FIRST QUARTERLY REPORT

* for identification purposes only

CHARACTERISTICS OF GEM (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

*This report, for which the directors (the “**Directors**”) of Xi’an Haitian Antenna Technologies Co., Ltd.* (the “**Company**”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM (the “**GEM Listing Rules**”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief, the information contained in this report is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this report misleading.*

20. EARNINGS PER SHARE

The calculation of basic earnings per share is based on the unaudited net profit attributable to owners of the parent company for the three months ended 31 March 2022 of RMB(5,878,713.84) (2021: RMB(2,767,107.24)) and the weighted average number of 1,897,629,000 shares (2021: 1,897,629,000 shares) in issue during the period. The weighted average number of ordinary shares is the number of shares in issue at the beginning of the period, adjusted by the number of shares issued during the period multiplied by a time-weighting factor.

The diluted earnings per share is equal to the basic earnings per share as calculated above since the Company does not have any potential shares outstanding for the both periods.

21. DIVIDENDS

The Board does not recommend the payment of a dividend for the three months ended 31 March 2022 (2021: nil).

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

Total Operating Income

The unaudited total operating income for the three months ended 31 March 2022 was approximately RMB7.09 million, representing approximately 90% of the unaudited total operating income for the corresponding period in 2021.

In response to the spread of COVID-19 in mainland China, various levels of temporary control measures were implemented during the period, which not only caused delay in the production process and affected operating income, but also prolonged production time and increased production costs. For agricultural products, the temporary control measures also resulted in the failure of the agricultural products to be supplied to the market at the most suitable time, which affected the sales price.

Artificial dielectric lens antenna products (the “**Dielectric Lens Antennas**”) of the Company were introduced to the market since 2019, after which the Company concentrated all available resources to develop and promote the Dielectric Lens Antennas. Approximately RMB5.43 million was generated from sales of the Dielectric Lens Antennas, which accounted for approximately 80% of main business operating income of the Group in the first quarter of 2022.

The Group carried out the production and sales of agricultural products, mainly live chicken, chicken meat and related non-staple foods, since 2016 in order to actively respond to the national policy on poverty alleviation and fulfil its social responsibilities. Approximately RMB1.32 million was generated from sales of agricultural products, which accounted for approximately 20% of main business operating income of the Group in the first quarter of 2022.

No operating income was recorded for both operating segments of sales of underwater surveillance and related products, and sales of aircraft products in the first quarter of 2022 as the Group did not actively carry out any promotion.

Gross Profit

During the three months ended 31 March 2022, an unaudited gross profit of approximately RMB2.23 million was recorded which represented gross profit margin of approximately 31.39%, compared to the unaudited gross profit margin of approximately 54.03% for the corresponding period in 2021. The decline in gross profit margin was mainly attributable to a decrease in sales price of the Dielectric Lens Antennas in order to expand sales scale of the Company to major communication network operators, and mobile communication suppliers of system integration and system equipment. At the same time, the temporary control measures in the first quarter of 2022 not only restricted sales price of agricultural products, but also raised breeding costs of live chicken. The gross profit margin for the period is still within reasonable range as when comparing to the gross profit margin of approximately 31.96% for the whole year of 2021.

Segment Performance

Segment performance was evaluated after considering gross profit, selling expenses, depreciation and amortisation expenses under administrative expenses, research and development expenses, credit and assets impairment loss of each operating segment.

Selling expenses increased from approximately RMB0.63 million for the corresponding period in 2021 to approximately RMB1.79 million for the three months ended 31 March 2022 due to an increase in payroll of sales force of approximately RMB0.36 million and network field test expenses of approximately RMB0.73 million.

Research and development expenses decreased from approximately RMB2.91 million for the corresponding period in 2021 to approximately RMB1.65 million for the three months ended 31 March 2022 which were solely used for further development of the Dielectric Lens Antennas.

No material impairment loss was recognised for receivables and assets for the three months ended 31 March 2022.

Despite ever-increasing sales orders for the Dielectric Lens Antennas, the production capacity was operated below normal level in the first quarter of 2022 due to temporary control measures and greater working capital requirement. The operating segment of sales of antenna products and the provision of related services recorded a segment loss of approximately RMB3.16 million.

