Dear Shareholders,

On behalf of Wai Chi Holdings Company Limited (the "Company"), its subsidiaries, and the board of directors of the Company ("Directors" or the "Board"), I am pleased to present the audited annual results of the Group for the year ended 31 December 2022.

INDUSTRY REVIEW

With the drastically-less-lethal Omicron variant of the Novel Coronavirus ("COVID-19") dominating the pandemic, 2022 was a year the world finally focused on healing wounds and recovering from losses. However, the lingering COVID-19 infections, the intense war in Ukraine, and the uncertainties such incidents brought to the markets caused the world economy to suffer a widespread and sharp slowdown.

致各位股東:

本人很榮幸能代表偉志控股有限公司(「本公司」)、其附屬公司及本公司董事會(「董事」或「董事會」)、欣然提呈本集團於截至2022年12月31日止年度的經審核全年業績。

行業回顧

隨著新型冠狀病毒(「COVID-19」)疫情以致死率大為降低的奧密克戎(Omicron)變種為主,2022年是全球終於將重心專注於治癒創傷及恢復損失的一年。然而,長期持續的COVID-19感染、激烈的烏克蘭戰爭及其給市場帶來的不確定性導致世界經濟遭受廣泛而急劇的放緩。

CHAIRMAN'S STATEMENT 主席報告

For China, 2022 was also challenging as the country went through a period of turbulence with the rest of the world. The highly-infectious Omicron variant caused waves of COVID-19 cases that triggered mass lockdowns in many regions of the country, halting its supply chains and putting its economic growth at risk. In the meantime, as global geopolitical tension keeps escalating, China's chip makers took a solid hit when the US implemented heavy sanctions against China's semiconductor industry.

Looking back at 2022, manufacturing industries were taking up increasing shares in the overall economy in China, indicating a healthy and upgraded growth model. Against such a backdrop, China's LED backlight industry had an eventful year, with the immense growth momentum coming mainly from the automobile onboard display segment. According to Sigmaintel, a professional research and advisory company, it is estimated that the global shipment of automobile onboard front display panels amounted to about 180 million pieces in 2022, an increase of approximately 11.5% year-on-year. BOE Varitronix Limited, a leading Chinese market player listed on the Main Board of HKEX, announced that it is expecting net profit growth of 70%-90% for 2022, citing automobile onboard display panels being the predominant growth driver.

對於中國,2022年亦充滿挑戰,因為其與全球其他地區同樣經歷了一段動盪時期。傳染性極強的奧密克戎變種引致數波COVID-19病例,觸發全國多個地區實施大規模封鎖,導致供應鍵中斷,使其經濟增長面臨風險。與此同時,隨著全球地緣政治緊張局勢加劇,美國對中國半導體行業實施嚴厲制裁,導致中國芯片製造商受到重創。

回顧2022年,製造業在中國整體經濟中的比重不斷提升,表明有一個健康升級的增長方式。在此背景下,隨著主要來自車載顯示器分部的極大增長動力,中國LED背光行司業別來不平凡的一年。根據專業研究諮詢公司群智諮詢(Sigmaintel)預測,2022年全球車載前顯示面板出貨量約為1.8億片,同比增長約11.5%。於香港聯交所主板上市的中國領先市場參與者京東方精電有限公司宣佈,預計2022年實現純利增長70%至90%,其中車載顯示器面板為主要增長動力。

CHAIRMAN'S STATEMENT 主席報告

The continued boom in automobile onboard displays was not taken for granted in China as the country's 13-year-long subsidy to the new energy car industry ended in 2022. Though this inevitably affected the automobile market, demand for onboard display panels continues to increase as automakers now, more than ever, compete to equip intelligent, advanced, and high-quality in-vehicle displays with larger sizes and in greater numbers. According to CINNO Research, the average electronic automobile dashboard size in China in the third quarter of 2022 reached 9.4 inches, growing from 8.7 inches in 2021 and 8.3 inches in 2020. The growing dashboard sizes are just the tip of the iceberg regarding how automobile onboard display technologies are evolving. The technological and capital barrier means it might be too late now for new players to enter this lucrative market while current players are competing to keep up with the rapidly developing trends.

Unlike the automobile display segment, LED backlights for other equipment, including TV, smartphone, notebook, tablet, etc., continued their downslope journey, suffering from demand drop brought by global economic pressure and intensified threats from more advanced technologies.

BUSINESS REVIEW

Driven mainly by the rapid expansion of backlight for automotive, the Group's overall revenue grew by approximately 15.3%, from approximately HK\$1,922,595,000 in 2021 to approximately HK\$2,216,352,000 in 2022. Affected by the COVID-19 curbs, including conducting regular polymerase chain reaction ("**PCR**") tests for our employees, arranging quarantine hotels for staff on business trips, and accommodating the disrupted supply chain, the Group's operation cost reached a high level during 2022. In addition, US dollar appreciation caused us some loss in the exchange rate. All of these external factors weighed on our profit margin. During the year, our overall gross profit amounted to approximately HK\$262,691,000, a decrease of approximately 6.9% compared to the approximate HK\$282,197,000 from the year ended 31 December 2021. The gross profit margin was 11.9% (2021: 14.7%) during the year.

不同於車載顯示器分部,電視、智慧型手機、 筆記本電腦、平板電腦等其他設備的LED背 光則繼續走下坡路,同時面臨全球經濟壓力 帶來的需求下降及來自更先進技術的加劇威脅。

業務回顧

主要受車載背光迅速擴張的推動,本集團整體收入由2021年的約1,922,595,000港元增長約15.3%至2022年的約2,216,352,000港元。受COVID-19限制措施的影響,包括定期為我們的員工進行聚合酶鏈式反應(「PCR」)測試,為出差員工安排隔離酒店,以及適應中斷的供應鏈,本集團的運營成本於2022年達到高位。此外,美元升值對我們造成一定的匯率損失。所有該等外部因素均對我們的整體毛利約為程成壓力。於本年度,我們的整體毛利約為262,691,000港元,較截至2021年12月31日止年度的約282,197,000港元減少約6.9%。本年度的毛利率為11.9%(2021年:14.7%)。

CHAIRMAN'S STATEMENT 主席報告

By segments, revenue from backlights for automobile onboard displays achieved a new record of approximately HK\$1,350,820,000 during the year, up about 16.6% from approximately HK\$1,158,602,000 in the previous year. Though the profit margin has room to improve, this segment was the biggest growth driver. According to CINNO Research, the Group accounted for 18% of global shipments in LED backlights for automobile onboard displays during the first half of 2022, also ranked number 1 during the past two years. Orders of our automotive backlight product were inflowing rapidly, which outperformed the capacity of our current storage facilities. As a solution, we rented a transshipment depot to meet our clients' demands, the cost of which, among others, was also a limiting factor on our profit margin during the year.

Considering our core businesses, being LED backlight and lighting products, as a whole, revenue amounted to approximately HK\$1,712,035,000, up approximately 6.8% compared to the approximate HK\$1,603,450,000 in 2021. Gross profit was approximately HK\$254,043,000, a decrease of approximately 7.7%.

Under the sanctions the US imposed on memory chips made in China, we were not able to continue the expansion of our semiconductor production line. However, the sourcing of semiconductor products remained an income stream, contributing a revenue of approximately HK\$504,317,000, up approximately 58.0%. This segment provided a stable income stream allowing us to focus on optimising our backlight products.

按分部計,車載顯示器背光本年度收入再創新高達約1,350,820,000港元,較去年的約1,158,602,000港元增長約16.6%。儘管利潤率有提升空間,但該分部為最大的增長動力。根據CINNO Research的數據,2022年上半年,本集團佔全球車載顯示器LED背光出貨量的18%,在過去兩年亦排名第一。我們現有倉儲設施的容量。作為解決方案,我們租用一個中轉倉以滿足客戶需求,其成本等亦為我們本年度利潤率的一個限制因素。

我們核心業務 (即LED 背光及照明產品) 的整體收入約為1,712,035,000港元,較2021年的約1,603,450,000港元上升約6.8%。毛利約為254,043,000港元,減少約7.7%。

在美國對中國製造的存儲芯片實施制裁的情況下,我們無法繼續擴大半導體生產線。然而,半導體產品採購仍為一項收入來源,貢獻收入約504,317,000港元,上升約58.0%。該分部提供了穩定的收入來源,令我們能夠專注於優化背光產品。

CHAIRMAN'S STATEMENT 主席報告

PROSPECTS

After re-assessing the situation, China's central government made the decision to ease the COVID-19 limitations and reopen in December 2022, sending a strong signal that the country is moving away from stringent curbs. Echoing this, in the January 2023 issue of World Economic Outlook by the International Monetary Fund ("IMF"), the global economic growth is projected to be 2.9% in 2023, though still a slowdown compared to 2021, it is 0.2 percentage points higher than the IMF's previous estimation published in October 2022, citing pent-up demand in numerous economies, a faster fall in inflation, and the recent reopening of China.

For businesses, it is widely expected that the negative impacts of major central banks' tightening monetary policies will further emerge. Geopolitical tensions will also add to downside risks. External demand weakness will continue to affect China's exports in the coming year. However, the Chinese economy is resilient and the fundamentals are solid. Mobility and activities are quickly recovering after COVID-19, and the effects of economic stabilisation measures introduced in the past year are gradually emerging.

Amid all the opportunities and challenges, 2023 will present an exciting journey for LED panel and backlight makers. OLED technology is becoming increasingly affordable in applications for cellphones, notebooks, and TVs, while the development of Micro-LED panels is claiming a noticeable share in ultra-high-end markets. Considering the price tag of Micro-LED, and the lack of brightness and short lifespan of OLED panels, they are not enjoying much preference in the automotive industry. Mini LED display panels, with a better viewing experience than traditional LCD panels and longer lifespans than OLED panels, are quickly taking over the automobile onboard display market. Many claimed that 2022 witnessed the mini LED's debut as a mainstream in-vehicle display application. Based on the data from CMMA (中國電子視像行業協 Mini/MicroLED 顯示產業 分會), demand for in-vehicle mini LED backlight, which was less than 0.1 million pieces in 2021, will quickly increase to 4.5 million pieces in 2025, with a CAGR of 159%.

前景

在重新審視形勢後,中國中央政府決定放寬 COVID-19限制,於2022年12月重新開放, 釋放出國家正在放寬嚴格限制的強烈信號。 與此相呼應,國際貨幣基金組織(「**國際貨幣 基金組織**」)於2023年1月發佈的《世界經濟 展望》預計2023年全球經濟增速為2.9%,雖 然仍較2021年放緩,但較國際貨幣基金組織 此前於2022年10月發佈的預測高出0.2個百 分點,原因是許多經濟體釋放先前被抑制的 需求、通脹下降加快以及中國近期重新開放。

對於企業而言,普遍預期主要央行收緊貨幣政策的負面影響將進一步顯現。地緣政治緊張局勢亦將增加下行風險。未來一年,外部需求疲軟將繼續影響中國的出口。然而,中國經濟韌性強,基本面穩固。於COVID-19後,流動性和活動正在迅速恢復,過去一年出台的經濟穩定措施的成效正在逐漸顯現。

2023年機遇與挑戰並存,將為LED面板和背光製造商呈現一段鼓舞的征程。OLED技術在手機、筆記本電腦和電視上的應用成本越來越低,而Micro-LED面板的發展逐漸在超高昂的情格,以及OLED面板的亮度不足及壽命較短,它們在汽車行業並無受到太多青睞。Mini LED顯示面板憑藉較傳統LCD面板更佳的視覺體驗及較OLED面板更長的使用壽命,正在迅速佔領車載顯示器市場。許多人認為,2022年是mini LED作為主流車載顯示應用元年。根據CMMA(中國電子視像行業協Mini/MicroLED顯示產業分會)的數據,車載mini LED背光的需求於2021年不到10萬片,於2025年將迅速增加至450萬片,複合年增長率為159%。

CHAIRMAN'S STATEMENT 主席報告

In view of the above, Wai Chi has already invested more effort and resources into the research and development ("R&D") of automobile onboard display backlights, including mini-LED backlights. In the meantime, the supply chain in our industry started to integrate as many panel makers are now producing auto-pilot and driverassistance modules, and some tier 1 suppliers in the market have already approached us for the procurement of complex products. In the future, we look to expand our business towards lower-stream in the supply chain to fit in with the industry integration. In addition, to capture the technological advancement, an expanded and enhanced R&D centre is on our agenda. To meet the need of our booming backlight business, as well as the growing panel sizes, we are also looking for an opportunity to expand our production facilities and storage space, ideally in a location nearby our current factories, so as to reduce the cost and risks arising from the transportation of delicate products.

