ABOUT THIS REPORT

Tak Lee Machinery Holdings Limited (the “Company” or “TLMC”, together with its subsidiaries, the “Group”) is pleased to present the Environmental, Social and Governance (“ESG”) Report (this “Report”). This Report aims to provide a balanced representation of the Group’s ESG management approach, strategy, performance and achievements. All information is prepared and published based on existing policies, practices and official documents or reports in an accurate, genuine and transparent manner.

The scope of this Report focuses on the three segments operated by the Group, being the sales of heavy equipment and spare parts, leasing of heavy equipment, as well as the provision of maintenance and ancillary services in Hong Kong. The Group has operational control over these principal activities, which are mainly conducted at its headquarters office, workshop and warehouse facility located in Pat Heung and branch office located in Tsuen Wan. Unless otherwise specified, this Report covers the financial year from 1 August 2022 to 31 July 2023 (the “Reporting Period”).

This Report is prepared in accordance with the “Mandatory Disclosure Requirements” and the “Comply or Explain” provisions of the ESG Reporting Guide set out in Appendix 27 to the Rules Governing the Listing of Securities (the “Listing Rules”) on The Stock Exchange of Hong Kong Limited (the “Stock Exchange”). The following four reporting principles served as the foundation in preparation of this Report.

Materiality	Following an ESG stakeholder engagement exercise and a materiality assessment, this Report is structured based on the materiality of ESG issues of the Group. The board of directors of the Company (the “Board”) and management review these sustainability issues annually to ensure that stakeholders’ opinions are reflected. The results of the materiality assessment process are set out in the section headed “Materiality Assessment” in this Report.
Quantitative	This Report discloses relevant ESG key performance indicators (“KPIs”) and quantitative information of the headquarters office, branch office, workshop and warehouse facility. Quantitative information is further accompanied by descriptions where appropriate.
Balance	The Board endeavours to present an unbiased overview of the Group’s ESG performance in this Report, disclosing both achievements and areas of improvements whenever applicable.
Consistency	This Report follows methodologies that are consistent with previous years, which allows for meaningful comparison of ESG data over time. There was no significant change to the reporting scope of this Report.

During the Reporting Period, the Group was not aware of any material complaints or cases of non-compliance relating to sustainability matters. Relevant information can be found in the sections headed “Company Policies” and “Laws, Rules and Regulations” in this Report.

The Group welcomes readers' feedback on this Report and its approach to sustainability. Please share comments or suggestions via the following channels:

Post	P.O. Box No. 351, Shek Wu Hui Post Office, Sheung Shui, Hong Kong
Email	tlmc@netvigator.com
Telephone	(852) 2488 8888

For more details regarding the Group's corporate governance and financial performance, please refer to the Annual Report 2023, which has been published on the websites of the Stock Exchange and the Company (<https://www.tlmc-hk.com>).

ABOUT TLMC

Overview

For over 22 years, TLMC has been serving customers in Hong Kong and Macau, as well as customers around the world. The Group mainly engages in the sales of new and used heavy equipment and spare parts, the leasing of heavy equipment, and the provision of maintenance and ancillary services in Hong Kong. The Group provides a range of high quality heavy equipment, including excavators, articulated dump trucks, compactors, wheel loaders, bulldozers, lifting cranes, and diesel energy generators, among others.

Demonstrating a highly efficient quality management system, TLMC has successfully obtained ISO 9001:2008 and ISO 9001:2015 Quality Management Systems (“QMS”) certification. Besides, the Group provides after-sales and maintenance services, including on-site service for customers in Hong Kong, and specific staff to follow up and deal with customers’ problems.

Listing on GEM (formerly known as the Growth Enterprise Market) of the Stock Exchange in July 2017 and then transferring to the Main Board of the Stock Exchange in October 2020 demonstrates the devotion of the Group to continuously deliver excellent services and quality products to its customers. As its business evolves, the Group will continue to create value to its stakeholders as well as strive to uphold its unique strengths and features.

Mission and Objectives

TLMC is committed to introducing high-quality heavy equipment and providing quality pre-sales and after-sales service to our customers. TLMC offers the most economical, most efficient and reliable supply of construction machinery and services to all. The usage of our services include quarry, construction, civil engineering, waste treatment and land reclamation.

Our Highlights

Sole authorised dealer of Hitachi brand heavy equipment in Hong Kong and Macau

Exclusive distributor of various earthmoving attachments of LaBounty brand in Hong Kong and Macau

Exclusive distributor of various earthmoving attachments of Hyundai Everdigm brand in Hong Kong, Macau and certain provinces in the People’s Republic of China (“PRC”)

Exclusive dealer of heavy vehicles of Ammann brand in Hong Kong and Macau

Distributor of diesel engine generators and certain types of engine compressors of Airman brand in Hong Kong and Macau

Distributor of articulated dump trucks and articulated trucks (water tankers) of Bell brand in Hong Kong

Dealer of grapples and other earthmoving attachments and also the exclusive dealer for the supply of Orange Peels product line of Rotobec brand in Hong Kong and Macau

Sole dealer of Xwatch brand machine safety and control systems in Hong Kong and Macau

Authorised dealer of VIA brand Mobile360 heavy equipment safety system

Awards and Recognitions

During the Reporting Period, the Group has been awarded the title of “Caring Company” by the Hong Kong Council of Social Service, in recognition of TLMC’s Corporate Social Responsibility (“CSR”) in caring for the community, employees and the environment since 2015. The Love Link of Hong Kong has also recognised our community contribution. We received the title of “Caring Enterprise”, which highlights our dedication to empowering and fostering the youth as well as caring for the community. Furthermore, the Group was awarded the title of “Construction Industry Caring Organisation” by the Construction Industry Council of Hong Kong (the “CIC”).

As a “Heart Caring Company” under the Labour Department and the Occupational Safety and Health Council of Hong Kong, we pledge to build a healthy workplace with active engagement of management and staff in preventing cardiovascular and cerebrovascular diseases. Meanwhile, TLMC has been admitted as an Institutional Member and a Marble Patron Member of the Hong Kong Green Building Council, enabling us to support and foster the development of sustainable buildings in Hong Kong.

SUSTAINABILITY AT TLMC

The Board considers it imperative that sustainability forms the backbone of the business to achieve corporate growth. Hence, the Group is dedicated to incorporating the concept of sustainability into every facet of its business, by upholding a well-rounded governance system, establishing strategic direction and maintaining active communication with its stakeholders.

The Group has developed and implemented a Sustainability Policy in order to be a responsible business that creates value for the community in which the Group operates. By embedding sustainability into its operations, the Group strives to provide innovative products and services, minimise environmental impact and strengthen relationships with its customers, suppliers and business partners.

ESG Management

The Board is responsible for overseeing the Group's ESG vision, objectives and strategies for the short, medium and long term. In addition to identifying material ESG issues of the Group, the Board is dedicated to evaluating, prioritising and managing material ESG issues, as well as considering relevant ESG risks and opportunities. The Board regularly meets to review its various ESG targets and progress, and the Board discusses, reviews and evaluates all ESG issues relevant to the Group at least once a year. The Board also reviews the policies such that they are up-to-date and consistent with any changes or developments in the Group's ESG vision, objectives and strategies.

For the management and governance of each ESG issue, the Group has developed a set of ESG policies such as the Sustainability Policy and the Human Rights Policy. Through these policies, the Group's management and various business functions are guided to effectively implement ESG strategies and practices that address key ESG issues. Information about the Group's formulated policies are detailed throughout this Report whilst a list of policies is disclosed in the section headed "Company Policies".

During the Reporting Period, the Board has attended relevant training to enhance ESG-related know-how and management effectiveness. Four directors of the Group attended the online ESG training of "Navigating Climate-related Disclosures", "ESG Academy Webinar Series", "ESG Governance and Reporting", and "Exchange's New ESG Requirements" held by the Stock Exchange in July 2023, with a total of 16 hours training time.

ESG Strategies

Global crisis and extreme weather events, such as the strong typhoons experienced by Hong Kong and the novel coronavirus disease 2019 (“COVID-19”) pandemic, have highlighted the importance of creating a strategy that guides the Group in navigating against the turbulent environmental and social climate whilst remaining in sight of its objectives. Subsequently, a series of ESG strategies were developed to bring clarity and focus on the Group’s sustainability direction.

Through the Group’s ESG strategies, the Group strives to bring positive outcomes to its five focus areas: (i) Ethical Governance, (ii) Quality Product and Service, (iii) Dedicated Workforce, (iv) Corporate Citizen and (v) Green Operations. Each focus area details pragmatic objectives of the Group. This provides the Group with guidance in deploying resources whilst shaping its trajectory in how the Group delivers its products and services in a way that strengthens the business of the Group. During the Reporting Period, the Group adjusted the strategic priorities within its ESG strategies to facilitate a streamlined ESG trajectory. The Group also aligned its ESG strategies with 8 of the United Nations Sustainable Development Goals (“UN SDGs”) to contribute to the global sustainable development agenda. Moving forward, we aim to disclose our key initiatives that highlight our positive impact on the aligned UN SDGs.

Ethical Governance

Commit to doing business with the highest degree of integrity, transparency and accountability and sharing these principles with those we work with.

Quality Product and Service

Foster continuous relationship with our network of suppliers to provide high quality, efficient and reliable supply of machinery and services to all stakeholders. By enhancing our quality assurance and safety measures, we ensure that our machinery is in top-notch conditions for customer satisfaction.

