REASONS FOR AND BENEFITS OF THE PLACING AND USE OF PROCEEDS

(i) Information of the Group

The Group is principally engaged in (i) provision of electronic manufacturing services (“EMS”); (ii) marketing and distribution of communication products; (iii) real estate supply chain services, (iv) assisted reproduction medical technology business; and (v) the securities and other assets investment. The Group’s products under the EMS business and the business segment of marketing and distribution of communication products (collectively, the “**EMS and Distribution Business**”) include but not limited to corded and cordless residential telephones, vacuum cleaner, printed circuit board of renewable energy charging solutions for electric vehicles and beauty care equipment.

(ii) Intended use of proceeds

Assuming all 34,505,837 Placing Shares are subscribed for in full, upon the Completion, the aggregate gross proceeds from the Placing will be approximately HK\$39.0 million and the aggregate net proceeds from the Placing will be approximately HK\$38.0 million (after deduction of commission and other expenses of the Placing), representing a net issue price of approximately HK\$1.10 per Placing Share.

The Company intends to use the entire net proceeds arising from the Placing as to: (i) approximately HK\$37.8 million for the development of renewable energy charging solutions specialized for electric vehicles; and (ii) approximately HK\$0.2 million as working capital of the Group.

(iii) Reasons for and benefits of the Placing

As disclosed in the annual report (the “**Annual Report 2022**”) of the Company for the year ended 31 December 2022 (the “**Year**”), the Group’s revenue and net loss for the Year amounted to approximately HK\$529.3 million and HK\$52.0 million. The Group’s revenue decreased by approximately 21.6% and the Group’s net loss increased by approximately 10.3% during the Year as compared with the previous year ended 31 December 2021 (the “**Previous Year**”), due to a significant decrease in sales in major European markets. Based on the Annual Report 2022, the Group’s revenue was principally generated from European countries, United States of America and the PRC.

In particular, the revenue from the major European countries, including but not limited to Switzerland, France, Belgium and Russia, accounted for approximately 43.1% and 51.6% of the total revenue of the Group in 2022 and 2021 respectively.

In view of the acceleration of the Russia-Ukraine tensions and the Russian invasion of Ukraine in February 2022 (the “**War Crisis**”), the Group’s revenue of the EMS and Distribution Business segment generated from the European countries has decreased significantly by approximately HK\$120.5 million or 34.6% for the Year as compared to the Previous Year. The War Crisis and ongoing COVID-19 development also caused logistic breakdown in worldwide triggering the rise of raw material’s cost of the EMS and Distribution Business segment which resulted in a decrease of the gross profit margin of the Group for the Year. Further, as disclosed in the latest interim report of the Company (the “**Interim Report 2023**”) for the six months ended 30 June 2023 (the “**Period**”), the Group recorded a decrease in revenue by approximately 18.9% to approximately HK\$228.5 million for the Period. Based on the Interim Report 2023, the revenue generated from the European countries of EMS and Distribution Business segment has been decreased by approximately 40.5% for the Period. The Directors noted that the ongoing War Crisis continued to impact the Group’s business performance and development adversely and therefore believe that there is immediate need to refine the Group’s business strategy.

To address the challenges brought by impact of the War Crisis and economic uncertainties, the management of the Group had formulated new business strategy, which was to expand its product offering with the development of renewable energy charging solutions specialized for electric vehicles (the “**EV Charging Solution**”) that targets to capture the PRC market. Based on the market research, the market size of the Asia Pacific electric vehicle charging station was valued over USD20.3 billion in 2022 and expects to grow at a rate of over 21.3% by 2032. In particular, the growing demand of electric vehicles in the PRC driven by the government policy to reduce greenhouse gas emission has created a need for charging infrastructure to support the expanding electric vehicle market. Therefore, the Director considers that the development of EV Charging Solution will enable the Group to capture the business opportunity created by rising demand of electric vehicles users and strengthen its market presence in Asia.

In particular, the Directors intend to utilize approximately HK\$37.8 million in aggregate for the development of the EV Charging Solution. The Director plan to acquire equipment and materials specialized for the production of EV Charging Solution including (i) charging monitoring and maintenance equipment of approximately HK\$10.6 million; (ii) charging module of approximately HK\$14.0 million; (iii) charging gun and charging cable of approximately HK\$7.0 million; and (iv) control panel of approximately HK\$2.4 million. The Group will apply approximately HK\$3.8 million to assemble the component and install the EV Charging Solution as a new offering trading under the EMS and Distribution Business. The EV Charging Solution was expected to be used as commercial electric vehicle charging stations by charge point operator in the PRC. The entire proceeds for the development of EV Charging Solution is expected to be fully utilised by 30 September 2024.

The remaining balance of approximately HK\$0.2 million from the net proceeds of Placing will be utilized for general corporate and working capital purposes. Based on the working capital needs of the Group, the Directors expect that the entire balance of approximately HK\$0.2 million will be used for payment of staff cost and will be fully utilized by the Group within 1 month upon Completion.

Having reviewed (i) the business environment and challenge experienced by the Group in the European market; (ii) the financial position and performance of the Group in the recent years; and (iii) that the Group's business operation is capital intensive in nature, the Directors contemplated to conduct new fundraising exercise (i.e. Placing) since May 2023 with the aim to support the capital needs of the Group for the implementation the new strategy to strive for business growth and diversification of revenue stream of the Group in Asia. Despite the expected dilution impact of Placing on the shareholding interests of the Shareholders, taking into account the aforementioned business considerations and use of proceeds, the Directors consider that it is commercially sensible and in the interest of the long-term development of the Group to conduct new equity fundraising exercise when new business opportunities arise, and hence the Placing is fair and reasonable and in the interests of the Company and the Shareholders as a whole.