After a few years of navigating through the ever-changing business environment, we remain prudent and alert in dealing with the technology market. However, business growth were recorded, even under difficult times. We now excitedly look forward to riding on the expansion of the automobile onboard display market and further optimising our profitability.

在瞬息萬變的營商環境中歷經數年摸索,我們在技術市場中保持謹慎及警覺。然而,即使在困難時期仍錄得業務增長。我們現欣然期許藉車載顯示器市場的擴張,進一步提升我們的盈利能力。

INDUSTRY REVIEW

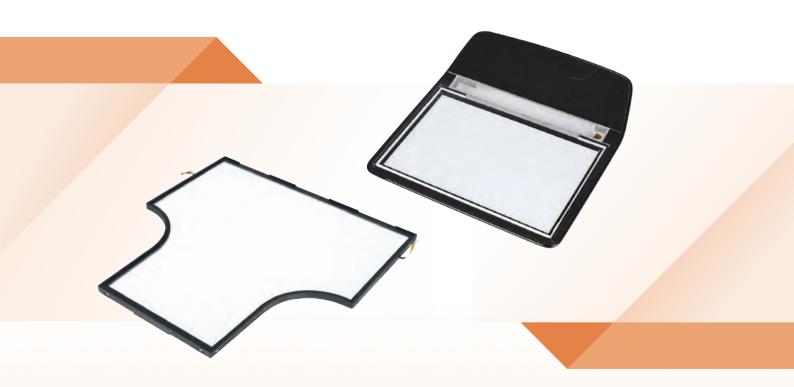

On September 14th, 2022, the head of the World Health Organization said at a press conference that the end of the pandemic was "in sight" while he urged countries to continue to push for higher vaccination rates. Though many countries have finally declared the end of the COVID-19 emergency by the end of 2022, the path to recovery is not easy, given the pressing inflation and recession risks and the rising global political tension. According to IMF, in 2022, the world output registered its weakest growth since 2001, except for the global financial crisis and the acute phase of the COVID-19 pandemic.

As for China, though the year opened well and held its steady position for the first half, circumstances drastically worsened in the second half, as the international environment became more turbulent and mass COVID-19 infections hit domestically. Adding to the challenges, the sweeping export bans imposed by the U.S. against chips made in China derailed the expansion plans of the country's chipmakers and left the whole semiconductor sector embattled. The year was concluded with GDP growth of 3% in China, missing the central government's target of 5.5%.

行業回顧

於2022年9月14日,世界衛生組織總幹事在新聞發佈會上稱,大流行的結束「近在眼前」,同時彼敦促各國繼續推動更高疫苗接種率。儘管許多國家最終在2022年底前宣佈結束COVID-19緊急狀態,但鑑於通脹和衰退風險緊迫,以及全球政治緊張局勢加劇,復甦之路並不平坦。根據國際貨幣基金組織的數據,除全球金融危機及COVID-19大流行的特殊階段外,2022年世界產出錄得自2001年以來最弱的增長。

就中國而言,雖然今年開局良好,上半年保持穩定,但下半年形勢急劇惡化,國際環境動盪加劇,國內出現大規模COVID-19感染。雪上加霜的是,美國對中國製造的芯片實施全面出口禁令,阻斷了中國芯片製造商的擴張計劃,令整個半導體行業陷入困境。最終中國全年GDP增長3%,低於中央政府5.5%的目標。

For China's LED and other manufacturers, 2022 also presented a complex profile of pressing factors. Since stringent COVID-19 curbs remained in place across the country for most of the year, raw material prices were unstable, and transportation, especially long-distance, was unreliable. The anti-epidemic requirements also meant lost working days and extra expenses to arrange for employees' regular COVID-19 tests and sick leave days. In the meantime, waves of COVID-19 outbreaks hit regions including the Yangze-river delta, where China's richest cities and biggest car markets, like Shanghai, are located, and the Central area, home to many optical-electronics, telecommunications, and equipment manufacturing factories. However, these are now considered problems of the past, as China introduced a shift of COVID-19 policies by the end of the year, and infections soon peaked, signaling the end of an era.

Within China's LED backlight industry, manufacturers experienced different business environments depending on the types of products they focused on. For those producing backlights for large-size LED panels, mainly used for TVs, the market continued to shrink as OLED technology continued to phase out traditional LCD TVs. As for the market of small panels, mainly used in cellphones and other electronic gadgets, the profitability of backlight manufacturers was minimal since global electronic sales itself plateaued and competition from OLED and micro-LED left LCD panels with little bargaining power.

就中國LED及其他製造商而言,2022年亦呈現複雜的緊迫因素。由於去年大部分時間裡,全國各地仍在實施嚴格的COVID-19防控措施,因而原材料價格不穩定,運輸(尤其是長途運輸)不可靠。抗疫要求亦意味着損失工作和額外費用,以安排員工定期進行COVID-19檢測和病假。與此同時,COVID-19疫情多輪衝擊中國最富裕城市及最大汽車市場(如上海)所在地長三角,以及眾多光電子、電信知是可以發展,以及眾多光電子、電信,現後備製造工廠所在地華中等地區。然而,現後不過時間題已成為過去,隨着年底中國轉變COVID-19政策,感染人數迅速達到峰值,標誌著一個時代的結束。

在中國LED背光行業,製造商因所專注的產品類型不同,經歷了不同的營商環境。就生產主要用於電視的大尺寸LED面板背光的製造商而言,隨著OLED技術繼續逐步淘汰傳統液晶電視,市場繼續萎縮。至於主要用於手機及其他電子產品的小面板市場,背光製造商的盈利空間狹窄,因為全球電子產品銷售本身已趨於平穩,而來自OLED及micro-LED的競爭讓LCD面板幾乎並無議價能力。

Manufacturers are now rushing into the medium-sized panel market, lured by the automobile onboard display sector, which stood out as a highly expandable and profitable business despite all the challenges mentioned above. Internationally, the global in-vehicle display panel market is expected to reach US\$10.453 billion in 2022, an increase of 5% from 2021, according to FujiKeizai, a Japanese market research agency. By 2026, its market size will reach US\$12.323 billion, an increase of 23.8% from 2021. Regionally, in-vehicle panel buyers are increasingly turning to Chinese manufacturers as the country accounted for the biggest cut in global car manufacture and sales. In addition, the global energy crisis and inflation also disadvantaged international competitors in terms of manufacturing and operating cost. According to CINNO Research's Quarterly Automotive Backlight Market Analysis Report, in the first half of 2022, in terms of product shipment, the biggest five automobile onboard display backlight manufacturers in the world are all Chinese, among which, the Group ranked first.

在車載顯示器分部的吸引下,製造商紛紛湧 入中型面板市場,儘管面臨上述所有挑戰, 車載顯示器仍為擴展空間巨大且盈利的業務。 就國際而言,根據日本市場研究機構富士經 濟(FujiKeizai)的數據,2022年全球車載顯示 器面板市場規模預計將達104.53億美元,較 2021年增長5%。到2026年,其市場規模將 達123.23億美元,較2021年增長23.8%。就 地區而言,由於中國在全球汽車製造和銷售 中佔比最大,故轉向中國製造商的車載面板 買家日益增多。此外,全球能源危機及通脹 亦使國際競爭對手在製造及運營成本方面處 於不利地位。根據CINNO Research的《車載 背光市場分析季度報告》,於2022年上半年, 按產品出貨量計, 全球前五大車載顯示器背 光製造商均來自中國,其中本集團位居第一。

Despite the luring opportunities, newcomers to the market are facing strong headwinds as in-vehicle panels go through evolving trends that make the industry more and more demanding on backlights. The first noticeable sign is the sizes of the in-vehicle screens. According to the automobile section of Gao Gong Intelligent (高工智能汽車), in the first half of 2020, only 32.98% of passenger cars in China were equipped with 10-inch or above central control screens, but it had increased to 52.58% by the first half of 2022. The penetration rate of multi-screen is also growing. According to ICVTank's prediction. the penetration rate of full LCD dashboards will increase from 30% in 2020 to 70% in 2025, and the penetration rate of central control screens, streaming rearview mirrors, and HUD head-up displays will increase from 80%, 7% and 10% in 2020 to 100%, 30% and 30%, respectively, in 2025. At the same time, more and more models with co-pilot entertainment screens and rear-row entertainment screens are entering the market.

儘管機會誘人,但由於車載面板不斷發展的趨勢,行業對背光的要求日益提高,新進內市場的企業面臨著巨大阻力。首個顯著的標誌為車載屏幕的尺寸。根據高工半年,中國裝配10英吋或以上中控屏的乘用車佔上至52.58%。多屏滲透率亦在增長。根據ICVTank的預測,全LCD儀錶盤滲透率將由2020年的30%提升至2025年的70%,中控屏、流媒體後視鏡及HUD抬頭顯示器滲透率將由2020年的80%、7%及10%分別提升至2025年的100%、30%及30%。與此同時,越來越多裝配副駕室娛樂屏及後排娛樂屏的車型進入市場。

During the year ended 31 December 2022, Wai Chi Opto Technology Limited, a subsidiary of the Group, has received the Green Office Label awarded under the Green Office Awards Labelling Scheme ("GOALS") organised by the World Green Organization ("WGO") for the sixth year, in recognition of the Group's continued efforts in aiding environmental protection.

WGO launched GOALS in 2013 with the objectives of raising awareness of global environmental issues and encouraging corporations to implement the best green practices in their offices in 9 stipulated aspects of operations, including energy savings, water savings, waste reduction, paper and printing reduction, green procurement, IT use and disposal, transportation, education and awareness, and finally green innovation. Companies have to undergo a process of stringent green audit, during which the Group has demonstrated its commitment in corporate social responsibility by incorporating its green mission into daily practice and corporate culture.

PROSPECTS

Successive shocks from political fragmentation, war, the aftermath of the pandemic, trade tensions, etc., have kept world economic uncertainty aggravated. However, economic growth proved fairly resilient, exhibiting strong labour markets, robust consumption, better-than-expected adaptation to the energy crisis in Europe, and signs of improvement in inflation across regions. China's earlier-than-anticipated re-opening also paved the way for a rapid rebound in activities. IMF believes global growth will slow down from 3.4 % in 2022 to 2.9% in 2023 but then rebound to 3.1% in 2024, much more encouraging than the Fund's earlier projections.

