CHAIRMAN'S STATEMENT

To all shareholders,

On behalf of the Board (the "**Board**") of directors (the "**Directors**") of Dowway Holdings Limited (the "**Company**", and together with its subsidiaries, the "**Group**"), I am pleased to present the Group's unaudited first quarterly results for the three months ended 31 March 2022 (the "**Period**").

As an integrated exhibition and event management service provider in the People's Republic of China ("**PRC**"), the Group is mainly engaged in design, planning, coordination and management services for exhibitions and events across more than 50 cities in the PRC. Since 2009, the Group has been providing integrated exhibition and event management services to domestic and overseas world-renowned automobile brands, primarily for facilitating showcases, promotion and/or sales of automobiles. The Group also undertakes projects related to exhibitions and events from non-automobile companies. Through its dedicated efforts and reliable services, the Group has established a strong reputation in this field and a solid and loyal customer base.

In 2021, China secured its second-place ranking in world GDP as its GDP in 2021 exceeded RMB114 trillion, representing a year-on-year increase of 8.1% and a 2-year average growth of 5.1%. The overall economic situation was stable, with a top ranking among the world's major economies. It was not easy for the country to maintain such growth and achievements amid the influence of rising raw material costs and the impact of the pandemic and floods. Besides that, the value added of the service sector increased by 8.2% year-on-year to approximately RMB61 trillion, accounting for 53.3% of GDP and contributing 54.9% to the economic growth. It is evident that the service sector has shown strong resilience and momentum and maintained a recovery growth trend throughout the year. The exhibition and curatorial business have also been driven by this industry trend, swiftly recovered and revitalized from the downturn of the epidemic and have achieved stable and outstanding results.

In the first quarter of 2022, faced with the multiple tests of increasingly grave and complex international environment and frequent outbreaks of the COVID-19 pandemic in China, China's government coordinated the efforts of COVID-19 prevention and control and economic and social development in a scientific way, and made economic stability the top priority and pursued progress while ensuring stability. As a result, the national economic recovery was sustained and the operation of the economy was generally stable.

According to preliminary estimates (data released by National Bureau of Statistics of China on 18 April 2022), the gross domestic product (GDP) in the first quarter reached RMB27,017.8 billion, up by 4.8 percent year on year at constant price, or up by 1.3 percent over that in the fourth quarter of 2021. The service sector continued to recover. The Index of Services Production increased by 2.5 percent year on year in the first quarter and decreased by 0.9 percent year on year in March. In the first two months, the business revenue of service enterprises above the designated size grew by 13.6 percent year on year. In March, the Business Activity Index for Services stood at 46.7 percent, and the Business Activity Expectation Index was 53.6 percent. Industries involving contacts and gatherings, such as railway transportation, air transportation, lodging and catering and including exhibition industry, were greatly impacted by the pandemic. The Business Activity Index for industries like telecommunication, broadcast, television and satellite transmission services, monetary and financial services, and insurance services stayed within the high expansion range of 55.0 percent and above. Generally speaking, the national economy in the first quarter continued the momentum of recovery, performing within the reasonable range. However, the faster-than-expected first-quarter growth was mainly aided by robust growth in the first two months before the weakening in economic activities in March, and warned of challenges and uncertainties at both home and abroad that may cloud the overall outlook. A stronger macro policy is expected in the second quarter to shore up the growth, saying that China has the potential to meet its economic growth target of around 5.5 percent for this year.

CHAIRMAN'S STATEMENT

During the Period, the Group has managed and coordinated 30 exhibitions and event projects, 8 exhibition showroom projects and 4 advertisement projects, among which 10 projects had been completed, which collectively generated a revenue of approximately RMB10.06 million, representing a period-on-period decrease of RMB12.02 million or approximately 54.42%. The Group recorded a gross loss of approximately RMB0.88 million, decreased by approximately RMB1.64 million period-on-period, which was primarily due to the exhibition and event management services industry involving gatherings and contacts impacted greatly by the pandemic in the PRC in the period of 2022. The Group recorded a net loss attributable to the owners of the Company of approximately RMB3.62 million during the Period. The Board does not recommend the payment of dividend for the Period.

