# MANAGEMENT DISCUSSION AND ANALYSIS

## BUSINESS REVIEW AND PROSPECTS

The first half of 2023 presented significant challenges for the Group, as it experienced lower revenue and net profit compared to the same period in 2022. These declines were primarily driven by the softening of the steel market. Furthermore, the pricing of scrap ferrous metal has remained consistently low since the latter half of 2022. Malaysia's domestic steel demand is projected to recover gradually through 2023. However, the consumption level is expected to remain below pre-Covid-19 levels, as forecasted by the Malaysia Iron and Steel Industry Federation. Geopolitical tension, global economic downturns, and stability of the financial market are also anticipated to influence the steel market's performance in 2023.

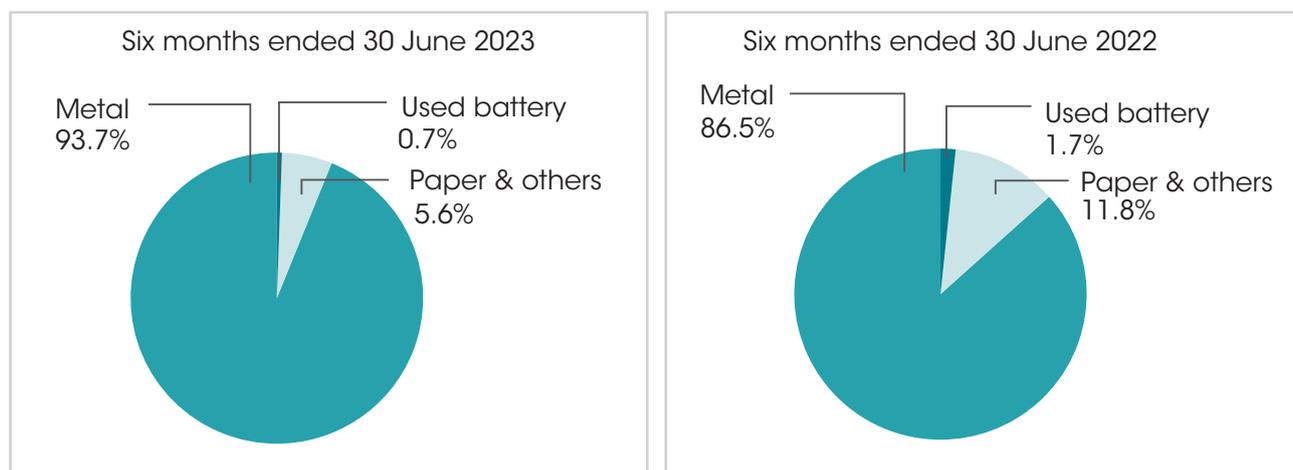

For the six months period ended 30 June 2023 ("**1H 2023**"), the Group recorded a total revenue of RM574.8 million. This marks a substantial decrease of approximately 33.8% compared to the corresponding period ended 30 June 2022 ("**1H 2022**") which recorded revenue of RM868.0 million. The decline in revenue was mainly due to lower sales volume and the decreased selling price of scrap ferrous metal. The sales volume of scrap ferrous metal during 1H 2023 and 1H 2022 was 308,891 tonnes and 384,646 tonnes, respectively, representing a decline of approximately 20%. Consequently, the Group's net profit after tax for 1H 2023 experienced a substantial decrease of about 68.1%, amounting to RM2.5 million, as compared to the RM7.7 million recorded in 1H 2022.

Considering the ongoing challenges in the steel market, the Group maintains a vigilant stance and a strong commitment to risk management. It aims to be responsive to market condition and optimize operational efficiency to enhance shareholders value.

## FINANCIAL REVIEW

### Revenue

Revenue of the Group for 1H 2023 was RM574.8 million (1H 2022: RM868.0 million), representing a decline of 33.8% as compared to the same period of 2022. The breakdown of our total revenue by product types for the periods under review are as below:

The sales of scrap ferrous metal remain the key contributor to the Group's revenue. Therefore, the decrease in sales volume and low selling price of scrap ferrous metal in the 1H 2023 were the main factors that contributed to lower Group's revenue as compared to 1H 2022. The average selling price of scrap ferrous metal during 1H 2023 was about RM1,740 per metric tonne, representing approximately 17% lower against the average selling price of RM2,095 per metric tonne during the corresponding period 1H 2022.