有關企業責任的獎項

截至2022年12月31日止年度,本集團附屬公司偉志光電有限公司第六度榮獲世界綠色組織(「世界綠色組織」)舉辦的綠色辦公室獎勵計劃」)所頒發的綠色辦公室企業獎,以表彰本集團於環境保護方面的持續付出。

世界綠色組織為了提高各界對全球環境問題的關注以及鼓勵企業於辦公室9個不同營運範疇施行綠色守則,遂於2013年推出綠色辦公室獎勵計劃,9個不同範疇包括節約能源、節約用水、減少廢物、減少用紙和印刷、綠色採購、資訊技術使用及處置、交通運輸、教育及意識以及綠色創新。本集團成功通過數格的審核,證明其於履行企業社會責任的堅持,以及積極將綠色理念融入日常生活及企業文化。

展望

政局分裂、戰爭、疫情餘波、貿易緊張局勢等接連沖擊,加劇了世界經濟的不確定性。然而,事實證明經濟增長相當有彈性,表現在強勁的勞動力市場、強勁的消費、對歐洲能源危機的適應較預期理想,以及各地區通脹出現改善的跡象。中國早於預期的重新開放亦為經濟活動的快速反彈鋪平道路。國際貨幣基金組織認為,全球增長將由2022年的3.4%放緩至2023年的2.9%,但隨後會於2024年反彈至3.1%,比該組織早先的預測更鼓舞人心。

As Asia propels a larger share of global economic growth, China is believed to be one of the major engines. IMF projected China's GDP growth to increase from 3% in 2022 to 5.2% in 2023, driven by a rebound in private consumption amid the reopening and the subsequent swift adaptation. This meant a great relief for all manufacturers in the country, who can now expect the end of COVID-19-related operating costs, a more stable supply chain, and much fewer unexpected emergencies to hinder their business. But since consumer electronic sales hit a plateau, the overall demand for display panels, especially those for personal electronics and TVs, is still expecting a drop for the coming year.

In the automotive market, after years of rapid growth pushed by the new energy sector, sales are cooling down. Passenger car makers are now competing to provide the best driving and in-vehicle entertaining experience, making onboard display systems one of the forefront battlefields. According to Digitimes Research, global shipments of in-vehicle displays, which were 141 million units in 2020, will reach 253 million units by 2026, with a CAGR of 10.24%. Along with screen quantity, sizes are also growing. According to CINNO Research, the average LED automotive dashboard size on Chinese passenger cars will grow from 9.4 inches in the third quarter of 2022 to 9.6 inches in 2023 and subsequently 10.0 inches in 2024. Besides, the panel sizes are starting to standardise, meaning less production waste and higher profit margin for manufacturers. There's also a significant trend of industry integration as many panel-focused manufacturers are producing complex in-vehicle modules featuring their expertise in LED. Able players in the market are adding more value to their products. In terms of display technology, traditional LCD panels will still take up the bulk of in-vehicle screens for their durability, reliability, and cost-effectiveness. But Mini LED panels have become the major favorite and selling point for many mid-high-end automobile vehicles, including Li Auto's flagship L9 SUV, Nio's latest ES8 and its preguel ES7 as well as Cadilac's futuristic LYRIO electric model, etc.

隨著亞洲在全球經濟增長中所佔份額越來越大,中國被認為是主要引擎之一。國際貨幣基金組織預計,中國的GDP增長率將由2022年的3%增加至2023年的5.2%,這主要得益於重新開放及隨後的迅速調整帶來的個人消費反彈。這對國內所有製造商來說都意味不動解脱,如今其可期待COVID-19相關營成本終結、供應鏈更加穩定以及阻礙其的。與由於消費電子產品及電視顯示面板的需求仍會下降。

汽車市場在新能源板塊推動下經歷多年的快 速增長後,銷售額正在下降。乘用車製造商 現在競相提供最佳的駕駛及車載娛樂體驗, 使車載顯示系統成為最前沿的戰場之一。根 據 Digitimes Research 的數據,2020年全球車 載顯示器出貨量為1.41億件,於2026年將 達到2.53億件,複合年增長率為10.24%。 隨著屏幕數量的增加,尺寸也越來越大。根 據 CINNO Research 的數據,中國乘用車的平 均LED汽車儀錶盤尺寸將由2022年第三季度 的9.4英吋增長至2023年的9.6英吋,其後 於2024年將達到10.0英吋。此外,面板尺寸 開始標準化,這意味著生產浪費減少,製造 商的利潤率提高。同時,許多以往專注於面 板的製造商開始利用其在LED領域的專業知 識生產複雜的車載模塊,行業整合亦成為一 個重要趨勢。市場上有能力的參與者正為其 產品增加更多價值。在顯示技術方面,傳統 LCD面板憑藉其耐用性、可靠性及成本效益 仍將佔據車載屏幕的大部分。但Mini LED面 板已經成為眾多中高端汽車的主要寵兒及賣 點,包括理想汽車的旗艦款L9 SUV、蔚來最 新款ES8及ES7,以及凱迪拉克未來感十足 的LYRIO電動車型等。

In view of the ample opportunities in the market, the Group is prioritising its LED backlight for automotive onboard displays. Mini LED backlights are in our R&D pipeline, enabling us to stay relevant in the market trend. In addition, we look to expand our portfolio downwards in the supply chain to introduce more value-added products. To catch the evolving technologies in our industry, we are also investing more resources to train and educate our talents. Besides, we are working on our vendor-managed inventory system to provide better services to our clients and reduce operation costs.

With an optimised product mix, improved operation system, and favourable market conditions, we believe our LED segment, particularly the automotive line, will continue to expand in the coming years. As a result of our growing business, our storage space reached its maximum capacity during the year ended 31 December 2022, leading us to the rental of a transshipment depot to meet the booming demand from our clients. In fact, at the current pace of expansion, we expect our production facilities to reach full capacity by as early as 2025. Thus, we are actively looking for an optimal location to expand our production facilities, ideally, a space near our current factories, to reduce the cost of product transportation and packaging, as well as keep the risk of breakage low.

Looking ahead, with recognition from the market and trust from our loyal customers, we are confident in maintaining our leading position as the top manufacturer of LED backlights for automobile onboard displays. In the meantime, we will stay prudent and resilient to any possible shift in market conditions.

FINANCIAL REVIEW

Revenue

During the year ended 31 December 2022, the sources of revenue for the Group were the sales of LED backlights, LED lighting services, and the sourcing of semiconductor products. The sales of the Group's LED backlight products were approximately HK\$1,620,565,000, representing an increase of approximately 11.5% from 2021, which was mainly attributable to the continuous increase in sales of automobile onboard display LED backlight products. The revenue from the Group's LED lighting services was approximately HK\$91,470,000, representing a decrease of approximately 38.8%, which is an expected fallback after the 101.0% expansion recorded in the previous year. The segment of the semiconductor product sourcing business recorded sales of approximately HK\$504,317,000 (2021: HK\$319,145,000), representing solid growth and providing a stream of income as the Group continues to upgrade its product mix.

Gross Profit and Gross Profit Margin

For the year ended 31 December 2022, gross profit from the sales of LED backlight products and LED lighting services was approximately HK\$254,043,000, representing a decrease of 7.7% from approximately HK\$275,166,000 in 2021. Gross profit margin for these two segments decreased by 2.6 percentage points from 17.2% in 2021 to 14.6% in 2022. The decrease in gross profit and gross profit margin was mainly due to 1) the increase in operating expenses under the impacts of COVID-19 curbs, including regular PCR tests for all employees, quarantine arrangements for travelling staff, and disruption in the supply chain; 2) foreign exchange losses due to the depreciation of RMB against USD. These impacts have already started to diminish and we expect a better operating environment in the coming year. Gross profit and gross profit margin from the sourcing of semiconductor products were HK\$8,648,000 and 1.7% (2021: HK\$7,031,000 and 2.2%) respectively, remaining relative stability. For the year ended 31 December 2022, the Group's overall gross profit was approximately HK\$262,691,000, representing a decrease of 6.9% from approximately HK\$282,197,000 in 2021. Overall gross profit margin was 11.9% in 2022, representing a decrease of 2.8 percentage points from 14.7% in 2021.

行政開支包括一般辦公室及廠房開支。本集團通過深圳生產廠房和惠州生產廠房資源整合強調有效率管理。然而,COVID-19限制措施擾亂運營,導致開支增加。截至2022年12月31日止年度,本集團的行政開支約為194,493,000港元,較2021年的約163,848,000港元增加18,7%。

其他收入

截至2022年12月31日止年度,其他收入約為52,335,000港元,較2021年的約23,239,000港元增加125.2%,此乃主要由於銀行存款產生的利息收入增加所致。

銀行結餘及現金

截至2022年12月31日止年度,本集團的銀行結餘及現金約為257,912,000港元,較2021年的約112,312,000港元增加129.6%。隨著COVID-19於本集團供應鏈各環節中爆發,本集團原材料及成品的運輸嚴重中斷,導致其應收賬款及應付賬款之間的缺口擴大。為維持服務穩定性,持有大量現金以備不時之需。

Pledged Deposit

During the year ended 31 December 2022, the Group's pledged deposit amounted to approximately HK\$562,630,000(2021: approximately HK\$342,017,000). Having only one property in PRC as collateral limited the Group's options for corporate loans needed for business expansion at times, thus, as a norm under the current macroeconomic policies, the Group was provided with an alternative of savings pledged loans. The Group is currently consolidating its assets and savings hoping to simplify and improve the situation in the coming year.

Taxation

Taxation comprised current tax and movements in deferred tax assets and liabilities. Two of the Group's subsidiaries, Wai Chi Opto Technology (Shenzhen) Limited ("Shenzhen Wai Chi") and Huizhou Wai Chi Electronics Company Limited, are qualified as "High-Tech Enterprises" in the PRC and granted certain tax benefits, including a preferential enterprise income tax rate of 15% instead of the statutory rate of 25%. During the year ended 31 December 2022, the Group's tax expenses were approximately HK\$377,000 (2021: Tax credit of approximately HK\$69,000), which increased alongside the expansion of business.

Inventories

As at 31 December 2022, the Group's inventories was approximately HK\$276,763,000, representing a decrease of 11.3% as compared to approximately HK\$312,029,000 as at 31 December 2021. The decrease in inventories was an expected fallback after the Group strategically increased its inventories in the previous year to offset the anticipated increase in raw material prices.

Trade Receivables

As at 31 December 2022, the Group's net trade receivables amounted to approximately HK\$749,923,000, which increased by 11.5% as compared to approximately HK\$672,316,000 as at 31 December 2021. This was attributable to the increase in sales of LED backlight products.

已抵押存款

截至2022年12月31日止年度,本集團的已抵押存款約為562,630,000港元(2021年:約342,017,000港元)。由於僅一處中國大陸的物業作為抵押品,有時會限制本集團獲得業務拓展所需的企業貸款的選擇,因此,作為當前宏觀經濟政策下的常態,本集團獲供儲蓄抵押貸款的替代方案。本集團目前正整合其資產及儲蓄,希冀於來年簡化並改善有關狀況。

税項

税項包括當期税項及遞延税項資產及負債的變動。本集團的兩家附屬公司,偉志光電(深圳)有限公司(「深圳偉志」)及惠州偉志電子有限公司被評定為中國「高新技術企業」,享有若干税務優惠,包括以優惠企業所得税税率15%而非法定税率25%納税。截至2022年12月31日止年度,本集團的税項開支約為377,000港元(2021年:税項抵免約69,000港元),隨著業務拓展有所增加。

存貨

於2022年12月31日,本集團的存貨量約為276,763,000港元,較2021年12月31日的約312,029,000港元減少11.3%。存貨減少乃去年本集團策略性地增加存貨以抵銷原材料價格預期上漲後的預期回落。

應收賬款

於2022年12月31日,本集團的應收賬款淨額約為749,923,000港元,較2021年12月31日的約672,316,000港元增加11.5%,此乃由於LED背光產品的銷售額增加所致。

Trade Payables

As at 31 December 2022, the Group's trade payables amounted to approximately HK\$393,639,000, which decrease mildly by 1.7% as compared to approximately HK\$400,649,000 as at 31 December 2021.