Dedicated Workforce

Aspire to create a safe, healthy and supportive workplace that upholds fairness and equality, a competitive welfare and incentive system as well as training opportunities for professional development.

Corporate Citizen

Drive positive values and relationships with the local community by investing and engaging in charitable causes and community outreach.

Green Operations

Uphold environmental compliance throughout operations whilst striving to adopt mitigation measures to minimise the potential impact from our machineries and achieve a sustainable future for all.

Stakeholder Engagement

Keeping abreast of stakeholders’ opinions and concerns enables TLMC to improve its ESG approach and performance. By understanding stakeholders’ expectations and gauging their priorities, the Group is better equipped to address their concerns, review its business approach, and ultimately, update or formulate sustainability policies and strategies.

The Group maintains active communication with internal and external stakeholders through various communication channels. The following table lists the stakeholders and their corresponding engagement channels during the Reporting Period.

Stakeholder Groups	Engagement Channels
Shareholders and Investors	<ul style="list-style-type: none"> ● Press releases ● Annual/ interim reports ● Company webpage ● Circulars ● General meetings and teleconferences
Employees	<ul style="list-style-type: none"> ● Meetings and teleconferences ● Performance assessment ● Training programmes ● Company events

Regulatory Bodies	<ul style="list-style-type: none"> ● Compliance/ non-compliance reports ● Certifications/ licensing ● Meetings and teleconferences ● Site visits

Materiality Assessment

To better understand the views of stakeholders and ensure our sustainability strategies, priorities and policies align with their expectations, a comprehensive stakeholder engagement exercise was conducted in 2020/21. A four-step process was used to determine ESG issues that are material to the Group.

<p>Step 1 Identification</p>	<p>Potential material ESG issues were identified by reviewing ESG reports of the Group and industry peers.</p> <p>The identification criteria include whether the issue has a significant impact on stakeholders’ assessment and decisions, and whether it reflects the Group’s material environmental and social impact. 22 material issues were identified and defined using the said criteria.</p>
<p>Step 2 Prioritisation</p>	<p>Different stakeholder groups were engaged based on their influence on the Group. A standardised survey was distributed to key stakeholder groups to ensure a consistent and systematic assessment of the material issues.</p> <p>Stakeholders were invited to rank the relative importance of identified ESG issues based on their own perceptions (represented by employees) and towards the Group’s sustainable development (represented by the Board and management).</p>
<p>Step 3 Validation</p>	<p>The Group’s management confirmed and validated the list of material issues for disclosure in this Report.</p>
<p>Step 4 Review</p>	<p>The Board reviewed the identified material ESG issues and the results of the materiality assessment to ensure they are relevant and important to the Group.</p>

In 2021/22, the Board conducted an assessment of the 22 previously identified material ESG issues. Since there were no major changes in the strategic direction of the Group, the Board determined that the list continues to be applicable to the Reporting Period. A materiality matrix was plotted, which depicts the importance of individual ESG issues to stakeholders against the Group’s sustainable development. The top 10 material ESG issues are highlighted in bold in the ESG issues table below. The content of this Report is structured according to the overall materiality of ESG issues expressed by stakeholders. Moving forward, TLMC will update the list of material issues to keep abreast of the latest developments, and continue to maintain ongoing communication with stakeholders to strengthen its ESG management.

ETHICAL GOVERNANCE

Strong corporate governance is essential both to delivering sustainable value as well as pursuing a culture of integrity. The Group is committed to ensuring that its business operates with the highest standard of business integrity by complying with all relevant laws, rules and regulations, preventing and prohibiting corrupt behaviour, implementing sound risk management, and undertaking responsible marketing practices and respecting human rights.

Anti-corruption

Professionalism, high ethical standards, integrity and honesty are core values of the Group. We strictly adhere to the Prevention of Bribery Ordinance (Cap. 201 of the Laws of Hong Kong) and prohibit any bribery or corrupt behaviour. By implementing the Code of Conduct in the Human Resources (the “HR”) Manual, in conjunction with the Staff Handbook and the Anti-Fraud and Anti-Bribery Policy, the Group aims to ensure professional and ethical conduct across its operations.

The Code of Conduct details employees’ responsibilities and obligations with respect to their work duties, whilst the Anti-Fraud and Anti-Bribery Policy contains provisions for combating bribery, extortion, fraud and money laundering, which apply to employees, contractors and suppliers. Employees are not allowed to solicit, accept, or provide any form of benefits without the approval of the Group. Benefits include money, gifts, loans, fees, remuneration, employment, contracts, services, or privileges.

The updated Staff Handbook also stipulates that employees must not violate the specified bribery regulations through agents, partners, contractors, family members or representatives. Those who breach the policies may be subject to summary dismissal. During the Reporting Period, there were no legal cases regarding corrupt practices brought against the Group or its employees.

The following tables detail the identification of potential fraudulent activities and responsibilities of key departments in upholding professional and ethical conduct.

Potential fraudulent activities at TLMC

- Fraudulent financial reporting arising from improper revenue recognition, capitalisation of expenses, asset valuation, related-party transactions, and management override of financial transactions
- Misappropriation of assets
- Improper or unauthorised expenditures
- Self-dealings, including kickbacks
- Violations of laws, rules and regulations

Responsibilities of TLMC Personnel	
The Board	To organise a formal fraud risk evaluation annually to evaluate and record key fraud risks, as well as review the effectiveness of controls to avoid any potential occurrence.
HR Department	To arrange for training on professional ethics and fraudulent behaviours.
All managers	To examine fraud risks within their scope of duty constantly and ensure that adequate controls are in place. Material fraud risks must be reported to the Board.

To put the provisions of the Code of Conduct into practice and reinforce good corporate governance, the Group has arranged anti-corruption training for the Board during the Reporting Period. During the Reporting Period, four directors of the Group attended the ethics training of “Ethics Legacy – Ethical and Governance Roles of Directors and Senior Management of Publicly Listed Companies” held by the Independent Commission Against Corruption (the “ICAC”), and the “Webinar on Integrity Risk Management of Construction Industry” held by the CIC. With eight hours of training time in total, such ethics training helps to cultivate a culture of compliance and integrity within the Group.

Meanwhile, our employees were required to complete self-learning materials provided by the Hong Kong Business Ethics Development Centre of the ICAC, where they enhanced their knowledge on best practices in preventing and stamping out corruption in the workplace. Moving forward, the Group is committed to keeping abreast of the latest anti-corruption advice, reporting requirements and the constantly evolving regulatory environment.

Whistle-blowing

The Whistleblowing Procedure, which was formulated in January 2021, is central to how the Group manages and handles unethical behaviour. The implementation of such procedure is overseen by the Audit Committee. It sets out examples of malpractice, the reporting process, as well as investigation procedures. The mechanism established under the procedure enables employees and those who deal with the Group (including customers and suppliers) to raise concerns to the Audit Committee about any suspected case of misconduct, malpractice or impropriety in a confidential manner, and without fear of retaliation. The mechanism also includes a whistleblowing email account accessible only by members of the Audit Committee, the address of which is shown at the Company’s website. The procedure ensures that the whistle-blower who lodges a complaint will not be fired, mistreated, and/or suffer unnecessary disciplinary punishments.

In the event of an alleged misconduct being reported, investigative measures will commence with the advice and guidance of the Audit Committee and/or the Board (if no director is involved). If after investigation the Audit Committee is of the view that no director is involved in the suspected case, the entire Board will be informed. The Group may, on the grounds of misconduct, take appropriate disciplinary actions against any violators of corroborated allegations. All allegation records shall be preserved by the Audit Committee for review and analysis for improvement.

Risk Management and Internal Control

TLMC is keenly aware of any potential risks associated with the industry and makes efforts to respond to them appropriately. With rapidly emerging trends, changing regulatory requirements, as well as new prospective infrastructure projects, it is more important than ever to maintain an effective risk management system.

The Group has implemented a Corporate Governance Policy that ensures risk management is an integral part of its overall governance. Risk management is led by the Board and supported and executed by the Audit Committee and senior management. The policy details the process of identification, documentation, evaluation, assessment and treatment of risks. Risks are monitored and reviewed on a regular basis to ensure regulatory compliance at all times.

Amidst the challenging backdrop, the Group has adopted a flexible fleet management strategy in the operation of its leasing business, which enhanced its ability to adapt to changing circumstances. We have maintained strong relationships with our major suppliers, such as Hitachi Construction Machinery Co., Ltd., Bell Equipment Company SA (Pty) Ltd and Ammann BauAusrüstung AG to create opportunities and competitive advantage.

Information Confidentiality

It is the Group's obligation to safeguard corporate and personal information, and the Group is committed to strengthening its security protocols to minimise risks of business disruption, such as leaks of information. As iterated in the Information Security Policy, which is managed by the Administration Manager, employees are required to handle, store and file confidential information received in the course of business with due care.

The Staff Handbook also outlines that employees are prohibited from disclosing the Company's trade secrets or confidential information to any person or organisation they come into contact with during their tenure or after leaving, except with prior permission under normal working conditions. Upon request, or in any case upon termination of employment, the employee must return all documents and tangible items belonging to the Company. If requested by the Company, employees must remove all confidential information from any reusable medium, and destroy all documents and tangible items in their possession and control that contain such confidential information.

To ensure that personal information is securely protected, the Personal Data Protection Officer is responsible for executing the Personal Data Privacy Policy by managing and implementing security protocols in accordance with the requirements of the Personal Data (Privacy) Ordinance (Cap. 486 of the Laws of Hong Kong), as well as ensuring the effectiveness of such protocols through an annual review. Other privacy measures of the Group include the signing of confidentiality agreements upon engagement of third-party service providers, and forbidding employees to disclose any confidential information to any person or department prior to the Group's official announcement or disclosure to the public. In the event that any employees, departments or subsidiaries discover that information has been exposed improperly, they shall immediately notify the Personal Data Protection Officer and request advice from external advisers if necessary.

