It is expected that the total service fees for the provision of other financial services by China Energy Finance to the Group for the period from 27 April 2022 to 31 December 2024 will not exceed RMB10 million for each year.

## **REASONS FOR AND BENEFITS OF ENTERING INTO THE CONTINUING CONNECTED TRANSACTIONS**

- (1) Institutional risk: China Energy Finance is a platform company authorised by CHN Energy to conduct fund collection, settlement, monitoring and service, with a registered capital of RMB12.5 billion. China Energy Finance shall comply with all relevant laws, regulations, requirements and guidelines formulated by the CBIRC and the People's Bank of China including requirements for the capital adequacy, provision coverage, liquidity and guarantee ratio of China Energy Finance. In addition, according to the requirements of the CBIRC, if China Energy Finance encounters any liquidity issues, CHN Energy, as its parent company, shall provide sufficient capital for China Energy Finance. In addition, China Energy Finance is not allowed to have inter-bank loan balances that exceed its total capital. The operating performance and financial position of China Energy Finance have been satisfactory, with prescribed risk monitoring and good performance in supervision and management, and security level of its settlement system has reached the level of domestic commercial banks. Compared with typical commercial banks, the account supervision of China Energy Finance such as substantial payment is more stringent, and the use of its deposit services provides higher fund security.

- (2) Achieving centralised fund management and efficient fund management: the deposit placed with China Energy Finance facilitates the settlement within the subsidiaries of the Group and between the subsidiaries of CHN Energy, and shortens the time required for transfer and turnover of funds. China Energy Finance will enable the Company to lower the cost of funds by improving the efficiency of the internal settlement and help realise optimisation of cost and operational efficiency. In addition, deposits placed with China Energy Finance would be conducive to realising centralized fund management of subsidiaries of the Group and can satisfy the flexible needs of funds of the Group.
- (3) Good commercial terms: China Energy Finance offers the Group relatively good commercial terms as compared with the domestic commercial banks. For example, China Energy Finance does not charge the Group settlement fees, which are typically charged by commercial banks in the PRC. The deposit rates the Group received from China Energy Finance are not lower than the rates it would receive from the major domestic commercial banks.
- (4) Compared with typical commercial banks in the PRC, China Energy Finance could provide the Group with stronger support and more flexible loan conditions. The collaboration between the Group and China Energy Finance may reduce finance costs, ensure the security of the capital chain and help monitor risks for the Group.
- (5) Familiar with the Company's business, and providing more flexible and convenient services: China Energy Finance is familiar with the capital structure, business operation, capital needs and cash flow pattern of each subsidiary of the Group, enabling it to better forecast the capital needs of the Group. Therefore, China Energy Finance can provide flexible, convenient and low-cost services to the Group at any time; and
- (6) The Group's ability to choose service providers: by entering into the New Financial Services Agreement with China Energy Finance, the Group opens another channel for service providers. The Group is able to cooperate with China Energy Finance, whilst not prohibited from selecting other financial and insurance institutions, including commercial banks in the PRC. The Group may freely cooperate with any institutions selected and obtain any best terms offered. Moreover, the credit services provided by China Energy Finance for the Group may increase credit for the credit provided by domestic commercial banks for the Group.

The Directors are of the view that the transactions contemplated under the New Financial Services Agreement do not have negative effects on the assets or liabilities of the Group.

The Directors, including the independent non-executive Directors, are of the view that the New Financial Services Agreement are conducted on normal commercial terms, in the ordinary and usual course of business of the Group, and are fair and reasonable and in the interests of the Company and its Shareholders as a whole. Mr. Tian Shaolin, Mr. Tang Chaoxiong, Mr. Wang Yiguo and Mr. Ma Bingyan, being connected Directors of the Company, have abstained from voting on the resolution approving the New Financial Services Agreement and its annual caps. Save as disclosed above, none of the other Directors of the Company has any material interest in the New Financial Services Agreement and the transactions contemplated thereunder.