意見

我們已審核第95至218頁所載偉志控股有限公司(「貴公司」)及其附屬公司(以下統稱為「貴集團」)的綜合財務報表,其包括於2022年12月31日的綜合財務狀況表,以及截至該日止年度的綜合損益表、綜合損益及其他全面收益表、綜合權益變動表及綜合現金流量表,連同綜合財務報表附註(包括主要會計政策概要)。

我們認為,綜合財務報表已根據香港會計師公會(「**香港會計師公會**」)頒佈的香港財務報告準則」)真實而公平地反映 貴集團於2022年12月31日的綜合財務狀況及其於截至該日止年度的綜合財務表現及綜合現金流量,並已根據香港公司條例的披露規定妥善編製。

意見基礎

我們根據香港會計師公會頒佈的香港核數準則(「**香港核數準則**」)進行審核工作。我們就該等準則承擔的責任已於報告內核數師就審核綜合財務報表承擔的責任一節作進一步闡述。根據香港會計師公會頒佈的專業會計師公會頒佈的專業會計師公會頒佈的專業會計師公會預行我們獨立於 貴集團,並根據守則履行我們的其他道德責任。我們相信我們已獲得足夠及適當的審核憑證,以為我們的審核意見提供基礎。

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Valuation of inventories

Refer to Note 21 to the consolidated financial statements and the accounting policies on page 120.

The key audit matter 關鍵審核事項

As at 31 December 2022, the carrying amount of inventories was approximately HK\$276,763,000. Provision of inventories of approximately HK\$7,196,000, and reversal of provision of inventories approximately HK\$13,713,000 were recognised during the year.

We have identified the valuation of inventories as a key audit matter because of the involvement of significant management judgement and estimation in identifying inventories with net realisable values that are lower than their carrying amounts, and obsolescence, with reference to the selling prices and condition of inventories.

於2022年12月31日,存貨的賬面值約為276,763,000港元。年內,已確認存貨撥備約7,196,000港元及存貨撥備撥回約13,713,000港元。

由於在參考存貨的售價及狀況識別可變現淨值低於其賬面值的存貨及陳舊情況時,涉及重大管理層判斷或估計, 我們已將存貨估值識別為一項關鍵審核事項。

關鍵審核事項

關鍵審核事項指以我們的專業判斷認為對本期間綜合財務報表的審核工作中最為重要的事項。該等事項於我們審核整份綜合財務報表並就此形成有關意見的背景下處理,而我們並不就該等事項發表獨立意見。

存貨估值

請參閱綜合財務報表附註21及第120頁會計政策。

How the matter was addressed in our audit 我們於審核時如何處理有關事項

Our audit procedures were designed to assess management estimation and judgement on the assessment of net realisable values of inventories and identification of obsolete items based on their subsequent usage and sales and selling prices subsequent to the end of the reporting period and current market conditions.

We have assessed the net realisable values and utilisation of inventories subsequent to the end of the reporting period and discussed with the management about the adequacy of the allowance and provision made by the management based on subsequent usage and sales, individual market price, ageing analysis and current market conditions. We have challenged the assumptions and critical judgements used by the management by assessing the reliability of the management's past estimates.

我們的審核程序旨在根據後續使用及出售狀況及報告期末 後售價以及當前市況,評估管理層就存貨可變現淨值評估 及識別陳舊存貨的估計或判斷。

於報告期末後,我們已評估存貨的可變現淨值及動用情況,並就管理層根據後續使用狀況及銷售、個別市場價格、賬齡分析及當前市況所作出的撥備是否充足與管理層進行討論。我們透過評估管理層過往估計的可靠性,對管理層所採用的假設及關鍵判斷提出質疑。

KEY AUDIT MATTERS (continued)

Valuation of trade receivables

Refer to Note 22 to the consolidated financial statements and the accounting policies on page 126 to page 132.

The key audit matter 關鍵審核事項

As at 31 December 2022, the carrying amount of trade receivables was approximately HK\$749,923,000, net of accumulated allowance for impairment of trade receivables of approximately HK\$25,217,000. Net reversal of impairment losses of trade receivables of approximately HK\$4,425,000 was recognised during the year.

Allowance for impairment of trade receivables is based on lifetime expected credit losses model, which is estimated by taking into account the historical credit loss experience and forward-looking information including both current and forecast general economic conditions.

We have identified the valuation of trade receivables as a key audit matter because the impairment assessment of trade receivables involved a significant degree of management estimation and may be subject to management bias.

於2022年12月31日,經扣除應收賬款累計減值撥備約25,217,000港元後,應收賬款的賬面值為約749,923,000港元。年內,已確認應收賬款減值虧損撥回淨額約4,425,000港元。

應收賬款減值撥備乃基於存續期預期信貸虧損模式作出, 而預期信貸虧損乃經計及過往信貸虧損經驗及前瞻性資 料(包括對當前和預測整體經濟狀況)後估算得出。

由於應收賬款減值評估涉及重大管理層估計及管理層可 能出現偏頗,我們已將應收賬款估值識別為一項關鍵審 核事項。

關鍵審核事項(續)

應收賬款估值

請參閱綜合財務報表附註22及第126頁至第 132頁會計政策。

How the matter was addressed in our audit 我們於審核時如何處理有關事項

Our audit procedures were designed to assess the assumptions and estimation adopted by the Group on the assessment of expected credit losses model of trade receivables.

We have assessed the reasonableness of management's assumptions and estimation for impairment by examining the information used by management, including testing the accuracy of the historical default data and evaluating whether the historical loss rates are appropriately adjusted based on current economic conditions and forward-looking information.

我們的審核程序旨在評估 貴集團於評估應收賬款的預期 信貸虧損模式時所採納的假設及估計。

我們藉檢測管理層所用的資料(包括測試過往預設數據的準確性、評估過往虧損率是否按目前經濟狀況和前瞻性資料)來評估管理層減值假設及估算的合理性。

INFORMATION OTHER THAN THE CONSOLIDATED FINANCIAL STATEMENTS AND AUDITOR'S REPORT THEREON

The directors of the Company are responsible for the other information. The other information comprises all of the information included in the annual report other than the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

RESPONSIBILITIES OF DIRECTORS OF THE COMPANY AND THE AUDIT COMMITTEE FOR THE CONSOLIDATED FINANCIAL STATEMENTS

The directors of the Company are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with HKFRSs issued by the HKICPA and the disclosure requirements of the Hong Kong Companies Ordinance, and for such internal control as the directors of the Company determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the directors of the Company are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors of the Company either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

The Audit Committee is responsible for overseeing the Group's financial reporting process.

INDEPENDENT AUDITOR'S REPORT 獨立核數師報告

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion, solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the
 consolidated financial statements, whether due to fraud or error,
 design and perform audit procedures responsive to those risks,
 and obtain audit evidence that is sufficient and appropriate
 to provide a basis for our opinion. The risk of not detecting a
 material misstatement resulting from fraud is higher than for
 one resulting from error, as fraud may involve collusion, forgery,
 intentional omissions, misrepresentations, or the override of
 internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

核數師就審核綜合財務報表承擔 的責任

作為根據香港核數準則進行審核工作的一部 分,我們在整個審核工作中運用專業判斷及 保持專業懷疑態度。我們亦:

- 識別及評估由於欺詐或錯誤而導致綜合 財務報表存在重大錯誤陳述的風險,設 計及執行審核程序以應對該等風險,以 及獲取充足及適當的審核憑證,作為我 們意見的基礎。由於欺詐可能涉及串謀、 偽造、蓄意遺漏、虛假陳述,或凌駕於 內部監控之上,因此未能發現因欺詐而 出現的重大錯誤陳述的風險高於未能發 現因錯誤而出現的重大錯誤陳述的風險。
- 瞭解與審核相關的內部監控,以設計在 有關情況下屬適當的審核程序,但目的 並非對 貴集團內部監控的有效性發表 意見。

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors of the Company.
- Conclude on the appropriateness of the Company's directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

核數師就審核綜合財務報表承擔 的責任(續)

- 評估 貴公司董事所採用會計政策的適 當性以及作出會計估計及相關披露的合 理性。
- 對 貴公司董事採用持續經營基準會計法的適當性作出結論,並根據所獲取的養生應之不存在與可能導致對 集團持續經營能力產生重大疑慮的事項或情況有關的重大不確定因素。倘仍須有關的重大不確定因素,則我們獨定存在重大不確定因素,則我們領人不被數師報告中提請垂注綜合財務報表中的相關披露,或倘若有關披露不足,數部報告中期止所獲得的審核憑證。然而,未來事項或情況可能導致 貴集團不能持續經營業務。
- 評估綜合財務報表的整體呈列方式、結構及內容(包括披露事項)以及綜合財務報表是否公平呈列相關交易及事項。
- 就 貴集團內實體或業務活動的財務資料獲取充足適當的審核憑證,以便對綜合財務報表發表意見。我們負責指引、監督及執行集團審核工作。我們僅為我們的審核意見承擔責任。

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Mr. Cheung Wang Kei.

Notes:

- (a) As stipulated by regulations in the People's Republic of China (the "PRC"), the Company's subsidiaries established and operated in the PRC are required to appropriate 10% of their after-tax profit (after offsetting prior year losses) as determined in accordance with the applicable laws and regulations in the PRC, to statutory reserve until the reserve balance reaches 50% of the registered capital of the relevant subsidiaries. The transfer to this reserve must be made before distribution of a dividend to equity owners.
- (b) Merger reserve represented the difference between the nominal value of the issued capital of subsidiaries acquired pursuant to a group reorganisation over the consideration paid for acquiring these subsidiaries.

In 2013, as part of the pre-listing reorganisation, the Company issued 135 ordinary shares of HK\$1,000,000 each which, through its subsidiaries, were used to subscribe for new shares issued and allotted by Wai Chi Group (HK) Limited and became the holding company of the Group. The difference between the proceeds from the issuance of shares and the then share capital and capital reserve subscribed was recognised in the merger reserve.

附註:

- (a) 中華人民共和國(「**中國**」)法規規定本公司於中國成立及營運的附屬公司須根據中國適用法律及法規釐定劃撥其除稅後利潤(於抵銷上一年度虧損後)10%為法定儲備,直至儲備結餘達相關附屬公司註冊資本50%。轉撥至此儲備須於分派股息予權益擁有人前作出。
- (b) 合併儲備指根據集團重組收購的附屬公司的已 發行股本面值與就收購該等附屬公司已付代價 的差額。

於2013年,作為上市前重組的一部分,本公司透過其附屬公司發行135股每股面值1,000,000港元的普通股,用作認購由偉志集團有限公司發行及配發的新股份,並成為本集團的控股公司。發行股份所得款項與已認購的當時股本及資本儲備間的差額於合併儲備確認。

3. SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements have been prepared in accordance with HKFRSs issued by the HKICPA. In addition, the consolidated financial statements include applicable disclosures required by the Rules Governing the Listing of Securities on the Stock Exchange and by the Hong Kong Companies Ordinance.