Looking ahead, despite facing a complicated international situation and domestic COVID-19 cases, the fundamentals of China's long-term sound economic growth remain unchanged. The government will step up macroeconomic policy support to stabilize the economy and strive to meet the annual growth target. Moreover, favorable policies launched due to the inner circulation policy will continue to be advocated by the PRC government. The Group will continue to uphold the "customer-oriented" service philosophy and adhere to the principle of "high quality and efficiency; cooperation with a view to achieve a win-win situation" and will closely monitor the development trends of the PRC exhibition and related services industries. It will dig into the needs of its core customers in order to provide more dedicated services. Meanwhile, the Group will horizontally develop the advertising and other exhibition and promotion businesses to improve their business layout. It will also grasp all potential opportunities that arise within the market so as to further promote the development of the Group's exhibition and event management and exhibition showroom services businesses, in a bid to maintain the Group's leading position in the industry, thrive in an increasingly competitive environment and generate long term value for the Company's shareholders and investors.

Finally, on behalf of the Board, I would like to extend my sincere gratitude to the shareholders, customers and business partners who have always supported the Group, as well as all my colleagues who have dedicated and worked hard for the Group.

MANAGEMENT DISCUSSION AND ANALYSIS

MARKET REVIEW

In 2021, the global economic recovery continued as economic performance accelerated amid the lifting of most pandemic restrictions and deployment of COVID-19 vaccines. According to the International Monetary Fund (IMF), global growth reached 5.9% during the year. Thanks to the effective anti-pandemic measures and a series of economic support and stimulus policies implemented by the Chinese Government, China sustained the steady recovery of the national economy and maintained the leading position in economic growth and pandemic prevention and control in the world. China's economy showed a strong rebound in 2021. Gross domestic product (GDP) expanded 8.1%, beating the government's own target of "expected above 6%", despite the complex international environment, resurgent COVID-19 cases, and severe flooding in Henan province. Consumption remained one of the key drivers for China's economic growth. Retail sales grew by 12.5%, in which retail sales of automobiles exceeded RMB4 trillion to RMB4.4 trillion, up 7.6% year-on-year, according to the China Association of Automobile Manufacturers (CAAM).

Meanwhile, China's exhibition industry saw rapid expansion in 2021 against the backdrop of severe challenges brought by the COVID-19 pandemic to offline exhibitions across the world. As a result of the swift economic recovery and effective control of the virus within the border, China has emerged as a haven for global businesses.

Under this background, a total of 2,949 economic and trade exhibitions were held in China in 2021, surging 48.6% year-on-year, as the domestic exhibition industry began to recover. The exhibitions covered a total exhibition area of 92.99 million square meters in 2021, increased by 27.2% from the previous year. Digital exhibitions have become an important complement to offline exhibitions during the pandemic. As the shift from offline to online exhibitions accelerated, many Chinese exhibitions adopted a hybrid mode to help Chinese and overseas companies better expand international trade channels. During the year, the automobile exhibition sector experienced flourishing growth. It remained one of the leading sectors in terms of the number and area of exhibitions. The number of exhibitions in the sector increased substantially to 308, up 125 or 68.3% as compared with 2020, while the total exhibition area was 11.158 million square meters, representing a year-on-year increase of 3.309 million square meters or 42.2%. A couple of influential automobile exhibitions took place as scheduled, including the 19th Shanghai International Automobile Industry Exhibition 2021, the first A-class international auto show since the outbreak of COVID-19 pandemic. It fully demonstrated the economic recovery and growth following the successful fight against the pandemic, which in turn restored global confidence in the automobile market.

During the first quarter of 2022, China's economy registered a steady start with the GDP up by 4.8 percent year on year, demonstrating its resilience and potential in the face of a complicated external environment and resurgent domestic COVID-19 cases. China's government will coordinate the efforts of COVID-19 prevention and control and economic and social development, make economic stability their top priority and pursue progress while ensuring stability.

