# Management Discussion and Analysis

## MARKET OVERVIEW

As the impact of the COVID-19 epidemic gradually receded and the relevant stimulus policies continued to be introduced, the macroeconomic environment and the automobile industry began to recover moderately. According to the data of the CAAM, the production and sales of passenger vehicles in China during the six months ended June 30, 2023 were approximately 11,281,000 units and 11,268,000 units respectively, representing a period-on-period growth of 8.1% and 8.8%, respectively. From the performance of the passenger car market in the first half of this year, the government launched a series of policies to promote automobile consumption, the end-of-quarter rush by automobile enterprises, and the continuous growth in sales and exports of new energy vehicles have collectively driven the dual growth in production and sales of China's passenger car market in the first half of this year.

Benefiting from the recovery of the automobile industry, China's automobile advertising industry is also experiencing a rebound. According to public data, China's automobile advertising and information market increased from RMB49.9 billion in 2015 to RMB74.8 billion in 2019, representing a CAGR of 10.7%, and is expected to increase from RMB56.8 billion in 2020 to RMB116.4 billion in 2025, representing a CAGR of 15.4%. In terms of penetration rate, the online automobile advertising penetration rate in China grew from 33.7% in 2015 to 45.6% in 2019. With the continuous enrichment of self-media content and the development of AI technology, the offline marketing budget is expected to continue to be shifted online in the future, and it is projected that the penetration rate of China's online automobile advertising will reach 58.6% in 2025.

In view of the Group's advanced and strong in-house technological capabilities, the Group has maintained steady development in its existing businesses. At the same time, the Group continues to promote the development strategy of "super connector" in the automobile industry and actively deployed in the related areas of the industry chain to construct the "second growth curve". For the six months ended June 30, 2023, the Group's total revenue was approximately RMB75.5 million, achieving positive performance compared to approximately RMB74.8 million for the six months ended June 30, 2022.

## GROUP OVERVIEW

Founded in September 2015 and acquired the business and assets of "Cheshi.com" in October 2015, a vertically integrated automobile portal which commenced operation in September 1999 in the PRC, the Group has developed into one of the leading automobile vertical media advertising platforms in China and is committed to provide its business partners and end users with comprehensive and high-quality automobile content and one-stop marketing solutions. ### Other Financial Information (Non-IFRS measures): Adjusted net profit

Adjusted Net Profit is defined as profit for the Reporting Period, as adjusted by adding back share-based compensation expenses, which represent the expenses on Post-IPO RSU Scheme.

Adjusted net profit is not required by, or presented in accordance with, IFRS. The Company believes that the presentation of non-IFRS measures when shown in conjunction with the corresponding IFRS measures provides useful information to investors and management regarding financial and business trends in relation to their financial condition and results of operations, by eliminating any potential impact of items that the Group's management does not consider to be indicative of the Group's operating performance. The Company also believes that the non-IFRS measures are appropriate for evaluating the Group's operating performance. However, the use of this particular non-IFRS measure has limitations as an analytical tool, and you should not consider it in isolation from, or as a substitute for analysis of, the Group's results of operations or financial conditions as reported under IFRS. In addition, this non-IFRS financial measure may be defined differently from similar terms used by other companies and therefore may not be comparable to similar measures used by other companies.

The Board will continue to review and consider segregating the roles of the Chairman and CEO at an appropriate time, taking into account the circumstances of the Group.

# Notes to Interim Condensed Consolidated Financial Information

30 June 2023

## 1. Basis of presentation

The interim condensed consolidated financial information for the six months ended 30 June 2023 has been prepared in accordance with HKAS 34 *Interim Financial Reporting*. The interim condensed consolidated financial information does not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's annual consolidated financial statements for the year ended 31 December 2022.

## 2. Changes in accounting policies and disclosures

The accounting policies adopted in the preparation of the interim condensed consolidated financial information are consistent with those applied in the preparation of the Group's annual consolidated financial statements for the year ended 31 December 2022, except for the adoption of the following new and revised International Financial Reporting Standards ("IFRSs") for the first time for the current period's financial information.

