Average	1.08	0.72	73.76
MCC	1.14	0.65	72.34

According to the table above, MCC's current ratio is slightly higher than the average of comparable companies in the same industry, its quick ratio is slightly lower than the average of comparable companies in the same industry, and its gearing ratio is slightly better than the average of comparable companies in the same industry.

Upon completion of the issuance of Preference Shares to specific targets, the Company's equity capital will be fully replenished, the gearing ratio will be further reduced, the current ratio and quick ratio will be further increased, the capital structure will be further optimized and the comprehensive risk resistance will be enhanced, laying the foundation for the healthy and stable development of the Company.

(II) Feasibility Analysis of the Use Plan of Proceed

1. The use of proceeds from the issuance of Preference Shares to specific targets complies with the requirements of laws and regulations

The issuance of Preference Shares to specific targets and the use of all the proceeds to replenish working capital is in compliance with the relevant laws and regulations of the Experimental Administrative Measures on Preference Shares (《優先股試點管理辦法》), Articles 9, 10, 11, 13, 40, 57 and 60 of the Measures for the Administration of Securities Issuance and Registration of Listed Companies – Opinions on the Application of Securities and Futures Laws No. 18” (《<上市公司證券發行註冊管理辦法>第九條、第十條、第十一條、第十三條、第四十條、第五十七條、第六十條有關規定的適用意見–證券期貨法律適用意見第18號》), and is feasible.

2. The Company has established a sound governance standard and internal control system for the use of proceeds

The Company has established a modern enterprise system with corporate governance structure as the core according to the governance standards of listed companies, and formed a relatively standardized and standard corporate governance system and comprehensive internal control procedures through continuous improvement and optimization. In terms of the management of the proceeds, the Company has also established the Proceeds Management System in accordance with the regulatory requirements, which has clear provisions on the storage, use and management of the proceeds to ensure the standard, safe and efficient use of the raised funds. After the proceeds from the issuance of Preference Shares to specific targets are received, the Company will deposit the proceeds in the special account designated by the board of directors according to the requirements of the system and use the funds for the specified purchase, in order to ensure the reasonable and standardized use of the proceeds and prevent the risks in connection with the use.

APPENDIX 3 IMPACTS ON DILUTION OF CURRENT RETURNS OF THE ISSUANCE OF PREFERENCE SHARES BY METALLURGICAL CORPORATION OF CHINA LTD., REMEDIAL MEASURES AND COMMITMENTS OF RELATED ENTITIES

In accordance with the relevant requirements of the Opinions of the General Office of the State Council on Further Strengthening the Protection of Legitimate Rights and Interests of Small and Medium Investors in Capital Market (Guo Ban Fa [2013] No. 110), the Opinions of the State Council on Further Promoting Healthy Development of the Capital Market (Guo Fa [2014] No. 17), and the Guiding Opinions on Matters Relating to Dilution of Immediate Returns by IPO, Refinancing or Major Assets Restructuring (CSRC Announcement [2015] No. 31), in order to protect the rights to information and interests of minority investors, the Company has seriously analyzed the impact of the issuance of Preference Shares to specific targets on the dilution of current returns and proposed specific remedial measures, and the relevant entities have made commitments to fulfill the Company's remedial measures, which are as follows:

I. ESTIMATION OF THE IMPACT OF THE DILUTED CURRENT RETURNS FROM THE ISSUANCE OF PREFERENCE SHARES TO SPECIFIC TARGETS ON THE KEY FINANCIAL INDICATORS OF THE COMPANY