The Group's revenue and volume from the sales of scrap ferrous metal during the period under review are as follows:

Six months period ended 30 June			
2023		2022	
Volume sold (tonnes)	Revenue (RM'000)	Volume sold (tonnes)	Revenue (RM'000)
308,891	538,630	384,646	810,457

## MANAGEMENT DISCUSSION AND ANALYSIS

### Gross Profit

The Group's gross profit for the 1H 2023 decreased by 16.1% from RM35.3 million to RM29.6 million as compared with the corresponding period in 1H 2022. The decrease in gross profit was primarily attributable to the lower sales volume and low selling price of scrap ferrous metal.

Nevertheless, the Group's gross profit margin has improved to 5.1% for the 1H 2023 as compared to 4.1% in the 1H 2022.

### Distribution and Selling Expenses

In view of the lower sales volume recorded during 1H 2023, the Group recorded a lower distribution and selling expenses of RM11.3 million in the 1H 2023 as compared to RM13.2 million posted during 1H 2022, represented a decrease of approximately 14.4%.

### Administrative Expenses

The Group's administrative expenses for 1H 2023 and 1H 2022 were recorded as RM13.4 million and RM11.6 million respectively, represented an increase of 15.5%. The increase was mainly attributable to the increase in head count on office and operation personnel, payroll adjustment and higher legal and professional expenses with regard to the additional bank facilities granted by a financial institution.

### Share of Results of An Associate

The Group's share of results of an associate is nil for 1H 2023, same as the corresponding period in 2022. The Group has not recognised further losses related to the associate since the Group has no obligation in respect to these losses and the carrying amount of the investment is nil.

### Taxation

Malaysian corporate income tax has been provided at the rate of 24% of the estimated assessable profit. Our effective tax rate for 1H 2023 was 42.8% (1H 2022: 36.7%). The higher effective tax rate was mainly due to higher non-deductible expenditures for tax purposes.

### Profit Attributable to Owners of the Company

The Group's profit attributable to owners of the Company for 1H 2023 was RM2.5 million (1H 2022: RM7.8 million), which is in tandem with the decrease in profit before tax.

## Key Financial Ratios

The following table sets forth certain of our financial ratios as at the dates indicated.

<b>Liquidity Ratios</b>	<b>As at 30 June 2023 (Unaudited)</b>	As at 31 December 2022 (Audited)
Current ratio	<b>2.7 times</b>	3.5 times
Gearing ratio	<b>37.6%</b>	26.6%
	<b>For the six months ended 30 June</b>	
	<b>2023</b>	2022
Inventories' turnover period	<b>16 days</b>	12 days
Trade receivables' turnover period	<b>38 days</b>	27 days
Trade payables' turnover period	<b>4 days</b>	7 days

## Working Capital

The inventories' turnover period of the Group was 16 days for 1H 2023 as compared to 12 days for 1H 2022. The increase was due to the lower sales volume recorded during the period under review.

The Group's trade receivables' turnover period was 38 days for 1H 2023 as compared to 27 days for 1H 2022. The increase was mainly attributable to the slow payment from steel mill customers.

The Group's trade payables' turnover period was 4 days for 1H 2023 as compared to 7 days for 1H 2022. The shorten of turnover period was mainly due to higher down payment to suppliers.

## Liquidity and Financial Resources

As of 30 June 2023, the Group's total equity attributable to owners of the Company amounted to RM207.2 million (as at 31 December 2022: RM204.8 million) including retained earnings of RM123.2 million (as at 31 December 2022: RM120.8 million). The Group's working capital amounted to RM155.8 million (as at 31 December 2022: RM149.0 million) of which cash and bank balances, pledged bank deposits and fixed deposits were RM44.9 million (as at 31 December 2022: RM30.7 million).

Taking into account the cash and bank balances and banking facilities available to us, the Group has adequate liquidity and financial resources to meet the working capital requirements as well as to fund its budgeted expansion plans for the next 12 months. The Board will continue to follow a prudent treasury policy in managing its cash and bank balances and maintain a strong and healthy liquidity to ensure that the Group is well positioned to achieve its business objectives and strategies.