Intellectual Property

The Group protects its intellectual property rights, including copyrights, patents and trademarks. The Group currently possesses two registered trademarks of “TLMC” in Hong Kong and is the owner of a domain name. The Group also makes all reasonable efforts to respect the intellectual property rights of third parties. For instance, the Group obtains authorisation before using third parties’ intellectual property, including the use of its suppliers’ brand names, logos, trademarks and other forms of branding for marketing purposes, under relevant dealership and distributorship agreements. Within its internal operations, the Group strictly prohibits employees from exploiting corporate internet access to communicate information that may infringe intellectual property rights or violate relevant laws or regulatory requirements. The Group shall continue to protect intellectual property rights by filing proper registrations in a timely manner.

Marketing and Labelling

The Group is committed to offering its customers an array of products and services based on their needs and preferences whilst adhering to the Trade Descriptions Ordinance (Cap. 362 of the Laws of Hong Kong) and relevant regulations in the jurisdictions where it operates. Our marketing brochure clearly discloses all product features such as engine model, fuel, weight, capacity, frequency, voltage, rated output and current, phase, as well as power factor, so that customers can select the equipment that best suits them.

Moreover, we have utilised various channels to promote our advanced machinery during the Reporting Period, including setting up customer service channels on WhatsApp and hotlines managed by different departments, placing advertisements in newspapers and magazines, organising promotion campaigns on Facebook, introducing and demonstrating products to customers, participating in the CIC Construction Expo, hosting an event for the Hong Kong Institute of Engineers (the “HKIE”) and presentation to The Airport Authority Hong Kong.

Human Rights

The Group recognises that fundamental human rights should be protected. The Group strictly prohibits child and forced labour of any kind in accordance with the Employment Ordinance (Cap. 57 of the Laws of Hong Kong) and all labour laws and regulations in the jurisdictions where it operates. Our Human Rights Policy outlines the protection for human rights, commitment to valuing diversity and non-tolerance for inappropriate or unfair treatment as well as the hiring of child and forced labour. It applies to all employees of the Group and draws reference from, among others, international human rights principles such as the United Nations Guiding Principles on Business and Human Rights.

The employment practices in place strictly adhere to the guidelines issued by the Labour Department of Hong Kong, including A Concise Guide to the Employment of Children Regulations and A Concise Guide to the Employment of Young Persons (Industry) Regulations. We have deployed sufficient controls in our HR processes to prevent the employment of child and forced labour, including checking identity documents and performing background verifications during the recruitment process. The recruitment process will only commence after the applicant's identity has been verified to ensure that prospective employees are lawfully employable. Children under 16 years old are prohibited from taking up any type of employment at the Group.

Should any case of child or forced labour be discovered by the Group within its operations, clients or suppliers, immediate actions will be taken including reporting the situation to relevant authorities and the temporary suspension of all business relationships with the relevant parties until further confirmation. In the unlikely event of hiring a worker with false information or identity, the recruitment procedures or the employment (as the case may be) will be terminated immediately. To encourage a culture of integrity, human rights provisions are extended to contractors and suppliers of the Group as outlined in the Code of Practice for Suppliers. For further information regarding the Code of Practice for Suppliers, please refer to the section headed "Supply Chain Management".

QUALITY PRODUCT AND SERVICE

In recent years, innovative technology has become the leading catalyst to improve the efficiency and safety of the construction industry. By specialising in various types of advanced electric construction machinery and applications that are energy efficient and low carbon, TLMC aims to promote a smart construction site, and a safe and green building environment. Meanwhile, TLMC continues to ensure its product quality and customer satisfaction levels, as well as maintains mutually beneficial relationships with suppliers to ensure stable and reliable provisions of heavy equipment and related services.

Leveraging Technology

Rapid digitisation and automation in the heavy equipment industry is changing the variety and quality of solutions the Group can offer to its customers. The Group is dedicated to working closely with its leading suppliers to harness technology and diversify its product offering to enhance operational efficiency, strengthen health and safety and boost productivity for its customers.

Real-time Alerts and Notifications System

Data reports

Maintenance warranty

ConSite OIL

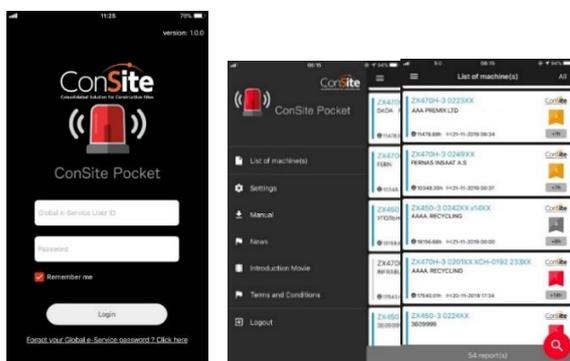

ConSite Pocket

ConSite Shot

ConSite Health Check

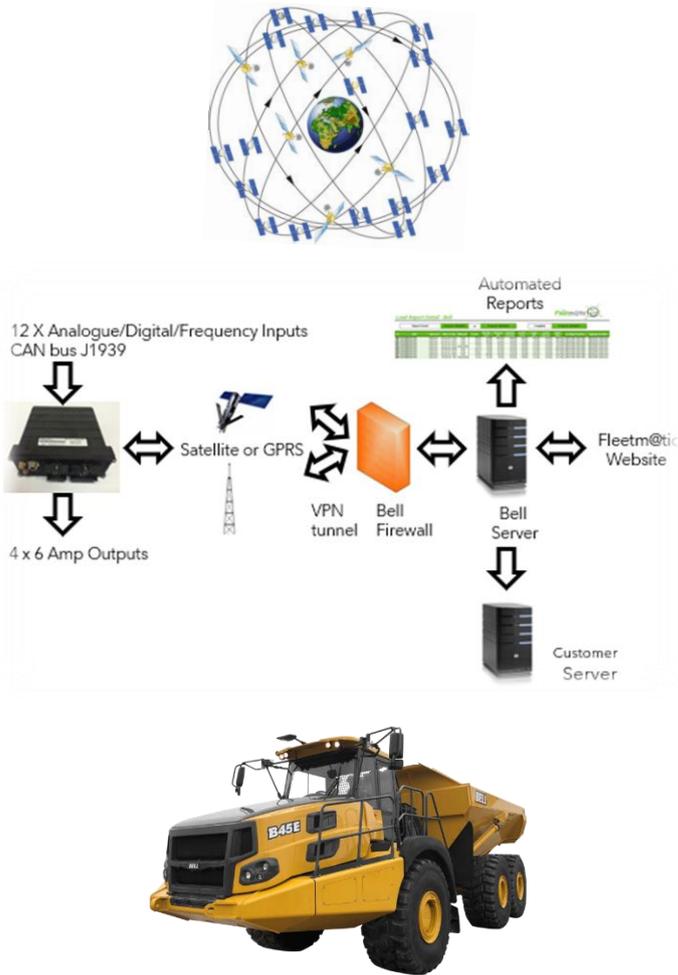

The Group offers the Hitachi brand excavators equipped with ConSite®. ConSite® is a consolidated solution service system that provides 24-hour real-time location detection and real-time overheating alarms.

Through gathering timely insights in ConSite® OIL solution, customers can avoid machine breakdown, including overheating and sudden changes in oil property and abnormality. In turn, it minimises maintenance cost and extends the service life.

Furthermore, the system can predict the wear and tear of machines, which improves risk control management and enables a quicker response to improve the safety of the construction site.

Fleet Management System

The Bell brand dump truck installed with Fleetm@tic® is a satellite-based fleet management system that provides automated reports, alerts, production data, various packages to choose from and pole-to-pole satellite coverage to keep track of the equipment at the worksites on a continuous basis. This allows customers to manage their fleet with greater precision, and overall enhances operational efficiency.

Proprietary Intelligent Compaction System

The Ammann Compaction Expert (ACE), a proprietary intelligent compaction system installed in Ammann brand rollers, is able to provide data regarding the areas the roller has covered through GPS mapping capabilities.

In addition to its ability to conduct automatic measurement, control and documentation, it can display and measure the degree of compaction for worksite efficiencies and quality control purposes in the ACEforce system. This unique function reduces the risk of over-compaction and minimises material destruction.

Safety Monitoring and Restriction System

The safety monitoring system by Xwatch Safety Solutions Ltd. is a smart system with overload, height and slew limitation functions that is controlled using proportional soft-stop hydraulic valves. This comprehensive system monitors real-time usage and sends alerts to operators when limitations are approached to ensure that machinery is always operated within its safety capacity for any type of hydraulic excavator and special purpose machines.