IFRS 17	<i>Insurance Contracts</i>
Amendments to IFRS 17	<i>Insurance Contracts</i>
Amendment to IFRS 17	<i>Initial Application of IFRS 17 and IFRS 9 – Comparative Information</i>
Amendments to IAS 1 and IFRS Practice Statement 2	<i>Disclosure of Accounting Policies</i>
Amendments to IAS 8	<i>Definition of Accounting Estimates</i>
Amendments to IAS 12	<i>Deferred Tax related to Assets and Liabilities arising from a Single Transaction</i>
Amendments to IAS 12	<i>International Tax Reform – Pillar Two Model Rules</i>

The nature and impact of the new and revised IFRSs that are applicable to the Group are described below:

- (a) Amendments to IAS 1 require entities to disclose their material accounting policy information rather than their significant accounting policies. Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements. Amendments to IFRS Practice Statement 2 provide non-mandatory guidance on how to apply the concept of materiality to accounting policy disclosures. The Group has applied the amendments since 1 January 2023. The amendments did not have any impact on the Group's interim condensed consolidated financial information.
- (b) Amendments to IAS 8 clarify the distinction between changes in accounting estimates and changes in accounting policies. Accounting estimates are defined as monetary amounts in financial statements that are subject to measurement uncertainty. The amendments also clarify how entities use measurement techniques and inputs to develop accounting estimates. The Group has applied the amendments to changes in accounting policies and changes in accounting estimates that occur on or after 1 January 2023. Since the Group's policy of determining accounting estimates aligns with the amendments, the amendments did not have any impact on the financial position or performance of the Group.

## 2. Changes in accounting policies and disclosures (continued)

The nature and impact of the new and revised IFRSs that are applicable to the Group are described below:  
(continued)

- (c) Amendments to IAS 12 Deferred Tax related to Assets and Liabilities arising from a Single Transaction narrow the scope of the initial recognition exception in IAS 12 so that it no longer applies to transactions that give rise to equal taxable and deductible temporary differences, such as leases and decommissioning obligations. Therefore, entities are required to recognise a deferred tax asset (provided that sufficient taxable profit is available) and a deferred tax liability for temporary differences arising from these transactions. The Group has applied the amendments on temporary differences related to leases as at 1 January 2022, with any cumulative effect recognised as an adjustment to the balance of retained profits or other component of equity as appropriate at that date. In addition, the Group has applied the amendments prospectively to transactions other than leases that occurred on or after 1 January 2022.
  
- (d) Amendments to IAS 12 International Tax Reform – Pillar Two Model Rules introduce a mandatory temporary exception from the recognition and disclosure of deferred taxes arising from the implementation of the Pillar Two model rules published by the Organisation for Economic Co-operation and Development. The amendments also introduce disclosure requirements for the affected entities to help users of the financial statements better understand the entities' exposure to Pillar Two income taxes, including the disclosure of current tax related to Pillar Two income taxes separately in the periods when Pillar Two legislation is effective and the disclosure of known or reasonably estimable information of their exposure to Pillar Two income taxes in periods in which the legislation is enacted or substantively enacted but not yet in effect. Entities are required to disclose the information relating to their exposure to Pillar Two income taxes in annual periods beginning on or after 1 January 2023, but are not required to disclose such information for any interim periods ending on or before 31 December 2023. The Group has applied the amendments retrospectively. Since the Group did not fall within the scope of the Pillar Two model rules, the amendments did not have any impact to the Group.

## 15. Fair value and fair value hierarchy of financial instruments (continued)

As at 30 June 2023 and 31 December 2022 the fair values of the Group's financial assets or liabilities approximated to their respective carrying amounts.

Management has assessed that the carrying amounts of cash and cash equivalents, trade receivables, financial assets included in prepayments, deposits and other receivables, trade payables, financial liabilities included in other payables and accruals and current portion of loans from a shareholder reasonably approximate to their fair values because these financial instruments are short-term in nature. The carrying amount of non-current loans from a shareholder approximates to its fair value which are estimated based on the discounted cash flows.

The Group's finance department headed by the finance manager is responsible for determining the policies and procedures for the fair value measurement of financial instruments. The finance manager reports directly to the chief financial officer and the audit committee. At each reporting date, the finance department analyses the movements in the values of financial instruments and determines the major inputs applied in the valuation. The valuation is reviewed and approved by the chief financial officer. The valuation process and results are discussed with the audit committee twice a year for interim and annual financial reporting.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

### (a) Financial instruments in Level 1

The fair value of the listed securities is determined based on the closing prices quoted in active markets. They are accounted for using their fair values based on the quoted market prices (Level 1: quoted price (unadjusted) in active markets) without deduction for transaction costs.

### (b) Financial instruments in Level 2

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value of an instrument are observable, the instrument is included in Level 2.

### (c) Financial instruments in Level 3

Level 3 instruments of the Group's assets are equity investments in unlisted companies and unlisted investment funds.