The consolidated financial statements have been prepared on the historical cost basis except for investment property, financial assets at FVTPL, financial asset at FVTOCI and derivative financial instrument, that are measured at fair values at the end of each reporting period.

Historical cost is generally based on fair value of the consideration given in exchange for goods.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. Details of fair value measurement are explained in the accounting policies set out below.

The significant accounting policies are set out below.

Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company and its subsidiaries.

Control is achieved where the Group has: (i) the power over the investee; (ii) exposure, or rights, to variable returns from its involvement with the investee; and (iii) the ability to use its power over the investee to affect the amount of the Group's returns.

3. 主要會計政策

綜合財務報表乃按照香港會計師公會頒 佈的香港財務報告準則編製。此外,綜 合財務報表包括聯交所證券上市規則及 香港公司條例規定的適用披露。

除投資物業、按公允值計入損益之金融 資產、按公允值計入其他全面收益之金 融資產及衍生金融工具於各報告期末按 公允值計量外,綜合財務報表乃按歷史 成本基準編製。

歷史成本一般按交換貨品代價的公允值計算。

公允值指市場參與者於計量日期在有秩 序交易中出售資產可收取或轉讓負債須 支付的價格,不論該價格是否可直接觀 察或使用其他估值方法估計所得。公允 值計量的詳情於下文載列的會計政策中 詳述。

主要會計政策載列如下。

綜合基準

綜合財務報表載入本公司及由本公司及 其附屬公司控制的實體的財務報表。

當本集團(i)擁有對被投資者的權力:(ii) 可透過參與被投資者事務而承擔或有權 取得可變回報:及(iii)可利用對被投資者 的權力影響本集團回報的金額,則取得 控制權。

For the year ended 31 December 2022 截至2022年12月31日止年度

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Basis of consolidation (continued)

The Group reassesses whether it controls an investee if facts and circumstances indicate that there are changes to one or more of these elements of control stated above.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary.

Income and expenses of subsidiaries are included in the consolidated statement of profit or loss from the date the Group gains control until the date when the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income of subsidiaries are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income/expenses of subsidiaries is attributed to owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the Group are eliminated in full on consolidation.

3. 主要會計政策(續)

綜合基準(續)

倘事實及情況顯示上述其中一項或多項 控制要素出現變動,本集團將重新評估 是否對被投資者擁有控制權。

對附屬公司的綜合入賬,於本集團獲得該附屬公司的控制權時開始,並於本集團失去該附屬公司的控制權時終止。

附屬公司的收入及開支自本集團獲得控 制權當日開始計入綜合損益表,直至本 集團不再擁有附屬公司控制權當日止。

附屬公司的損益及其他全面收益的各組成部分歸屬於本公司擁有人及非控股權益。附屬公司的全面收益/開支總額歸屬於本公司擁有人及非控股權益,即使此舉會導致非控股權益出現虧絀結餘。

所有與本集團實體之間交易相關的集團 內公司間資產及負債、權益、收入、開 支及現金流量於綜合入賬時全數撇銷。

For the year ended 31 December 2022 截至2022年12月31日止年度

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Assets acquisitions

The Group can elect to apply an optional concentration test, on a transaction-by-transaction basis, that permits a simplified assessment of whether an acquired set of activities and assets is not a business. The concentration test is met if substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or group of similar identifiable assets. The gross assets under assessment exclude cash and cash equivalents, deferred tax assets, and goodwill resulting from the effects of deferred tax liabilities. If the concentration test is met, the set of activities and assets is determined not to be a business and no further assessment is needed.

When the Group acquires a group of assets that do not constitute a business, the Group identifies and recognises the individual identifiable assets acquired assumed by allocating the purchase price first to investment properties which are subsequently measured under fair value model and financial assets and financial liabilities at the respective fair values, the remaining balance of the purchase price is then allocated to the other identifiable assets and liabilities on the basis of their relative fair values at the date of purchase. Such a transaction does not give rise to goodwill or bargain purchase gain.

3. 主要會計政策(續)

資產收購

於本集團收購一組不構成業務的資產時,本集團首先通過以各自公允值分配購買價至根據公允值模型進行後續計量的投資物業以及金融資產及金融負債,識別及確認所收購的個別可識別資產,購買價的餘下結餘將隨後於購買日期根據其相對公允值分配至其他可識別資產及負債。該交易並不會使商譽或議價購買收益增加。

For the year ended 31 December 2022 截至2022年12月31日止年度

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Revenue from contracts with customers

Revenue is recognised to depict the transfer of promised goods to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods. Specifically, the Group uses a 5-step approach to revenue recognition:

- Step 1: Identify the contract(s) with a customer
- Step 2: Identify the performance obligations in the contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to the performance obligations in the contract
- Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation.

The Group recognised revenue when (or as) a performance obligation is satisfied, i.e. when "control" of the goods underlying the particular performance obligation is transferred to customers.

A performance obligation represents a good (or a bundle of goods) that is distinct or a series of distinct goods that are substantially same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- The customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs;
- The Group's performance creates and enhances an asset that the customer controls as the asset is created or enhanced; or
- The Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

3. 主要會計政策(續)

來自客戶合約的收益

實體應以反映該實體因交換約定商品預期將獲得的代價的方式確認收益,以說明向客戶轉讓相關商品。具體而言,本集團使用5步收益確認法:

- 第1步:與客戶確認合約
- 第2步:確認合約內的履約責任
- 第3步: 釐定交易價格
- 第4步:將交易價格分配至合約內 的履約責任
- 第5步:當實體完成履約責任時確認收益。

本集團於完成履約責任時(或就此)確認 收益,即與特定履約責任相關的商品的 「控制權」轉讓予客戶時。

履約責任指一個明確商品(或一批明確 商品)或一系列大致相同的明確商品。

倘符合下列其中一項標準,則控制權在 一段時間內轉移,而收益確認會參考一 段時間內已完成相關履約責任的進度進 行:

- 於本集團履約時,客戶同時取得並享用本集團履約所提供的利益;
- 於資產增設或優化時,本集團的履 約增設或優化一項由客戶控制的資 產;或
- 本集團的履約並未創造對本集團有 替代用途的資產,且本集團對迄今 已完成履約的付款具有可強制執行 的權利。

For the year ended 31 December 2022 截至2022年12月31日止年度

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Revenue from contracts with customers (continued)

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct goods.

Revenue is measured based on the consideration specified in a contract with a customer, excludes discounts and sales related taxes.

Contract liabilities

A contract liability represents the Group's obligation to transfer goods to a customer for which the Group has received consideration from the customer.

The Group recognised revenue from the sales of goods including (i) Light-Emitting Diode ("**LED**") backlight; (ii) LED lighting; and (iii) sourcing business.

Sales of goods

Revenue from sales of goods is recognised when goods are delivered to location specified by the customers and accepted by the customers, which is recognised at a point in time when the customer has the ability to direct the use of the products.

Principal versus agent

When another party is involved in providing goods to a customer, the Group determines whether the nature of its promise is a performance obligation to provide the specified goods itself (i.e. the Group is a principal) or to arrange for those goods to be provided by the other party (i.e. the Group is an agent).

The Group is a principal if it controls the specified good before that good is transferred to a customer.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Principal versus agent (continued)

The Group is an agent if its performance obligation is to arrange for the provision of the specified good by another party. In this case, the Group does not control the specified good provided by another party before that good is transferred to the customer. When the Group acts as an agent, it recognises revenue in the amount of any fee or commission to which it expects to be entitled in exchange for arranging for the specified goods to be provided by the other party.

Leasing

Definition of a lease

A contract is, or contains, a lease if the contract conveys a right to control the use of an identified asset for a period of time in exchange for consideration.

The Group as lessee

The Group assesses whether a contract is or contains a lease, at inception of the contract. The Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less from the commencement date and do not contain a purchase option) and leases of low value assets. For these leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

Lease liabilities

At the commencement date, the Group measures lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discounted by using the interest rate implicit in the lease. If this rate cannot be readily determined, the Group uses its incremental borrowing rate.

和賃

租賃的定義

倘合約轉讓在一段時間內控制使用已識 別資產的權利以換取代價,則合約為或 包含租賃。

本集團作為承租人

本集團於合約初始評估有關合約是否屬租賃或包含租賃。本集團就其作為承租人的所有租賃安排確認使用權資產及租應的租賃負債,除短期租賃(定義乃租赁期為自開始日期起12個月或以下值值別分抵價值團別分,就該等租賃而言,本經營期內以直線法確認租賃付款為經營開支,惟倘有另一系統化基準更能代表利用租賃資產經濟利益的時間模式則除外。

租賃負債

於開始日期,本集團按於該日未支付租賃付款的現值計量租賃負債。租賃付款使用租賃中的內含利率進行貼現。倘上述利率不能較容易地確定,則本集團會採用增量借款利率。

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Leasing (continued)

The Group as lessee (continued)

Lease liabilities (continued)

Lease payments included in the measurement of the lease liability comprise:

- fixed lease payments (including in-substance fixed payments); and
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising an option to terminate the lease.

The lease liability is presented as a separate line in the consolidated statement of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

Right-of-use assets

The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement date and any initial direct costs.

Except for the right-of-use assets classified as investment property and measured under fair value model, right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses. They are depreciated over the shorter period of lease term and useful life of the underlying asset. If a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the Group expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

The Group presents right-of-use assets that do not meet the definition of investment property as a separate line item in the consolidated statement of financial position. The right-of-use assets that meet the definition of investments property is presented within "Investment property".

Leasing (continued)

The Group as lessee (continued)

Right-of-use assets (continued)

The Group applies HKAS 36 to determine whether a right-ofuse asset is impaired and accounts for any identified impairment loss.

When the Group obtains ownership of the underlying leased assets at the end of the lease term upon exercising purchase options, the carrying amount of the relevant right-of-use asset is transferred to property, plant and equipment.

The Group as lessor

The Group enters into lease agreements as a lessor with respect to its investment property. Leases for which the Group is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct cost incurred in negotiating and arranging on operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

Foreign currencies

In preparing the financial statements of each individual group entity, transactions in currencies other than the functional currency of that entity (foreign currencies) are recorded in the respective functional currency (i.e. the currency of the primary economic environment in which the entity operates) at the rates of exchanges prevailing at the dates of the transactions. At the end of the reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on the retranslation of monetary items, are recognised in profit or loss in the period in which they arise.

For the purpose of presenting the consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into the presentation currency of the Group (i.e. HK\$) using exchange rates prevailing at the end of each reporting period. Income and expenses items are translated at the average exchange rates for the year. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity under the heading of translation reserve.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets until such time as the assets are substantially ready for their intended use or sale.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

Government grants (continued)

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred income in the consolidated statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Government grants related to income that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognised in profit or loss in the period in which they become receivable.

Retirement benefit costs

Payments to stage-managed retirement benefit schemes and the Mandatory Provident Fund Scheme (the "MPF Scheme") are recognised as an expense when employees have rendered services entitling them to the contributions.