Dual Purpose Safety Monitoring System

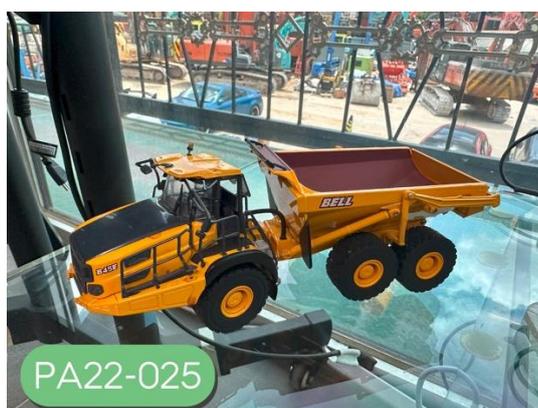

With dual monitoring functions of Mobile360 by VIA brand, the artificial intelligence (“AI”) powered wide-angle dual camera lens detects the movement of pedestrians in the dangerous area of work, sends real-time visual alarm and audio reminder to the operator, solves emergencies and provides protection for blind spots. In order to ensure that the operator is fully focused on the operation, the M500 indoor AI powered face-specific camera lens can monitor whether the operator is fatigued, smoking, or focusing on the phone. Real-time visual alarms and audio reminders can prevent unsafe conditions and associated accidents from happening. The system can also be used with mobile phone applications to ensure the safety of pedestrians and operators alike.

In July 2023, representatives of the Construction Innovation and Technology Fund (the “CITF”) visited TLMC for the “CITF Promotion Briefing”, where they introduced the application process of the CITF. CITF representatives also shared with us various types of technologies and products on the CITF pre-approved list, which can be applied to fields ranging from land reclamation to house decoration.

We are proud to announce that our articulated dump truck BELL B45E, the safety monitoring and restriction system X-Watch XW5, and the dual purpose safety monitoring system VIA Mobile360 M500 have been included in the CITF pre-approval list. X-Watch XW5 and VIA Mobile360 M500 are two sets of safety monitoring and restriction systems that complement each other to safeguard the construction personnel. If there is a danger at the construction site, X-Watch XW5 will actively intervene to restrict or stop the construction machinery operations, whereas the VIA Mobile360 M500 will provide real-time audio reminders and visual alarms to ensure the safety of frontline workers. Excavators, lifting cranes, and lifting platforms, in conjunction with these building safety restriction systems, can also actively sense nearby obstacles to prevent accidents at the construction sites.

BELL B45E (PA22-025)

X-Watch XW5 (PA23-012)

VIA Mobile360 M500 (PA22-043)

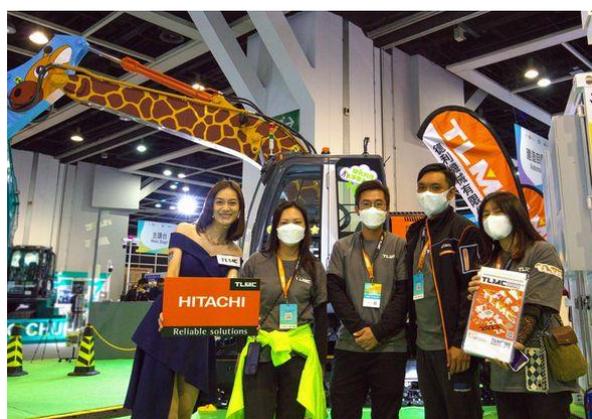

During the Reporting Period, the Materials Division of the HKIE also visited TLMC to learn about the operation of the intelligent safety construction systems. With the increasingly mature development of AI, we hope to promote the widespread use of our intelligent safety construction systems that can proactively prevent dangerous situations and automatically stop machinery, monitor the safety situation of construction sites in real-time, ensure the safety of workers, and bring innovation to the construction industry.

In December 2022, TLMC participated in the “Construction Innovation Expo 2022” held by the CIC at the Hong Kong Convention and Exhibition Centre. During the expo, we showcased our advanced construction machinery and applications, including electric excavators, the safety monitoring and restriction system X-Watch XW5, Hitachi patented ConSite system, the articulated dump truck BELL B45E, amongst others. By employing the AI technology, these products can help build a safe and green construction environment and accelerate the movement of the construction industry towards carbon neutrality.

Specifically, the electric excavators we imported from Japan can help achieve zero emissions and low noise. Compared with the most commonly used excavators on construction sites, which use diesel engines and generate oil residue, electric excavators not only prevent the emission of toxic gases, but also do not pose any danger when operating in confined spaces (such as digging tunnels). Moving forward, TLMC will continue to introduce advanced construction machinery, and work together with government departments and industry stakeholders to jointly develop Hong Kong’s construction industry.

Product Quality Assurance

The ISO 9001:2015 QMS underpins the Group’s overall approach to the supply, rental, installation and maintenance of heavy equipment and ensures that its products continuously meet customer and regulatory requirements.

The Group has appointed senior management to oversee the procedures and actions in achieving the Group’s quality objectives. The senior management is responsible for identifying risks and opportunities, delegating roles and responsibilities, ensuring employees’ competence and awareness, as well as managing customer satisfaction. During the Reporting Period, the Group fulfilled the requirements in the QMS and had no major non-conformance.

Quality Requirements at TLMC

- Providing adequate, effective and sufficient resources to provide high quality and reliable services to customers
- Identifying and controlling business risks and opportunities
- Ensuring that the operations are customer-driven, and that customers’ requirements and expectations are met as planned
- Maintaining effective internal and external communications, and actively monitoring, observing and understanding customers’ needs
- Complying with all applicable requirements, including standards, statutory requirements, guidelines and codes, under all circumstances
- Being responsible for the continuous development, analysis, improvement and enhancement of product or service quality, as well as monitoring operational efficiency and the effectiveness to help reduce operating costs
- Monitoring and continuously improving the effectiveness of the QMS through regular internal audits, data analysis and management reviews

Regular internal reviews are conducted to ensure that the Group delivers products and services that meet or exceed customers’ expectations. In February 2023, two Quality Managers and one director of the Group participated in the Quality Management Review Committee meeting. The purpose of this meeting is to report to various management personnel on the current operation of the QMS and to review the overall performance, effectiveness, and suitability of the Company's QMS.

The Group also appointed external auditors to evaluate the QMS by performing the Management System Certification Audit during the Reporting Period on the quality of the supply, rental, installation and maintenance service of excavators, breakers and generators. As a final step to ensure product quality, senior management had carried out a review against 2022/23 objectives and targets. During the Reporting Period, both targets were achieved, and the Group did not have any products sold or shipped that have been subject to recalls for safety and health reasons.

Quality Objectives and Targets 2022/23

1. <3 customer complaints for every project
2. >90% of customer satisfaction in Grade B

Quality Assessment Results 2022/23

- ✓ No material complaint in FY2022/23
- ✓ No corrective action request was issued for internal audit
- ✓ >90% of customer satisfaction in Grade A and B

Customer Satisfaction

TLMC aims to create and maintain a trusted relationship with its customers by treating them fairly and providing caring, competent and efficient services to them. During the Reporting Period, the Group has updated the Customer Services Code of Conduct Policy to enhance its commitment to complying with laws and regulations in relation to customer services matters in the jurisdictions in which it operates.

We believe in nurturing strong relationships with our customers through regular engagement, where we can listen to their feedback and subsequently improve our services. New customers are required to submit an assessment form to identify their expectations, so that TLMC can provide products and services that cater to their business operations. In addition to utilising the standardised terms and conditions under the Sales Policy for the ordering and acceptance of equipment quotations, the Group follows the Technical Procedures - Tender Review and Project Initiation under the QMS in the preparation, review, approval and post-contract processing of quotations. These policies and procedures help the Group maintain excellent customer satisfaction for all its work.

Maintenance, Repair and Service

The Group provides attentive inspection, maintenance and other services throughout the equipment leasing process. Prior to the delivery of leased equipment, comprehensive component checks will be performed to meet safety expectations and ensure good conditions. Subsequently, condition reports are generated for each equipment upon receipt and removal from the warehouse. When assembling the equipment on-site, technicians will conduct checks on the equipment and provide on-site training for lessees, whenever necessary. These equipment checks are also carried out when the equipment is returned.

Customers of the Group are offered with top-notch after-sales technical support, such as recondition and refurbishment services. In the case of a manufacturing defect, the Group will recover payment for the replacement from the manufacturer according to the dealership and distributorship agreements.

Assessment and Satisfaction

Customer feedback is paramount for the continuous improvement of our services. The Group welcomes all feedback to improve its operations and enhance customer experience. Guided by the Complaints Handling Policy and the Operations Procedures - Customer Satisfaction under the QMS, the Group distributed customer satisfaction surveys during the Reporting Period. The survey assesses appropriateness, efficiency and accuracy of services and communications, staff's willingness to assist and service attitude, as well as the ability to meet agreed timelines and expectations. During the Reporting Period, the Group received no material complaints or negative customer feedback, and the overall customer satisfaction rating reached 90% / B level or above, highlighting an achievement of QMS objectives.

