THIRD QUARTERLY RESULTS ANNOUNCEMENT FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2022

CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

11. CONTINGENT LIABILITIES

(a) Contingent liabilities in respect of legal claims

As at 30 September 2022, there were a number of labour claims lodged against the Group arising from the ordinary course of its civil engineering construction business. No specific claim amount has been specified in the applications of these claims. It is anticipated that, the outflow of resources required in settling these claims, if any, was remote as these claims are usually covered by insurance maintained by relevant main contractors. Therefore, the ultimate liability under these claims would not have a material adverse impact on the financial position or performance of the Group and no provision for the contingent liabilities in respect of these claims is necessary.

(b) Guarantee issued

The Group provided guarantee to an insurance company in respect of the followings:

	As at 30 September 2022 HK\$'000 (Unaudited)	As at 31 December 2021 HK\$'000 (Audited)
Surety bonds issued in favour of customers (<i>Note</i>)	<u>7,889</u>	<u>9,169</u>
	<u>7,889</u>	<u>9,169</u>

Note:

As at 30 September 2022, one surety bond (as at 31 December 2021: two) at an amount of approximately HK\$7,889,000 was given by an insurance company in favour of the Group's customers (as at 31 December 2021: approximately HK\$9,169,000) as security for the due performance and observance of the Group's obligations under the subcontracts entered into between the Group and its customers. If the Group fails to provide satisfactory performance to its customers to whom the surety bonds have been given, the customers may demand the insurance company to pay to them the sum or sums stipulated in such demand. The Group will then become liable to compensate the insurance company accordingly pursuant to the guarantee granted by the Group to such insurance company. The surety bonds will be released upon completion of the subcontract works for the customers.

It is anticipated that the amount of approximately HK\$7,889,000 as at 30 September 2022 was the maximum exposure to the Group (as at 31 December 2021: approximately HK\$9,169,000). It is not probable that the insurance company would claim against the Group for losses in respect of the guaranteed contracts as it is unlikely that the Group will be unable to fulfil the performance requirements of the relevant contracts. Accordingly, no provision for the Group's obligations under the guarantee has been made as at 30 September 2022 (as at 31 December 2021: nil).

12. CAPITAL COMMITMENT

As at 30 September 2022, the capital commitment of the Group for the acquisition of property, plant and equipment is approximately HK\$225,000 (as at 31 December 2021: approximately HK\$410,000).

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

The Group is an established subcontractor engaged in civil engineering works and operating solely in Hong Kong. The Group is principally engaged in the provision of underground construction services and mainly serves main contractors in public sector infrastructure projects. Public sector projects refer to the projects in which the main contractors are employed by the Hong Kong Government, its statutory bodies or statutory corporations. The Group has also been involved in some private sector projects, which have covered all other types of engagements.

The Group provides underground construction services, in particular, tunnel construction services (including excavation, shotcreting, shutter design and fabrication, tunnel lining services, shafts, advanced and structural works) and utility construction (mainly the construction and refurbishment of underground public utility works such as road and drainage works) and others (mainly structural works related to tunnel construction and construction of service buildings and support structure for the public). The Group also provides programme design, costing and management for underground construction services. As a result, the Group works routinely with its key clients in pre-tenders for various underground construction projects.

Since 2014, the Group has been focusing on the development of a complete suite of tunnel construction services, which has laid a solid foundation for the Group's growth and a strong advantage in securing contracts. The Group is constantly evaluating opportunities within the underground construction industry and seeking profitable areas in which it can develop, broaden or commence operation. Other than tunnel works, the Group has also participated in earthworks, bridge works and construction of service buildings during the Reporting Period. The Group considers that diversification is necessary under the current market condition, and continues to explore opportunity in other fields of the construction industry. As at the date of this announcement, the Group had submitted certain number of tenders to main contractors, the results of which were still pending.

During the nine months ended 30 September 2022, the Group had secured 14 public construction projects and four private sector projects with the aggregate secured contract sum of approximately HK\$896,406,000 and approximately HK\$3,746,000, respectively (the "**Newly Awarded Contracts**"). The Group was awarded two construction contracts for infrastructure works in Tung Chung East, including i) reinforced concrete for common utility tunnel, bridge, underpass, and cycle subway; and ii) reinforced concrete works for eastern and western sewage pumping stations and common utility tunnel supporting building on 19 August 2022 with a total contract sum of approximately HK\$711 million. The construction works had commenced in August 2022 and are expected to be completed at the end of 2025.

