APPENDIX I: LIST OF MAIN LAWS AND REGULATIONS TO WHICH THE COMPANY IS SUBJECT	28
APPENDIX II: INDEX OF ESG REPORTING GUIDE OF HKEX	29

ABOUT THIS REPORT

OVERVIEW

This is the seventh Environmental, Social and Governance (“**ESG**”) Report (the “**Report**”) issued by Future Bright Mining Holdings Limited (the “**Group**”, “**Future Bright**”, the “**Company**” or “**us**”). It is published on an annual basis. This Report summarises all ESG-relevant material issues and the Group’s management approaches and performance for the year ended 31 December 2022.

REPORTING SCOPE AND BOUNDARY

This ESG report covers the Company’s main business, which is the mining and sale of marble blocks. Therefore, the locations where its business operates, namely the operational site in Hubei, and the Company’s offices in Xiangyang, Inner Mongolia, Xiamen and Hong Kong will be included in this Report. The scope of this Report covers the period from 1 January 2022 to 31 December 2022 (the “**Reporting Period**”), which is same as the financial year ended 31 December 2021. Some information is retrospective with respect to past years.

Although the reporting scope remains unchanged, the Company was in the process of renewing mining permit and performing exploration work during the Reporting Period. As a result, there were no mining operations, and the scale of business may not be comparable to that of the previous year. The data provided in this Report has taken consideration of this temporary change in scale of business.

BASIS OF PREPARATION

This report has been prepared in accordance with the Environmental, Social and Governance Reporting Guide (the “**ESG Reporting Guide**”) issued by The Stock Exchange of Hong Kong Limited (the “**Stock Exchange**”) as set out in Appendix 27 to the Rules Governing the Listing of Securities on the Stock Exchange (the “**Listing Rules**”). It presents and discloses information on the Company’s ESG performance for the reference of all relevant parties. The contents of this report have been determined in accordance with a set of established procedures, which include: identifying and prioritising key stakeholders and material ESG issues, determining ESG reporting boundaries, collecting materials relevant to the report, preparing ESG report based on information, and reviewing the information in the report.

During the preparation of this Report, the Company has applied the reporting principles stipulated in the ESG Reporting Guide as follows:

- **Materiality:** Identification of material issues is completed by conducting materiality assessment and the identified material issues are adopted as the focus for the preparation of the ESG Report. The materiality of issues is reviewed and confirmed by the Board and the ESG working group. Please refer to the sections headed “Stakeholder Engagement” and “Materiality Assessment” for further details.
- **Quantitative:** Supplementary notes are added along with quantitative data disclosed in the ESG Report to explain any standards, methodologies, and sources of conversion factors used during the calculation of emissions and energy consumption.
- **Consistency:** There is no major change in reporting scope and methodology compared to the previous ESG Report and any changes to the figures of disclosure and calculation methodologies are specified in the ESG Report.

In relation to the Group’s corporate governance matters, please refer to the Corporate Governance Report on pages 17 to 29 of the Annual Report 2022.

SOURCE AND RELIABILITY ASSURANCE

The information in this report was mainly retrieved from statistical reports and relevant documents of the Company. The board (the “**Board**”) of directors (the “**Directors**”) of the Company undertakes that there are no false representations or misleading statements in this report, and accepts responsibility for the truthfulness, accuracy and completeness of the contents of this Report.

FORWARD-LOOKING STATEMENTS

This Report contains forward-looking statements which are based on the current expectations, estimates, projections, beliefs, and assumptions of the Company about the businesses and the markets in which it and its subsidiaries operate. These forward-looking statements are not guarantees of future performance and are subject to market risk, uncertainties, and factors beyond the control of the Company. Therefore, actual outcomes and returns may differ materially from the assumptions made and the statements contained in this Report.

CONFIRMATION AND APPROVAL

This Report was approved by the Board on 25 April 2023 following the confirmation by the management.

ABOUT THE COMPANY

The Company is an enterprise engaged in Yiduoyan marble mining. It focuses on the extraction and sale of its main product, marble blocks. The Company is also involved in coal trading activities to expand its revenue source during the Reporting Period. Through a comprehensive and open disclosure of our non-financial information, we hope to provide an exchange platform demonstrating the social responsibility philosophy and non-financial operating achievements of Future Bright to investors, the public and stakeholders, with a view of continuously enhancing and improving our ESG performance.

BOARD STATEMENT AND ESG GOVERNANCE

The Company follows the requirements of the Listing Rules, all applicable laws and regulations, and adheres to the operating policy of being “quality-oriented, honest and progressive”. We continue to optimise the internal management system of the Company in order to ensure its outstanding operation and management, thereby providing essential assurance to safeguard the interests of its shareholders and investors. We view our ESG commitment as part of our corporate social responsibility and are committed to incorporating ESG considerations into our decision-making process. To achieve this, we have established a thorough ESG governance structure to ensure that our ESG goals are aligned with our strategic development and integrated into our business operations.

The Board has ultimate oversight responsibility for the Company’s ESG matters, including ESG guidelines, strategy and policy. The Board of Directors is responsible for supervising and managing ESG work and ensuring that Future Bright establishes timely and effective ESG risk management and internal monitoring systems. In order to better manage the Company’s ESG performance and identify potential risks, the Board of Directors conducts annual materiality assessment with the assistance of the ESG working group and evaluates and prioritises important ESG-related issues with reference to the opinions of different stakeholders.

The Company’s ESG working group is appointed and established by Board members to facilitate the Board’s oversight of ESG matters. The ESG working group is responsible for collecting and analysing ESG data, monitoring and evaluating the Company’s ESG performance, ensuring compliance with ESG-related laws and regulations, and preparing ESG reports. The ESG working group will schedule meetings to evaluate the effectiveness of current policies and procedures and develop appropriate solutions to improve the overall performance of ESG policies. The Company will strive to integrate sustainable development into its business operations, reduce the environmental impact of the Company’s operations by setting ESG-related goals, reduce potential risks and their negative impacts on our business operations, and fulfil corporate responsibility. The ESG working group will report to the Board in due course, evaluate the implementation and effectiveness of the internal control mechanism, and review the progress of the established goals. The ESG working group will also be involved in enterprise risk management to assist in assessing and identifying the Company’s ESG risks and opportunities.

ABOUT THIS REPORT

STAKEHOLDER ENGAGEMENT

Maintaining adequate communication with stakeholders and listening to their demands so as to achieve the Company's goal of growing and developing with its stakeholders are always the focus of Future Bright. In order to strengthen the communication between the Company and its stakeholders and ensure that the interests of stakeholders can be realised, we continue to improve the communication channels and internal management mechanisms, establish a stakeholder communication mechanism, and effectively integrate the expectations of related parties into the day-to-day operations and reports of the Company. After investigation and identification, we have identified a cluster of important stakeholders of the Company, including employees, shareholders and investors, customers, suppliers, government and regulatory authorities, community and social organisations, media and the public, and so forth. The categories of stakeholders and communication methods are set out in the table below:

Stakeholder Groups	Issues of Concern	Communication Channels/ Feedback Approach
Employees	<ul style="list-style-type: none"> • Career development • Employee remuneration and welfare • Occupational health and safety • Labour rights 	<ul style="list-style-type: none"> • Employee performance appraisal review • Meetings and training • Internal email communications • Phone calls or instant communication software
Shareholders and investors	<ul style="list-style-type: none"> • Operating results • Corporate governance • Honesty and compliance 	<ul style="list-style-type: none"> • Financial report • Mails • General meetings/extraordinary general meetings • Official website • Performance press conference • Press releases/announcements
Customers	<ul style="list-style-type: none"> • Product quality control • Customer services • Customer rights 	<ul style="list-style-type: none"> • On-site visits • Mails • Phone calls or instant communication software • Meetings • Industry seminars
Suppliers	<ul style="list-style-type: none"> • Fair and open competition • Responsible supply chain management • Win-win cooperation • Product responsibility 	<ul style="list-style-type: none"> • On-site visits • Mails • Phone calls or instant communication software • Meetings • Industry seminars
Government and regulatory authorities	<ul style="list-style-type: none"> • Compliance with laws and regulations • Occupational health and safety • Environmental protection 	<ul style="list-style-type: none"> • General report • On-site visits • Mails • Correspondence • Meetings
Community and social organisations	<ul style="list-style-type: none"> • Community involvement • Environmental protection awareness • Business ethics 	<ul style="list-style-type: none"> • On-site visits • Meetings
Media and the public	<ul style="list-style-type: none"> • Environmental protection • Occupational health and safety • Community involvement • Open and transparent information 	<ul style="list-style-type: none"> • ESG report • Press releases/announcements • Social welfare activities • Meetings

The Company is committed to understanding and meeting stakeholders' ever-changing expectations to improve the Company's ESG performance and continue to create greater value for the wider community.

