MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

For the Current Period, the Group's total revenue decreased by 23.1% to approximately RMB108.8 million as compared to the Corresponding Period due to the shutdowns of some locations in the PRC where the central government enforced "zero-COVID" policy to hit highly infectious Omicron variant. Certain LNG supply location experienced particularly significant drop for the demand.

The New Energy Business continued to contribute over 99% to the Group's total revenue. A net loss after tax of approximately RMB12.6 million was recorded for the Current Period as compared to a net loss after tax of approximately RMB50.2 million recorded in the Corresponding Period, mainly caused by the decrease in allowance for impairment of trade receivables from approximately RMB61.2 million in Corresponding Period to approximately RMB9.0 million for the Current Period due to no significant increase in overdue trade receivables balance as at 31 March 2022 when compared to as at 31 December 2021.

As disclosed in the Annual Report 2021, the Group faced difficulty of the collections of trade receivables due to the economic instability under novel coronavirus ("COVID-19"), the customers of the Group slowed down their repayment. The delay of payment and overdue balance led to an increase in expected credit loss rates in 2020 and 2021. The Group's management had assigned additional manpower to the collection team.

The decrease in net loss was offset by a fair value losses of convertible bonds of approximately RMB2.1 million for the Current Period (Corresponding Period: fair value gains of approximately RMB10.2 million).

Loss and total comprehensive income attributable to owners of the Company for the Current Period amounted to approximately RMB11.5 million as compared to loss and total comprehensive income attributable to owners of the Company of approximately RMB45.1 million for the Corresponding Period.

New Energy Business

The Group is principally engaged in the provision of diverse integrated new energy services including technological development, construction related and consultancy services in relation to heat supply and coal-to-natural gas conversion, supply of LNG, coupled with trading of new energy related industrial products.

The Group believes that diversification and expansion of the business both in terms of scopes and footprints are the best strategies to lessen the impact of market uncertainties. During the Current Period, the primary source of revenue from the New Energy Business was contributed by the LNG supply, the city shutdown policy substantially limit the accesses to customers and significantly drag down the demand for the LNG products.

The LNG price competition remained fierce and the margin of the LNG supply business remained low. While the market condition under the continuous impacts of pandemic, there was no new project from the construction related and consultancy services in the New Energy Business. The coal-to-natural gas conversion in Tianjin district tends to be saturated and the Group anticipated that future new project will continue to decrease.

In September 2021, the Group's strategic cooperation with a wholly-owned subsidiary of a top Fortune Global 500 company, namely Jiangsu Shagang Group Co., Ltd. has come into effect to fosters strategic alliances for building a long-term cooperation to embrace potential opportunities ahead brought by new energy growth in future, and on execution level to create synergy effect in areas of LNG refueling stations and pipeline gas supply.

The Group continued to maintain strategic partnerships with Tractebel Engineering S.A. from France and several other vital partners in hope to explore new business opportunities with potential clients.

Property Investments

The Group owns two office premises on Beijing West Road, Jing An District, Shanghai, the PRC. During the Current Period, both premises continued to be on medium-term lease and generated long-term stable rental income for the Group.

FINANCIAL REVIEW

Revenue

For the Current Period, revenue of the Group amounted to approximately RMB108.8 million, representing a decrease of 23.1% from approximately RMB141.4 million for the Corresponding Period. The decrease was mainly attributable to the decrease in sales in certain LNG supply location, due to the outbreak of COVID-19 in some locations in the PRC.

Cost of Sales

The cost of sales for the New Energy Business amounted to approximately RMB111.1 million (Corresponding Period: approximately RMB143.8 million). The decrease mainly represented the decrease in cost in LNG supply during the Current Period.

Gross Loss Margin

Gross loss represents revenue less cost of sales. Gross loss margin of the New Energy Business segment increased from 1.7% for the Corresponding Period to 2.2% for the Current Period. The intense price competition and price fluctuation of LNG led to a thin margin which could not cover the fixed direct cost for both periods.

The gross profit margin of the Property Investments segment was 100% (Corresponding Period: 100%).

Other (Losses)/Gains

Other losses of approximately RMB1.9 million were recorded in the Current Period as compared to other gains of approximately RMB10.2 million in the Corresponding Period, mainly due to the fair value losses of Convertible Bonds of approximately RMB2.1 million recognised in the Current Period (Corresponding Period: fair value gains of approximately RMB10.2 million).

Administrative Expenses

Administrative expenses decreased by 26.1% from approximately RMB6.5 million for the Corresponding Period to approximately RMB4.8 million for the Current Period. The decrease was due to the cost saving measures.

Income Tax Credit

Income tax credit was recorded nil in the Current Period (Corresponding Period: approximately RMB4.2 million). It was derived from the effect of deferred tax asset provided on the allowance for impairment of trade receivables.

Loss and Total Comprehensive Income Attributable to Non-controlling Interests

Loss and total comprehensive income attributable to non-controlling interests decreased by 77.5% from approximately RMB5.1 million for the Corresponding Period to approximately RMB1.1 million for the Current Period. This was mainly attributable to the net loss recorded by the non-wholly owned subsidiaries in Tianjin for the Current Period.

Loss and Total Comprehensive Income Attributable to Owners of the Company

Loss and total comprehensive income attributable to owners of the Company recorded a decrease by 74.5% from approximately RMB45.1 million for the Corresponding Period to approximately RMB11.5 million for the Current Period.

Basic and diluted loss per share for the Current Period were both RMB0.003, as compared to basic and diluted loss per share of RMB0.013 for the Corresponding Period.

PROSPECTS

The green energy LNG is the future energy alternative and therefore the growth potential remains enormous in the country. The prolonged pandemic delays the overall development of industrial and business activities. The Group's top forward priority sets on the path of restore, develop and expand the New Energy Business in scopes and footprint of its emerging knitted network following the post pandemic recovery in the PRC as well as seek opportunity to venture into other overseas markets such as Europe to extend the market footprint. The Group will keep on pursuing growth opportunities through establishing new joint ventures and carrying out merger and acquisition including but not limit to secure stable LNG supply.

As some of our LNG supply location was shutdown due to the COVID-19 pandemic in April and May 2022, the management expect the revenue of second quarter of 2022 will be lower than that of the same period in 2021.

Furthermore, the Group will properly utilize the capital generated from the 3-year Convertible Bonds issued in late 2020 to enhance its existing business and support any new opportunities.
