysis of the carrying amounts of interests held by the Group in unconsolidated structured entities, as well as an analysis of the line items in the consolidated statement of financial position in which relevant assets are recognized:

(c) Unconsolidated structure entities sponsored by the Group during the six months which the Group does not consolidate and does not have an interest in

During the six months ended 30 June 2021, the aggregated amount of the non-principal guaranteed wealth management products sponsored and issued by the Group after 1 January, but matured before 30 June amounted to RMB1,418.30 million (six months ended 30 June 2020: RMB4,448.25 million). During the six months ended 30 June 2021, the Group recorded commission income as the manager of these wealth management products amounting to RMB5.80 million (six months ended 30 June 2020: RMB3.97 million).

40 CAPITAL MANAGEMENT

The Group's capital management includes capital adequacy ratio management, capital financing management and economic capital management, of which the primary focus is on capital adequacy ratio management. The Group calculates the capital adequacy ratio in accordance with guidelines issued by the former CBRC. The capital of the Group is divided into core tier-one capital, other core tier-one capital and tier-two capital.

Capital adequacy ratio management is the key in capital management. The capital adequacy ratio reflects the soundness of the Group's operations and risk management capabilities. The main objective in capital adequacy ratio management is to set an optimal capital adequacy ratio that meets the regulatory requirements by benchmarking against the capital adequacy ratio level of leading peer banks with reference to its own business environment and conditions.

The Group considers its strategic development plans, business expansion plans and risk variables when conducting scenario analysis and stress testing and executing other measures to forecast, plan and manage its capital adequacy ratio.

The Group calculates its capital adequacy ratios in accordance with "Regulation Governing Capital of Commercial Banks (Provisional)" and other relevant regulations promulgated by the CBIRC.

(EXPRESSED IN THOUSANDS OF RMB, UNLESS OTHERWISE STATED)

40 CAPITAL MANAGEMENT (Continued)

The former CBRC requires commercial banks to meet the requirements of capital adequacy ratios by the end of 2018 in accordance with “Regulation Governing Capital of Commercial Banks (Provisional)”. For non-systemically important banks, the minimum ratios for core tier-one capital adequacy ratio, tier-one capital adequacy ratio and capital adequacy ratio are 7.50%, 8.50% and 10.50%, respectively.

The on-balance sheet risk-weighted assets are measured using different risk weights, which are determined according to the credit, market and other risks associated with each asset and counterparty, taking into account any eligible collaterals or guarantees. Similar practice is adopted for off-balance sheet exposure, with adjustments made to reflect the more contingent nature of any potential losses. Market risk-weighted assets are calculated using the standardized approach. Operational risk-weighted assets are calculated using basic indicator approach.

The capital adequacy ratios and related components of the Group illustrated below are computed based on the Group’s statutory financial statements prepared in accordance with PRC GAAP.

41 SEGMENT REPORTING

(a) Operating segments

The Group manages its business by business lines. Consistent with the way in which information is reported internally to the Group's most senior executive management for the purposes of resource allocation and performance assessment, the Group defines reporting segments based on the following operating segments:

Corporate banking

This segment represents the provision of a range of financial products and services to corporations, government agencies and financial institutions. These products and services include corporate loans and advances, trade financing and deposit taking activities, agency services, consulting and advisory services, remittance and settlement services and guarantee services.

Retail banking and credit card

This segment represents the provision of a range of financial products and services to retail customers. These products and services include personal loans and deposit taking activities, bank card business, personal wealth management services and remittance services.

Financial markets business

This segment covers the Group's financial markets business operations. The financial markets business includes inter-bank money market transactions, repurchases transactions and investments. It also trades in debt securities. The financial markets business segment also covers management of the Group's overall liquidity position, including the issuance of debts.

41 SEGMENT REPORTING (Continued)

(a) Operating segments (Continued)

Others

These represent assets, liabilities, income and expenses which cannot directly attributable or cannot be allocated to a segment on a reasonable basis.

Measurement of segment assets and liabilities and of segment income, expenses and results is based on the Group's accounting policies.

Internal charges and transfer prices are determined with reference to market rates and have been reflected in the performance of each segment. Interest income and expense earned from third parties are referred to as "external net interest income/expense". Net interest income and expense arising from internal charges and transfer pricing adjustments are referred to as "internal net interest income/expense".