PRINCIPAL RISKS AND UNCERTAINTIES

The Group faces the following principal risks and uncertainties that may materially and adversely affect its business, financial status and operating results:

1. The exhibition services industry in the PRC has relatively low entry barriers and competition is keen within the industry.
2. The Group's business depends heavily on the provision of exhibition and event management services in the automobile industry.
3. The majority of the Group's customers are automobile companies and there is no assurance that it can successfully diversify its customer base.
4. There is no assurance that the demand for integrated exhibition and event management services the Group provides can continue or increase.
5. There may be fluctuations in the Group's cost of service which it may not be able to pass on to customers.

MANAGEMENT DISCUSSION AND ANALYSIS

6. The Group may face cash flow problems if it is unable to receive payments from customers on time and in full under the current pricing policy.
7. The Group may be exposed to litigation risk as a result of the engagement of suppliers without obtaining written consent from customers.
8. The Group relies on suppliers for the provision of construction services, leasing of equipment and logistics and transportation services, hence may have to bear the consequences should these suppliers deliver substandard services on its own.
9. The Group relies on its senior management and other key personnel and may not be able to retain these staff to provide services.
10. The Group may not be able to implement its business strategies and its future growth could be limited.
11. The control and prevention of epidemic around the world are still challenging and risky and may continue to influence on the recovery of exhibition industry in PRC to normal, which may in turn have a material and adverse effect on the Group's business, financial position and results of operations.

The cost of exhibition and event related services provided by suppliers makes up a significant portion of the Group's cost of service. The following uncertainties may affect the Group's efforts to implement cost control measures:

1. As human resources and costs of construction materials and equipment are the major components of the cost of exhibition and event related services, increase in salary of employees of suppliers and average consumer prices may push up the lump sum cost of exhibition and event related services provided by suppliers.

Major risks and uncertainties relating to the implementation of business strategies

1. The Group expects to tender proposals to potential new customers with lower profit margins in the short run in connection with its future expansion to new segments in the market and such expansion could exert great pressure on allocation of resources.
2. The Group cannot guarantee that it will have sufficient resources to support future development. Its future growth is also subject to the preferences of potential clients and the overall market situation. Failure to execute expansion strategy effectively may lead to higher costs, inefficient operation flow and decline in profitability.

FUTURE PLANS FOR MATERIAL INVESTMENTS, ACQUISITIONS AND CAPITAL ASSETS

The Group did not have other plans for material investments, acquisitions and capital assets during the Period.

MATERIAL ACQUISITIONS AND DISPOSALS RELATED TO THE SUBSIDIARIES AND ASSOCIATED COMPANIES

During the Period, the Group did not have any material acquisitions and disposals related to the subsidiaries and associated companies.

MANAGEMENT DISCUSSION AND ANALYSIS

CONTINGENT LIABILITIES

As at 31 March 2022, the Group had no significant contingent liabilities (as at 31 March 2021: Nil).

HUMAN RESOURCES

As at 31 March 2022, the Group employed a total of 54 employees, among which 9 of them were at management level, all stationed in the PRC. For the Period, the staff costs (including Directors' emoluments) were approximately RMB2.23 million (for the three months ended 31 March 2021: approximately RMB2.65 million). The Group conducts periodic performance review with employees and determines their salaries, benefits and discretionary bonuses based on factors including qualifications, contributions, years of experience and performance.

In accordance with the applicable PRC laws and regulations, the Group has made contributions to social security insurance and housing provident funds for all eligible staff. For the Period, the total amount contributed in these areas by the Group was approximately RMB0.82 million. The Group has complied with all the requirements about social security insurance and housing provident fund obligations applicable under the PRC laws and regulations.

In order to continually maintain the quality, knowledge and skills of employees, the Group has provided various training opportunities, which include on-the-job training, technical training and professional training.

The Group has maintained a good working relationship with its employees. During the Period, the Group has not experienced any significant labor disputes which are likely to have an adverse material impact on business, financial conditions and results of operations.

