

CSOP Asset Management Limited

16 February 2022

- ***This is a passive exchange traded fund.***
- ***This statement provides you with key information about this product.***
- ***This statement is a part of the Prospectus.***
- ***You should not invest in this product based on this statement alone.***

Quick facts

Stock code:	3109
Trading lot size:	100 Shares
Fund Manager:	CSOP Asset Management Limited
Custodian:	Cititrust Limited
PRC Custodian:	CITIBANK (CHINA) CO., LTD.
Registrar:	Tricor Investor Services Limited
Sub-Custodian and Administrator:	Citibank, N.A., Hong Kong Branch
Underlying Index:	SSE Science and Technology Innovation Board 50 Index
Base currency:	Renminbi (“ RMB ”)
Trading currency:	HKD
Financial year end of this fund:	31 December
Dividend policy:	Subject to the Manager’s discretion. Currently the Manager intends to distribute income to Shareholders annually (in December). Distributions may be paid out of capital or effectively out of capital and reduce the Sub-Fund’s net asset value (“ NAV ”). However, there is no guarantee of regular distribution nor the amount being distributed (if any). Distributions on any Shares will be in RMB only.
Ongoing charges over a year:	Estimated to be 2.0% #
Estimated annual tracking difference:	Estimated to be -2.0% ##
ETF Website:	http://www.csopasset.com/en/products/co-star50 (this website has not been reviewed by the SFC)

As the Sub-Fund (as defined below) is newly set up, this figure is a best estimate only and represents the sum of the estimated ongoing charges over a 12-month period, expressed as a percentage of the estimated average NAV over the same period. It may be different upon actual operation of the Sub-Fund and may vary from year to year.

This is an estimated annual tracking difference. Investors should refer to the ETF website for more up to date information on actual tracking difference.

What is this product?

The CSOP STAR 50 Index ETF (the “**Sub-Fund**”) is a sub-fund of the CSOP ETF Series OFC (“**Company**”), which is a public umbrella open-ended fund company established under Hong Kong law with variable capital with limited liability and segregated liability between sub-funds. The Sub-Fund is a passively managed index tracking ETF authorised under Chapter 8.6 of the Code on Unit Trusts and Mutual Funds. The shares of the Sub-Fund (the “**Shares**”) are traded on the Stock Exchange of Hong Kong Limited (the “**SEHK**”) like stocks.

SFC registration and authorization do not represent a recommendation or endorsement of the Company or the Sub-Fund nor do they guarantee the commercial merits of the Company or the Sub-Fund or their performance. They do not mean the Company or the Sub-Fund is suitable for all investors nor do they represent an endorsement of its suitability for any particular investor or class of investors.

The Sub-Fund is a physical ETF and invests primarily in China A-Shares listed on the Science and Technology Innovation Board of Shanghai Stock Exchange (the “STAR Board”) of the PRC mainland primarily through the Qualified Foreign Investor (“QFI”) status of the Manager and/or the Shanghai-Hong Kong Stock Connect (“Stock Connect”). The Sub-Fund is denominated in RMB.

Objectives and Investment Strategy

Objective

The investment objective of the Sub-Fund is to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the Index, namely, SSE Science and Technology Innovation Board 50 Index (the “Index”). There is no assurance that the Sub-Fund will achieve its investment objective.

Investment Strategy

In order to achieve the investment objective of the Sub-Fund, the Manager intends to adopt a combination of physical representative sampling and synthetic representative sampling strategy. The Sub-Fund will (i) primarily use a physical representative sampling strategy by investing 50% to 100% of its NAV in Securities constituting the Index (“Index Securities”); and (ii) where the Manager believes such investments are beneficial to the Sub-Fund and will help the Sub-Fund achieve its investment objective, use a synthetic representative sampling strategy as an ancillary strategy by investing up to 50% in financial derivative instruments (“FDIs”), which will only be funded total return swaps with one or more counterparties. Exposure of the Sub-Fund to the Index Securities (either through direct investment or through FDIs) will be in substantially the same weightings (i.e. proportions) as these Index Securities have in the Index.

