CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

PRINCIPAL RISKS AND UNCERTAINTIES

The business operations and results of the Group may be affected by various factors, some of which are external causes and some are inherent to the business. The Board is aware that the Group is exposed to various risks and the principal risks and uncertainties are summarized below:

The Pandemic had brought unprecedented challenges and added uncertainties to the global economy. To contain the spread of the virus, local governments had implemented cities lockdown measures. Business operations were negatively impacted. The sales and profitability of our products are dependent on our customers' business performance. We sell our products mainly to retailers, beauty products to brand owners and trading companies. Meanwhile, the business performance of our customers could also underperform due to a number of factors, such as changes in business strategies, failure to develop successful marketing strategies, changes in the market demand for our customers' products and adverse market or economic conditions in the markets in which our customers operate, in particular, the US. If the business performance of our customers deteriorates, they could reduce the amount of their purchases for our products, or terminate their business relationship from us, which could have a material and adverse impact on our business, financial condition, results of operations and prospect.

Supplementary Information

The Group's products are produced in China and mostly exported to the US market. The weakening of the Sino-US relationship has hindered business growth. Any further increase in tariff for our products exported to US will increase our costs. There is no assurance that we can negotiate with brand customers and trading companies for a sharing of the extra tariff.

Any shortage in labour, increase in labour costs, strikes, labour unrests or other adverse factors affecting our labour force may have a material adverse effect on our business operations.

As we expand our production capabilities and capacities, we will require more production personnel. There is no assurance that we will not experience any shortage of labour for our production. Given the economic growth in the PRC, competition for labour is substantial and labour costs have been increasing generally, and we cannot assure that we can retain and attract sufficient qualified employees and/or on commercially reasonable terms in the future. If we fail to retain and attract sufficient labour, we may not be able to effectively implement our expansion plans, our business, financial conditions and results of operations would be materially and adversely affected. The economic, political and social conditions in the PRC, as well as government policies, laws and regulations, could affect our business, financial condition and results of operations. The Group maintained substantial amount of business assets and operations in the PRC. Accordingly, our results of operations are subject to economic, political and legal developments in the PRC. Any changes in its regulations will definitely affect our business in the regional segment.