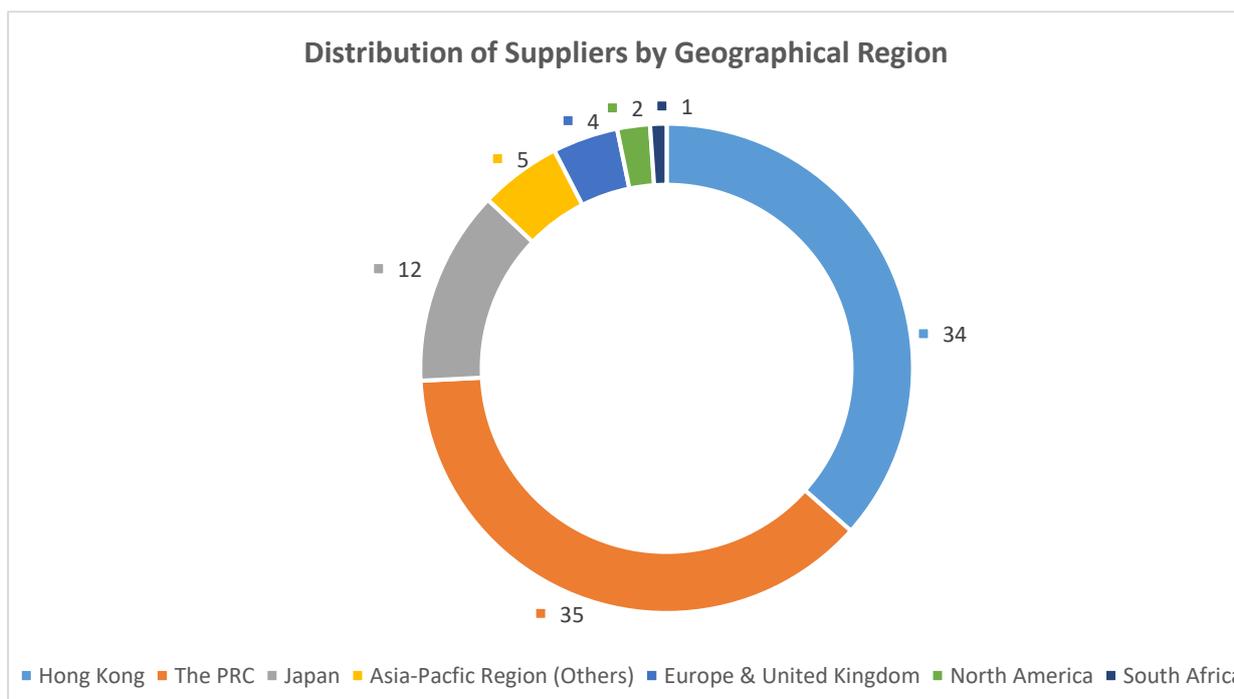

Supply Chain Management

TLMC greatly relies on the reliability and quality of products and services delivered by its suppliers. Hence, the Group is committed to developing ongoing collaborative working relationships within its supply chain. The selection of suppliers is governed by the Technical Procedures - Selection and Appointment of Suppliers under the QMS, as well as the New Supplier Assessment Procedures.

To ensure that the most qualified suppliers are selected to meet the needs of the Company as well as its customers, the Group assesses potential suppliers on various criteria, such as the value of the procured products and/or services, customer requirements and quotation, years of experience and reputation in the industry. An annual Supplier Performance Assessment is also performed to assess existing suppliers based on 10 criteria. During the Reporting Period, all suppliers have successfully passed the assessment criteria for continual engagement, and the Group worked with 93 (2022: 99) suppliers around the world.

Supplier Performance Assessment Criteria	
1	Product and/or Service Pricing
2	Response to and Handling Quotation
3	Employee Attitude and Competency
4	Product and Craftmanship Quality
5	Provision of Sufficient Resources
6	Procedural Control
7	Compliance with Legal and Contractual Requirements
8	Timely and Accurate Delivery
9	Safety and Environmental Awareness
10	Protection Measures for Site Materials

The chart below sets out the distribution of the Group’s suppliers by geographical region.

Suppliers' Environmental and Social Practices

The Group takes environmental and social considerations into account when managing its supply chain. The Code of Practice for Suppliers has been updated in January 2023, which outlines the CSR requirements that all our suppliers, contractors, and consultants must follow. Suppliers are encouraged to report their sustainability performance and influence their business partners in their supply chain to follow the Code of Practice for Suppliers so far as is practicable.

Code of Practice for Suppliers	
Business Ethics	Suppliers should maintain a high standard of ethics through business integrity, compliance with applicable laws and regulations, respect for intellectual property rights, non-disclosure of confidential information, and uphold anti-collusion and anti-corruption practices.
Working Operations	Suppliers should conduct sound workplace practices. The workplace refers to the activities that define the supplier's relationships with its employees, including: equal opportunity, staff training and development, wage and benefits, working hours and rest days, child labour and forced labour, health and safety, freedom of association and human rights, and support of fair-trade products.
Marketing Activities	Suppliers should seek to influence their business partners in the supply chain to follow the same practices as laid down in this Code. When dealing with customers, information on products or services should be accurate, environmentally friendly products and packaging should be used wherever possible, complaints need to be handled fairly and quickly, and customer data should be protected.
Community Contact	Suppliers should be proactive in finding opportunities to serve the community alongside their own business, including encourage employee volunteer activities, and help the underprivileged of society through promotion of different schemes and wherever possible consider employing the disabled.
Environmental Protection and Climate Action	Suppliers should take precautions against climate change, and conserve natural resources and improve the environment. Efforts include implement environmental policies and management systems, minimise waste, operate energy-efficient schemes, adhere to environmental regulations, and implement carbon reduction and sustainability initiatives.
Cybersecurity	Suppliers should comply with the Group's cybersecurity requirements.

Regarding our supplier selection process, suppliers are more likely to be selected or retained if they are certified with the ISO 9001: 2015 QMS certification. CSR performance is also one of the supplier selection criteria. The Group is dedicated to working with suppliers who demonstrate a commitment to sustainable development and promote environmental practices in their supply chain by implementing environmental policies, conducting sustainability initiatives, and reporting their sustainability performance. During the Reporting Period, the Group has assessed more than 70% of its suppliers, and no suppliers were found to have significant negative impact in the supplier performance assessment.

Sustainable Procurement

The Group's Sustainable Purchasing Policy developed during the Reporting Period outlines its regulations on green procurement. We ensure the employment of environmentally friendly products and services to conserve resources, consider the application of Life Cycle Costing ("LCC") and promote the recycling of materials. All our project companies, associates, suppliers and business partners are encouraged to make reference to the principles of this Policy, where applicable.

Sustainable Procurement Guidelines

- To purchase timber and timber-related products from sustainable sources. Suppliers shall prove that the timber source is sustainable. The use of timber from unsustainable sources shall be avoided wherever possible
- To buy paper from environmentally friendly paper manufacturers or traders
- To ensure that the principles of conserving resources and maximising energy efficiency are observed in our purchases (e.g. by purchasing solar-powered calculators instead of battery-operated types)
- Where practicable or economically viable, to neither buy nor allow contractors to use polluting products (e.g. paint containing organic solvents and asbestos; and extinguishers made of halon for building and services maintenance)
- To promote environmental awareness to suppliers and contractors, and encourage services providers to consider the environmental impacts of service delivery

DEDICATED WORKFORCE

The contributions of the Group's workforce are critical to its success. Whilst the Group strives to safeguard the health and safety of its employees and to grow and sustain its talented workforce, it also aims to nurture talents to help them thrive professionally and grow their technical capabilities as well as enhancing employee engagement. Our Staff Handbook, which was updated in December 2022, clearly sets out the guideline in compliance with relevant employment laws and regulations, including the Employment Ordinance (Cap. 57 of the Laws of Hong Kong), the Employee Compensation Ordinance (Cap. 282 of the Laws of Hong Kong), the Occupational Safety and Health Ordinance (Cap. 509 of the Laws of Hong Kong), and so on.

Occupational Health and Safety

The nature of the Group's works involves working with heavy equipment. Any inappropriate acts may create accidents and cause injuries. As such, the Group regards occupational health and safety as a primary concern. Such concern stems from the use, handling, storage, transportation and maintenance of its heavy equipment. The Group, therefore, is committed to constructing a hazard-free working environment by identifying, assessing, evaluating and mitigating operational hazards and risks for its employees and contractors. To achieve this, the Group strictly adheres to its Health and Safety Policy.

Health and Safety Policy Commitments

- Support and nurture a culture that promotes employee wellness and enhances health and safety awareness
- Adopt and maintain effective management systems designed to eliminate health and safety hazards, respond to public health emergencies, conduct regular reviews and make continuous improvement in pertinent areas of health and safety
- Provide necessary information, instruction, training and supervision, and enable a healthy and safe working environment
- Encourage commitments from all employees and all levels of management
- Extend its commitments to its business partners to meet the same health and safety standards

Aside from establishing a management system, the Group holds safety awareness training classes regularly to ensure its employees can proactively recognise hazards and implement appropriate prevention and protection measures. All workers are required to attend the Success Sky Induction Training before working on-site. Individuals who do not hold the Safety Card and the Safety Training Form issued by TLMC after passing the induction training are forbidden from entering the construction job site.

By participating in the induction training and familiarising themselves with the general duties and safety guidelines, employees have gained a solid understanding of the Company's safety rules, and are equipped with good response and protection abilities in the face of unexpected situations during outdoor work. For more details regarding the measures to address outdoor work under extreme weather conditions, please refer to the "Climate Change Adaptation" section in this Report.

During the Reporting Period, there were 3 (2022: 7) reported work injuries, which resulted in 222 (2022: 517) lost days, and an injury rate per 100 employees of 2.26¹ (2022: 3.89) recorded. There were no work-related fatalities for the past three years, which includes the Reporting Period.

Responding to COVID-19

As the COVID-19 pandemic continues, the Group believes that it is crucial to implement a long-term pandemic response and recovery mechanism to help minimise disruption to its employees and customers, as well as ensure business continuity. In doing so, the Group established the Office and Warehouse Contingency Procedures, which detail the emergency response system for its operations.