Physical representative sampling sub-strategy

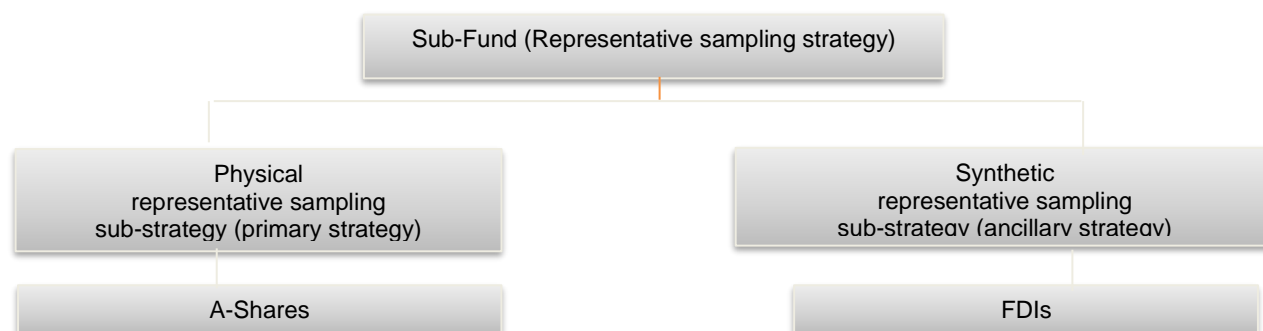

For direct investments in the Index Securities, currently, the Sub-Fund will invest primarily through the Manager’s QFI status and/or the Stock Connect. The Manager may invest up to 100% of the Sub-Fund’s Net Asset Value through either QFI and/or the Stock Connect.

Synthetic representative sampling sub-strategy

The Sub-Fund’s synthetic representative sampling strategy will involve investing up to 50% of its NAV in FDIs, which will only be direct investment in funded total return swap transaction(s) whereby the Sub-Fund will pass on the relevant portion of cash to the Swap Counterparty(ies) and in return the Swap Counterparty(ies) will provide the Sub-Fund with an exposure to the economic gain/loss in the performance of the relevant Securities (net of indirect costs). The Manager will only use a synthetic representative sampling sub-strategy when it considers that such investments are beneficial to the Sub-Fund.

The Sub-Fund will bear the Swap fees, which is a fixed fee payable each time the Sub-Fund enters into a Swap transaction, subject to a minimum annual fee. No fees are payable for the unwinding or early termination of Swaps. The Swap fees will be borne by the Sub-Fund and hence may have an adverse impact on the NAV and the performance of the Sub-Fund, and may result in higher tracking error.

The diagram below shows the investment strategies of the Sub-Fund:

Securities Lending

The Manager may, on behalf of the Sub-Fund, enter into Securities Lending Transactions, with the maximum level for up to 50% and expected level for approximately 20% of its NAV, and is able to recall the securities lent out at any time. All Securities Lending Transactions will only be carried out in the best interest of the Sub-Fund and as set out in the relevant securities lending agreement. Such transactions may be terminated at any time by the Manager at its absolute discretion.

Please refer to the section “Securities Financing Transactions” under “Investment Objective, Investment Strategy, Investment Restrictions, Securities Lending and Borrowing” of Part 1 of the Prospectus and the Appendix of the Sub-Fund in Part 2 of the Prospectus regarding details of the arrangements.

Other investments

The Sub-Fund may also invest not more than 5% of its NAV in cash and money market funds for cash management purpose.

Other than Swaps, the Sub-Fund may also invest in FDIs such as forwards for hedging purposes. The Manager does not currently enter into Sale and Repurchase Transactions, Reverse Repurchase Transactions and other similar over-the-counter transactions.

Prior approval of the SFC (to the extent required under applicable regulatory requirements) will be sought and not less than one month’s prior notice (or such shorter notice period as may be permitted under applicable regulatory requirements) will be given to Shareholders in the event the (i) Manager wishes to invest in Sale and Repurchase Transactions, Reverse Repurchase Transactions and other similar over-the-counter transactions, or (ii) the Manager wishes to adopt an investment strategy other than a combination of physical and synthetic representative sampling strategy.

Index

The Index is a turnover adjusted, market cap-weighted with weighting adjustment factors index consisting of 50 securities with largest market capitalisation and good liquidity listed on the Science and Technology Innovation Board (the “**STAR Board**”) of Shanghai Stock Exchange. The Index aims to reflect the overall performance of leading technological innovation-based enterprises’ securities. The Index is calculated and disseminated in RMB on a real-time basis and is maintained by China Securities Index Co., Ltd. The Index is quoted in RMB.

The Index is a net total return index. A net total return index calculates the performance of the Index constituents on the basis that any dividends or distributions are reinvested.

The Index was launched on 23 July 2020 and had a base level of 1,000 on 31 December 2019.

As of 6 May 2021, the Index had a total market capitalisation of RMB466.78 Billion and 50 constituents.

It is compiled and managed by China Securities Index Co., Ltd. (“**CSI**”). The Manager and its connected persons are independent of CSI.