(I) Assumptions

1. There is no major change in the macroeconomic environment, industrial policy and industry development, etc.;
2. It is assumed that the impact on the business operation and financial position of the Company (such as financial expense, investment income, etc.) upon receipt of the proceeds from the Issuance is not taken into account;
3. It is assumed that the number of Preference Shares to be issued to specific targets will be 150,000,000 Shares and the estimated total amount of proceeds to be raised will not exceed RMB15 billion, without taking into account the impact of issuance expenses. The above-mentioned number of Preference Shares to be issued to specific targets and the total amount of proceeds to be raised are only assumptions. The final number of Shares to be issued and the

total amount of proceeds to be raised will be determined based on the review by the Shanghai Stock Exchange Audit Centre, the approval for registration by the CSRC, the subscription status of the issuance and the issuance expenses;

4. It is assumed that the Company's net profit attributable to ordinary shareholders of the listed company and the increase in net profit attributable to ordinary shareholders of the listed company after deducting non-recurring gains and losses for 2023 (compared to 2022) are calculated at 0%, 10% and 20% respectively.

This profit assumption is for illustrative purposes only and does not represent a profit forecast for the Company's net profit in 2023;

5. It is assumed that the issuance of Preference Shares to specified targets will be completed in the second half of 2023 (for illustrative purposes only, it does not represent the actual issuance time of the Preference Shares, which will ultimately be subject to the actual completion date after the registration of the issuance by the CSRC. Investors should not make investment decisions based on this assumptive completion date; otherwise, the Company shall be held no liable for any losses arising from such investment). According to the issuance plan of the Preference Shares, the annual dividend payment date shall be the anniversary date of the last day for payment for the issuance of Preference Shares, but for prudential purposes, the Company has made the following calculations assuming that the Preference Shares are subsisting at the beginning of 2023 and will complete a full dividend payment in 2023 for one interest bearing year at a dividend rate of 5.0% (for illustrative purposes only, and does not represent the expected dividend rate for the Preference Shares under the Issuance);
6. The estimation of the total Share capital of the Company will be based on the Company's total Share capital of 20,723.62 million Shares as of 31 December 2022, and only the impact of the Preference Shares (disregarding other factors which may result in a change of Share capital) has been taken into consideration;
7. The impact of other factors on net assets (other than net profit and cash dividend) has not been taken into consideration in estimating the net assets of the Company after the issuance;
8. The above is just the assumption for the purpose of making calculation, which does not constitute a commitment, profit forecast or performance commitment. Investors should not make investment decisions based on this assumption; the Company does not bear any liability for investors' losses caused by making investment decisions based on the assumption.

(II) Particulars of the Calculation

Based on the above assumptions, the impacts of the diluted current returns of issuance of Preference Shares to specific investors on the Company's main financial indicators are as follows:

Item	Year 2022/ 31 December 2022	Year 2023/ 31 December 2023	
		Before issuance	After issuance
Ordinary share capital (0'000 shares)	2,072,362	2,072,362	2,072,362

Weighted average return on net assets after deducting non-recurring gains and losses (%)	9.79%	10.58%	9.85%

Note 1: Net profit after deducting non-recurring gains and losses attributable to ordinary shareholders of the listed company = Net profit attributable to shareholders of the listed company – non-recurring gains and losses – dividends that the Preference Shares are entitled to for the current period

Note 2: The calculation formulas of basic earnings per share, diluted earnings per share after deducting non-recurring gains and losses, and weighted average return on net assets after deducting non-recurring gains and losses shall be calculated in accordance with the requirements of the Guiding Opinions on Matters regarding the Dilution of Immediate Return by Initial Offering, Refinancing and Material

Asset Reorganisation formulated by the CSRC and the provisions of “Calculated in accordance with No. 9 Rule for the Preparation and Reporting of Information Disclosure of Companies with Public Offering – the Calculation and Disclosure of ROE and EPS”.

(III) Explanations about these calculations

1. The above-mentioned assumptions and analysis of the Company that are used in these calculations do not constitute the Company’s profit forecast. Investors shall not base their investment decisions on these grounds. Should an investor use them to make investment decisions and incur losses therefrom, the Company assumes no responsibility whatsoever;
2. The total amount of funds to be raised for the issuance of Preference Shares is only an estimated value. The assumptions that these Preference Shares had already been in existence at the beginning of 2023 are made for the purpose of indicative calculation only. The total amount of funds to be raised from the actual issuance, the completion time of the actual issuance and the actual dividend yield after approval from the CSRC should be used in real calculation.