Office and Warehouse Contingency Procedures

Employee Responsibility Allocation	Separating Work Arrangement	Work-From-Home Arrangement
<ul style="list-style-type: none"> • Check that all employees are aware of their duties and tasks at hand • Assess business priorities and prioritise important tasks • Establish a list of personnel responsible for handling external communication to ensure uninterrupted services 	<ul style="list-style-type: none"> • Separate department units into different office/warehouse areas • Prevent unnecessary guests from entering the premises 	<ul style="list-style-type: none"> • Employee may trial work-from-home arrangement if deemed feasible

To enhance the Group’s preparedness to health and safety risks, during the Reporting Period, it has provided surgical masks, hand sanitisers and rapid antigen test kits to its staff. Guests are required to complete a health declaration form when necessary, whilst employees need to report on recent trips, suspected symptoms and contact with suspected or confirmed COVID-19 cases.

Workplace Well-being

The Group takes crucial steps to safeguard the safety and well-being of the physical environment for a healthier and productive workforce. As a regular practice, the QMS auditor commissioned by the Group performed the annual Workplace Environmental Assessment at the facility site during the Reporting Period. A total of eight workplace health and safety elements were assessed, and all aspects received satisfactory levels of conformance.

In a bid to instil a culture of health and safety at the offices, the Group maintains a Smoke-Free Workplace Policy and communicates the Office Occupational Health and Safety Guidelines developed by the Occupational Safety and Health Council to its employees.

Workplace Environmental Assessment	
1	Air Ventilation and Odour
2	Noise Nuisance and Vibration
3	Hygiene Condition
4	Adequacy of Lighting
5	Room Temperature and Humidity
6	Unobstructed Corridors
7	Availability of Fire-fighting Equipment
8	Availability of Other Safety Equipment

¹ Total number of injuries divided by total workforce at the end of the Reporting Period multiplied by 100.

Smoke-Free Workplace Policy	Office Occupational Health and Safety Guidelines
<p>The Group recognises that smoking can impair the health of its employees as well as their job performance. The policy ensures that smoking is prohibited as smoking is illegal in all indoor areas of workplaces and public places.</p>	<p>The guidelines cover topics such as office workplace management, appropriate lighting, indoor air quality, security, equipment handling, hazard response and mental well-being. Understanding and adhering to this guideline enables the Group to maintain a thriving work environment.</p>

Moreover, a series of activities that include on-site health risk assessments, online dietician’s counselling classes and fitness instructor’s simple workout instructions, regular health challenges, and mindfulness exercises were provided to our employees to encourage healthy lifestyles as well as promote the health awareness of cardiovascular and cerebrovascular disease. During the Reporting Period, the Group purchased two sets of health check equipment, including the blood pressure monitor and a digital body composition scale, to facilitate employees’ self-monitoring of their health.

Training and Development

TLMC values the professional development of its employees and encourages them to enrich their knowledge to unleash their potential. The Learning and Development Policy of the Group guides the Administration Department in implementing a diverse range of training courses for employees of all levels and is formulated based on a balance between employee preferences and strategic business objectives.

Apart from the Success Sky Induction Training that aims to guide employees to understand the Group’s core values, organisation structure, business goals, relevant policies, as well as the Code of Conduct, for technicians and operators that require specific professional expertise, the Group ensures technical training is arranged for relevant products. A portion of these product trainings are directly conducted by the suppliers, who ensure that the Group’s technical team is equipped with the latest knowledge and skills to effectively operate and properly maintain the equipment. These skills also serve to help address customers’ enquiries promptly and efficiently.

In order to cultivate the younger generation to master professional skills and create development pathways for different talents, TLMC has been recognised as an approved employer for the Approved Technical Talents Training Programme held by the Hong Kong Institute of Construction (“HKIC”). Targeting recent college graduates from the HKIC, the Group offered apprenticeship programmes that last for two or three years for successful candidates. During the recruitment process, candidates are assessed based on their merits and abilities through their application and an on-the-spot interview, among others. Besides, in May 2023, we organised the “CIC Apprentice Visit Day”. The CIC apprentices were invited to visit our office and the site, which enabled them to learn about our job positions and the working environment.

Meanwhile, the Group sponsors external training programmes related to individuals' job scope, relevant public examinations, as well as application for membership of professional associations. The training courses supported by the Group cover aspects of business ethics, anti-corruption and occupational health and safety, among others. During the Reporting Period, a total of 562.50 (2022: 499.50) hours have been allocated for training purposes for the Group's employees, including directors and management, office employees, technicians and operators. Additionally, three independent non-executive directors of the Group have completed a total of 130.00 (2022: 102.00) hours of training. For further details of the training data during the Reporting Period, please refer to the section headed "Performance Data Summary" in this Report.

Employment Welfare

Employees are indispensable to the long-term development and sustainability of TLMC. Guided by a people-oriented philosophy, the Group strives to cultivate an ideal workplace by providing attractive benefits, rewarding high performers, facilitating two-way communication and promoting fairness in the workplace. In order to enhance the sense of belonging and team spirit of our employees, we regularly arrange different forms of leisure activities to enhance physical and mental health, and encourage all employees to actively participate in these events.

Benefits and Compensation

To develop a thriving workforce, the Group offers competitive remuneration and benefits. These include a basic salary, performance-related discretionary bonus, retirement benefits, overtime allowance, as well as the Group Medical Insurance Scheme. As stated in the Staff Handbook, our employees are also entitled to rest periods and leave, such as annual leave, sick leave, education leave, maternity leave, paternity leave, marriage leave, compassionate leave and jury leave. As set out in the HR Manual, employees who work outside of normal working hours as specified by management are appropriately compensated in the form of compensation leave, or job-related payments and reimbursement.

Communication and Engagement

The Group believes that the success of the business depends on mutual trust, communication, respect and understanding between different departments and seniority. Hence, employees are encouraged to candidly share their views and constructive criticisms with their immediate supervisors or senior management through various communication channels, including staff communication groups, briefing sessions or other informal channels. In striving to build a culture of fairness, the Group is also committed to ensuring that grievances are treated with respect and confidentiality. Appropriate investigation and resolution procedures will be taken if necessary.

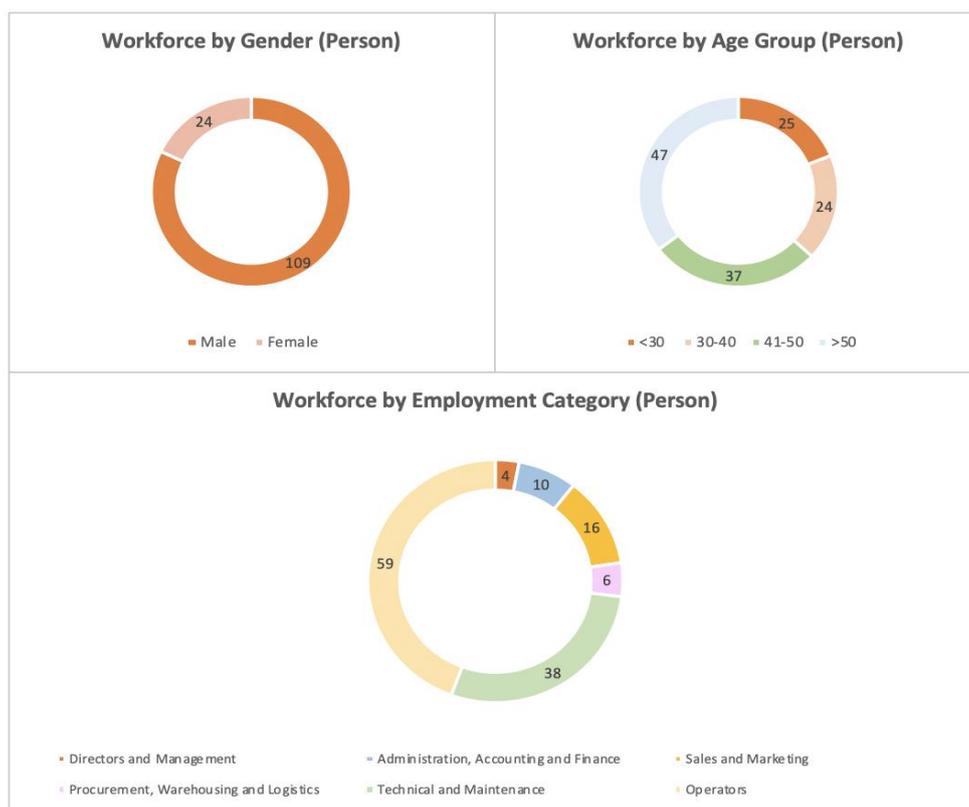

Diversity and Equal Opportunity

The Equal Opportunity Policy in the HR Manual embodies the Group’s dedication to fostering a diverse and inclusive workplace that strictly prohibits any form of discrimination, harassment, victimisation or vilification. The Group takes an active approach to ensure that the recruitment, promotion and retention of employees are free of discrimination.

As stated in the Staff Handbook, our recruitment process adheres to the principles of openness, fairness, and impartiality, and candidates are selected based solely on their ability and integrity. The Group is committed to providing equal opportunities regardless of their age, sex, marital status, pregnancy, family status, disability, race, nationality or religion, provided that these do not impede the abilities of the prospective appointees to carry out normal job duties or affect the health and safety of fellow employees. The Group prides itself in being a competence-based employer by evaluating candidates based on their merits and abilities, including job knowledge and technical know-how, competence and potential, performance and quality of work, qualifications, working attitude and interpersonal skills, as well as personal attributes.

Besides, the Staff Handbook adheres to the Sex Discrimination Ordinance (Cap. 480 of the Laws of Hong Kong) and stipulates that we do not tolerate sexual harassment. Employees who are sexually harassed can file a complaint to the HR Department, and the complaint will be investigated with due diligence. For employees who violate relevant legislation, the Company will take appropriate disciplinary action.