The most updated list of the constituents of the Index, their respective weightings, additional information and other important news of the Index can be obtained from the website of China Securities Index Co., Ltd at <http://www.csindex.com.cn> (the contents of which has not been reviewed by the SFC).

Wind Code: 000688CNY02.SH

BBG Ticker: STAR50NR Index

Use of derivatives / investment in derivatives

The Sub-Fund’s net derivative exposure may be up to 50% of the Sub-Fund’s NAV.

What are the key risks?

Investment involves risks. Please refer to the Prospectus for details including the risk factors.

1. Investment risk

- The Sub-Fund is not principal guaranteed and your investments may suffer losses. There is no assurance that the Sub-Fund will achieve its investment objective.

2. Equity market risk

- The Sub-Fund's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.

3. New Index risk

- The Index is a new index. The Sub-Fund may be riskier than other exchange traded funds tracking more established indices with longer operating history.

4. Risks relating to STAR Board

- Higher fluctuation on stock prices and liquidity risk: Companies listed on the STAR Board are usually of emerging nature with smaller operating scale. Such companies are subject to wider price fluctuation limits, and due to higher entry thresholds for investors may have limited liquidity, compared to other boards. These companies are subject to higher fluctuation in stock prices and liquidity risks and have higher risks and turnover ratios than companies listed on the main board of the Shanghai Stock Exchange (the "SSE").
- Over-valuation risk: Securities listed on the STAR Board may be overvalued and such exceptionally high valuation may not be sustainable. Stock price may be more susceptible to manipulation due to fewer circulating shares.
- Differences in regulation: The rules and regulations regarding companies listed on the STAR Board are less stringent in terms of profitability and share capital than those in the main board of the SSE.
- Delisting risk: It may be more common and faster for companies listed on the STAR Board to delist. The STAR Board has stricter criteria for delisting compared to other boards. This may have an adverse impact on the Sub-Fund if the companies that it invests in are delisted.
- Concentration risk: The STAR Board is a newly established board and may have a limited number of listed companies during the initial stage. Investments in the STAR Board may be concentrated in a small number of stocks and subject the Sub-Fund to higher concentration risk.
- Investments in the STAR Board may result in significant losses for the Sub-Fund and its investors.

5. Risks of investing in companies focusing on technology innovation

- The Sub-Fund's investments are concentrated in companies focusing on technology innovation. Many of the companies focusing on technology innovation have a relatively short operating history. Technology companies are often characterised by relatively higher volatility in price performance when compared to other economic sectors. Companies in the technology sector also face intense competition, and there may also be substantial government intervention, which may have an adverse effect on profit margins. Rapid changes could render obsolete the products and services offered by these companies. These companies are also subject to the risks of loss or impairment of intellectual property rights or licences, cyber security risks resulting in undesirable legal, financial, operational and reputational consequences. The value of the Sub-Fund may be more volatile than that of a fund having a more diverse portfolio of investments.
- The Sub-Fund may be exposed to risks associated with different technology sectors and themes (including information technology, energy and healthcare, etc). A downturn in the business for companies in these sectors or themes may have adverse effects on the Sub-Fund.

6. Concentration risk and PRC mainland market risk

- The Index is subject to concentration risk as a result of tracking the performance of securities incorporated in, or with the majority of revenue derived from, or with a principal place of business in Mainland China. The NAV of the Sub-Fund is therefore likely to be more volatile than a more broad-based fund, such as a global or regional fund, as the Index is more susceptible to fluctuations in value resulting from adverse conditions in a single region.
- The Sub-Fund's investments are concentrated in a single geographical region (i.e. Mainland China) and the STAR market. As such, it may be subject to greater volatility than broad-based funds.
- Mainland China is considered an emerging market and investments in the Mainland China market may be subject to greater economic, political, tax, foreign exchange, regulatory, volatility and liquidity risks, than that in more developed countries. The A-Shares market is volatile and unstable (e.g. due to suspension of particular stocks or government intervention) than those in more developed markets.

7. Risks associated with investment in FDIs

- The Sub-Fund's synthetic representative sampling strategy will involve investing up to 50% of its NAV in FDIs, which will only be direct investment in funded total return swap transaction(s) through one or more

counterparty(ies). Other than Swaps, the Sub-Fund may also invest in other FDIs such as forwards for hedging purposes. As such, the Sub-Fund may suffer significant loss if a swap counterparty fails to perform its obligations, or in case of insolvency or default of the counterparty(ies).