Segment income, expenses, assets and liabilities include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Segment income, expenses, assets and liabilities are determined before intra-group balances and intra-group transactions are eliminated as part of the consolidation process. Segment capital expenditure is the total cost incurred during the reporting period to acquire property and equipment, intangible assets and other long-term assets.

41 SEGMENT REPORTING (Continued)

(b) Geographical information

Geographically, the Group mainly conducts its business in Jiangxi Province of the PRC and majority of its customers and assets are located in Jiangxi Province of the PRC.

42 RISK MANAGEMENT

The Group has exposure to the following risks from its use of financial instruments: credit risk, market risk, liquidity risk and operational risk.

This note presents information about the Group's exposure to each of the above risks and their sources, and the Group's objectives, policies and procedures for measuring and managing these risks.

The Group aims to seek the appropriate balance between the risks and benefits from its use of financial instruments and minimize potential adverse effects.

The Board of Directors is the highest decision-making authority within the Group in terms of risk management and oversees the Group's risk management functions through the Risk Management Committee. The Group's risk management policies are established to identify and analyze the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities.

Senior management is the highest execution level in the risk management structure and reports directly to the Risk Management Committee of the Board of Directors. Based on the risk management strategies determined by the Board of Directors, senior management is responsible for formulating and implementing risk management policies and systems, as well as supervising, identifying and controlling the risks that various businesses are exposed to.

(a) Credit risk

Credit risk represents the potential loss that may arise from the failure of a debtor or counterparty to meet its contractual obligation or commitment to the Group. It arises primarily from credit and bond investment portfolios and guarantees granted.

Credit business

The Board of Directors is responsible for setting the Group's risk management strategy and the overall risk tolerance level. The Board of Directors also monitors the Group's risk management process and regularly assesses the Group's risk position and risk management strategies. The Board of Directors gives advice on internal controls relating to risk management. The responsible departments for credit risk management include the Credit Approval Department and Risk Management Department. The Risk Management Department is responsible for implementing the Group's overall risk management system. Besides risk monitoring and control, the Risk Management Department is also responsible for formulating risk management policies. To ensure the independence of credit approval, the Credit Approval Department is independent from customer relationship and product management departments. Front office departments of branches carry out credit businesses according to the Group's risk management policies and procedures.

The Group continuously improves the internal control mechanism and strengthens the management of the credit business. The Group has established comprehensive assessment and inquiry mechanisms, assigning the credit management accountability to the relevant departments and individuals.

For corporate and institutional businesses, the Group has established industry-specific limits for credit approval. It has put in place continuous monitoring mechanism, with regular reporting of credit exposures to the Board of Directors. The Group's credit risk management covers key operational phases, including pre-lending evaluations, credit approval and post-lending monitoring. With respect to pre-lending evaluations, the Group assesses customer credit ratings and performs integrated analysis on the risk and return of the loan. In the credit approval phase, all credit applications are approved by designated credit officers. During the post-lending monitoring, the Group continually monitors outstanding loans and other credit related businesses. Any adverse events that may significantly affect a borrower's repayment ability are reported immediately and actions are taken to mitigate the risks.

For personal credit operation business, credit assessment of applicants is used as the basis for loan approval. In the credit assessment, customer relationship managers are required to assess the income level, credit history and repayment ability of the applicant. The customer relationship managers then forward the application and their recommendations to the loan-approval departments for further approval. The Group monitors borrowers' repayment ability, the status of collaterals and any changes to their value during the post-lending phase. Once a loan becomes overdue, the Group starts the recovery process according to standardized loan recovery procedures.

Treasury Business

The Group's treasury business are exposed to the credit risk associated with the investment business and interbank business. The Group manages the credit risk exposures by setting up credit on its treasury business and interbank business. Credit risk exposure is closely monitored on a systematic and real-time basis. Credit risk limits are reviewed and updated regularly.

Measurement of ECL

Based on whether there is a significant increase in credit risk and whether the asset has incurred credit impairment, the Group measures allowances for loss of different assets with 12-month ECL or lifetime ECL respectively.

The Group measures loss provision of the financial instruments that meet the following conditions according to the amount of expected credit losses within the next 12 months and measures loss allowances for other financial instruments in accordance with the amount of lifetime expected credit losses.