II. RISK WARNING OF THE DILUTION OF CURRENT RETURN BY ISSUANCE OF PREFERENCE SHARES TO SPECIFIC TARGETS

As holders of Preference Shares take priority over holders of Ordinary Shares of the Company in profit distribution based on the agreed dividend yield, expenditures on the Preference Shares dividends will dilute the after-tax net profit of the Company attributable to holders of Ordinary Shares to a certain extent irrespective of the financial return of proceeds raised by issuance of Preference Shares. As a result, indicators such as return on net assets and basic earnings per Share may decline by a certain extent and holders of ordinary shares may be exposed to risks of dilution of current return on Ordinary Shares by the issuance of Preference Shares.

Investors should carefully consider the risks of dilution of current return by the non-public issuance of Preference Shares. Investors are also reminded that the Company’s remedial measures against the potential dilution of current return do not constitute the Company’s guarantee for future profit. The Company will continue to disclose in periodic reports the implementation progress and the fulfilment of undertakings given by related entities in relation to the diluted current return remedial measures.

III. EXPLANATION OF THE BOARD OF DIRECTORS ON NECESSITY AND RATIONALITY OF THIS ISSUANCE OF PREFERENCE SHARES TO SPECIFIC TARGETS

The Company intends to issue no more than 150 million Preference Shares, with a total fundraising amount not exceeding RMB15 billion. The net proceeds of the fundraising, after deducting the issuance expenses, will be utilized to supplement the Company's working capital. The necessity and rationality for the Company's issuance of Preference Shares to specific targets are set out below:

(I) To alleviate the financial pressure on the Company and support the development of its business operations

In recent years, the Company has followed the trend of green, low-carbon, and intelligent development in the metallurgical and construction industry, as well as the trend of comprehensive infrastructure construction strengthening. The traditional business, such as engineering contracting, has maintained a relatively fast growth trend. Meanwhile, the Company has actively accelerated its layout in emerging industries such as ecological environmental protection, cultural and tourism engineering, and new energy engineering, making emerging industries a new growth point for the Company's performance. As the Company's business continues to expand, the demand for operating capital has also increased.

The net proceeds from the issuance of Preference Shares to specific targets will be utilized in their entirety to supplement the Company's working capital, which will provide support for the continuous and stable development of the Company's various business operations.

(II) To optimize the Company's capital structure and enhance its comprehensive risk resistance capability

In recent years, the Company's various business operations have achieved stable and high-quality development. However, as the business scale continues to expand, the overall size of the Company's liabilities has also increased, resulting in a relatively high level of debt-to-asset ratio. As of 31 December 2020, 31 December 2021, and 31 December 2022, the Company's consolidated asset-liability ratios were 72.28%, 72.14%, and 72.34%, respectively.

As of 31 December 2022, the Company's relevant financial indicators compared to comparable listed companies in the same industry are as follows:

Company name	Current ratio <i>(times)</i>	Quick ratio <i>(times)</i>	Debt-to-asset ratio <i>(%)</i>
CRCC	1.08	0.49	74.67
CREC	1.03	0.62	73.77
CCCC	0.93	0.41	71.80
CNCEC	1.19	1.14	70.02
CEEC	1.11	0.93	74.79
PowerChina	0.88	0.78	76.89
CSCEC	1.31	0.65	74.35
Average	1.08	0.72	73.76
MCC	1.14	0.65	72.34

According to the above table, MCC's current ratio is slightly higher than the average level of comparable companies in the same industry, while its quick ratio is slightly lower than the average level of comparable companies. The debt-to-asset ratio is slightly better than the average level of comparable companies in the same industry.