MATERIALITY ASSESSMENT

Future Bright is always concerned about the important issues that reflect the significant economic, environmental and social impacts generated by the businesses of the Company, and at the same time, it pays attention to the stakeholders' expectations of the Company. We continue to identify and analyse the importance of the ESG issues, provide full disclosure on the ESG issues and respond to the concerns of various stakeholders about our obligations to fulfil social responsibilities. During the Reporting Period, the Company actively communicates with internal and external stakeholders to understand their concerns, and the results of the survey have been included in the following materiality matrix. Occupational health and safety, as well as integrity and compliance, remain as major concerns for the Company. The importance of other ESG issues is illustrated below:

Issues in the matrix are as follows:

No.	Name of Issue	No.	Name of Issue
1	Occupational health and safety	7	Suppliers management
2	Quality assurance	8	Employment and equality
3	Integrity and compliance	9	Employee development and training
4	Pollution discharge	10	Employee remuneration and welfare
5	Use of energy and resources	11	Community involvement
6	Environmental protection	12	Climate change

COMPLIANCE GOVERNANCE

INTEGRITY PRACTICES

The Company is committed to maintaining a high level of business integrity, honesty and transparency in all business dealings. We comply with the Company Law of the People's Republic of China (《中華人民共和國公司法》), the Interim Provisions on Banning Commercial Bribery (《關於禁止商業賄賂行為的暫行規定》) and the Prevention of Bribery Ordinance (Chapter 201 of the Laws of Hong Kong) and other relevant laws and regulations of the place where we operate; formulate the rules and regulations such as the Employee Code of Conduct and Anti-corruption Policy and Procedures; strictly prohibit any form of fraud or bribery; and are also committed to the prevention and deterrence of all forms of fraud and bribery. In December 2022, we distributed anti-corruption training materials internally and invited professionals to host a training seminar on the responsibilities and obligations of directors for listed companies for all Directors and management, in order for them to further consolidate their compliance-related knowledge.

The Company coordinated the cross-departments anti-fraud work through the Audit Committee under the Board. Future Bright strictly prohibited employees from making improper payments, illegal rebates, and other forms of bribery. While assisting employees in identifying shady trading activities such as fraud, corruption, anti-money laundering in order to prevent employees from being involved in the activities that can adversely damage the Company's business reputation, we are committed to developing employees' awareness of honesty and integrity. During the Reporting Period, the Company and its employees were not involved in any corruption cases.

Future Bright is committed to maintaining the highest level of openness, integrity and accountability, thereby has developed a whistle-blowing policy. In order to raise employees' awareness of maintaining fairness within the enterprise and use it as an internal control mechanism, the whistle-blowing policy provides employees with channels and guidelines for reporting. Employees may report incidents of suspected misconduct directly to the vice chairman of the Board and/or the Audit Committee, who may appoint the Audit Committee or other appropriate person or establish a team to investigate the matter.

Besides strengthening anti-fraud and anti-corruption supervision, the Company appoints Board members to supervise anti-money laundering activities, conduct due diligence on customers and transaction parties, and establish collaborative relations with customers having legitimate sources of funds and good reputation. Future Bright is able to continue to improve the internal supervision and control level of the enterprise through implementation of appropriate and reasonable measures.

FAIR COMPETITION

A fair and orderly competitive environment is the basis for ensuring healthy and orderly production and operation of enterprises. The Company proactively creates a fair and clean business environment and working ambience, and strictly complies with the laws and regulations including the Anti-unfair Competition Law of the People's Republic of China (《中華人民共和國反不正當競爭法》), the Anti-monopoly Law of the People's Republic of China (《中華人民共和國反壟斷法》), the Company Law of the People's Republic of China (《中華人民共和國公司法》) and the Competition Ordinance (Chapter 619 of the Laws of Hong Kong). It also rejects the act of market monopolisation, misconduct that limits the market competition, and malicious industry competition. During the Reporting Period, there were no litigations against the Company due to unfair competition or violation of antimonopoly laws.

Future Bright continuously improves its standard of management in accordance with the laws and industry standards in relation to product quality in the region where it operates. At the same time, it collaborates with suppliers to improve product quality so as to ensure a timely and safe supply of high-quality products to customers.

WIN-WIN COOPERATION

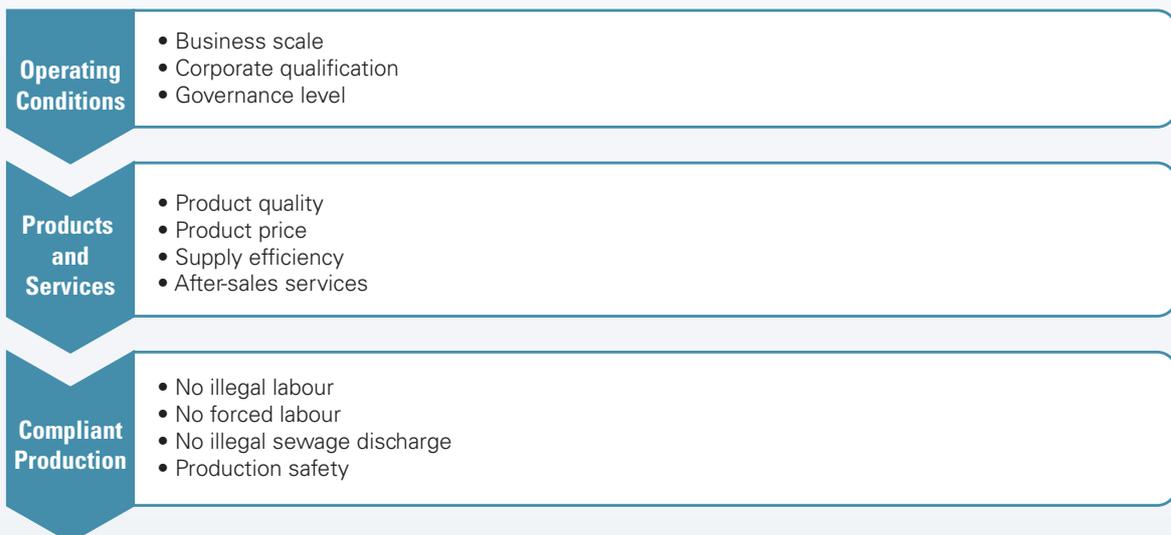

Future Bright has formulated and implemented the Procurement Management System and achieved the aim of reducing procurement costs, and enhancing the quality and economic benefits of procurement through standardised supply chain management. We strive to maintain close communication with suppliers, focus on developing suppliers with long-term cooperation opportunities and strengthening our cooperation, so as to achieve mutual complementation, joint development and improvement in competitiveness.

The suppliers of Future Bright are mainly manufacturers of machineries, equipment and relevant damageable parts in the production process, such as diamond string bead wire, lubricating oil, gasoline, drill pipes, drill bits and equipment parts, as well as coal miners. During the Reporting Period, the Company had a total of 12 suppliers in China. The number of suppliers has increased when compared to the last year.

Selection of Suppliers

Future Bright continued to maintain the standard in material procurement responsibilities and procedures in the mining area and the non-mining area, fine-tune the qualification certification and the warehousing inspection requirements for suppliers to ensure the quality and safety of raw materials and machineries, in order to guarantee the quality of products. During the Reporting Period, we submitted procurement contracts and documents through the OA system and approval was made in the system. Future Bright further enhanced the effectiveness and reasonableness of supply chain management through professional digital tools.

In selecting potential suppliers, we verify indicators including the suppliers' operating conditions, product and service quality, ESG performance, actual supply capability and compliance of suppliers through various on-site and off-site investigations, to select the best supplier.

Key Process for Assessment of Potential Suppliers

QUALITY DRIVEN

Supplier Evaluation and Grading

We have updated the supplier evaluation process during the Reporting Period and evaluated existing suppliers to ensure suppliers meet the Company's standards and requirements. In addition, we require suppliers to take appropriate measures to ensure timely and proper compliance with new laws and regulations as well as relevant regulations of regulatory authorities. During the Reporting Period, Future Bright has implemented supplier evaluation for all the suppliers.

Based on factors including the quality, price, speed of delivery, after-sales services, number of maintenance or returns, value-added, payment period and other factors, the Company classifies existing suppliers into three categories, namely "preferred", "accepted" and "tentatively acceptable", and eliminates suppliers that did not meet our requirement in a timely manner in order to maintain product quality and stability of supply.