The supply and sales price of agricultural products was affected by temporary control measures, the operating segment of sales of agricultural products recorded a segment loss of approximately RMB0.08 million.

Since no operating income was generated from the operating segments of sales of underwater surveillance and related products, and sales of aircraft products, segment losses were recorded.

Other Expenses, Expenditure, Gain and Income

Administrative expenses increased from approximately RMB3.75 million for the corresponding period in 2021 to approximately RMB4.52 million for the three months ended 31 March 2022 due to an increase in amortisation expenses in respect of intangible assets of approximately RMB1.78 million.

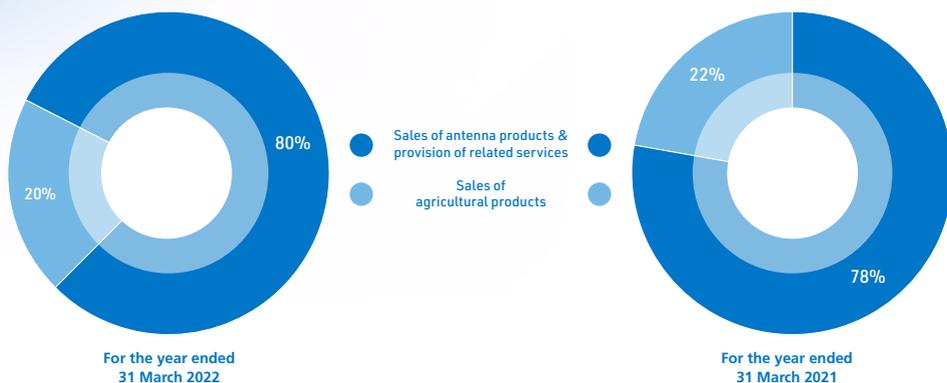

Financial expenses increased from approximately RMB0.12 million for the corresponding period in 2021 to approximately RMB0.20 million for the three months ended 31 March 2022 of which approximately RMB0.11 million was attributable to interest expenses of short-term borrowings. The working capital requirement for ever-increasing sales orders of the Dielectric Lens Antennas became greater, and the procedures for issuance of new shares were initiated but were not completed in the year of 2021. Accordingly, approximately RMB8.50 million short-term bank borrowings were raised by the end of 2021 and approximately RMB1.90 million were repaid during the period.

No gain was recognised as financial assets measured at fair value through profit or loss for the three months ended 31 March 2022, compared to approximately RMB0.10 million for the corresponding period in 2021. It was because all significant investment was disposed of in the year of 2021 in order to meet the working capital requirement of the Group.

Net Loss

As the decrease in sales price of the Dielectric Lens Antennas and the low sales price of agricultural products by the influence of temporary control measures in the first quarter of 2022, the Group recorded an unaudited net loss of approximately RMB5.94 million for the three months ended 31 March 2022, compared to the unaudited net loss of approximately RMB2.79 million for the corresponding period in 2021.

Composite of the Group's main business income by reportable and operating segments for the three months ended 31 March 2022, together with the comparative figures for the corresponding period in 2021 are as follows:

PROSPECTS

Due to the influence of COVID-19 in the year of 2021, certain procurement activities of major communication network operators, and mobile communication suppliers of system integration and system equipment were postponed to 2022. As the Group conducted a series of network field tests and technology exchanges previously, the Group has confidence to obtain a high share of bidding in various subsequent procurement activities.

Except for the production capacity of the Dielectric Lens Antennas has been increased to cope with ever-increasing sales orders, a private placement of no more than 124,466,666 domestic shares was approved by the China Securities Regulatory Commission on 23 March 2022. It is expected that the private placement would be completed in the second quarter of 2022 to provide sufficient working capital for ever-increasing sales orders.

The Group will focus on the development of the operating segment of sales of antenna products and provision of related services, and will pay close attention to the working capital requirement of ever-increasing sales orders of the Dielectric Lens Antennas. The Group will also consider further financing through bank borrowings, issuance of shares and bonds to ensure smooth operation and development.