- The financial instruments that are determined to have low credit risk at the reporting date; or
- The financial instruments for which credit risk has not increased significantly since initial recognition.

42 RISK MANAGEMENT (Continued)

(a) Credit risk (Continued)

Measurement of ECL (Continued)

(i) *Significant increase in credit risk*

When one or more quantitative and qualitative standards or upper limits are triggered, the Group assumes that credit risk on financial instruments has increased significantly.

If the counterparty is listed in the watch list and one or more of the following criteria are met:

- The credit spread increases significantly;
- Significant changes with an adverse effect that have taken place in the counterparty's business, financial and economic status;
- Application of a grace period or debt-restructuring;
- Significant changes with an adverse effect in the counterparty's operating conditions;
- Less value of the collaterals (for the collateralized loans and pledged loans only);
- Early indicators of problems of cash flow/liquidity, such as late payment of accounts payable/repayment of loans; and
- The payment is more than 30 days past due.

The Group uses watch lists to monitor credit risk of financial instruments related to loans and treasury operations and conducts regular assessments at the counterparty level. The standards used in determining whether credit risk increases significantly are regularly monitored and reviewed by the management for the appropriateness.

As at 30 June 2021, the Group has not considered that any of its financial instruments has lower credit risk and no longer compared the credit risk at the balance sheet date with that at the initial recognition to identify whether there was a significant increase in credit risk (31 December 2020: nil).

(ii) *Definition of “default” and “credit-impaired assets”*

When a financial instrument meets one or more of the following conditions, the Group considers the financial asset to be in default and the criteria are consistent with the definition of credit-impaired assets.

(a) Quantitative criterion

The financial asset is more than 90 days past due.

(b) Qualitative criterion

The counterparty meets the criterion of “having difficulty in repayment”, which indicates that the counterparty has significant financial difficulty, including:

- the counterparty has been in the grace period for a long time;
- the death of the counterparty;
- the counterparty enters bankruptcy;
- the counterparty breaches (one or more) terms of the contract that the debtor shall be subject to;
- the disappearance of an active market for the related financial asset because of financial difficulties faced by the counterparty;
- the creditor makes concessions due to the financial difficulties faced by the counterparty;
- it becomes probable that the counterparty will enter bankruptcy; and
- a higher discount was obtained during the acquisition of assets and the assets has incurred credit loss when they are acquired.

The above criteria apply to all financial instruments of the Group and they are consistent with the definition of “default” adopted by the internal management of credit risk.

42 RISK MANAGEMENT (Continued)

Measurement of ECL (Continued)

(iii) Notes to the parameters, assumptions and valuation techniques

The ECL is the result of the discounted product of probability of default (PD), exposure at default (EAD) and loss given default (LGD). The definitions of these terms are as follows:

- PD refers to the likelihood that a counterparty will be unable to meet his repayment obligations over the next 12 months or the remaining lifetime of the loan;
- EAD is the amount that the Group should be reimbursed upon default of an obligor over the next 12 months or the remaining lifetime of the loan;
- LGD refers to the expected degree of loss arising from the exposure at default which is predicted by the Group. LGD varies according to different types of counterparties, methods and priority of recovering debts, and the availability of collaterals or other credit support.

The Group determines the expected credit losses by estimating the PD, LGD and EAD of individual exposure or asset portfolios in the future months. The Group multiplies these three parameters and makes adjustments according to the probability of their continuance (i.e. there is no prepayment or default at an earlier period). By adopting this approach, the Group can calculate the expected credit losses for the future months. The results of calculation for each month are then discounted to the balance sheet date and added up. The discount rate used in the calculation of ECL is the initial effective interest rate or its approximate value.

The lifetime PD is deduced from using the maturity model or 12-month probability of default. The maturity model describes the development rule of the defaults of the asset portfolio over its lifetime. The model is developed based on historical observational data and applicable to all assets in the same portfolio with the same credit rating. The above method is supported by empirical analysis.

Measurement of ECL (Continued)

(iii) Notes to the parameters, assumptions and valuation techniques (Continued)

The 12-month EAD and lifetime EAD are determined based on expected repayment arrangements, which are different according to different types of products.