GREEN PROCUREMENT

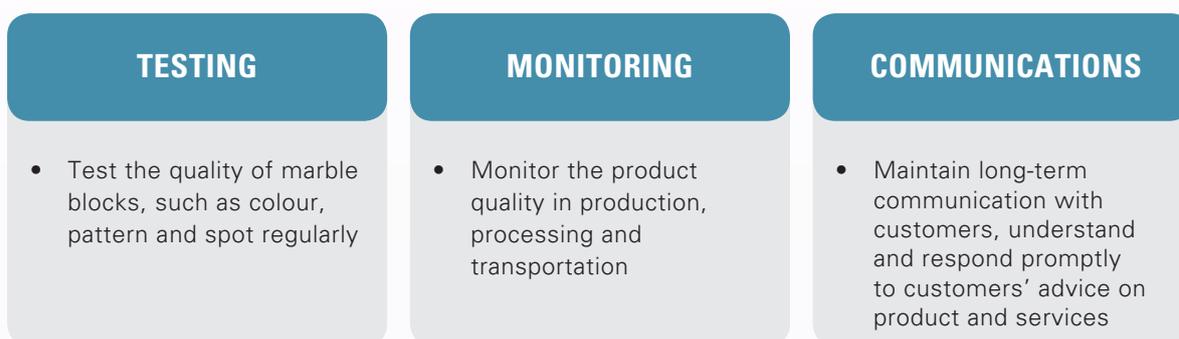

The Company is committed to local sourcing in order to achieve sustainable development in the Company's operation. During the procurement process, the Company places priority on local suppliers and environmentally friendly products and services, hoping to reduce its carbon footprint, support local economic development and create employment opportunities for local communities. In addition to environmental factors, the Company also monitors compliance of suppliers and contractors with regard to relevant laws and regulations, as well as standards related to health, safety, forced labour and child labour. The Company conducts visits to suppliers' operating locations, to ensure that suppliers can meet all aspects of the standards, as a parameter in evaluating suppliers. Through the above practices, the Company aims to reduce environmental and social risks in the supply chain.

QUALITY ASSURANCE

Products of the Company are mainly marble blocks extracted from the Yiduoyan marble mine at Xiaoyan Town, Nanzhang County, which are supplied to downstream customers engaging in building materials distribution and real estate development. Our products are subject to sample inspections by the National Stone Quality Supervision and Testing Centre and the National Test Centre of Building Materials to ensure our marble blocks meet the quality standards. During the Reporting Period, the Company did not produce any marble blocks.

To improve and optimise product quality, we have formulated and implemented the product quality control process to ensure our products meet the standard. Future Bright strives to keep abreast of the latest industry trends, consolidate the foundation of its business and leverage on the feedback from industry professionals and end users to enhance product recognition. We have established a quality control team comprised of technical consultants and the mining head, each with specific responsibilities in product quality and on-site support at the mining area to assure quality of the products. Our technicians and consultants have extensive industrial, technical, legal or management experience, which ensures all products of Future Bright meet the quality standard. We conducted detailed inspection, testing and preparation works on horizontal platforms and mining benches to ensure successful mining works and product quality.

The Company is committed to establishing long-term and stable relationships with customers and maintaining the goal of zero customer complaints. If we receive any complaints, we will conduct inspections and determine the required actions in order to promptly respond to customer comments on products and services. Since our products are heavy-duty goods, customers will conduct on-site inspections of the goods before delivery, therefore product recalls do not apply to us. During the Reporting Period, there were no complaints from customers regarding quality issues of marble blocks.

Product Quality Management and Control Measures

COMPLIANT OPERATION

Future Bright established a compliance management system focusing on daily compliance consultation, material incidence assessment, compliance training, compliance inspection, feedback and improvement proposals. We rely on this system to ensure compliance with laws and regulations that have a material impact on us. Relevant employees and operating units are informed of changes in prevailing laws and regulations in a timely manner. During the Reporting Period, except for the mining permit which is under renewal procedures, we obtained all material approvals and permits necessary for our existing operations.

As for protection of customer privacy, the Company prohibits employees from disclosing customer information externally without authorisation. We strictly comply with relevant laws and regulations on privacy protection and information security to protect privacy of customers.

As for intellectual property right protection, we strictly comply with the laws and regulations on intellectual property right, and include such provisions in the Staff Handbook to forbid any form of intellectual property right infringement. The corporate logo and major product names (“銀狐灰” (silver fox grey) and “銀白玉” (silver white jade)) of Future Bright have been registered as trademarks and the corporate logo has also been registered for copyrights.

CARING FOR OUR EMPLOYEES

Future Bright adheres to the talent philosophy of “people-oriented” and considers employees as the most valuable assets, and it is committed to creating a good working environment for employees while insisting on safeguarding the basic rights and interests of employees in a fair and just manner. We also encourage employees to attend training offered internally or externally in order to improve their skills, enthusiasm and sense of mission, thereby achieving mutual benefits and win-win results between the Company and employees.

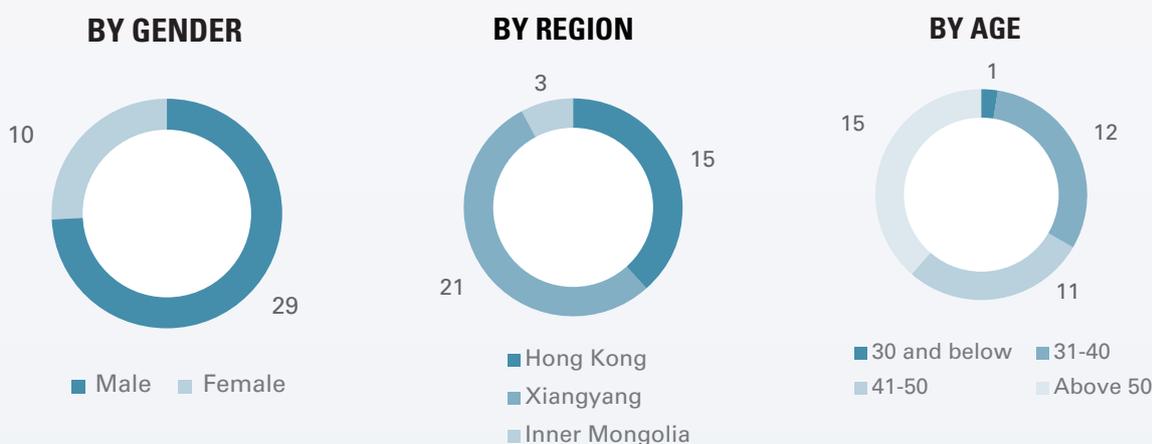

EMPLOYMENT AND LABOUR RIGHTS

The Company strictly complies with the laws and regulations including the Labour Law of the People’s Republic of China (《中華人民共和國勞動法》), the Law of the People’s Republic of China on Employment Contracts (《中華人民共和國勞動合同法》), the Employment Ordinance (Chapter 57 of the Laws of Hong Kong), Employees’ Compensation Ordinance (Chapter 282 of the Laws of Hong Kong) and Minimum Wage Ordinance (Chapter 608 of the Laws of Hong Kong). The Company has formulated internal systems such as the Staff Handbook, which sets out the requirements of employment, basic rights protection, remuneration and benefits in details, in order to build a harmonious, stable and equal labour relationship.

The Company strictly complies with the Law of the People’s Republic of China on the Protection of Minors (《中華人民共和國未成年人保護法》) and the Provisions on the Prohibition of Using Child Labour (《禁止使用童工規定》). We have formulated the “Labour Standards and Child Labour and Underage Labour Management Regulations” and performed careful review of candidate information in order to rule out the possibility of child labour and forced labour. If any employee is found to use false information or in violation of regulations, the Company will terminate the probationary period or terminate the labour contract in accordance with the Company’s policies. During the Reporting Period, the Company has not found any breach related to the use of child labour and forced labour.

At the same time, we uphold a diversified and equal labour philosophy. In addition to respecting the differences of employees in terms of gender, age, region, marital status, religious beliefs, and race, we resolutely oppose any form of discrimination and vicious competition.