As of 31 July 2023, the Group’s workforce consisted of 133 (31 July 2022: 180) employees, representing a decrease of 26.11% in the total workforce. The workforce of the Group comprises directors and management, office employees, technicians and operators. All employees are based in Hong Kong.

CORPORATE CITIZEN

As a socially responsible corporate, the Group is dedicated to community investment through community engagement programmes, volunteer services, charitable donations and expertise sharing, which enables it to continue nurturing a healthy, caring and sustainable society. To this end, TLMC engages in an ongoing conversation with charitable and non-profit organisations, such as the End Child Sexual Abuse Foundation, Hong Chi Social Enterprise, and The Community Chest.

Community Investment and Engagement

In July 2023, the Group formulated and implemented its Social Investment Policy, which commits to contributing to the betterment of the communities it serves, fostering social integration and creating long-term value for its stakeholders. As listed in the table below, our community initiatives focus on three domains to create positive impacts on areas where we operate. Where applicable, all our project companies, associates, suppliers and business partners are encouraged to make reference to this Policy.

Community Health and Wellness	<ul style="list-style-type: none"> • We aim to share our values with our communities and create better living conditions • We support initiatives that can improve social inclusion and community well-being, including but not limited to helping our staff and the underprivileged
The Environment	<ul style="list-style-type: none"> • We are working to reduce the carbon footprint of our operations • We support initiatives that aim for decarbonisation and can create a sustainable world for future generations
Youth Development	<ul style="list-style-type: none"> • To ensure the future of our communities, we put great emphasis on public education and are committed to investing our resources for future generations

During the Reporting Period, the Group donated approximately HK\$82,500 (2022: HK\$459,000) to support the operations of various organisations focusing on, among others, the underprivileged, children’s health and the construction industry. Undoubtedly, CSR as the key concept has been integrated into TLMC’s corporate culture, which enables the Company to continue to foster positive values and relationships with its communities. In the future, we will continue to champion local social causes and lend a helping hand to those socially vulnerable people.

Case Study: The Community Chest New Territories Walk for Millions 2022

On 20th November 2022, 15 of our employees participated in the “New Territories Walk for Millions 2022” at Tseung Kwan O Cross Bay Link. The purpose of this event is to raise funds to support The Community Chest’s member agencies in providing “Family and Child Welfare Services”. Each of our employees contributed three hours to the event, and the Group donated HK\$68,000 to help those in great need and improve the well-being of our citizens.

GREEN OPERATIONS

TLMC is committed to strengthening the control of environmental pollutants and adopting more environmentally conscious operation methods. As the Group is primarily engaged in the sales, leasing and maintenance of heavy equipment, the environmental impact is relatively low when compared to its manufacturers and product users at construction sites. Nevertheless, the Group still seeks ways to minimise its indirect environmental footprint by strictly complying with laws, rules and regulations, closely controlling emissions, improving energy efficiency, managing waste and adapting to climate change.

The Group’s Environmental Policy was developed to manage environmental risks systematically and integrate environmental considerations into all aspects of its business operations in line with all applicable laws and regulations. Updated in January 2023, the Environmental Policy demonstrates our commitment to continuously improving our environmental performance and minimising the impact of our operations on the environment while supporting the government's environmental and climate policies.

Environmental Compliance

The Group procures machinery that strictly adheres to the regulatory requirements of the Environmental Protection Department (the “EPD”) on the emission of non-road mobile machinery. To comply with prescribed air and GHG emissions standards, the Group ensures that its machineries comply with the Air Pollution Control (Non-road Mobile Machinery) (the “NRMM”) (Emission) Regulation (Cap. 311Z of the Laws of Hong Kong). The noise levels of the heavy equipment of the Group also comply with the Noise Control Ordinance (Cap. 400 of the Laws of Hong Kong) and are indicated by the Quality Powered Mechanical Equipment (“QPME”) Labels.

The Group has obtained approval or exemption labels for regulated machineries for inventory and leasing purposes. Equipment with such labels are in compliance with international standards, including Article 12 of the Directive 2000/14/EC relating to the noise emission in the environment by equipment for use outdoors of the European Union (EU) and the Low Noise Construction Equipment Regulations by the Ministry of Land, Infrastructure, Transport and Tourism (MLIT) of Japan. The table below sets out the number of equipment of different standards:

<i>(As of 31 July 2023)</i>	Exempted NRMM	Approved NRMM	QPME
Inventory (unit)	1	183	80
Leasing Fleet (unit)	6	504	318

Environmental Impact and Resource Efficiency

The Group recognises the role it plays in helping to transition the world into a low-carbon society. Whilst its direct impact remains low, the Group strives to optimise its operational efficiency, as well as to seek environmentally-friendly solutions for its customers.

Air, Noise and GHG Emissions Control

The Group’s air emissions primarily consist of GHG and exhaust gas emissions. In terms of GHG emissions, scope 1 direct emissions stemmed from fuel combustion of the usage of its own vehicles, whereas scope 2 indirect emissions derived from generated electricity used in its offices and facilities. Exhaust gas emissions mainly derived from the operation of the Group’s own vehicles, which generates direct air pollutants, including nitrogen oxides (“NOx”), sulphur oxides (“SOx”) and particulate matter (“PM”).

The quantification methodology makes reference to the Guidelines to Account for and Report on Greenhouse Gas Emissions and Removals for Buildings (Commercial, Residential or Institutional Purposes) in Hong Kong, published by the Electrical and Mechanical Services Department (“EMSD”) and EPD, as well as the latest emission factors, published by the China Light and Power Company Limited (“CLP”). The Global Warming Potential values are referenced from the Intergovernmental Panel on Climate Change’s Sixth Assessment Report, and the fuel economy of electric vehicles are referenced from the latest ratings published by the Environmental Protection Agency of the United States.

The following table shows the Group’s GHG emissions profile for the Reporting Period as compared with the previous two years.

Emission Type	Unit	2020/21	2021/22	2022/23	% Change ²
NOx	kg	383.86	598.48	573.21	-4.22%
SOx	kg	0.47	0.91	0.94	3.09%
PM	kg	37.07	47.31	45.74	-3.32%
Scope 1 Emissions	tCO ₂ -e	80.44	153.00	158.89	3.85%
Scope 2 Emissions	tCO ₂ -e	36.14	42.38	39.91	-5.83%

To ensure that the operational and emissions performance of the machinery provided to its customers is of excellent condition, the Group conducts thorough inspections before rental and performs regular maintenance during the rental process. Additionally, older machinery would be progressively phased out to keep in line with the most updated regulatory control requirements. The Group also adopts initiatives to lower noise emission levels in its machineries such as applying anti-vibration devices to equipment, installing silencers, air compressor tubes, as well as using flexible joints for draught fans.

² This column compares information of FY22/23 with FY21/22.

Case study: Hybrid and Electric Equipment Product Line

To improve its customers' environmental footprint, for a number of years, the Group has expanded its rental and sales product line to include hybrid hydraulic excavators. Hybrid equipment are eco-friendly equipment with higher fuel efficiency levels than those powered by internal combustion engines.

In August 2021, the Group leased out its first electric excavator for use in construction sites in Hong Kong. As customers are becoming increasingly conscious of their environmental impacts, the Group hopes to offer a diverse range of machinery to tailor to their sustainability requirements and values.

Regarding vehicles that support its daily business operations, the Group strives to lessen its impact on climate change by continuously monitoring their emissions performance, documenting energy usage, and calculating respective air and GHG emissions annually, in an accurate and transparent manner. During the Reporting Period, the Group maintained a total fleet of 26 (2022: 29) vehicles and their total travelled distance was 373,988.32 (2022: 324,869.60) km. Among them, there were three diesel commercial vehicles waiting to be phased out through the Ex-gratia Payment Scheme operated by the EPD.

Case study: Shell's Carbon Reduction Programme

While we continue to work towards phasing in more electric vehicles into our company fleet, some replacements are not yet feasible due to technical or operational constraints.

In order to lessen the impacts of our fossil fuel-powered vehicles, we have participated in Shell's Carbon Reduction Programme. For all carbon emissions generated from the use of fuel supplied by Shell, they will be offset through Shell's carbon offsetting projects.

During the Reporting Period, we obtained 63 carbon credits, equivalent to compensating for 63 tonnes of tCO₂e emissions.

Carbon Credits Retirement Certificate

This is to certify that: **63**
carbon credits were retired for:
ECONSMART LTD

by Shell from their global carbon credits portfolio on:
10 February 2023

to compensate for **63**
tonnes of CO₂e emissions from the Shell products
purchased in **2022**.

Serial number
MOB4-MOBILITY-2023M2D10-B-2023-1-142

 - 0.05K Fufuhan Afforestation Project, China, VCS ID 1864
 - 0.15K Afforestation Project in Xining City, China, VCS ID 1825

Further information about Shell's global carbon credits portfolio can be found at www.shell.com/environment/programs and more information on Shell's climate target at www.shell.com/ClimateTarget.
Terms and conditions apply as set out in your agreement. This retirement will be subject to independent annual audit (see paragraph 6.2.2).
Carbon credits are not a substitute for switching to lower emission energy solutions or reducing the use of fossil fuels. Carbon credits are purchased and stored against the calculated Report CO₂e emissions of the product, in line with the applicable international carbon standards.
emissions CO₂, CH₄, N₂O greenhouse gas emissions, expressed in carbon dioxide equivalents or CO₂e.
The companies in which Shell has investments are separate entities. Shell is used for convenience where reference is made to these entities individually or collectively.