The Company's policies concerning emoluments of Directors are (i) the amount of emoluments is determined on the basis of the relevant Director's experience, responsibility, workload and the time devoted to the Company; and (ii) non-cash benefits may be provided to the Directors under their remuneration package.

FOREIGN EXCHANGE RISK

The Group is not exposed to any significant foreign exchange risk in the normal course of business, as it operates in the PRC with the majority of the transactions being conducted and settled in RMB.

CREDIT RISK

Credit risk exposures arise principally in cash and cash equivalents, trade and other receivables, notes receivables and contract assets shown on consolidated balance sheets.

The Group takes on exposure to credit risk, which is the risk that a customer or counterparty will cause a financial loss for the Group by failing to discharge an obligation. Credit risk is one of the most significant risks for the Group's business.

For cash at bank, the Group manages the credit risk by placing its domestic deposits in reputable nationwide financial institutions with good credit ratings in the PRC and overseas' deposits in reputable international financial institutions. The Group believes those banks and financial institutions are of high-credit-quality without significant credit risk. Thus it considers its cash at bank are not at high credit risk.

The Group's trade receivables arise from exhibition and event marketing services fees, over 70% of which are in turn derived from main customers that are renowned automobile companies. Should there be change in the strategic relationships with these main customers that might cause change in the cooperative arrangements; or if they experience financial difficulties themselves which in turn causes difficulties in their settling payables to the Group, the Group's revenue from those automobile companies might be adversely affected due to deterioration in recoverability of trade receivables from them.

MANAGEMENT DISCUSSION AND ANALYSIS

To manage this risk, the Group's management team maintains frequent communications with their contacts at those automobile companies to ensure the Group captures the most updated understanding about relevant customer's business status and assesses their credibility. In view of the smooth cooperation history with these automobile companies and the sound collection history of receivables due from them, management believes that the credit risk inherent in the Group's outstanding trade receivable balances due from those automobile companies is low. As for new customers, the management is responsible for managing and analysing the credit risk for each of their new customers before they offer such new customers standard payment and delivery terms and conditions. To do such assessment, various factors including their financial position and other factors about these new customers would be considered.

The Group's other receivables comprise of deposits, staff advance and loan to employees, which have a low risk of default, thus the Group considers its other receivables are not at high credit risk.

LIQUIDITY RISK

The Group regularly monitors current and expected liquidity demand to ensure that it maintains sufficient cash reserves to meet related demand in the short and long run. The Group monitors liquidity position through rolling forecasts of liquidity requirements in order to ensure that it has sufficient cash on hand to satisfy operational needs.

PROSPECTS

In the first quarter of 2022, China's government consolidated and expanded the achievements of prevention and control as well as economic and social development, and implemented macroeconomic policies in a scientific and targeted way. The national economy in the first quarter continued the momentum of recovery, performing within the reasonable range. However, the faster-than-expected first-quarter growth was mainly aided by robust growth in the first two months before the weakening in economic activities in March, and warned of challenges and uncertainties at both home and abroad that may cloud the overall outlook. The government will further strengthen the implementation of macro policies, take solid steps to ensure stability on six key fronts (employment, the financial sector, foreign trade, foreign investment, domestic investment, and expectations) and security in six key areas (job security, basic living needs, operations of market entities, food and energy security, stable industrial and supply chains, and the normal functioning of primary level governments), focus on maintaining stable macroeconomic performance, continue to stabilize employment and prices, ensure to meet basic living needs and keep the economy performing within an appropriate range. The exhibition and event services industry will recover step by step and is promising to return to normal operation. Under the above situation, the Group will increase its online exhibitions, strengthen its online service capabilities by updating audiovisual and information technology equipment and lower the expense of leasing multimedia audiovisual equipment and venues from third-party suppliers. The Group will actively tackle the challenges due to force majeure, seize new opportunities for business transformation and create new business growth.

Looking forward, the Group will effectively improve the level of co-ordination and management of exhibitions and events through the implementation of the above business strategies, improve customer service and experience in an all-round way, actively seek reformation with a view to continuing to create sustainable returns for shareholders.
