### **3 CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS**

The preparation of the Interim Financial Information requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

In preparing the Interim Financial Information, the significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements for the year ended 31 December 2021.

### **4 FINANCIAL RISK MANAGEMENT AND FINANCIAL INSTRUMENTS**

#### **4.1 Financial risk factors**

The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, cash flow and fair value interest rate risk and price risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance. Risk management is carried out by the financial department under policies approved by the Board.

The Interim Financial Information has not included all financial risk management information and disclosures required in the annual financial statements, and should be read in conjunction with the annual financial statements for the year ended 31 December 2021.

There have been no changes in the risk management policies since period end.

## 4 FINANCIAL RISK MANAGEMENT AND FINANCIAL INSTRUMENTS

*(continued)*

### 4.2 Credit risk

The Group's maximum exposure to credit risk in relation to financial assets is the carrying amounts of cash and cash equivalents, restricted cash at banks, trade receivables, contract assets and other receivables.

#### (i) Risk management

As at 30 June 2022, substantially all (31 December 2021: same) the Group's bank deposits are deposited with major financial institutions incorporated in the PRC and Hong Kong, which management believes are of high credit quality without significant credit risk (31 December 2021: same).

As at 30 June 2022, approximately 80.4% (31 December 2021: 84.0%) of the Group's trade receivables were due from the five largest customers. In respect of trade receivables and other receivables, periodical credit evaluations are performed taking into account the counterparty's financial position, past experience, future economic environment and other factors.

None of the Group's trade receivables and other receivables has any collateral. However, the Group has policies in place to ensure that sales are made to customers with appropriate credit history and the Group performs periodic credit evaluations of its customers.

## 4 FINANCIAL RISK MANAGEMENT AND FINANCIAL INSTRUMENTS

*(continued)*

### 4.3 Fair value estimation

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are recognised and measured at fair value in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Group has classified its financial instruments into Level 1 prescribed under the accounting standards. An explanation of Level 1 to 3 follows underneath the table.

	<b>Level 1</b> HK\$'000
<hr/>	
<b>Financial assets at fair value through profit or loss ("FVPL")</b>	
At 30 June 2022 (unaudited)	<b>60,875</b>
At 31 December 2021 (audited)	67,758

Level 1: The fair value of financial instruments traded in active markets (such as publicly traded derivatives, and trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the Group is the current bid price. These instruments are included in level 1.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities.

## 4 FINANCIAL RISK MANAGEMENT AND FINANCIAL INSTRUMENTS

*(continued)*

### 4.3 Fair value estimation *(continued)*

Specific valuation techniques used to value financial instruments include:

- the use of quoted market prices or dealer quotes for similar instruments
- the fair value of the remaining financial instruments is determined using discounted cash flow analysis.

For the six months ended 30 June 2022, there were no significant changes in the business or economic circumstances that affect the fair value of the Group's financial assets and financial liabilities.

The carrying amounts of the Group's cash and cash equivalents, restricted cash at banks, trade receivables, other receivables, trade and notes payable, lease liabilities and other payables and accruals approximate their fair values due to their short maturities.

## 5 SEGMENT INFORMATION

Management has determined the operating segments based on the reports reviewed by the chief operating decision-maker ("**CODM**"), who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the executive directors of the Company.

The Group is principally engaged in the manufacturing and sales of packaging materials for cigarette in the PRC (the "**Cigarette Packaging Business**") and environmental and ecological restoration treatment business in the PRC (the "**Environmental Treatment Business**"), which are identified as reportable segments. Meanwhile, the Group diversified its business into other business, which is in a preliminary stage and contributed to less than 10% of the Group's revenue, profit or loss and assets.

The CODM assesses the performance of the operating segments based on a measure of operating profit or loss excluding other gains or losses arising from financial assets at FVPL.

Segment assets exclude financial assets at FVPL and deferred tax assets. Segment liabilities exclude current income tax liabilities and deferred tax liabilities.

## 10 INCOME TAX CREDIT/(EXPENSE)

The Company was incorporated in the Cayman Islands as an exempted company with limited liability under the Companies Law of Cayman Islands and accordingly, is exempted from Cayman Islands income tax. The Company's direct subsidiary in the British Virgin Islands was incorporated under the International Business Companies Act of the British Virgin Islands and, accordingly, is exempted from British Virgin Islands income tax.

The Company's operating subsidiaries incorporated in Hong Kong are subject to income tax at the rate of 16.5% (six months ended 30 June 2021: 16.5%) on the assessable profits arising in Hong Kong during the six months ended 30 June 2022. For the six months ended 30 June 2022, the Group is eligible to nominate one Hong Kong incorporated entity in the Group, which is Huge East Investment Limited, to be taxed under a two tiered profits tax rate system, whereby profits tax will be chargeable on the first HKD2,000,000 of assessable profits at 8.25% and assessable profits above this threshold will be subject to a rate of 16.5% (six months ended 30 June 2021: same). Hong Kong profits tax of the other Hong Kong incorporated group entities has been provided for at a rate of 16.5% on the estimated assessable profits. The profit of the other Hong Kong incorporated group entities is mainly derived from dividend income from subsidiaries and interest income from banks, which is not subject to Hong Kong profits tax.

Pursuant to the PRC Enterprise Income Tax Law ("**EIT Law**") and the Implementation Rules of the EIT Law, the EIT rate for domestic enterprises and foreign invested enterprises is 25%, effective from 1 January 2008.

On 1 December 2020, Shantou Xinda Colour Printing & Packaging Material Co. Ltd. ("**Shantou Xinda**"), the Group's subsidiary in the PRC, successfully renewed the High and New Technology Enterprise Certificate ("**the Certificate**") which was effective for three years commencing on 1 January 2020. As there is no change to the relevant laws and regulations, the directors assess and consider that Shantou Xinda will continue to be granted the preferential tax treatment through an application of renewal. Accordingly, a tax rate of 15% has been applied when considering current income tax for the period and the deferred income tax for the six months ended 30 June 2022 (six months ended 30 June 2021: 15%).

**10 INCOME TAX CREDIT/(EXPENSE)** *(continued)*

According to the EIT Law and Implementation Rules, starting from 1 January 2008, a withholding income tax of 10% will be levied on the intermediate holding companies outside the PRC when their PRC subsidiaries declare dividends out of profits earned after 1 January 2008. A lower 5% withholding income tax rate may be applied when the intermediate holding companies of the PRC subsidiaries are established in Hong Kong and fulfil requirements under the tax treaty agreements between the relevant authorities of the PRC and Hong Kong. Hence, the Group used 5% as its withholding tax rate for certain Hong Kong intermediate holding companies which are expected to fulfill the aforesaid conditions.