As of 31 December 2022, Future Bright had 39 full-time employees (including the Board of Directors). The specific classification is as follows:

Due to the stable operation model in the Reporting Period, the employee turnover rate was 15.2%. The employee turnover rate of the Company by type is as follows:

Category	Turnover (%)*
By Gender	
Male	9.4
Female	28.6
By Region	
Hong Kong	21.1
Xiangyang	8.7
Xiamen	100
Inner Mongolia	–
By Age	
30 and below	–
31-40	29.4
41-50	15.4
Above 50	–

* Employee turnover by category = number of employees left during the Reporting Period for the category/(number of employees of the corresponding category at the end of the year + number of employees left during the Reporting Period for the category)

WELFARE AND CARE

Remuneration and Welfare

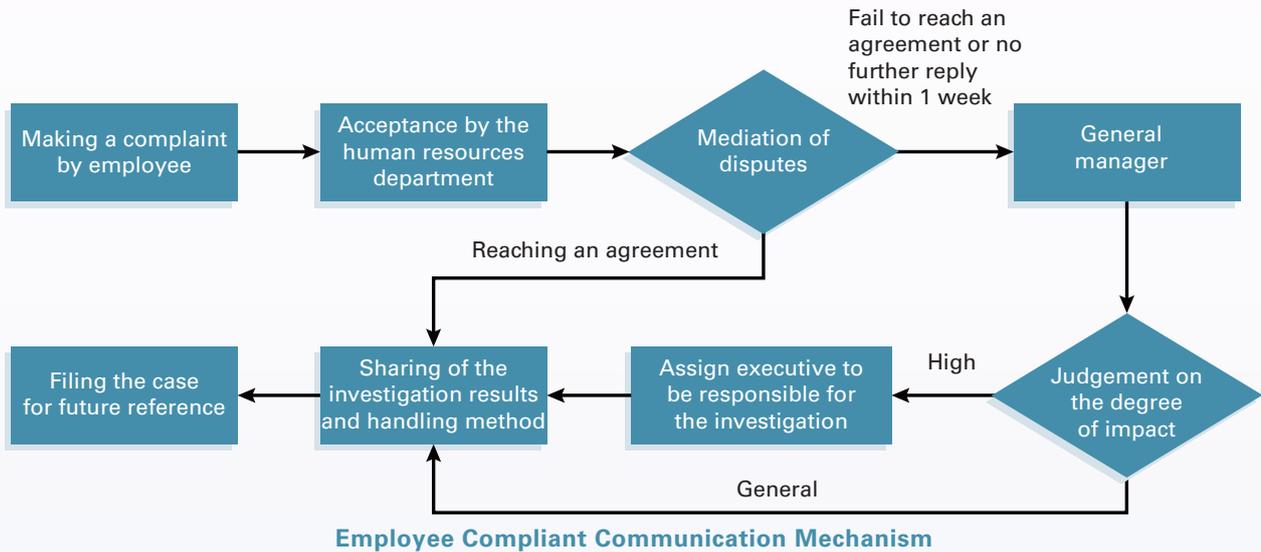

Future Bright regularly reviews employee remuneration packages and ensures that our remuneration packages are competitive according to changes in regions and industries and other factors. We have established a sound employee remuneration and benefits system, which includes basic salary, regular employee benefits, and supplemental benefits to enhance employees’ sense of belonging and strengthen our competitiveness.

CARING FOR OUR EMPLOYEES

Communication and Exchange

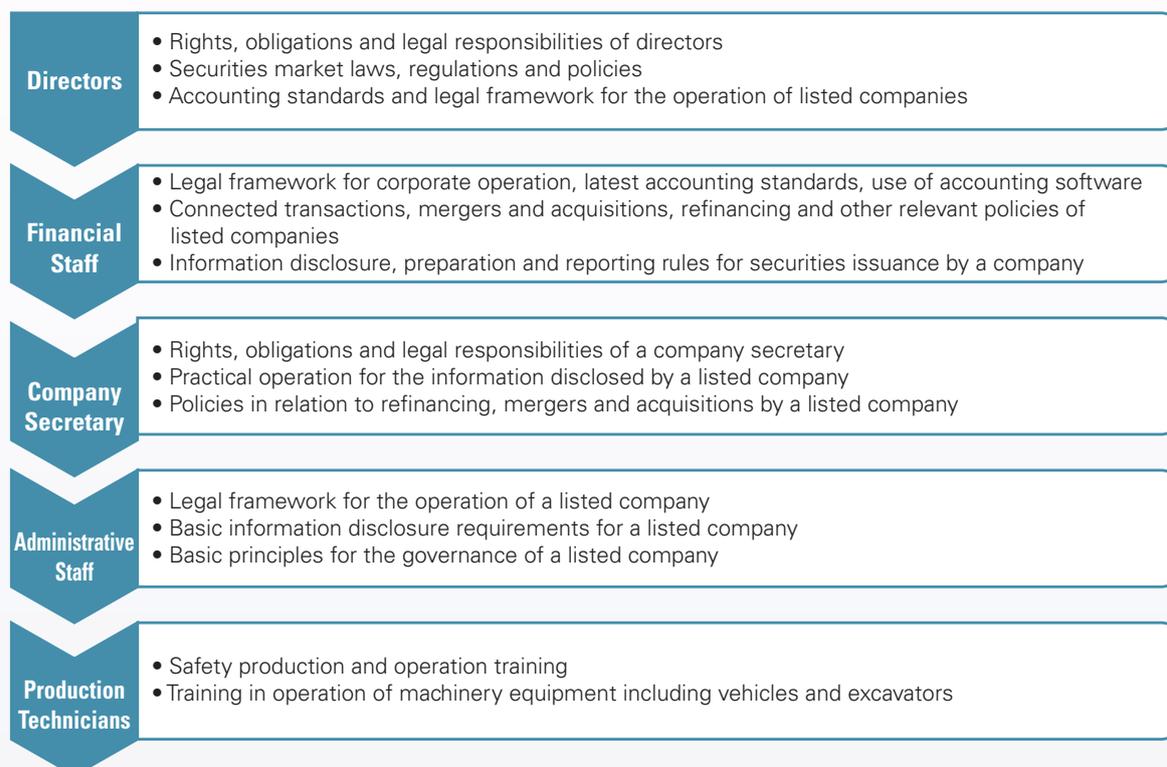

We pay attention to the communication and exchange between all staff members of the Company and are committed to creating a harmonious and friendly culture for our employees. By providing an open and transparent communication platform, we encourage employees to voice out issues regarding their own lives and work to the relevant departments. Based on internal investigation, timely adjustments will be made. Regarding any complaints about unfair treatment or different opinions on operation and management, we will also adopt a prudent and confidential approach to deal with the incidents and convey the result in a timely manner. During the Reporting Period, no complaint or suggestion was received by the Company.

During the pandemic, the Company pays particular attention to the balance between the work and physical and mental health of its employees. We offer regular support and help to frontline employees who are sick or in certain difficulties, and also arrange appropriate activities to assist employees in overcoming problems at work and in life, conveying our message of care and concern.

TRAINING AND DEVELOPMENT

The Company pays great attention to nurture innovative talents in aspects such as science, technology, and management, and it is our commitment to build a comprehensive training and development system. Future Bright undertakes to integrate excellent internal and external learning resources to offer various themed training courses according to the actual needs of employees at different positions, thus driving its employees to keep abreast with changes. In addition, the Company will provide training subsidies for employees and directors who actively participate in various job-related training and continuous education externally.

Scope of Training for Different Levels of Employees

During the Reporting Period, the Company achieved 100% training for production employees. The total training hours of all Directors and staff of the Company were 2,063 hours and the average hours of training received per person were 52.90 hours. The average hours of training received by gender and position are as follows:

	Employees Trained (%)	Average Hours of Training Received (Hours)
By Gender		
Male	93.10	61.31
Female	70.00	28.50
By Position		
Directors and management	100.00	12.08
Non-management staff	80.77	73.31

OCCUPATIONAL HEALTH AND SAFETY

Safety Regulations and Standards

The Company attaches great importance to the safety of all staff members in the workplace. Future Bright strictly complies with the laws and regulations including the Production Safety Law of the People's Republic of China (《中華人民共和國安全生產法》), the Regulations on Production Safety Licenses (《安全生產許可證條例》), and the Implementing Measures for the Work Safety License of Non-coal Mining Enterprises (《非煤礦山企業安全生產許可證實施辦法》). We have established detailed rules to govern the operating procedures in the production processes, and to set up a safety leading group to carry out supervision and management in order to protect our employees, thereby standardising and rationalising the production activities of the Company.

We have always adhered to the production safety policy of “safety first, prevention as core and comprehensive governance”. Future Bright implements the production safety management system and conducts a series of meetings. On one hand, the Company actively conducts safety training, as well as special rectification targeting to identify potential hazards and carry out safety management from top to bottom. On the other hand, the Company conducts company-level production safety meetings, regular production meetings, professional safety meetings, and emergency meetings, to predict any possible risk incidents that might occur in the course of production and list out and record the emergency plans.

We adopted a “pre-shift meeting” system, which requires responsible staff of one work shift to hand over to the staff of the next work shift the details of the work in progress and hidden hazards detected.

In July 2022, the main person in charge of the mine and the safety management personnel participated in the province’s non-coal mine safety and emergency online conference. The content of the meeting helped deepen and consolidate the results of large-scale inspection, and improve the level of safety during production in non-coal mines. According to the coordinated arrangement of the Municipal Safety Committee and the Municipal Mine Special Committee, a “100-day” activity, from July until the end of October 2022, was organised to remove and rectify hidden dangers of non-coal mines as an effort to curb accidents during production.

The Company is also concerned about the impact of occupational diseases on the health of employees. The Company regularly conducts occupational health examinations for employees, distributes relevant labour insurance materials to employees, and purchases liability insurance for employees in high-risk positions. In addition, the Company has also adopted measures such as purchasing equipment required for safe production, producing training materials, and performing regular maintenance of equipment in order to minimise the loss that may be incurred in the event of safety incidents.