During the nine months ended 30 September 2022, the Group had been engaged in 40 public sector projects (during the nine months ended 30 September 2021: 31) and five private sector projects (during the nine months ended 30 September 2021: two). Please refer to the subsection headed “Financial Review” below for the analysis on the Group’s revenue. The total backlog of the Newly Awarded Contracts and contracts carried over from 2021 to be recognised as revenue after 30 September 2022 was approximately HK\$1,047,128,000.

PRINCIPAL RISKS AND UNCERTAINTIES

The Group is reliant on the availability of public sector civil engineering projects in Hong Kong which by their nature are procured by a limited number of main contractors. Due to the fact that the civil engineering projects are non-recurring in nature, there is no guarantee that the Group will be able to secure new business from past or existing customers on a recurring basis. Accordingly, the number and scale of projects, and the amount of revenue from the public sector projects may vary from period to period, which may make it difficult for the Group to forecast the volume of future businesses and the amount of revenue.

The Group operates solely in Hong Kong and derived all its income in Hong Kong during the Reporting Period. Accordingly, the Group’s business, financial results and prospects are affected by policies of the Hong Kong Government, political environment, economic and legal development in Hong Kong. The budgeting and funding approval process on public infrastructure and construction projects may be lengthened and the expected timetable of projects may be delayed. The Hong Kong Government’s policy and public spending patterns on the civil engineering construction industry may also affect the availability of construction projects in Hong Kong.

The Group’s historical results may not be indicative of its future performance, which may vary from period to period in response to a variety of factors beyond the Group’s control, including general economic conditions, regulations pertaining to the underground construction industry in Hong Kong and the ability to secure new business in the future. Besides, adverse weather conditions, natural disasters, potential wars, terrorist attacks, riots, epidemics, pandemics (such as coronavirus disease (“COVID-19”)) and other disasters which are beyond the Group’s control may reduce the number of workdays and hinder the Group’s operations. Yet, COVID-19 had no significant adverse effect on the Group during the Reporting Period.

OUTLOOK OF TUNNEL AND CONSTRUCTION INDUSTRY IN HONG KONG

It is expected that there will be continuous demand for tunnel construction services in Hong Kong given that the construction works at Central Kowloon Route and the Three-runway System of Hong Kong International Airport are gearing up. As a result, the Group will continue to focus on growing its tunnel construction services business and expects this to be its major growth driver and a long term and sustainable source of revenue. The growth in tunnel and construction industry will mainly be supported by several major infrastructure projects including Central Kowloon Route, Sha Tin Cavern Tunnel, Cha Kwo Ling Tunnel, the Three-runway System of Hong Kong International Airport and Tung Chung East development.

In respect of the contribution of the Central Kowloon Route, the Legislative Council of the Hong Kong Special Administrative Region (the “**Legco**”) had approved the funding of approximately HK\$42.3 billion on 20 October 2017. As at the date of this announcement, the Highways Department of the Hong Kong Government has awarded seven construction contracts of Central Kowloon Route to the main contractors with a total value of approximately HK\$28.9 billion, which included the construction works of (i) the shaft at Ho Man Tin; (ii) the tunnels at Kai Tak East and West; (iii) the tunnels at Yau Ma Tei East and West; (iv) the Central Tunnel; and (v) buildings, electrical and mechanical works.

The finance committee of Legco approved the funding of HK\$16.0 billion for the construction of Trunk Road T2 and Cha Kwo Ling Tunnel on 25 October 2019. This construction will connect the Central Kowloon Route and Tseung Kwan O-Lam Tin Tunnel to form Route 6 as an East-west Express Link between West Kowloon and Tseung Kwan O. The Civil Engineering and Development Department of the Hong Kong Government signed a works contract with a main contractor on 6 November 2019 for the design and construction of the trunk road with 3.1 kilometres in the form of tunnels, two ventilation buildings at the two ends of the trunk road, and associated works. The total cost of the contract is about HK\$10.9 billion. The whole project is scheduled for completion in 2026.

The Airport Authority Hong Kong had awarded two major construction contracts on (i) tunnels and related works for an automatic people mover and baggage handling system; and (ii) expansion works of Terminal 2 at Hong Kong International Airport to a main contractor with the total contract sum of approximately HK\$7.2 billion and HK\$12.9 billion, respectively. Such construction works form major parts of the Three-runway System of Hong Kong International Airport.

The Group observes that these public infrastructure projects are coming on full stream in 2022. The Group is one of the selected few subcontractors experienced in tunnel construction in Hong Kong and is well prepared to capitalise on the opportunities from these public infrastructure projects.