- In respect of the loans with instalment repayments and bullet repayment, the Group determines 12-month or lifetime EAD according to the repayment schedule agreed in the contract and makes adjustment based on prediction of over-limit repayment and prepayments/refinancing made by the counterparty;
- In respect of the products of revolving credit agreement, the Group estimates the remaining withdrawal within the limits by using the balance of the loan after previous withdrawals and the “credit conversion factor”, so as to predict the exposure at default. Based on the Group’s analysis on recent default data, these assumptions vary based on differences in product type and utilization rate of the limits;
- The Group determines the 12-month LGD and lifetime LGD based on the factors that affects post-default recovery. LGD for different product types are different;
- As to loans classified as guarantees, the Group determines the LGD according to the types of collaterals and their expected value, the discount rate at the compulsory sale, the recovery time and the estimated recovery cost;
- As to fiduciary loans, the Group usually determines LGD in the product level due to the limited differences in recoverable amounts from different counterparties. The LGD is affected by the recovery strategies, which include the transfer plan and pricing of loans;
- Forward-looking economic information should be considered when determining the 12-month and lifetime PD, EAD and LGD.

The Group quarterly monitors and reviews assumptions related to the calculation of expected credit losses, including the changes in PD and the value of collaterals under the different time limits.

(iii) *Notes to the parameters, assumptions and valuation techniques* (Continued)

Both the assessment of the significant increase in credit risk and the measurement of expected credit losses involve forward-looking information. Based on the analysis on historical data, the Group identified critical economic indicators that affect the credit risk and expected credit losses of all asset portfolios, including GDP, increase in RMB loans, PPI, etc.

There have been no significant changes in the valuation techniques and key assumptions during the reporting period. For the six months ended 30 June 2021, the Group has fully considered the impact of COVID-19 pandemic on macroeconomic and the banking industry when assessing the forward-looking information used in the expected credit loss model.

(1) Maximum credit risk exposure

The maximum exposure to credit risk is represented by the net carrying amount of each type of financial assets at the end of the reporting period. The maximum exposure to credit risk in respect of those off-balance sheet items at the end of the reporting period is disclosed in Note 38(a).

42 RISK MANAGEMENT (Continued)

(b) Market risk

Market risk is the risk of loss, in respect of the Group's activities, arising from adverse movements in market rates including interest rates, foreign exchange rates, commodity prices, stock prices and other prices.

The Board of Directors is ultimately responsible for monitoring the Group's market risk to ensure that the Group has effectively identified, measured and monitored all types of market risk. The Risk Management Committee monitors the market risk management process within the scope authorized by the Board of Directors, which include review and approval of market risk management strategies, policies and procedures. The Group is primarily exposed to market risk in its financial markets business. The Financial Market Department is responsible for carrying out capital investments and transactions. The Finance Management Department and International Business Department are responsible for monitoring and managing the interest rate risk and foreign exchange risk on a daily basis. The Risk Management Department is responsible for formulating the market risk management policies and procedures as well as identifying, measuring and monitoring the Group's market risk.

Sensitivity analysis is a technique which assesses the sensitivity of the Group's overall risk profile and its risk profile for each period with reference to the interest rate risks for different maturities.

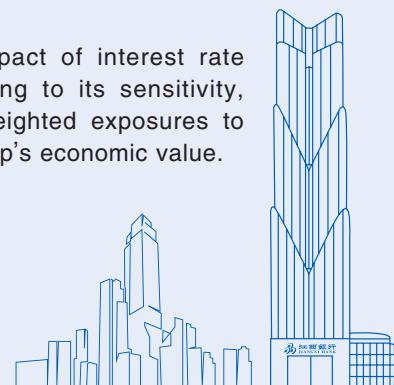

Scenario analysis is a multi-factor analysis method which assesses the impact of multiple factors interacting simultaneously, taking into consideration of the probabilities of various scenarios.

Foreign currency gap analysis is a technique which estimates the impact of foreign exchange rate movements on the Group's current profit or loss. The foreign currency gap mainly arises from the currency mismatch in the Group's on/off-balance sheet items.

Sensitivity gap analysis is a technique which estimates the impact of interest rate movements on the Group's current profit or loss. It is used to work out the gap between future cash inflows and outflows by categorizing each of the Group's interest-bearing assets and interest-taking liabilities into different periods based on repricing dates.

The results of stress testing are assessed against a set of forward-looking scenarios using stress moves in market variables. The results are used to estimate the impact on profit or loss.