- Risks associated with FDIs include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. FDIs are susceptible to price fluctuations and higher volatility, and may have large bid and offer spreads and no active secondary markets. The leverage element/component of an FDI can result in a loss significantly greater than the amount invested in the FDI by the Sub-Fund. Exposure to FDIs may lead to a high risk of significant loss by the Sub-Fund.

8. QFI risk

- The Sub-Fund's ability to make the relevant investments or to fully implement or pursue its investment objective and strategy is subject to the applicable laws, rules and regulations (including restrictions on investments and repatriation of principal and profits) in the PRC mainland, which are subject to change and may have retrospective effect.
- The Sub-Fund may suffer substantial losses if the approval of the QFI is being revoked/terminated or otherwise invalidated as the Sub-Fund may be prohibited from trading of relevant securities and repatriation of the Sub-Fund's monies, or if any of the key operators or parties (including RQFII custodian/brokers) is bankrupt/in default and/or is disqualified from performing its obligations (including execution or settlement of any transaction or transfer of monies or securities).

9. Risks associated with the Stock Connect

- The relevant rules and regulations on Stock Connect are subject to change which may have potential retrospective effect. The Stock Connect is subject to quota limitations. Where a suspension in the trading through the programme is effected, the Sub-Fund's ability to invest in China A-Shares or access the PRC mainland market through the programme will be adversely affected. In such event, the Sub-Fund's ability to achieve its investment objective could be negatively affected.

10. Risks relating to securities lending transactions

- Securities lending transactions may involve the risk that the borrower may fail to return the securities lent out in a timely manner and the value of the collateral may fall below the value of the securities lent out.

11. Renminbi currency risk

- RMB is currently not a freely convertible currency as it is subject to foreign exchange controls and restrictions. Non-RMB based investors are exposed to foreign exchange risk and the value of RMB against the investors' base currency (e.g. HKD) may depreciate. Any depreciation of RMB could adversely affect the value of investor's investment in the Sub-Fund.
- Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.
- Under exceptional circumstances, payment of redemptions and/or dividend payment in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.

12. PRC mainland tax risk

- There are risks and uncertainties associated with the current PRC mainland tax laws, regulations and practice in respect of capital gains realised via QFI or Stock Connect (which may have retrospective effect). Any increased tax liabilities on the Sub-Fund may adversely affect the Sub-Fund's value.
- Based on professional and independent tax advice, the Sub-Fund does not make any withholding income tax provision on the gross unrealised and realised capital gains derived from trading of A-Shares.

13. Trading differences risks

- As the STAR Board of the SSE may be open when Shares in the Sub-Fund are not priced, the value of the securities in the Sub-Fund's portfolio may change on days when investors will not be able to purchase or sell the Sub-Fund's Shares. Differences in trading hours between STAR Board of the SSE and the SEHK may also increase the level of premium or discount of the Share price to its NAV.
- While A-Shares are subject to trading bands which restrict increases and decreases in the trading price, Shares of the Sub-Fund listed on the SEHK are not. This difference may also increase the level of premium or discount of the Share price to its NAV.

14. Reliance on market makers risk

- Although the Manager will use its best endeavours to put in place arrangements so that at least one market maker will maintain a market for the Shares and that at least one market maker gives not less than 3 months' notice prior to terminating market making arrangement under the relevant market maker agreement, liquidity in the market for the Shares may be adversely affected if there is no or only one market maker for the Shares. There is also no guarantee that any market making activity will be effective

15. Tracking error risk

- The Sub-Fund may be subject to tracking error risk, which is the risk that its performance may not track that of the Index exactly. This tracking error may result from the investment strategy used, and fees and expenses. The Manager will monitor and seek to manage such risk in minimising tracking error. There can be no assurance of exact or identical replication at any time of the performance of the Index.

16. Trading risk

- The trading price of the Shares on the SEHK is driven by market factors such as the demand and supply of the Shares. Therefore, the Shares may trade at a substantial premium or discount to the Sub-Fund's NAV.
- As investors will pay certain charges (e.g. trading fees and brokerage fees) to buy or sell Shares on the SEHK, investors may pay more than the NAV per Share when buying Shares on the SEHK, and may receive less than the NAV per Share when selling Shares on the SEHK.

17. Risk of early termination

- The Sub-Fund may be terminated early under certain circumstances, for example, where the Index is no longer available for benchmarking or if the size of the Sub-Fund falls below USD10,000,000 (or its equivalent in the Sub-Fund's base currency). Investors may not be able to recover their investments and suffer a loss when the Sub-Fund is terminated.

18. RMB distribution risk

- Investors should note that distributions are made in RMB only. As such, investors may suffer a foreign exchange loss and incur foreign exchange associated fees and charges to receive their dividend.