Short-term and other long-term employee benefits

A liability is recognised for benefits accruing to employees in respect of wages and salaries in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Taxation

Income tax (expense) credit represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the consolidated statement of profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary difference to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

所得税(開支)抵免指即期應付税項與遞 延税項之和。

即期應付税項根據年內應課税利潤計算。應課税利潤與綜合損益表呈報的除税前利潤不同,原因為其剔除其他年度的應課税或可扣減收入或開支項目及進一步剔除毋須課税或不可扣減項目。本集團的即期税項負債採用於各報告期末已實施或實質上已實施的稅率計算。

遞延稅項按綜合財務報表內資產及負債 的賬面值與計算應課稅利潤所採用的暫時性差額確認。所有可能 實稅的暫時性差額確認為遞不可 負債。所有可知減的暫時性差額為過一 負債。所有可知資產,惟以有應課稅 可用作抵銷可扣減暫時性差額為限 可用性差額因初步確認既不影響會計利潤 產人負債而產生,則不會確認該等 稅項資產及負債。

遞延税項負債乃就於附屬公司投資產生的應課税暫時性差額予以確認,惟本集團能夠控制暫時性差額的撥回且暫時性差額於可見未來可能不會撥回則除納納。 與該等投資相關的可扣減暫時性差額的產生的遞延税項資產,僅於可能有足夠應課税利潤可用作抵銷暫時性差額的利益,且暫時性差額預期會於可見未來撥回的情況下,方予以確認。

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Taxation (continued)

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on the tax rate (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

For the purposes of measuring deferred tax for investment property that is measured using the fair value model, the carrying amount of such property is presumed to be recovered entirely through sale, unless the presumption is rebutted. The presumption is rebutted when the investment property is depreciable and is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale. The directors of the Company reviewed the Group's investment property and concluded that the Group's investment property is not held under a business model whose objective is to consume substantially all of the economic benefits embodied in investment property over time, rather than through sale. Therefore, the directors of the Company have determined that the "sale" presumption set out in the amendments to HKAS 12 is not rebutted. As a result, the Group has not recognised any deferred taxes on changes in fair value of the investment property as the Group is not subject to any income taxes on the fair value changes of the investment property on disposal.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle current tax liabilities and assets on a net basis.

3. 主要會計政策(續)

税項(續)

遞延税項資產及負債按預期適用於清償 負債或變現資產期間的税率,根據於報 告期末已實施或實質上已實施的税率(及 稅法)計量。

遞延税項負債及資產的計量反映本集團 預期於報告期末收回或結算其資產及負 債賬面值的方式產生的税項結果。

就計量遞延税項而言,利用公允值模式 計量之投資物業之賬面值乃假設通過銷 售全數收回,除非該假設被推翻則除外。 當投資物業可予折舊及於業務模式(其 業務目標是隨時間而非透過銷售消耗投 資物業所包含之絕大部分經濟利益)內 持有時,有關假設會被推翻。本公司董 事檢討本集團之投資物業,並得出結論 認為,本集團並無以隨時間推移而非通 過銷售消耗投資物業所含絕大部分經濟 利益為目標之商業模式持有投資物業。 因此,本公司董事認定載於香港會計準 則第12號修訂本之「銷售」假設不會被推 翻。因此,本集團並無就投資物業之公 允值變動確認任何遞延税項,因為本集 **国**毋須就出售投資物業之公允值變動繳 納任何所得税。

當有可依法強制執行之權利將即期稅項 資產與即期稅項負債抵銷,而其與同一 稅務機構徵收之所得稅相關時,則可將 遞延稅項資產與負債抵銷,且本集團擬 按淨額基準結算即期稅項負債及資產。

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Taxation (continued)

For the purposes of measuring deferred tax for leasing transactions in which the Group recognises the right-of-use assets and the related lease liabilities, the Group first determines whether the tax deductions are attributable to the right-of-use assets or the lease liabilities.

For leasing transactions in which the tax deductions are attributable to the lease liabilities, the Group applies HKAS 12 Income Taxes requirements to right-of-use assets and lease liabilities separately. Temporary differences relating to right-of-use assets and lease liabilities are not recognised at initial recognition due to application of the initial recognition exemption. Temporary differences arising from subsequent revision to the carrying amounts of right-of-use assets and lease liabilities, resulting from remeasurement of lease liabilities and lease modifications, that are not subject to initial recognition exemption are recognised on the date of remeasurement or modification.

Current and deferred tax are recognised in profit or loss.

Ownership interests in leasehold land and buildings

When the Group makes payments for ownership interests of properties which includes both leasehold land and building elements, the entire consideration is allocated between the leasehold land and the building elements in proportion to the relative fair values at initial recognition. To the extent the allocation of the relevant payments can be made reliably, interest in leasehold land is presented as "right-of-use assets" in the consolidated statement of financial position except for those are classified and accounted for as investment properties under the fair value model.

Depreciation is recognised so as to write off the cost of items of property, plant and equipment, other than construction in progress, less their residual values over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Costs include any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management, including cost of testing whether the related assets are functioning properly and, for qualifying assets, borrowing costs capitalised in accordance with the Group's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and carrying amount of the asset and is recognised in profit or loss.

Investment property

Investment property is property held to earn rentals and/or for capital appreciation.

Owned investment property are initially measured at cost, including any directly attributable expenditure. Subsequent to initial recognition, investment property is measured at its fair values. Gains or losses arising from changes in the fair value of investment property is included in profit or loss for the period in which they arise.

Cash equivalents are short-term (generally with original maturity of three months or less), highly liquid investments that are readily convertible to a known amount of cash and which are subject to an insignificant risk of changes in value. Cash equivalents are held for the purpose of meeting short-term cash commitments rather for investment or other purposes.

Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets. Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income ("FVTOCI") and FVTPL.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them.

Financial assets at amortised cost (debt instruments)

The Group measures financial assets subsequently at amortised cost if both of the following conditions are met:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment.

- 金融資產的合約條款於指定日期產 生的現金流量純粹為支付本金及未 償還本金的利息。

Amortised cost and effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period.

For financial assets, the effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding expected credit losses ("ECL"), through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition.

The amortised cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance. The gross carrying amount of a financial asset is the amortised cost of a financial asset before adjusting for any loss allowance.

Interest income is recognised using the effective interest method for debt instruments measured subsequently at amortised cost. For financial assets that have subsequently become creditimpaired. For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset. If, in subsequent reporting periods, the credit risk on the creditimpaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset.

Interest income is recognised in profit or loss and is included in the "Other income" line item (Note 7).

攤銷成本及實際利率法

實際利率法乃計算債務工具攤銷成本及 於有關期間分配利息收入之方法。

就金融資產而言,實際利率乃按債務工具預計存續期或(如適用)較短期間,準確貼現估計未來現金收入(包括構成實際利率不可或缺部分之一切已付或已收費用及點數、交易成本及其他溢價或折讓)(不包括預期信貸虧損(「預期信貸虧損」))至其初步確認時債務工具之賬面總值之利率。

金融資產的攤銷成本指金融資產於初始確認時計量的金額減去本金還款,加上初始金額與到期金額間的任何差額使用實際利率法計算的累計攤銷(就任何虧損撥備作出調整)。金融資產的賬面總值指金融資產就任何虧損撥備作出調整前的攤銷成本。

就其後按攤銷成本計量的債務工具而言,利息收入採用實際利率法確認。就其後出現信貸減值的金融資產而言。就其後出現信貸減值之金融資產而言,利息收入乃對金融資產攤銷成本應用實際減值本 予以確認。倘於報告期後,信貸減值率 融工具之信貸風險好轉,使金融資產不 再出現信貸減值,利息收入乃對金融 產賬面總值應用實際利率予以確認。

Equity instrument designated as at FVTOCI

On initial recognition, the Group may make an irrevocable election (on an instrument-by-instrument basis) to designate investment in equity instrument as at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognised by an acquirer in a business combination.

Investment in equity instrument at FVTOCI is initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the revaluation reserve. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investment, instead, it will be transferred to retained profits.

Financial assets at FVTPL

Financial assets that do not meet the criteria for being measured at amortised cost or FVTOCI are measured at FVTPL. Specifically:

 Investments in equity instruments are classified as at FVTPL, unless the Group designates an equity investment that is neither held for trading nor a contingent consideration arising from a business combination as at FVTOCI on initial recognition.

Debt instruments that do not meet the amortised cost criteria or the FVTOCI criteria are classified as at FVTPL. In addition, debt instruments that meet either the amortised cost criteria or the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases. The Group has not designated any debt instruments as at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any fair value gains or losses recognised in profit or loss to the extent that they are not part of a designated hedging relationship. Derivative financial instruments

Derivatives are initially recognised at fair value at the date when derivative contracts are entered into and are subsequently remeasured to their fair value at the end of the reporting period. The resulting gain or loss is recognised in profit or loss.

Impairment of financial assets

The Group recognises a loss allowance for ECL on investments in debt instruments that are measured at amortised costs. The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

The Group always recognises lifetime ECL for trade receivables. The ECL on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

For all other financial instruments, the Group measures the loss allowance equal to 12-month ECL, unless when there has been a significant increase in credit risk since initial recognition, the Group recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increase in the likelihood or risk of a default occurring since initial recognition.

Significant increase in credit risk

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical credit loss experience and forward-looking information that is available without undue cost or effort. Forward-looking information considered includes the future prospects of the industries in which the Group's debtors operate, obtained from relevant think-tanks and other similar organisations, as well as consideration of various external sources of actual and forecast economic information that relate to the Group's operations.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly since initial recognition:

- an actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating;
- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;
- an actual or expected significant deterioration in the operating results of the debtor;
- significant increases in credit risk on other financial instruments of the same debtor;

 an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

Irrespective of the outcome of the above assessment, the Group presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Group assumes that the credit risk on a debt instrument has not increased significantly since initial recognition if the debt instrument is determined to have low credit risk at the reporting date. A financial instrument is determined to have low credit risk if (i) the financial instrument has a low risk of default. (ii) the borrower has a strong capacity to meet its contractual cash flow obligations in the near term, and (iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfill its contractual cash flow obligations. The Group considers a debt instrument to have low credit risk when the asset has external credit rating of 'investment grade' in accordance with the globally understood definition or if an external rating is not available, the asset has an internal rating of 'performing'. Performing means that the counterparty has a strong financial position and there are no past due amounts.

The Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

Definition of default

The Group considers the following as constituting an event of default for internal credit risk management purposes as historical experience indicates that receivables that meet either of the following criteria are generally not recoverable:

- when there is a breach of financial covenants by the debtor;
- information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Group, in full (without taking into account any collaterals held by the Group).

Irrespective of the above analysis, the Group considers that default has occurred when a financial asset is more than 90 days past due unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- significant financial difficulty of the issuer or the debtor;
- a breach of contract, such as a default or past due event;
- the lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider;
- it is becoming probable that the debtor will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for that financial asset because of financial difficulties.

Write-off policy

The Group writes off a financial asset when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings. Financial assets written off may still be subject to enforcement activities under the Group's recovery procedures, taking into account legal advice where appropriate. Measurement and recognition of ECL

The measurement of ECL is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information as described above. As for the exposure at default, for financial assets, this is represented by the assets' gross carrying amount at the reporting date.

For financial assets, the ECL is estimated as the difference between all contractual cash flows that are due to the Group in accordance with the contract and all the cash flows that the Group expects to receive, discounted at the original effective interest rate.

If the Group has measured the loss allowance for a financial instrument at an amount equal to lifetime ECL in the previous reporting period, but determines at the current reporting date that the conditions for lifetime ECL are no longer met, the Group measures the loss allowance at an amount equal to 12-month ECL at the current reporting date, except for assets for which simplified approach was used.