Effective duration analysis is a technique which estimates the impact of interest rate movements by giving a weight to each period's exposure according to its sensitivity, calculating the weighted exposure, and summarising all periods' weighted exposures to estimate the non-linear impact of a change in interest rates on the Group's economic value.

42 RISK MANAGEMENT (Continued)

(b) Market risk (Continued)

Interest rate risk

The Group is primarily exposed to interest rate risk arising from repricing risk in its commercial banking business and the risk of financial markets business position.

Repricing risk

Repricing risk, which is also known as “maturity mismatch risk”, is the most common form of interest rate risk. It is caused by the differences in timing between the maturities (related to fixed interest instruments) or repricing (related to floating interest instruments) of assets, liabilities and off-balance sheet items. The mismatch of repricing timing causes the Group’s income or its inherent economic value to vary with the movement in interest rates.

The Finance Management Department is responsible for measuring, monitoring and managing interest rate risk. The Group regularly performs assessment on the interest rate repricing gap between the assets and liabilities that are sensitive to changes in interest rates and sensitivity analysis on the net interest income as a result of changes in interest rates. The primary objective of interest rate risk management is to minimize potential adverse effects on its net interest income or its inherent economic value caused by interest rate volatility.

Trading interest rate risk

Trading interest rate risk mainly arises from the financial markets business’ investment portfolios. Interest rate risk is monitored using the effective duration analysis method. The Group employs other supplementary methods to measure its interest rate sensitivity, which is expressed as changes in the investment portfolios’ fair value given a 100 basis points (1%) movement in the interest rates.

(i) The following tables indicate the assets and liabilities at the end of the reporting period by the expected next repricing dates or by maturity dates, depending on which is earlier: (Continued)

(a) As at 30 June 2021, for loans and advances to customers, the category “Less than three months” of the Group includes overdue amounts (net of allowances for impairment losses) of RMB1,554.88 million (31 December 2020: RMB1,917.94 million).

(b) As at 30 June 2021, for financial investments, the category “Less than three months” of the Group includes overdue amounts (net of allowances for impairment losses) of RMB2,276.74 million (31 December 2020: RMB1,739.08 million).

(ii) Interest rate sensitivity analysis

The Group uses sensitivity analysis to measure the impact of changes in interest rate on the Group’s net profit and equity. The following table sets forth the results of the Group’s interest rate sensitivity analysis on net profit and equity with an assumption that all other variables held constant.

	30 June 2021	31 December 2020

(ii) Interest rate sensitivity analysis (Continued)

The sensitivity analysis above is based on a static interest rate risk profile of the Group's assets and liabilities. This analysis measures only the impact of changes in interest rates within one year, showing how annualized net profit or loss and equity would have been affected by repricing of the Group's assets and liabilities within the one-year period. The sensitivity analysis is based on the following assumptions:

- Interest rate movements at the end of each of the reporting period apply to financial instruments of the Group;
- At the end of each of the reporting period, an interest rate movement of 100 basis points is based on the assumption of interest rates movement over the next 12 months;
- There is a parallel shift in the yield curve with the changes in interest rates;
- There are no other changes to the assets and liabilities portfolio;
- Other variables (including exchange rates) remain unchanged; and
- The analysis does not take into account the effect of risk management measures taken by the management.

Due to the adoption of the aforementioned assumptions, the actual changes in the Group's net profit or loss and equity caused by an increase or decrease in interest rates might vary from the estimated results of this sensitivity analysis.

Foreign exchange risk

Foreign currency risk

The Group's currency risk mainly arises from foreign currency deposits with banks and other financial institutions, loans and advances to customers and deposits from customers. The Group manages currency risk by matching its foreign currency denominated assets with corresponding liabilities in the same currencies.

(ii) Exchange rate sensitivity analysis

	30 June 2021 (decrease)/ increase	31 December 2020 (decrease)/ increase
Changes in net profit		
Foreign exchange rates decreases by 100 bps	(6,838)	(6,951)
Foreign exchange rates increases by 100 bps	6,838	6,951

The sensitivity analysis mentioned above is based on a static foreign exchange exposure profile of assets and liabilities and certain simplified assumptions as set out below:

- The foreign exchange sensitivity is the gain and loss recognized as a result of 100 basis points fluctuation in the foreign currency exchange rates against RMB;
- The fluctuation of exchange rates by 100 basis points is based on the assumption of exchange rates movement over the next 12 months;
- The exchange rates against RMB for the US dollars and other foreign currencies change in the same direction simultaneously, and thus other foreign currencies are converted into US dollars for the sensitivity analysis mentioned above to show how net profit or loss would have been affected; and
- Other variables (including interest rates) remain unchanged.