During the Reporting Period, Future Bright had no work-related accidents or fatalities caused by work injury and no lost days due to work injury. Future Bright has achieved zero work-related fatalities for three consecutive years (including the Reporting Period).

Production Safety

In order to ensure the production of the mine complies with the laws and regulations, the Company is renewing the Production Safety License (安全生產許可證) and the Level 3 Enterprise Certificate for Safety Production Standardisation (安全生產標準化三級企業證書). At the same time, a qualified third-party institution and experts from the Xiangyang Administration of Work Safety were specifically engaged to prepare the Mining Safety (before construction) and Safety Acceptance Evaluation Report (after completion) based on the on-site situation of the Xiangyang Yiduoyan marble mine, and to review the project and related facilities and perform completion inspection.

In addition, the Company has adopted a number of measures to ensure the safety of its staff during the production process:

Safety Protection Measures

- Stripping followed by mining, and bench mining from top to bottom, with each bench meeting requirements;
- Constructing special access to the working platform to reduce the potential safety hazards in transporting materials and machinery in the mining area;
- Distributing personal protective equipment on a regular basis;
- Prohibiting unauthorised personnel from entering the mine and setting up fences and warning signs in dangerous areas;
- Forbidding construction at night or in rainy, snowy, windy and other bad weather conditions;
- Signing a mine rescue agreement with the Nanzhang mine rescue team for all-weather rescue;
- Engaging qualified organisations and operators for storage, transportation and blast in blasting operations;
- Regularly adjusting mining schedules to avoid work with fatigue and potential hazards in work in summer, at night and in severe weather conditions;
- Organising employees to have an occupational health examination and improving occupational health records and only allowing employees who pass pre-employment check-ups to carry out work in dusty environment.

Office Safety

Future Bright pays great attention to the safety, health and comfort of its employees in the office and workplace. Good corporate image of the Company has been built by setting out relevant rules in the Staff Handbook, including rules on the maintenance of environmental hygiene, anti-smoking, fire prevention, adverse weather arrangements, and handling of emergency conditions.

During the Reporting Period, the COVID-19 pandemic persisted, and the Company implemented the "Emergency Plan for Pandemic Prevention and Control" and the "Implementation Plan for Pandemic Prevention and Control", to strengthen the leadership of the "COVID-19 Emergency Leading Group" and enforce supervision of management, thus ensuring a favourable and safe working environment.

In addition, the Company has carried out various forms of promotion and educational activities to keep itself familiarised with the concepts and policies of pandemic prevention and control among employees. Materials such as posters and prevention and control brochures have been put up and distributed. Pandemic prevention and control have been added to the pre-job training plan, and trainees must pass the test before they can commence their employment.

CARING FOR OUR EMPLOYEES

At the same time, Future Bright continues to implement guidelines and procedures related to the pandemic, properly arrange relevant work, and ensure the work safety of employees. The relevant office safety measures are as follows:

Disinfection of public office equipment and telephones; ensure proper ventilation of work areas, once in the morning and in the afternoon for 20 to 30 minutes

Arrange employees to work flexibly or work from home according to local government requirements and actual conditions to reduce the chance of infection

Promote hygiene, epidemic prevention and disinfection work, focus on the health status of employees on a daily basis, and promptly respond to emergencies such as suspected cases

Employees are required to carefully study the guidance manual for the prevention and control of epidemic in order to equip them with personal protection skills

It is strictly forbidden to join posts during working hours. If multiple people are required to work together, they must stay at a safe distance from each other

All employees must wear masks during working hours except when eating

Gathering is strictly forbidden

Discarded masks and lunch boxes must be placed at the designated place of the Company

Through a variety of methods, Future Bright effectively ensures that employees are familiar with relevant pandemic prevention and control knowledge, maintains the quality of work, protects the Company's interests, and ensures the safety of employees, so that production can be carried out smoothly together with all employees.

Safety Training and Drill

Future Bright is committed to strengthening its safety culture along with creating a safe working environment for employees. The Company actively exchanges with industry peers and integrates internal and external resources to provide comprehensive safety training that are in line with the Company’s actual situation. In addition, it regularly carries out assessment and safety drills in order to continuously enhance the safety awareness and capability of employees. For employees who fail the safety assessment, Future Bright will conduct a second round of assessment to ensure their safety awareness and skills meet the standards. During the Reporting Period, mining operations were suspended due to the ongoing renewal of the mining permit and related exploration work, therefore no safety drills were carried out.

Internal safety training	Orientation training	<ul style="list-style-type: none"> No less than 48 hours of safety education and training (open mine operators) No less than 72 hours of safety education and training (underground mine operators)
	Specific training	<ul style="list-style-type: none"> Resumption of safety education training Production safety publicity and training (professional hygiene management) Fire safety lecture and rescue drill Class III safety education and training
External safety training	Field trips and visits	<ul style="list-style-type: none"> Field trips or visits to enhance knowledge of production safety

Production Safety Training System

Safety Training

Future Bright organised training workshops for employees to learn about a variety of safety measures.

GREEN OPERATIONS

Environmental protection and corporate social responsibility have become the key concerns for all sectors of the society. Future Bright strictly complies with the Environmental Protection Law of the People's Republic of China 《中華人民共和國環境保護法》 and the Provisions on the Protection of the Geologic Environment of Mines and other laws and regulations 《礦山地質環境保護規定》. We strive to promote green operations, energy saving and emission reduction so as to minimise the impact of mining on the surrounding environment and develop a sustainable green economy.

We continued to adopt the "5S" on-site management method for the Yiduoyan Project, an open pit mine located in Hubei Province, and enhanced the level of green management in the process continuously. "5S" stands for Sort (SEIRI), Set in order (SEITON), Shin (SEISO), Standardise (SEIKETSU), and Sustain (SHITSUKE).

DISCHARGE COMPLIANCE

Protection of natural resources and achieving sustainable economic development are the foundation of the Company's stable operations. In particular, the Company attaches utmost importance to discharge management and control of major pollutants, including sewage, solid waste, exhaust gas and noise produced during the mining process. The Company strives to reduce any negative impact of its pollutants to the environment through compliant waste reduction measures.

Exhaust Gas Emissions

The Company does not generate a substantial amount of air pollutants via transportation and logistics. We have actively taken emission reduction measures, including monthly maintenance of our vehicles so as to effectively reduce fuel consumption, thereby reducing carbon emissions and exhaust emissions. At the same time, we purchase regular gasoline for vehicles and conduct annual inspections to ensure that vehicles meet relevant emission standards.

Greenhouse Gas Emissions

The Company's greenhouse gas emissions mainly come from direct emissions caused by gasoline and diesel consumed in company-owned vehicles, and liquefied petroleum gas consumed in mine dormitories (scope 1), and indirect emissions caused by purchased electricity (scope 2). During the Reporting Period, the direct emissions have increased compared with last year, mainly because the fuel consumption of mining machineries was borne by the Company starting from March 2022 after terminating the contract with the subcontractor. Indirect emissions decreased significantly compared to the previous year because the Company was undertaking the renewal of the mining permit and related exploration work, and did not carry out any mining activities.

In order to properly manage greenhouse gas emissions, the Company actively adopts electricity-saving and energy-saving measures. Relevant specific measures are described in the section headed "Use of Energy" in this Report. Through these measures, employee awareness of reducing greenhouse gas emissions has been raised. In order to ensure the effectiveness of the carbon reduction measures, the Group has set a goal of reducing its greenhouse gas emission intensity (tCO₂e/tonne) by 2025 compared to emissions in 2021. The goal is expected to be achieved through continuous review of the above carbon reduction measures.

During the Reporting Period, the details of greenhouse gas emissions of the Company are as follows:

Indicator ¹	Unit	2020	2021	2022
Direct greenhouse gas emissions (Scope 1)	tCO ₂ e	375.01	29.33	69.51
Indirect greenhouse gas emissions (Scope 2)	tCO ₂ e	61.33	74.91	43.12
Total greenhouse gas emissions	tCO ₂ e	436.34	104.24	112.63
Greenhouse Gas Emission Intensity by Production	tCO ₂ e/tonne	0.023	0.006	Not applicable

Notes:

- GHG emissions data is presented in terms of carbon dioxide equivalent and is based on, but not limited to, "The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standards" issued by the World Resources Institute and the World Business Council for Sustainable Development, "How to prepare an ESG report – Appendix 2: Reporting Guidance on Environmental KPIs" issued by the Stock Exchange, the latest released emission factors of China's regional power grid basis, and the "2021 Sustainability Report" published by HK Electric Investments.
- During the Reporting Period, the Company did not produce any Yiduoyan marble blocks as it was required to carry out new exploration work for the purpose of renewing the mining permit (production volume in 2021 and 2020 were approximately 16,691.99 tonnes and 19,045.80 tonnes respectively). The data is also used for calculating other intensity data.

