### **Amendments to HKAS 1 – Classification of Liabilities as Current or Non-current and related amendments to Hong Kong Interpretation 5 (2020)**

The amendments to HKAS 1 affect only the presentation of liabilities as current or non-current in the statement of financial position and not the amount or timing of recognition of any asset, liability, income or expenses, or the information disclosed about those items.

The amendments clarify that the classification of liabilities as current or non-current is based on rights that are in existence at the end of the reporting period, specify that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability, explain that rights are in existence if covenants are complied with at the end of the reporting period, and introduce a definition of ‘settlement’ to make clear that settlement refers to the transfer to the counterparty of cash, equity instruments, other assets or services.

Hong Kong Interpretation 5 was revised as a consequence of Amendments to HKAS 1 Classification of Liabilities as Current or Non-current to align the corresponding wordings with no change in conclusion.

The amendments are applied retrospectively for annual periods beginning on or after 1 January 2023, with early application permitted.

Based on the Group's outstanding liabilities as at 31 December 2021, the application of the amendments will not result in change in the classification of the Group's liabilities.

#### **Amendments to HKAS 1 and HKFRS Practice Statement 2 – Disclosure of Accounting Policies**

The amendments change the requirements in HKAS 1 with regard to disclosure of accounting policies. The amendments replace all instances of the term “significant accounting policies” with “material accounting policy information”. Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements.

The supporting paragraphs in HKAS 1 are also amended to clarify that accounting policy information that relates to immaterial transactions, other events or conditions is immaterial and need not be disclosed. Accounting policy information may be material because of the nature of the related transactions, other events or conditions, even if the amounts are immaterial. However, not all accounting policy information relating to material transactions, other events or conditions is itself material.

Guidance and examples were provided to explain and demonstrate the application of the “four-step materiality process” described in HKFRS Practice Statement 2. The application of the amendments is not expected to have significant impact on the financial position or performance of the Group but may affect the disclosures of the Group's significant accounting policies. The impacts of application, if any, will be disclosed in the Group's future consolidated financial statements.

#### **Amendments to HKAS 8 Definition of Accounting Estimates**

The amendments to HKAS 8 introduce the definition of ‘accounting estimates’. The amendments clarify the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors. Also, they clarify how entities use measurement techniques and inputs to develop accounting estimates.

The amendments are effective for annual reporting periods beginning on or after 1 January 2023 and apply to changes in accounting policies and changes in accounting estimates that occur on or after the start of that period, with earlier application permitted.

### 3. REVENUE AND SEGMENT INFORMATION

## **MANAGEMENT DISCUSSION AND ANALYSIS**

### **INDUSTRY REVIEW**

Throughout the year of 2021, COVID-19 pandemic continued to wreak havoc around the world, and the emergence of various variant viruses had greatly increased the difficulty of epidemic prevention in various countries. The latest Omicron variant had caused a sharp rise in the number of confirmed cases in many countries and the pandemic restrictions were tightened again. Nevertheless, against this background, the economy of China still recorded a steady growth. According to the data of the National Bureau of Statistics of China, the gross domestic product reached RMB114 trillion for 2021, representing a year-on-year growth of 8.1%. This reflected that China's pandemic prevention and control work has been effectively implemented as the economy resumed steady growth and the product demand picked up in an orderly manner.

China's textile and clothing industry also successfully seized the opportunity to make progress in the midst of stability. Based on the statistics published by the General Administration of Customs of the PRC, China's textile exports set another record high and amounted to US\$314.47 billion in 2021, representing a year-on-year increase of 8.4%, crossing the US\$300 billion threshold in the industry's history for the third time. In particular, apparel exports reached US\$170.26 billion, representing a year-on-year increase of 24%. This was mainly due to the significant increase in clothing demand in developed countries and diversion of export orders back to China as a result of suspension of factories in Southeast Asia countries amid the COVID-19 pandemic. In spite of the recovery of the China's textile and clothing industry, the prevalence of the COVID-19 pandemic, the global supply chain congestion and the sharp rise in the prices of raw materials have added material uncertainties about the future. Textile enterprises in the PRC still need to remain cautious and pay attention to the developments of the global pandemic and even the evolution of geopolitics.