The Group recognises an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss. On derecognition of an investment in equity instrument which the Group has elected on initial recognition to measure at FVTOCI, the cumulative gain or loss previously accumulated in the revaluation reserve is not reclassified to profit or loss, but is transferred to retained profits.

Classification as debt or equity

Debt and equity instruments issued by a group entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a group entity are recognised at the proceeds received, net of direct issue costs.

Share options granted to employees (continued)

At the end of the reporting period, the Group revises its estimates of the number of options that are expected to ultimately vest. The impact of the revision of the original estimates during the vesting period, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to share options reserve.

When share options are exercised, the amount previously recognised in share options reserve will be transferred to share premium. When the share options are forfeited after the vesting date or are still not exercised at the expiry date, the amount previously recognised in share options reserve will be transferred to retained earnings.

Impairment losses on property, plant and equipment and right-of-use assets

At the end of the reporting period, the Group reviews the carrying amounts of its property, plant and equipment and right-of-use assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cashgenerating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generation units, or otherwise they are allocated to the smallest group of cashgenerating units for which a reasonable and consistent allocation basis can be identified.

Impairment losses on property, plant and equipment and right-of-use assets (continued)

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. For corporate assets or portion of corporate assets which cannot be allocated on a reasonable and consistent basis to a cash-generating unit, the Group compares the carrying amount of a group of cash-generating units, including the carrying amounts of the corporate assets or portion of corporate assets allocated to that group of cashgenerating units, with the recoverable amount of the group of cash-generating units. In allocating the impairment loss, the impairment loss is allocated first to reduce the carrying amount of any goodwill (if applicable) and then to the other assets on a pro-rata basis based on the carrying amount of each asset in the unit or the group of cash-generating units. The carrying amount of an asset is not reduced below the highest of its fair value less costs of disposal (if measurable), its value in use (if determinable) and zero. The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit or the group of cashgenerating units. An impairment loss is recognised immediately in profit or loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or the cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or the cash-generating unit) in prior years. A reversal of an impairment loss is recognised as income immediately in profit or loss.

可收回金額是指公允值減去出售成本後的餘額與使用價值兩者間的較高者。在評估使用價值時,估計未來現金流會採用稅前貼現率貼現為現值,該稅前貼現率應反映當前市場對貨幣時間價值的評估及該資產特有的風險(未就此調整估計未來現金流者)。

如資產(或現金產生單位)的可收回金額 估計較其賬面值少時,則該資產(或現金 產生單位)的賬面值將降低至其可收回 金額。就未能按合理一致基準分配至現 金產生單位的企業資產或一部分企業資 產而言,本集團會將一組現金產生單位 的賬面值(包括分配至該現金產生單位 組別的企業資產或一部分企業資產的賬 面值)與該組現金產生單位的可收回金 額作比較。於分配減值虧損時,減值虧 損首先獲分配以減少任何商譽(如適用) 的賬面值,然後根據單位或該組現金產 生單位中每項資產的賬面值按比例分配 至其他資產。資產的賬面值不會減少至 低於其公允值減出售成本(如可計量)、 其使用價值(如可釐定)及零的最高值。 否則原應將分配至資產的減值虧損金額 按比例分配至該單位或該組現金產生單 位的其他資產。減值虧損即時於損益中 確認。

Fair value measurement

When measuring fair value except for the Group's share-based payment transactions, leasing transactions, net realisable value of inventories and value in use of property, plant and equipment and right-of-use assets for the purpose of impairment assessment, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. Specifically, the Group categorised the fair value measurements into three levels, based on the characteristics of inputs, as follows:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

於計量公允值時(本集團的以股份支付款項之交易、租賃交易、存貨可變現淨值及評估減值所用物業、廠房及設備以及使用權資產的使用價值除外),本集團會考慮市場參與者於計量日對資產或負債定價時所考慮的資產或負債特點。

計量非金融資產公允值時,須考慮市場參與者藉資產的最高及最佳用途所得經濟效益、或售予另一以最高及最佳用途使用資產的市場參與者所得經濟效益。

本集團所用的估值方法,務求切合情況, 且有充足數據用以計量公允值,盡量使 用相關可觀察輸入數據,而盡量避免使 用不可觀察輸入數據。具體而言,本集 團按輸入數據特性將公允值計量分成如 下三級:

4. CRITICAL ACCOUNTING JUDGEMENT AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, which are described in Note 3, the directors of the Company are required to make judgement, estimates and assumptions about the amounts of assets and liabilities, revenue and expenses reported and disclosures made in the consolidated financial statements. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Critical judgement in applying accounting policies

The following are the critical judgement, apart from those involving estimations (see below), that the directors of the Company have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised and disclosures made in the consolidated financial statements.

4. CRITICAL ACCOUNTING JUDGEMENT AND KEY SOURCES OF ESTIMATION UNCERTAINTY (continued)

Principal versus agent consideration

The Group engages in trading of memory chips related products. The Group assessed whether the Group should recognise revenue on gross basis based on the requirements in HKFRS 15. The Group concluded that the Group acts as the principal for such transactions as it controls the specified good before it is transferred to the customer after taking into consideration indicators such as that the Group is primarily responsible for fulfilling the promise to provide the goods. The Group has inventory risk and discretion in establishing selling prices of the goods. During the year ended 31 December 2022, the Group recognised revenue in respect of such business is approximately HK\$504,317,000 (2021: HK\$319,145,000).

Deferred taxation on investment property

For the purposes of measuring deferred tax liabilities or deferred tax assets arising from investment property that is measured using the fair value model, the directors of the Company have reviewed the Group's investment property and concluded that the Group's investment property is held under a business model whose objective is to consume through sale, rather than to consume substantially all of the economic benefits embodied in the investment property over time. Therefore, in measuring the Group's deferred taxation on such investment property, the directors of the Company have determined that the presumption that the carrying amount of investment property measured using the fair value model is recovered entirely through sale not rebutted. As a result, the Group has not recognised any deferred taxes on changes in fair value of investment properties as the Group is not subject to any income taxes on the fair value changes of the investment property on disposal.

Key sources of estimation uncertainty

The followings are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Income taxes

As at 31 December 2022, No deferred tax asset has been recognised on the tax losses of HK\$64,147,000 due to the unpredictability of future profit streams for certain subsidiaries. The realisability of the deferred tax asset mainly depends on whether sufficient future profits or taxable temporary differences will be available in the future. In cases where the actual future profits generated are less than expected, a material reversal of deferred tax assets may arise, which would be recognised in profit or loss for the period in which such a reversal takes place.

Valuation of inventories

Inventories are stated at the lower of cost and net realisable value. Net realisable value is the estimated selling price for inventories, less the estimated costs of completion and costs necessary to make the sales. The management reviews the inventory ageing listing on a periodic basis for those aged inventories. This involves comparison of carrying amount of the aged inventory items with the respective net realisable value. The purpose is to ascertain whether allowance is required to be made in the consolidated financial statements for any obsolete and slow moving items. The Group has carried periodic review on the net realisable value of inventory. However, the actual realisable value of inventory is not known until the sale was concluded. As at 31 December 2022, the carrying amounts of inventories of the Group was approximately HK\$276,763,000 (2021: HK\$312,029,000) (net of provision of inventories of approximately HK\$61,465,000 (2021: HK\$74,002,000)). Net reversal of provision of inventories of approximately of HK\$6,517,000 (2021: HK\$2,881,000) was recognised during the year.

Valuation of trade receivables

Allowance for impairment of trade receivables are based on assumptions about ECL. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, bases on the number of days that an individual receivable is past due as well as the Group's historical credit loss experience and forward-looking information at the end of the reporting period. Changes in these assumptions and estimations could materially affect the result of the assessment and it may be necessary to make additional allowance for impairment to the consolidated statement of profit or loss. As at 31 December 2022, the carrying amounts of trade receivables of the Group was approximately HK\$749,923,000 (2021: HK\$672,316,000) (net of accumulated allowance for impairment of trade receivables of HK\$25,217,000 (2021: HK\$32,563,000)).

Estimated impairment of property, plant and equipment and right-of-use-assets

Property, plant and equipment and right-of-use assets are stated at costs less accumulated depreciation and impairment, if any. In determining whether an asset is impaired, the Group has to exercise judgement and make estimation, particularly in assessing: (1) whether an event has occurred or any indicators that may affect the asset value; (2) whether the carrying amount of an asset can be supported by the recoverable amount, in the case of value in use, the net present value of future cash flows which are estimated based upon the continued use of the asset; and (3) the appropriate key assumptions to be applied in estimating the recoverable amounts including cash flow projections and an appropriate discount rate. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cashgenerating unit to which the assets belongs.

The Group manages its capital to ensure that entities in the Group will be able to continue as a going concern while maximising the return to shareholders through the optimisation of the debt and equity balance. The Group's overall strategy remains unchanged from prior year.

The directors of the Company review the capital structure regularly. Sensitivity analysis (continued)

The following table details the Group's sensitivity to a 5% (2021:5%) increase or decrease in HK\$ against the relevant foreign currencies other than US\$. 5% (2021: 5%) is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents the management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the end of each reporting period for a 5% (2021:5%) change in foreign currency rates. The sensitivity analysis includes external loans as well as loans to foreign operations within the Group where the denomination of the loan is in a currency other than the functional currency of the lender or the borrower. A positive (negative) number below indicates an increase (a decrease) in post-tax profit where the respective functional currencies strengthen by 5% (2021: 5%) against the relevant currency. For a 5% (2021: 5%) weakening of HK\$ against the relevant foreign currency, there would be an equal and opposite impact on the profit and other equity and the balances below would be negative.

Interest rate risk

The Group is exposed to fair value interest rate risk in relation to fixed-rate pledged bank deposits and deposits with bank (see Note 24) and fixed-rate bank borrowings (see Note 28). The Group currently does not have an interest rate hedging policy. However, the management of the Group monitors interest rate exposure and will consider other necessary actions when significant interest rate exposure is anticipated.

The Group is also exposed to cash flow interest rate risk in relation to variable-rate pledged bank deposits and bank balances (see Note 24) and variable-rate bank and other borrowings (see Note 28). It is the Group's policy to keep its borrowings at floating rate of interest so as to minimise the fair value interest rate risk.

The Group's exposures to interest rates on financial liabilities are detailed in the liquidity risk management section of this note. The Group's cash flow interest rate risk is mainly concentrated on the fluctuation of Hong Kong Interbank Offered Rate ("HIBOR")/London Interbank Borrowing Rate ("LIBOR") arising from the Group's Hong Kong dollars denominated borrowings and the fluctuation of Loan Prime Rate ("LPR") arising from the Group's RMB denominated borrowings.

本集團承受與固定利率已抵押銀行存款 及銀行存款(見附註24)以及固定利率銀 行借款(見附註28)有關的公允值利率風 險。本集團現時並無利率對沖政策。然而, 本集團管理層監管利率風險,並將於預 見重大利率風險時,考慮採取其他必要 行動。

本集團亦承受與浮動利率已抵押銀行存款及銀行結餘(見附註24)及浮動利率銀行及其他借款(見附註28)有關的現金流量利率風險。本集團的政策為將借款按浮動利率計息以盡量減低公允值利率風險。

Sensitivity analysis

The sensitivity analysis below has been determined based on the exposure to interest rates for non-derivative instruments at the end of the reporting period. The analysis is prepared assuming the amounts of financial instruments outstanding at the end of the reporting period were outstanding for the whole year. A 50 basis point (2021: 50 basis point) increase or decrease is used when reporting interest rate risk internally to key management personnel and represents the management's assessment of the reasonably possible change in interest rates.