GREEN OPERATIONS

Sewage Discharge

Reduction of sewage discharge is mainly achieved through generating less wastewater, in order to protect the ecological environment and water resources. The Company strictly complies with relevant requirements of the Water Pollution Prevention and Control Law of the People's Republic of China (《中華人民共和國水污染防治法》), and also the requirement of suspended solids content of the sewage discharged being less than or equal to 1.0mg/m³. In addition, the Company carries out different ways of harmless treatments for sewage generated from dust removal in the mining area, daily domestic wastewater from the office as well as externally discharged sewage.

SEWAGE GENERATED DURING DUST REMOVAL IN THE MINING AREA

Drainage and diversion conduits, grit chambers and recycling systems are used for diversion, filtration and precipitation of drainage in dust removal, and sewage are recycled for and used in production, mining and green plant irrigation

DAILY DOMESTIC WASTEWATER FROM THE OFFICE

Discharged directly into the municipal drainage system and transported and treated by building property management companies and relevant municipal departments

EXTERNALLY DISCHARGED SEWAGE

Third-party organisations are engaged regularly to monitor the water quality in the environment of the mining area, including the grit chambers

During the Reporting Period, the Company is in the process of renewing the mining permit and performing exploration work. There have not been any mining activities, and therefore the discharge of production sewage has decreased significantly when compared to the previous year. The details of sewage discharge of the Company are as follows:

Sewage Discharge	Unit	2020	2021	2022
Domestic sewage	tonne	56	51	54
Production sewage	tonne	12,750	13,600	850
Total sewage discharge	tonne	12,806	13,651	904
Sewage discharge intensity in terms of production output	tonne/tonne	0.67	0.82	Not applicable

Solid Waste Treatment

In order to avoid generating health hazards to humans, we must classify and treat solid waste properly. The Company strictly complies with relevant requirements of the Law of the People's Republic of China on the Prevention and Control of Environmental Pollution by Solid Waste (《中華人民共和國固體廢物污染環境防治法》). The Company has established a detailed solid waste management system to govern the classification, collection, storage and disposal of solid wastes such as waste stone materials, kitchen waste and office waste. At the same time, the Company also encourages employees to recycle solid waste and reduce the use of disposable items such as plastic tableware. In order to ensure the effectiveness of the waste reduction measures, the Company has set a target of reducing the generation intensity of non-hazardous solid waste (tonne/tonne) by 2025 compared with 2021. To achieve this goal, the Group will strengthen the implementation of the below measures (as below diagram).

During the Reporting Period, the Company is in the process of renewing the mining permit and performing exploration work. There have not been any mining activities, and therefore the volume of non-hazardous solid waste generated decreased significantly when compared to the previous year. On the other hand, the volume of office waste increased since we have leased a new office in Inner Mongolia and more staff were employed during the Reporting Period. The details of the Company's non-hazardous waste generated are as follows:

Non-hazardous Solid Waste Generated	Unit	2020	2021	2022
Recycled waste stone materials	tonne	34,197.15	35,470.48	-
Kitchen waste	tonne	1.62	1.80	2.00
Office waste	tonne	0.63	1.10	2.38
Total amount of non-hazardous waste	tonne	34,199.40	35,473.38	4.38
Intensity of non-hazardous solid waste in terms of output	tonne/tonne	1.80	2.13	Not applicable

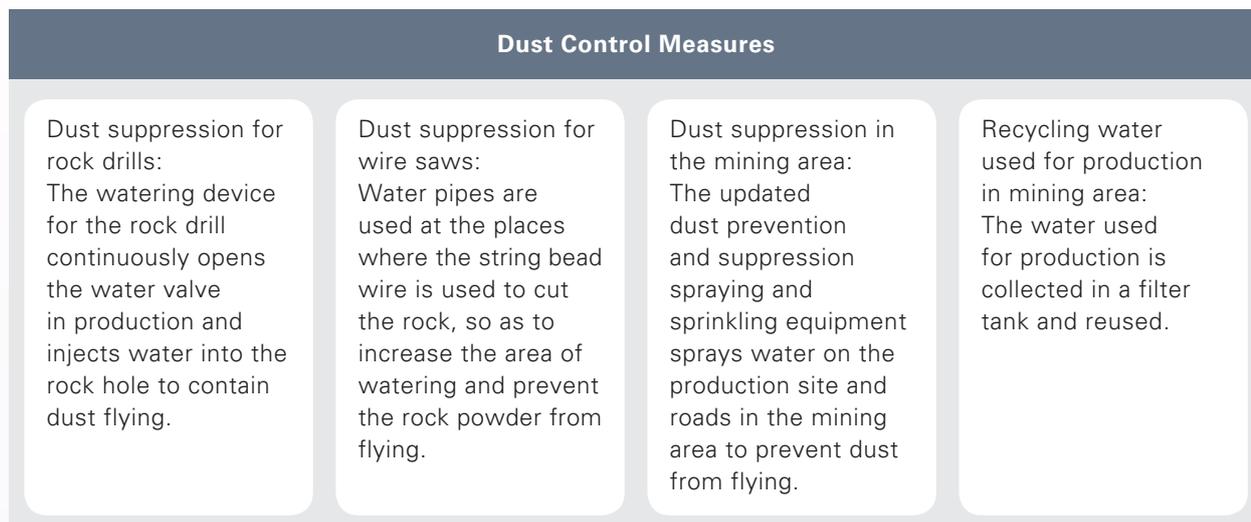

Due to the nature of the Company's business, no significant hazardous waste is generated during the mining process. Therefore, the disclosure of the total amount and intensity of hazardous wastes is not applicable. Nevertheless, the Company will continue to closely monitor the production process and, if necessary, will expand the scope of disclosure in the future.

Dust and Noise Emission

Industrial dust is prone to pollute operation sites, while noise can easily affect the physical and mental health of employees. The Company strictly complies with relevant requirements of the Law of the People's Republic of China on the Prevention and Control of Atmospheric Pollution (《中華人民共和國大氣污染防治法》) and the Law of the People's Republic of China on Prevention and Control of Pollution From Environmental Noise (《中華人民共和國環境噪聲污染防治法》). The Company conducts control and management of noise from drilling and cutting equipment and engineering and transport equipment. It also provides staff with noise reduction equipment such as earplugs and earmuffs. At the same time, the Company pays extra attention to the distance between the mining area and residential areas in order to minimise the impact to the surrounding area during production.

GREEN OPERATIONS

The Company has been reducing dust emissions effectively through various dust control measures detailed below.

USE OF RESOURCES

Rational use of resources is an important means for enterprises to realise sustainable development and lower operational cost. The Company strives to implement energy-saving and water-saving in its daily operations and requires employees to carry out rational use of resources with the help of “5S” management method. Regular analysis is conducted to improve the efficiency in the use of resources.

Use of energy

Energy-saving is beneficial to environmental protection and the improvement of efficiency. The Company strictly complies with relevant provisions of the Law of the People’s Republic of China on Conserving Energy (《中華人民共和國節約能源法》) and formulates relevant energy-saving plan targeting the reduction of electricity consumption, fuel used in vehicles (including gasoline and diesel), and liquefied petroleum gas used in the canteen and dormitory of the mining site.

Energy-saving Measures	
Energy-saving	<ul style="list-style-type: none">• Choose energy-efficient models when purchasing office equipment• Maintain office equipment regularly to ensure they operate at the best energy efficiency• Adjust the temperature of office air-conditioning according to real-time weather• Encourage all the staff to leave curtains open for as long as possible to make full use of natural lights• Have the last employee leaving the office check and switch off all unnecessary air conditioning, lights and power of office equipment before leaving the office
Fuel-saving	<ul style="list-style-type: none">• Encourage employees to give priority to public transport or walking instead of driving when travelling• Maintain and adjust engines regularly to keep vehicles operating at the best condition to reduce fuel consumption

In order to ensure the effectiveness of energy-saving measures, the Company has set a target of reducing the total energy consumption intensity (MWh/tonne) by 2025 compared with that of 2021, and this is expected to be achieved through continuous review of the above carbon reduction measures.

During the Reporting Period, direct energy consumption increased when compared to the last year. The increase of gasoline consumption mainly attributable to the purchase of a new motor vehicle during the Reporting Period. Besides, the diesel used for production machineries and vehicles were previously borne by sub-contractor and thus, the Company did not record such data. However, the Company has terminated the contract with sub-contractor at the end of February 2022 according to the updated safety production requirements of the PRC government. The subsequent diesel used in mining machineries and vehicles is therefore being borne by the Company. On the other hand, since the Company is in the process of renewing the mining permit and performing exploration work during the Reporting Period, there has not been any mining activities, and therefore the electricity consumption decreased significantly when compared to the previous year.