19. Risk relating to distributions paid out of capital

- Payment of dividends out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions involving payment of dividends out of capital or effectively out of capital of the Sub-Fund may result in an immediate reduction of the NAV per Share of the Sub-Fund.

20. Passive investment risk

- The Sub-Fund is passively managed and the manager will not have the discretion to adapt to market changes due to the inherent investment nature of the Sub-Fund. Falls in the index are expected to result in corresponding falls in the value of the Sub-Fund.

How has the fund performed?

Since the Sub-Fund is newly set up, there is insufficient data to provide a useful indication of past performance to investors.

Is there any guarantee?

The Sub-Fund does not have any guarantees. You may not get back the amount of money you invest.

What are the fees and charges?

Charges incurred when trading the Sub-Fund on SEHK

Fee	What you pay
Brokerage fee	At market rates ¹
Transaction levy	0.0027% ²
Financial Reporting Council ("FRC") transaction levy	0.00015% ³
Trading fee	0.005% ⁴
Stamp duty	Nil

Ongoing fees payable by the Sub-Fund

¹ The brokerage fee is payable in the currency decided by the intermediaries used by the buyer and the seller.

² Transaction levy of 0.0027% of the trading price of the Shares, payable by each of the buyer and the seller.

³ FRC transaction levy of 0.00015% of the trading price of the Shares, payable by each of the buyer and the seller from 1 January 2022.

⁴ Trading fee of 0.005% of the trading price of the Shares, payable by each of the buyer and the seller.

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the NAV of the Sub-Fund which may affect the trading price.

	<u>Annual rate (as a % of the Sub-Fund's NAV)</u>
Management Fee*	0.99% per annum
Custodian Fee (inclusive of fees payable to the Sub-Custodian)	Included in the Management Fee
Registrar Fee	Included in the Management Fee
Performance Fee	Nil
Administration Fee	Included in the Management Fee
Other Ongoing costs	Please refer to Part 2 of the Prospectus

* Please note that some fees may be increased up to a permitted maximum amount by providing one month's prior notice to Shareholders. Please refer to the section headed "**Fees and Charges**" in Part 1 of the Prospectus for details.

Additional Information

The Manager will publish important news and information in respect of the Sub-Fund, both in English and Chinese language at the following website <http://www.csopasset.com/en/products/co-star50> (this website has not been reviewed by the SFC), including:

- the Prospectus (as amended and supplemented from time to time);
- the latest Product Key Facts Statements;
- the latest annual and semi-annual financial reports in English;
- any public announcements made by the Sub-Fund, including information in relation to the relevant Sub-Fund and the Index, notices of the suspension of the calculation of NAV, changes in fees and charges, the suspension and resumption of trading of Shares;
- notices relating to material changes to the Sub-Fund which may have an impact on its investors such as material alterations or additions to the offering documents and constitutive documents of the Sub-Fund;
- the near real-time indicative NAV per Share of the Sub-Fund updated every 15 seconds during normal trading hours on the SEHK in HKD;
- the last NAV of the Sub-Fund in RMB only and the last NAV per Share of the Sub-Fund in HKD and RMB;
- full portfolio information of the Sub-Fund (updated on a daily basis);
- the compositions of the dividends (i.e. the relative amounts paid out of net distributable income and capital) for the last 12 months (also available by the Manager on request);
- the tracking different and tracking error of the Sub-Fund;
- the latest list of participating dealers and market makers; and
- the past performance information of the Sub-Fund.

The near real time indicative NAV per Share in HKD (updated every 15 seconds during SEHK trading hours) and the last NAV per Share in HKD are indicative and for reference purposes only. The near real-time indicative NAV per Share in HKD uses a real-time HKD:CNH foreign exchange rate – it is calculated using the near real-time indicative NAV per Share in RMB multiplied by a real-time HKD:CNH foreign exchange rate provided by ICE Data Indices when the SEHK is opened for trading. Since the indicative NAV per Share in RMB will not be updated when the underlying A-Shares market is closed, any change in the indicative NAV per Share in HKD (if any) during such period is solely due to the change in the foreign exchange rate.

The last NAV per Share in HKD is calculated using the last NAV per Share in RMB multiplied by an assumed foreign exchange rate using the CNH exchange rate quoted by Reuters at 3:00 p.m. (Hong Kong time) as of the same Dealing Day. The official last NAV per Share in RMB and the indicative last NAV per Share in HKD will not be updated when the underlying A-Shares market is closed.

Important

- If you are in doubt, you should seek professional advice.