If interest rates had been 50 basis points (2021: 50 basis points) higher/lower and all other variables were held constant, the Group's post-tax profit for the year ended 31 December 2022 would decrease/increase by HK\$2,907,000 (2021: post-tax profit decrease/increase by HK\$1,531,000). This is mainly attributable to the Group's exposure to cash flow interest rate risk on its variable-rate bank borrowings.

敏感度分析

以下敏感度分析根據於報告期末非衍生工具的利率風險釐定。有關分析假設於報告期末尚未償還的金融工具金額於整個年度均未償還。50個基點(2021年:50個基點)上升或下降為在內部向主要管理人員報告利率風險時所使用的,且代表管理層對利率合理可能變動的評估。

倘利率上升/下降50個基點(2021年:50個基點),而所有其他可變因素均維持不變,本集團截至2022年12月31日止年度的除税後利潤將減少/增加2,907,000港元(2021年:除税後利潤減少/增加1,531,000港元),主要歸因於本集團就其浮動利率銀行借款面臨現金流量利率風險。

Credit risk

Credit risk refers to the risk that the Group's counterparties default on their contractual obligations resulting in financial losses to the Group. As at 31 December 2022 and 2021, the Group's maximum exposure to credit risk without taking into account any collateral held or other credit enhancements, which will cause a financial loss to the Group due to failure to discharge an obligation by the counterparties is arising from the carrying amount of the respective recognised financial assets as stated in the consolidated statement of financial position.

The credit risk of the Group mainly arises from bank balances, pledged bank deposits, deposits with bank, trade receivables, bills receivables and deposits and other receivables. The Group does not hold any collateral or other credit enhancements to cover its credit risks associated with its financial assets. The carrying amounts of these balances represent our Group's maximum exposure to credit risk in relation to financial assets.

In order to minimise the credit risk, the management of the Group has delegated a team responsible for determination of credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts.

For trade receivables, the Group has applied the simplified approach in HKFRS 9 to measure the loss allowance at lifetime ECL. The Group determines the ECL collectively by using a provision matrix, estimated based on historical credit loss experience, as well as the general economic conditions of the industry in which the debtors operate. In this regard, the directors of the Company consider that the Group's credit risk is significantly reduced.

信貸風險

信貸風險指本集團對手方未履行合約責任導致本集團蒙受財務虧損的風險。於2022年及2021年12月31日,本集團因交易對手方未能履行責任,而將導致本集團蒙受財務虧損的最高信貸風險(不計及任何持有的抵押品或其他信用增級),乃因綜合財務狀況表所列有關已確認金融資產的賬面值而產生。

本集團的信貸風險主要來自銀行結餘、 已抵押銀行存款、銀行存款、應收賬款、 應收票據及按金以及其他應收款項。本 集團並無持有任何抵押品或其他信用增 級以應對與其金融資產相關的信貸風險。 本集團就金融資產面臨的最大信貸風險 為該等結餘的賬面值。

為盡量降低信貸風險,本集團管理層已 委派一組人員負責制訂信貸限額、信貸 審批及其他監控措施,以確保採取跟進 措施收回逾期未付的債項。

就應收賬款而言,本集團已應用香港財務報告準則第9號的簡化法計量存續期預期信貸虧損的虧損撥備。本集團基於過往信貸虧損經驗及債務人經營所在行業的一般經濟狀況,使用撥備矩陣共同確定預期信貸虧損。就此而言,本公司董事認為,本集團的信貸風險已顯著降低。

Credit risk (continued)

For bills receivables, deposits and other receivables, the Group has assessed whether there has been a significant increase in credit risk since initial recognition. The Group considers that there are no significant increase in credit risk of these amounts since initial recognition and the Group provided impairment based on 12m ECL.

The credit risk on liquid funds is limited because the counterparties are banks with high credit ratings assigned by international credit-rating agencies.

Included in the Group's trade receivables balance as at 31 December 2022, HK\$206,274,000 (31 December 2021: HK\$178,967,000), representing 28% (31 December 2021: 27%) of the total trade receivables, is due from the Group's largest customer. There are no other customers who represent more than 5% of the total trade receivables balance as at the end of the reporting periods. The concentration of credit risk is limited due to the customer base being large and unrelated.

The Group's concentration of credit risk by geographical locations is mainly in PRC, which accounted for 69% (2021: 65%) of the total trade receivable as at 31 December 2022.

The Group has concentration of credit risk as 28% (2021: 27%) and 62% (2021: 58%) of the total trade receivables was due from the Group's largest customer and the five largest customers respectively within the property construction business segment.

Note: For trade receivables, the Group has applied the simplified approach in HKFRS 9 to measure the loss allowance at lifetime ECL. The Group determines the ECL on trade receivables collectively by using a provision matrix, estimated based on historical credit loss experience and the past due status of the debtors, adjusted as appropriate to reflect current conditions and estimates of future economic conditions. Note 22 includes further details on the loss allowance for these assets.

The carrying amount of the Group's financial assets at FVTPL as disclosed in note 19 best represents their respective maximum exposure to credit risk. The Group holds no collateral over any of these balances.

Liquidity risk

In the management of the liquidity risk, the Group monitors and maintains a level of cash and cash equivalents deemed adequate by the management to finance the Group's operations and mitigate the effects of fluctuations in cash flows. The management monitors the utilisation of bank and other borrowings and ensures compliance with loan covenants.

The Group relies on bank and other borrowings as a significant source of liquidity. As at 31 December 2022, the Group has available unutilised trade financing and bank loan facilities of HK\$57,671,000 (2021: HK\$472,601,000), details of which are set out in Note 28(e).

The following table details the Group's remaining contractual maturity for its non-derivative financial liabilities. The table has been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. Specifically, bank borrowings with a repayment on demand clause are included in the earliest time band regardless of the probability of the banks or financial institution choosing to exercise their rights. The maturity dates for other non-derivatives financial liabilities are based on the agreed repayment dates.

Note: Bank and other borrowings with a repayment on demand clause are included in the "on demand or within 1 year time band in the above maturity analysis. As at 31 December 2022, the aggregate undiscounted principal amounts of these bank and other borrowings amounted to HK\$444,408,000 (2021: HK\$325,429,000). Taking into account the Group's financial position, the directors of the Company do not believe that it is probable that the banks and financial institutions will exercise their discretionary rights to demand immediate repayment. The directors of the Company believe that these bank and other borrowings will be repaid in accordance with the scheduled repayment dates set out in the loan agreements. At that time, the aggregate principal and interest cash outflows will amount to approximately HK\$485,202,000 (2021: HK\$357,127,000).

The amounts included above for variable interest rate instruments for non-derivative financial liabilities are subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of each reporting period.

Accordingly, the directors of the Company elected to designate the investment in equity instrument as at FVTOCI as they believe that recognising short-term fluctuations in this investment's fair value in profit or loss would not be consistent with the Group's strategy of holding this investment for long-term purposes and realising their performance potential in the long run.

22. TRADE AND BILLS RECEIVABLES (continued)

All the bills receivables are aged within 180 days.

The Group measures the loss allowance for trade receivables at an amount equal to lifetime ECL. The ECL on trade receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for factors that are specific to the debtors, general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of conditions at the reporting date.

There has been no change in the estimation techniques or significant assumptions made during the years.

As the Group's historical credit loss experience does not indicate significantly different loss patterns for different customer segments, the loss allowance based on past due status is not further distinguished between the Group's different customer bases.

The following table provides information which are assessed based on provision matrix.

As the end of the reporting period, certain subsidiaries of the Group had aggregate unused tax losses of HK\$64,147,000 (2021: HK\$53,060,000) available for offset against future profits. No deferred tax asset has been recognised in respect of these unused tax losses due to the unpredictability of future profit stream of these subsidiaries. As at 31 December 2022, tax losses of HK\$11,585,000 (2021: HK\$7,251,000) will be expired within 5 years from 2018. With effective from 1 January 2018, the tax losses incurred by "High and New Technology Enterprise" ("HNTE") of HK\$52,562,000 (2021: HK\$34,382,000) will expire in ten years from the year in which the loss originated in 2015. Other losses may be carried forward indefinitely.

於報告期末,本集團若干附屬公司可供抵銷未來利潤的未動用税項虧損總額為64,147,000港元(2021年:53,060,000港元)。由於難以預測該等附屬公司的未來利潤流,故並無就該等未動用税項虧損確認遞延税項資產。於2022年12月31日,稅項虧損11,585,000港元(2021年:7,251,000港元)將自2018年12月31日,行高新技術企業」(「高新技術企業」)產生之税項虧損52,562,000港元(2021年:34,382,000港元)將自虧損產生年度2015年起十年內屆滿。其他虧損可無限期結轉。

For the year ended 31 December 2022 截至2022年12月31日止年度

29. DEFERRED TAXATION (continued)

As the end of the reporting period, the Group has deductible temporary differences of HK\$113,062,000 (2021: HK\$116,281,000). A deferred tax asset has been recognised in relation to HK\$59,110,000 (2021: HK\$51,438,000) of such temporary differences. No deferred tax asset has been recognised in relation to the remaining HK\$53,952,000 (2021: HK\$64,843,000) as it is not probable that taxable profit will be available against which the deductible temporary differences can be utilised.

Under the EIT Law, withholding tax is imposed on dividends in respect of profits earned by the PRC subsidiaries from 1 January 2008 onwards (the "Post-2008 Earnings"). Deferred taxation has not been provided for in the consolidated financial statements in respect of temporary difference attributable to the "Post-2008 Earnings" amounting to HK\$518,439,000 (2021: HK\$566,489,000) as the Group is able to control the timing of the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future.

30. CORPORATE BOND

In 2017, the Group issued a 7.5 year corporate bond with principal amount of HK\$2,000,000 to an independent third party, net of direct expenses of HK\$300,000, which will be due in September 2023. The corporate bond carries interest at a fixed rate of 8% per annum with interest payable annually in arrears. The corporate bond is unsecured. The effective interest rate of the corporate bond is approximately 11.05% per annum.

29. 遞延税項(續)

於報告期末,本集團可扣減暫時性差額為113,062,000港元(2021年:116,281,000港元)。已就該等暫時性差額中59,110,000港元(2021年:51,438,000港元)確認遞延税項資產。由於應課税利潤將可用作抵銷可扣減暫時性差額的可能性不大,故並無就餘下53,952,000港元(2021年:64,843,000港元)確認遞延稅項資產。

根據企業所得税法,自2008年1月1日起,中國附屬公司就其所賺取利潤(「2008年後的盈利」)的股息須繳交預扣税。由於本集團可控制撥回暫時性差額的時間,而有關暫時性差額可能不會於可預見的將來撥回,故此並無於綜合財務報表內就「2008年後的盈利」應佔暫時性差額518,439,000港元(2021年:566,489,000港元)的遞延税項作出撥備。

30. 公司債券

於2017年,本集團向獨立第三方發行本金額2,000,000港元的7.5年公司債券,扣除直接開支300,000港元,將於2023年9月到期。公司債券按固定年息率8%計息(每年期末支付利息)。公司債券並無抵押。公司債券的實際年利率約為11.05%。

The government grants of HK\$17,200,000 (2021: HK\$18,793,000) is stated as non-current liabilities in the consolidated statement of financial position as the directors of the Company are of the opinion that certain conditions in respect of these grants will not be fulfilled within the next twelve months from the end of the reporting period.