Total borrowings of the Group as at 30 June 2023 were RM75.4 million (as at 31 December 2022: RM52.3 million). The borrowings were mainly used to finance the procurement of scrap ferrous metals and capital expenditure.

The Group's gearing ratio as at 30 June 2023 was 37.6% (as at 31 December 2022: 26.6%). Gearing ratio is calculated based on total interest-bearing debts divided by total equity as at the end of the period.

	<b>30,647</b>	30,989

### Contingent Liabilities

The Group did not have any significant contingent liability as at 30 June 2023 (as at 31 December 2022: Nil).

### Capital Commitments

As at 30 June 2023, the Group has capital commitment to the bank in respect of the acquisition of property, plant and equipment of RM11.8 million (as at 31 December 2022: RM11.8 million).

### Risk Management

The Group in its ordinary course of business is exposed to market risk (such as foreign currency risk and interest rate risk), credit risk and liquidity risk. The management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

As most of the Group's operation subsidiaries are located in Malaysia and conduct their transactions in Malaysia Ringgit ("RM"), which is also the functional and presentation currency, the Group is not significantly exposed to foreign currency risk.

Since most of the Group's business transactions, assets and liabilities are denominated in RM, the Group has minimal exposure to foreign currency risk. While the Group currently does not have a foreign currency hedging policy for foreign currency transactions, assets and liabilities, the management closely monitors foreign currency exposure and may consider hedging significant exposure if necessary.

The Group's interest rate risk arises primarily from borrowing obtained at variable rates, which expose the Group to cash flow interest rate risk.

The credit risk of the Group mainly arises from cash and bank balances, trade and other receivables and amounts due from related parties. The carrying amounts of these balances represent the Group's maximum exposure to credit risk in relation to financial assets.

## MANAGEMENT DISCUSSION AND ANALYSIS

The Group considers the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk, the Group compares the risk of a default as at the date of initial recognition. The Group considers available reasonable and supportive forwarding looking information, especially the following indicators are incorporated:

- internal credit rating;
- external credit rating;
- actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the debtor's ability to meet its obligations;
- actual or expected significant changes in the operating results of individual debtor;
- significant increases in credit risk on other financial instruments at the individual debtor; and
- significant changes in the expected performance and behaviour of the debtor, including changes in payment status of debtor in the Group and changes in the operating results of the debtor.

The Group manages credit risk associated with cash and bank depositors by only transacting with reputable commercial banks that are considered high-credit-quality financial institutions. There has been no recent history of default in relation to these financial institutions, and the expected credit loss of cash at banks is close to zero.

The Group applies the simplified approach prescribed by IFRS 9 to provide for expected credit losses for all trade receivables which permits the use of the lifetime expected loss provision. The Group considers the credit risk characteristics, days past due, and forward-looking information to measure the expected credit losses. During the six months ended 30 June 2023, the expected loss rate for trade receivable was 0.9% (1H 2022: 1.0%). The provision for trade receivables for 1H 2023 was nil (1H 2022: Nil).

The Group has no write-off of trade receivables during 1H 2023 and 1H 2022.

The Group has significant concentration of credit risk from customers for scrap ferrous metals such as steel mills and ferrous metal trading companies. As at 30 June 2023, 84% (as at 31 December 2022: 84%) of its total trade receivables was due from this group of customers. As the Group is one of the few approved scrap metal providers to the steel mill customers and based on the past repayment history and forward-looking estimates, the Directors believe that the credit risk inherent in the Group's outstanding trade receivables from this group of customers is low.

Our Group monitors the outstanding debts from its customers individually due to the concentration of credit risk. Based on historical repayment trend, there is no correlation between the risk of default occurring and the collection of past-due status as long as there is no significant change in the credit rating of the customers. Historically, the Group's loss arising from risk of default and time value of money is negligible.

Cash flow forecasting is performed by the operating entities of the Group and aggregated by Group finance. The Group finance monitors rolling forecasts of our Group's liquidity requirements to ensure it has sufficient cash to meet operational needs, taking into consideration the Group's debt financing plans, covenant compliance, and if applicable external regulatory requirements, such as currency restrictions.