The analysis does not take into account the effect of risk management measures taken by the Group.

Due to the assumptions adopted, actual changes in the Group's profit or loss resulting from the increase or decrease in foreign exchange rates may vary from the estimated results of this sensitivity analysis.

42 RISK MANAGEMENT (Continued)

(c) Liquidity risk

Liquidity risk is the risk that a commercial bank is unable to obtain funds on a timely basis or obtain funds at a reasonable cost to sustain its asset business or meet repayment obligations. This risk exists even if a bank's solvency remains strong. In accordance with liquidity policies, the Group monitors the future cash flows and maintains an appropriate level of highly liquid assets.

The Asset and Liability Management Committee ("ALMC") is responsible for managing the Group's overall liquidity risk. The ALMC is responsible for the formulation of the liquidity policies in accordance with regulatory requirements and prudential principles. Such policies include:

- Maintaining liquidity at a stable and sufficient level; establishing integrated liquidity risk management system; ensuring the meeting on a timely basis of liquidity requirements and the payment of assets, liabilities and off-balance sheet business, whether under a normal operating environment or a state of stress; balancing the effectiveness and security of funds in an efficient manner; and
- Making timely and reasonable adjustments to capital structure and scale in response to market changes and business developments; pursuing profit maximization and cost minimization to a modest extent while ensuring appropriate liquidity; achieving the integration of the security, liquidity and effectiveness of the Bank's funds.

The Finance Management Department takes the lead to execute liquidity management policies and is responsible for formulating and revising the liquidity management strategies, and for identifying, measuring, monitoring and releasing the liquidity risk of the Bank. It is also responsible for managing and forecasting the working capital on a regular basis together with the Finance Market Department, and ensuring the liquidity of working capital meets management requirements based on the liquidity strategies. The Finance Market Department is responsible for performing the operation following the instructions of the Finance Management Department. Significant disbursement or portfolio changes must be reported to the ALMC on a timely basis.

A substantial portion of the Group's assets are funded by deposits from customers. These deposits from customers, which have been growing in recent years, are widely diversified in terms of type and duration and represent a stable source of funds.

The Group principally uses liquidity gap analysis to measure liquidity risk. Scenario analysis and stress testing are also adopted to assess the impact of liquidity risk.

42 RISK MANAGEMENT (Continued)

(d) Operational risk

Operational risk refers to the risk of losses associated with internal processes deficiencies, personnel mistakes and information system failures, or impact from other external events.

The Group establishes a framework of policies and procedures to identify, assess, control, manage and report operational risk. The framework covers all business functions ranging from corporate banking, retail banking, trading, corporate finance, settlement, intermediary business, asset management and all supporting functions, including human resource management, financial management, legal affairs, anti-money laundering and administration management. The key elements of the framework are listed as below:

- A multi-level operational risk management framework with segregation of duties between front and back offices under the leadership of senior management;
- A series of operational risk management policies covering all businesses on the basis of core operational risk management policy;
- An emergency plan and a business continuity system designed to deal with emergent and adverse circumstances, including public relation issues, natural disasters, IT system errors, bank runs, robberies, etc.;
- An evaluation system on the operational risk management as well as an inquiry and disciplinary system on the non-compliance issues; and
- An independent risk assessment framework based on the internal audit and the compliance review.

43 SUBSEQUENT EVENTS

The Group has no material events for disclosure subsequent to the end of the reporting period.

44 COMPARATIVE FIGURES

For financial statements disclosure purpose, the Group made reclassification adjustments to some comparative figures.

3 INTERNATIONAL CLAIMS

The Group is principally engaged in business operations within Mainland China and regards all claims on third parties outside Mainland China as international claims.

International claims include loans and advances to customers, balances with the central bank, amounts due from banks and other financial institutions.

A country or geographical area is reported where it constitutes 10% or more of the aggregate amount of international claims, after taking into account all risk transfers. Risk transfers are only made if the claims are guaranteed by a party in a country which is different from that of the counterparty or if the claims are on an overseas branch of a bank whose Head Office is located in another country.