Upon completion of the issuance of Preference Shares to specific targets, the Company's equity capital will be adequately replenished, the debt-to-asset ratio will further decrease, and the current ratio and quick ratio will further increase, with the capital structure being further optimised and the comprehensive risk resistance capability being enhanced, thereby laying a solid foundation for its healthy and stable development.

IV. RELATIONSHIP BETWEEN THE PROJECTS INVESTED BY THE PROCEEDS AND THE COMPANY'S EXISTING BUSINESS; RESERVE OF STAFF, TECHNOLOGY, MARKET AND OTHER ASPECTS OF PROJECTS TO BE INVESTED

The proceeds from the issuance of Preference Shares will be used to supplement the Company's working capital. After the fundraising is allocated to the working capital, the Company's financial strength will be further strengthened, laying a foundation for its future rapid development. This issuance of Preference Shares to specific targets to raise fund does not involve the reserves in personnel, technology, market and others.

V. REMEDIAL MEASURES FOR THE DILUTION OF CURRENT RETURN BY THE ISSUANCE OF PREFERENCE SHARES TO SPECIFIC TARGETS OF THE COMPANY

As holders of Preference Shares take priority over holders of ordinary shares of the Company in profit distribution, without taking into account any financial return that may be generated from the proceeds, it may cause the reduction of net profit attributable to the holders of ordinary shares, thus resulting in the decreases in earnings per share and weighted average return on net assets attributable to the Company's ordinary shareholders.

In order to ensure the effective use of the proceeds under this issuance, prevent the risk of diluted current return and improve future profitability, the Company has proposed to enhance its profitability, improve its core competitiveness, consolidate its risk resistance, and achieve sustainable development by strengthening the management of the raised funds, optimizing its business model, promoting cost management, strengthening risk management, and enhancing the investor return. The specific measures are as follow:

(I) to strengthen the Company's strategic leadership role and promote high-quality development

The Company will strengthen its strategic leadership role, thoroughly implement the spirit of the "14th Five-Year Plan," actively support the development of the real economy that is related to the national economy and people's livelihoods and in line with national strategic guidance, and focus on serving industrial transformation and upgrading. The Company will grasp the essence of its business, comprehensively clarify the business logic, thoroughly understand regulatory requirements, optimize its assessment and incentive mechanisms to align with strategic objectives, guide business and management to follow the established strategic direction, and promote the Company's overall, stable, and high-quality development.

(II) to reasonably utilize the raised funds to improve utilization efficiency

To regulate the management and use of the funds raised, the Company has formulated and improved the management methods for the use of the funds raised in accordance with the provisions and requirements of the Company Law, Securities Law, the Rules Governing the Listing of Stocks on Shanghai Stock Exchange, and other relevant laws and regulations, combined with the Company's actual situation. The Company has stipulated that the funds raised shall be managed separately and used for specific purposes. The Board of Directors of the Company will strictly regulate and manage the funds raised in accordance with relevant laws and regulations, as well as the Company's own management system for the use of funds, to ensure the safe and efficient use of the funds.

(III) to improve the corporate governance structure and enhance operational and management efficiency

The Company will continue to take advantages of separating ownership and management in accordance with the requirements of modern enterprise systems, and ensure standardized and efficient operation in legal person governance structure, decision-making mechanisms, organizational forms, and decision-making processes in accordance with relevant regulatory rules for listed companies, achieving scientific decision-making and standardized operation. Meanwhile, the Company will further improve its operational and management capabilities, strengthen internal control, and enhance its corporate governance effectiveness. The Company will promote comprehensive budget management, strengthen cost management, and strengthen supervision of budget implementation. By strictly controlling various expenses, the Company aims to enhance operational and management efficiency, and control operational and management risks.

Upon completion of the issuance of Preference Shares to specific targets, the Directors and senior management of the Company will continue to faithfully and diligently discharge their duties, safeguard the legitimate rights and interests of the Company and all of its Shareholders.