The Company's energy consumption during the Reporting Period is as follows:

Energy Consumption	Unit	2020	2021	2022
Direct energy consumption	MWh	1,523.69	115.06	278.47
• Gasoline	MWh	110.71	5.17	36.64
• Diesel	MWh	1,407.28	101.93	232.44
• Liquefied petroleum gas	MWh	5.70	7.96	9.39
Indirect energy consumption	MWh	113.50	88.23	50.87
• Purchased electricity	MWh	113.50	88.23	50.87
Total energy consumption	MWh	1,637.19	203.29	329.34
Energy consumption intensity in terms of production output	MWh/tonne	0.09	0.01	Not applicable

Use of Water Resources

Water-saving brings significant environmental benefits and is therefore important in corporate sustainable development. The Company strictly complies with the laws and regulations including the Water Law of the People's Republic of China (《中華人民共和國水法》) and the Regulation on the Administration of Water Sourcing Permission and Levy of Water Resource Fees (《取水許可和水資源費徵收管理條例》). The Company conducts regular maintenance of pipelines and taps and establishes a comprehensive water resources management and control system focusing on tap water used during daily office work and groundwater used for dust prevention and cooling during stone cutting.

In order to ensure the effectiveness of the water-saving measures, the Company has set a target of reducing the water consumption intensity (tonne/tonne) by 2025 compared with that of 2021. To achieve the above goal of reducing use of water, the Group will strengthen the implementation of water-saving measures as below:

Water-saving Measures

- Promote the concept of water-saving among employees and strengthens the maintenance, inspection, and management of water-consuming equipment for water conservation
- Pay attention to the efficient utilisation of water resources and carry out effective management from both awareness and practice perspectives
- Promote employee awareness of water conservation by putting up posters and signs
- Inspect water pipes and related equipment regularly, and handle drips and leaks in a timely manner to ensure efficient utilisation of water resources and reduction in wastage

GREEN OPERATIONS

During the Reporting Period, the Company is in the process of renewing the mining permit and performing exploration work. There has not been any mining activities, and therefore the volume of groundwater consumption also decreased significantly when compared to the last year. The use of water resources by the Company during the Reporting Period is as follows:

Water Consumption	Unit	2020	2021	2022
Groundwater	tonne	15,000	16,000	1,000
Tap water	tonne	65	60	83
Total water consumption	tonne	15,065	16,060	1,083
Water consumption intensity in terms of output	tonne/tonne	0.79	0.96	Not applicable

As the marble blocks and other products of our company are heavy materials, they are directly transported to customers after excavated from our mining site, and no packaging materials are required. Therefore, the disclosure of the total amount of packaging materials and its intensity per production unit is not applicable.

ECOLOGICAL CONSERVATION

Ecological conservation and improving the quality of life have become a main issue. As a marble production enterprise, the Company strictly complies with the Environmental Impact Assessment Law of the People's Republic of China (《中華人民共和國環境影響評價法》), the Water and Soil Conservation Law of the People's Republic of China (《中華人民共和國水土保持法》), the Provisions on Land Reclamation (《土地復墾規定》) and other relevant regulations. The Company has formulated an environmental impact assessment and a water and soil conservation plan targeting water and soil loss and ecological damage, so as to avoid impacts on local plant and animal communities.

According to the approval of relevant authorities and the completion acceptance approval for environmental protection, as the forest coverage rate around the Yiduoyan marble mine is relatively high with no vegetation species under national protection, the Company adopted the area-by-area water and soil prevention and control measures and launched an ongoing reclamation plan to plan for the scope of land operation. We also utilise local plant species and soil to reduce water and soil loss and conduct site clean-up and reclamation in a timely manner after the mining is completed.

In addition, the Company regularly pays water and soil conservation compensation fees to government authorities, for speeding up the recovery of the local ecological system and promoting the protection and rational utilisation of water and soil resources, in order to fulfil the social responsibilities as a responsible corporate.

CLIMATE CHANGE

The public's awareness of climate change continues to increase, and climate change is one of the most frequently discussed topics internationally. The latest Intergovernmental Panel on Climate Change (IPCC) Sixth Assessment Report further warns of the severity and urgency of the climate crisis.

GREEN RECOVERY PLAN

In order to assist the country in mitigating climate change, enterprises should take the responsibility of supporting green environmental protection and contributing to reducing carbon emissions. Carrying out the concept of “Lucid Waters and Lush Mountains are Invaluable Assets”, the Company plans to use the method of covering soil and greening for the original roads that are no longer in use to complete the greening in 1 to 3 years, so that the project road can be coordinated with the surrounding environment and restore the natural scenery. We will conduct on-the-spot investigation of the road section, lay the soil layer to meet the required thickness of the roots of trees and vegetation suitable for local growth, and then select tree species with developed roots and high survival rate and are suitable for growth in the region, planting trees and sowing grass seeds to restore green naturally. We have considered extreme weather events brought about by climate change, such as rainstorms. Therefore, we implement the method of planting in batches, which can not only prevent landslides in the newly laid soil layer, but also improve the survival rate.

RISK IDENTIFICATION

Future Bright understands the importance of identifying and mitigating major climate-related issues, pays close attention to the potential impact of climate change on the company’s business and operations, and is committed to managing potential climate-related risks that may affect the company’s business activities. According to the reporting framework developed by the ESG working group on Climate-related Financial Disclosures, climate-related risks are divided into two categories: physical risks and transition risks. The Company has incorporated environmental-related risks into enterprise risk management to identify and mitigate potential risks.

Physical risks refer to immediate or long-term climate events brought about by climate change, such as increased frequency and severity of extreme weather events and rising sea levels. Extreme weather events can threaten the personal safety of our employees, as well as damage our facilities, resulting in direct financial loss. While we have not identified significant and immediate climate risks at the locations of our corporate offices and the mine site, we are aware of the need to strengthen our protection against future extreme climate risks and emergencies. To minimise potential risks and hazards, the Company has implemented countermeasures, including flexible working arrangements and precautions in severe or extreme weather conditions. We will explore contingency plans to further avoid damage to our facilities due to extreme weather events to improve business stability.

Transition risk refers to policy, legal, technological and market changes resulting from the transition to a low-carbon economy. The PRC government has proposed in September 2020 that carbon dioxide emissions will strive to achieve a “carbon peak” by 2030, and “carbon neutrality” by 2060. In order to accomplish the vision of global carbon neutrality, the Company expects that there will be changes in regulation, technology and market landscape caused by climate change, including the tightening of national policies and the Listing Rules and the generation of environment-related taxes. Stricter environmental laws and regulations may expose companies to higher claims and litigation risks, potentially incurring additional compliance costs and impacting the Company’s reputation. In response to policy and legal risks and reputational risks, the Company continuously monitors any changes in laws or regulations and global trends in climate change to avoid increased costs and fines for non-compliance or reputational risks due to slow responses. In addition, the Company has been taking comprehensive measures to protect the environment, including measures aimed at reducing greenhouse gas emissions, and has set targets to gradually reduce our energy consumption and greenhouse gas emissions in the future.

CONTRIBUTION TO COMMUNITIES

Future Bright upheld the philosophy of “Taking from and giving back to the society” and persisted in performing social responsibilities of a corporate citizen, actively participating in various activities including educational public welfare, voluntary services and community care and paying attention to children education and the underprivileged in order to contribute to a harmonious community and better homes. During the Reporting Period, the Company made monetary donations and in-kind donations of approximately RMB134,000 to external voluntary organisations.

EDUCATIONAL PUBLIC WELFARE

The Company is active in supporting education. In May 2022, the Company donated books worth RMB6,600 to the Communist Youth League of the Nanzhang County Party Committee. In June 2022, the Company donated various sports equipment to Xiaoyan Town Primary School. It also donated school bags, stationery, water cups, mineral water and other items to all students. The Company also took the opportunity to express condolences to five teachers and staff members in need, and donated clothes to some of the needy students.

CARE FOR COMMUNITY

On 21 July 2022, the Company went to Taogou Village, Xueping Town to participate in the “Village Station Hand-in-Hand” donation activity. The corn planted by some farmers in Taogou Village, Xueping Town, was seriously damaged by wild boars, resulting in reduced production and harvest, and the Company reacted immediately to donate rice, edible oil, flour, noodles, mineral water and other materials to Taogou Village.

CONTRIBUTION TO COMMUNITIES

On 25 August 2022, the Company contributed to continuous pandemic prevention and control, donating RMB100,000 and 100 boxes of mineral water to the Red Cross of Nanzhang County, in order to overcome the difficulties together with other members of the community.