For the Year under Review, with the increase of vaccination rates in many countries around the globe, the relaxation of pandemic prevention and control measures, and the improving global economy and business environment, the Group's orders also recorded a robust growth in the Year under Review. Based on the statistics published by the General Administration of Customs of the PRC, the value of export from China to the United States, the European Union and Japan in 2021, the top three China merchandise importers, increased by 36.4%, 21.5% and 6.3% respectively when compared with the same period last year. For the Year under Review, the Group's orders for domestic fabrics recorded growth.

In the face of the uncertain development of the pandemic, the Group is actively exploring new markets for its fabrics and innerwear products so as to adapt to market changes and strive for new development. In the Year under Review, there was no such urgent order of face mask, and the revenue from sales of face masks decreased accordingly.

The increase in staff cost was mainly due to the increase in social welfare and pension expenses. ## **Inventories**

The inventory balances increased to approximately RMB88.2 million as at 31 December 2021 (2020: RMB59.1 million). The Group continues to implement prudent financial management policies and monitor its capital structure based on the ratio of total liabilities to total assets.

### **Interest rate and foreign currency exposure**

The Group is exposed to cash flow interest rate risks in relation to variable rate interest-bearing borrowings. The pledged bank deposits and bank balances also expose the Group to cash flow interest rate risk due to the fluctuation of the prevailing market interest rate on bank balances. The Group historically has not used any financial instruments to hedge potential fluctuations in interest rates. The management considers that the exposure of the pledged bank deposits and bank balances to cash flow interest rate risk is not significant as the Group does not anticipate significant fluctuation in the interest rate on bank deposits. To mitigate the impact of interest rate fluctuations, the Group will manage the interest expenses by financing with both fixed and variable rate debts, and will continually assess and monitor the Group's exposure to interest rate risk and will consider other necessary actions when significant interest rate exposure is anticipated.

The Group is exposed to foreign currency risk. A significant proportion of the Group's revenue was denominated in USD and certain trade and other receivables, cash and bank balances, trade and other payables and loan from a shareholder of the Company (the "**Shareholders**") are denominated in USD, Japanese yen and HK\$ respectively, while substantial operating expenses are denominated in RMB, and the Group's reporting currency is RMB.

The Group does not have a foreign currency hedging policy. In the event of currency fluctuations, the Group may have to increase its product pricing to compensate for the increase in cost of production. This would lower the Group's market competitiveness, on a price basis, for its products and could result in a decrease in revenue. In the future, the management will monitor foreign exchange exposure and will consider hedging or factoring significant foreign currency exposure should the need arise.

## **Contingent liabilities**

As at 31 December 2021, the Group had no material contingent liabilities.

## **Charges on group assets**

Key components of the Group's remuneration packages include basic salary, medical insurance, discretionary cash bonus and retirement benefit scheme. The Group conducts periodic reviews for the employees and their salaries and bonuses are performance related. The Group has neither experienced any significant problems with its employees or disruptions to its operations due to labour disputes, nor has it experienced any difficulties in the recruitment and retention of experienced employees. The Group maintains a good relationship with its employees.

## **FINAL DIVIDEND**

No payment of a final dividend for the Year under Review was recommended by the Board (2020: Nil).

## **MATERIAL ACQUISITIONS AND DISPOSALS**

No material acquisitions and disposals by the Group were noted during the Year under Review.

## **PROSPECTS**

In the post-pandemic era, factors including the COVID-19 pandemic, rising global inflation, rate hike cycle in the United States and geopolitics, will continue to affect the pace of global economic recovery, and at the same time bring certain risks to the Group's businesses. According to the World Economic Outlook report published by the International Monetary Fund, global economic growth is reduced to 4.4% this year. The report pointed out that multiple uncertainties will continue to haunt the global economy due to the disruptions on the supply side and rising inflation.

With the effective implementation of pandemic prevention and control measures, China's economy will continue to recover as China will stay committed to further expanding and deepening its opening up and pushing high-quality economic development. With the Group's diversified business and geographical advantages, the Group will continually improve its business, adjust the production capacity of its production facilities in various regions and identify projects with investment and development potential other than its principal business to reduce operational risks while seeking development opportunities. The successful restructuring of the Group's ultimate controlling Shareholder in 2021 is believed to help improve the Company's overall financing capacity in the future in the hope of gaining more Shareholder support and generating satisfactory investment returns for Shareholders.

## **PURCHASE, SALE OR REDEMPTION OF LISTED SECURITIES**

Neither the Company nor any of its subsidiaries has purchased, sold or redeemed any of the Company's listed securities during the Year under Review.