APPENDIX I: LIST OF MAIN LAWS AND REGULATIONS TO WHICH THE COMPANY IS SUBJECT

Environmental

- Environmental Protection Law of the People's Republic of China
- Provisions on the Protection of the Geologic Environment of Mines
- Water Pollution Prevention and Control Law of the People's Republic of China
- Law of the People's Republic of China on the Prevention and Control of Environmental Pollution by Solid Waste
- Law of the People's Republic of China on the Prevention and Control of Atmospheric Pollution
- Law of the People's Republic of China on Prevention and Control of Pollution From Environmental Noise
- Law of the People's Republic of China on Conserving Energy
- Water Law of the People's Republic of China
- Regulation on the Administration of Water Sourcing Permission and Levy of Water Resource Fees
- Environmental Impact Assessment Law of the People's Republic of China
- Water and Soil Conservation Law of the People's Republic of China
- Provisions on Land Reclamation
- Waste Disposal Ordinance (Chapter 354 of the Laws of Hong Kong)

Social

- Anti-unfair Competition Law of the People's Republic of China
- Company Law of the People's Republic of China
- Interim Provisions on Banning Commercial Bribery
- Anti-monopoly Law of the People's Republic of China
- Labour Law of the People's Republic of China
- Law of the People's Republic of China on Employment Contracts
- Law of the People's Republic of China on the Protection of Minors
- Provisions on the Prohibition of Using Child Labour
- Production Safety Law of the People's Republic of China
- Regulations on Production Safety Licenses
- Implementing Measures for the Work Safety License of Non- coal Mining Enterprises
- Safety Regulations for Metal and Nonmetal Mines
- Prevention of Bribery Ordinance (Chapter 201 of the Laws of Hong Kong)
- Competition Ordinance (Chapter 619 of the Laws of Hong Kong)
- Employment Ordinance (Chapter 57 of the Laws of Hong Kong)
- Mandatory Provident Fund Schemes Ordinance (Chapter 485 of the Laws of Hong Kong)
- Employees' Compensation Ordinance (Chapter 282 of the Laws of Hong Kong)
- Minimum Wage Ordinance (Chapter 608 of the Laws of Hong Kong)
- Occupational Safety and Health Ordinance (Chapter 509 of the Laws of Hong Kong)

APPENDIX II: INDEX OF ESG REPORTING GUIDE OF HKEX

Key Scope, Aspect, General Disclosure and ESG Indicators		Section/ Statement
Aspect A1: Emissions		
General Disclosure	Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to air and greenhouse gas emissions, discharges into water and land, and generation of hazardous and non-hazardous waste.	Discharge Compliance
KPI A1.1	The types of emissions and respective emissions data.	Discharge Compliance
KPI A1.2	Direct (Scope 1) and energy indirect (Scope 2) greenhouse gas emissions (in tonnes) and, where appropriate, intensity (e.g. per unit of production volume, per facility).	Discharge Compliance
KPI A1.3	Total hazardous waste produced (in tonnes) and, where appropriate, intensity (e.g. per unit of production volume, per facility).	Discharge Compliance (Not applicable – explained)
KPI A1.4	Total non-hazardous waste produced (in tonnes) and, where appropriate, intensity (e.g. per unit of production volume, per facility).	Discharge Compliance
KPI A1.5	Description of emissions target(s) set and steps taken to achieve them.	Discharge Compliance
KPI A1.6	Description of how hazardous and non-hazardous wastes are handled, and a description of reduction target(s) set and steps taken to achieve them.	Discharge Compliance
Aspect A2: Use of Resources		
General Disclosure	Policies on the efficient use of resources, including energy, water and other raw materials.	Use of Resources
KPI A2.1	Direct and/or indirect energy consumption by type (e.g. electricity, gas or oil) in total (kWh in '000s) and intensity (e.g. per unit of production volume, per facility).	Use of Resources
KPI A2.2	Water consumption in total and intensity (e.g. per unit of production volume, per facility).	Use of Resources
KPI A2.3	Description of energy use efficiency target(s) set and steps taken to achieve them.	Use of Resources
KPI A2.4	Description of whether there is any issue in sourcing water that is fit for purpose, water efficiency target(s) set and steps taken to achieve them.	Use of Resources
KPI A2.5	Total packaging material used for finished products (in tonnes) and, if applicable, with reference to per unit produced.	Use of Resources (Not applicable – explained)

APPENDIX II: INDEX OF ESG REPORTING GUIDE OF HKEX

Key Scope, Aspect, General Disclosure and ESG Indicators		Section/ Statement
Aspect A3: The Environment and Natural Resources		
General Disclosure	Policies on minimising the issuer's significant impacts on the environment and natural resources.	Ecological Conservation
KPI A3.1	Description of the significant impacts of activities on the environment and natural resources and the actions taken to manage them.	Ecological Conservation
Aspect A4: Climate Change		
General Disclosure	Policies on identification and mitigation of significant climate-related issues which have impacted, and those which may impact, the issuer.	Climate Change
KPI A4.1	Description of the significant climate-related issues which have impacted, and those which may impact, the issuer, and the actions taken to manage them.	Risk Identification
Aspect B1: Employment		
General Disclosure	Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to compensation and dismissal, recruitment and promotion, working hours, rest periods, equal opportunity, diversity, anti-discrimination, and other benefits and welfare.	Employment and Labour Rights Welfare and Care
KPI B1.1	Total workforce by gender, employment type (for example, full-or part-time), age group and geographical region.	Employment and Labour Rights
KPI B1.2	Employee turnover rate by gender, age group and geographical region.	Employment and Labour Rights
Aspect B2: Health and Safety		
General Disclosure	Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to providing a safe working environment and protecting employees from occupational hazards.	Occupational Health and Safety
KPI B2.1	Number and rate of work-related fatalities occurred in each of the past three years including the reporting year.	Occupational Health and Safety
KPI B2.2	Lost days due to work injury.	Occupational Health and Safety
KPI B2.3	Description of occupational health and safety measures adopted, and how they are implemented and monitored.	Occupational Health and Safety

APPENDIX II: INDEX OF ESG REPORTING GUIDE OF HKEX

Key Scope, Aspect, General Disclosure and ESG Indicators		Section/ Statement
Aspect B3: Development and Training		
General Disclosure	Policies on improving employees' knowledge and skills for discharging duties at work. Description of training activities.	Training and Development
KPI B3.1	The percentage of employees trained by gender and employee category (e.g. senior management, middle management).	Training and Development
KPI B3.2	The average training hours completed per employee by gender and employee category.	Training and Development
Aspect B4: Labour Standards		
General Disclosure	Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to preventing child and forced labour.	Employment and Labour Rights
KPI B4.1	Description of measures to review employment practices to avoid child and forced labour.	Employment and Labour Rights
KPI B4.2	Description of steps taken to eliminate such practices when discovered.	Employment and Labour Rights
Aspect B5: Supply Chain Management		
General Disclosure	Policies on managing environmental and social risks of the supply chain.	Win-win Cooperation
KPI B5.1	Number of suppliers by geographical region.	Win-win Cooperation
KPI B5.2	Description of practices relating to engaging suppliers, number of suppliers where the practices are being implemented, and how they are implemented and monitored.	Win-Win Cooperation
KPI B5.3	Description of practices used to identify environmental and social risks along the supply chain, and how they are implemented and monitored.	Green Procurement
KPI B5.4	Description of practices used to promote environmentally preferable products and services when selecting suppliers, and how they are implemented and monitored.	Green Procurement

APPENDIX II: INDEX OF ESG REPORTING GUIDE OF HKEX

Key Scope, Aspect, General Disclosure and ESG Indicators		Section/ Statement
Aspect B6: Product Responsibility		
General Disclosure	Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to health and safety, advertising, labelling and privacy matters relating to products and services provided and methods of redress.	Quality Driven
KPI B6.1	Percentage of total products sold or shipped subject to recalls for safety and health reasons.	Quality Assurance
KPI B6.2	Number of products and service related complaints received and how they are dealt with.	Quality Assurance
KPI B6.3	Description of practices relating to observing and protecting intellectual property rights.	Compliant Operation
KPI B6.4	Description of quality assurance process and recall procedures.	Quality Assurance
KPI B6.5	Description of consumer data protection and privacy policies, and how they are implemented and monitored.	Compliant Operation
Aspect B7: Anti-corruption		
General Disclosure	Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to bribery, extortion, fraud and money laundering.	Compliance Governance
KPI B7.1	Number of concluded legal cases regarding corrupt practices brought against the issuer or its employees during the reporting period and the outcomes of the cases.	Integrity Practices
KPI B7.2	Description of preventive measures and whistle-blowing procedures, and how they are implemented and monitored.	Integrity Practices
KPI B7.3	Description of anti-corruption training provided to directors and staff.	Integrity Practices
Aspect B8: Community Investment		
General Disclosure	Policies on community engagement to understand the needs of the communities where the issuer operates and to ensure its activities take into consideration the communities' interests.	Contribution to Communities
KPI B8.1	Focus areas of contribution (e.g. education, environmental concerns, labour needs, health, culture, sport).	Educational Public Welfare Care for Community
KPI B8.2	Resources contributed (e.g. money or time) to the focus area.	Educational Public Welfare Care for Community