Energy Usage and Efficiency

Enhancing energy efficiency can lead to an overall improvement in environmental performance and lessen the impact on the environment. The two principal energy sources that support the operations of the Group are fossil fuel and electricity.

Energy Type	Function
Diesel, Petroleum	<ul style="list-style-type: none"> <input type="checkbox"/> Operation and transportation of heavy equipment for the delivery and collection of sold and leased equipment to and from customers <input type="checkbox"/> Transportation means for the Group's personnel
Electricity	<ul style="list-style-type: none"> <input type="checkbox"/> Powering electronic appliances that support operations

In 2020, the Group installed solar panels on the rooftops of one of its warehouses. The solar panels are connected to the power grid and CLP's Feed-in Tariff (FiT) Scheme and provide a source of renewable energy. During the Reporting Period, the solar panels generated 104,758.91 (2022: 83,391.88) kW of electricity. Moving forward, the Group aims to seek further opportunities in expanding its solar panels to other facilities to promote the wider use of renewable energy.

Within its office, the Group actively practises energy-saving measures as efforts to reduce its overall carbon footprint. The Group will continue to strengthen employees' awareness in responsible energy usage at the office. The second table below shows the energy usage of the Group for the Reporting Period as compared with the previous two years.

Energy Saving Initiatives at TLMC	
<ul style="list-style-type: none"> ● Maintaining indoor temperature at an optimal level of comfort ● Encouraging employees to turn off computers and monitors when not in use ● Setting timers and other sensors to automatically turn off office appliances, such as copiers, TV monitors and air-conditioners, after office hours ● Encouraging employees to make the best use of telecommunication systems to avoid unnecessary travel arrangements ● Putting up signage that emphasise the importance of energy saving ● Optimising logistics arrangement to and from customers' sites ● Using energy-efficient light bulbs such as LED, T5 or compact fluorescent lamps with energy labels (i.e. EMSD's Grade 1 and 2 or equivalent) ● Monitoring room temperature through inspecting thermometers 	

Energy Usage	Unit	2020/21	2021/22	2022/23	% Change ³
Diesel	L	27,204.43	48,993.85	50,667.36	3.42%
Petroleum	L	2,567.72	7,996.59	8,324.84	4.10%
Electricity	kWh	97,660.87	108,670.49	100,828.94⁴	-7.22%

³ This column compares information of FY22/23 with FY21/22.

⁴ The calculation of electricity usage covers its headquarters office, branch office and 4 warehouses at its operating sites.

Waste Management

Waste generated by machineries, if improperly handled, can be a potential health risk and harm the environment. TLMC is dedicated to managing its waste effectively and divesting useful resources from landfills to recycling or repurposing, whenever applicable. As set out in our Environmental Policy, we aim to manage waste through the “5R” principle of Replace, Reduce, Reuse, Recover and Recycle, not only within our operations but also along our value chain.

The Group generates two major types of waste from its operations, specifically scrap metal and other non-hazardous waste including package materials of parts, domestic household waste and office waste. For scrap metals, the Group performs a systematic process for sorting, organising and storing scrap metal at its facility site. Once a certain amount is collected, the Group commissions a metal recycler to collect and recycle the scrap metal waste in accordance with the Construction Waste Disposal Charging Scheme implemented by the EPD. During the Reporting Period, the Group recycled 87,620 (2022: 53,360) kg of scrap metals.

For other non-hazardous waste, the Group encourages the recycling and reuse of materials. A designated area has been set up for waste handling by an appointed waste collection company. During the Reporting Period, 25 (2022: 480) tonnes of waste have been collected for further handling by the Group’s third-party collection company. Due to our improved waste management measures of identifying waste sources at operational points, encouraging waste recycling, and facilitating the internal allocation of reused materials, we managed to achieve this significant reduction in waste generation.

Since the operations of the Group produce an insignificant amount of hazardous chemical waste, there are no hazardous waste records. However, the Group still ensures the hazardous chemical waste is handled with due care at all times. As a registered Chemical Waste Producer, the Group strictly abides by the Waste Disposal Ordinance (Cap. 354 of the Laws of Hong Kong) to control the release of chemical waste generated by its own direct usage of heavy equipment. Moreover, the Group ensures that chemical waste is responsibly handled at sites by creating a designated area for the storage of waste, in accordance with the Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes under the Waste Disposal Ordinance (Cap. 354 of the Laws of Hong Kong). To strengthen its commitment, the Group also encourages lessees to exercise utmost attention when managing hazardous chemical waste at their sites.

Paper Usage

At the office, the Group is committed to reducing paper consumption through adopting digital means of communication instead of using paper. In addition to performing double-sided printing, the Group promotes the concept of reusing and sharing stationery and office furniture. During the Reporting Period, the Group has disposed 111,000 (2022: 47,500) pieces of paper and recycled 5,000 (2022: N/A) pieces of paper.

Water Usage

The Group recognises that water is a scarce resource and strives to use its water resources efficiently by treating sewage in a sustainable manner. Our Environmental Policy indicates our implemented water conservation measures within our operations and production processes, including promoting water saving awareness, upgrading to water efficient appliances and fixtures, and increasing our water recycling rate, amongst others.

In its facilities, the Group has set up a water sedimentation tank as the first layer of wastewater treatment that allows suspended particles to settle as the water flows into the public stream. Once the accumulated solids, or sludge, are formed at the bottom of the tank, they are periodically removed by a professional licensed waste collector. During the Reporting Period, the Group did not encounter any issues in sourcing water, and has consumed a total of 3,975.56 (2022: 3,370.99⁵) cubic metres of water covering four operating sites.

Biodiversity

While biodiversity is not recognised as a material issue to the Group, it has a commitment to work towards no net loss and strives to achieve net positive impact, as stated in its Environmental Policy. We uphold the following principles to minimise any impact on biodiversity and will consider biodiversity in planning during our whole operational cycle:

Biodiversity Principles

- Avoid operating in areas rich in biodiversity or close proximity to World Heritage areas or the International Union for Conservation of Nature (IUCN) Category I-IV protected areas
- Minimise potential adverse impact on biodiversity and meet our no deforestation commitment by conducting environmental and biodiversity impact assessment for projects at environmentally significant sites
- Utilise technology and employ mitigation hierarchy to reduce, restore and offset biodiversity disturbance and operational effects
- Promote biodiversity awareness among employees and stakeholders through community investment and training programmes
- Respect indigenous people around our operational boundaries, and minimise ecological and cultural impacts to local communities

Climate Change Adaptation

The Group acknowledges the importance of minimising climate-related impacts of its business activities to tackle pertinent global environmental challenges. We strive to induce behavioural change and adopt resource-efficient technology, processes and systems to manage the environmental footprint across the Group.

During the Reporting Period, the Group has formulated the Climate Change Policy, which demonstrates its commitment to complying with laws, regulations and standards in relation to climate change matters at its business locations. We aim to not only adopt applicable industry best practices to reduce carbon footprint from our own operations and along the value chain, but also engage our stakeholders to promote climate awareness and influence their behaviour.

⁵ Water usage in 2022 has been recalculated due to inconsistencies in the calculation methodology.

To strengthen the approach to managing climate-related issues, during the Reporting Period, the Group reviewed its preliminary climate-related risk assessment in accordance with the framework of the Task Force on Climate-Related Financial Disclosures (“TCFD”). Nine climate-related risks consisting of four physical and five transition risks were identified as likely to have an impact on the Group. Through the assessment, all nine climate-related risks were deemed by the Group to be of low risk and thus have a minimal impact on its business activities. As mentioned in our Climate Change Policy, we aim to establish an appropriate risk management plan to address climate-related risks and impacts, and will conduct regular review of such risks.

Nevertheless, the Group has proactively adopted appropriate mitigation measures to deal with the more frequent risks of extreme weather events, which include typhoons, extreme heat, rainstorms and flooding. To mitigate typhoon risks, emergency management and emergency evacuation plans are in place whilst suitable storage facilities for materials and equipment are set up. Our Staff Handbook and HR Manual also set out comprehensive guidelines for all employees on responding to typhoon and rainstorm warnings in accordance with the Code of Practice in Times of Typhoons and Rainstorms published by the Labour Department of the Government of Hong Kong. To manage flooding risks, building designs are enhanced to increase resistance to extreme precipitation, and flood risk assessments are conducted for specific construction sites.

With the number of hot days expected to increase over the 21st century, the Group strictly follows the Guidelines on Site Safety Measures for Working in Hot Weather issued by the CIC. To reduce worker’s heat load and prevent disruption to its operations, the Group provides work shelters, ventilation facilities, rest periods, potable water, appropriate clothing and relevant training. In addition, the Group regularly updates employees with information on extreme hot weather conditions through staff communication groups. Through these measures, the Group aims to promote good practices to its employees and ensure that they are aware of the latest weather information to make timely arrangements.

Metrics and Targets

To join the global efforts in combating climate change, the Group formulated a series of environmental targets in 2020/21 that aim to reduce its operational impact on the environment. The Group’s progress in achieving these environmental targets will be communicated on an annual basis, and the disclosed targets may be revised to reflect operational changes. The Group shall consider establishing waste-related targets in the future as waste management is considered to be a material topic.

Environmental Issue	Target	Status	2022/23 Progress
GHG Emissions	By 2025, reduce GHG emissions (Scope 1 & 2) intensity (by tCO ₂ e / HK\$ 'million) by 4%, compared to a FY17/18 baseline	In progress	Recorded an increase ⁶
Electricity	By 2025, reduce electricity consumption intensity (by full time employee (“FTE”)) by 67%, compared to a FY17/18 baseline	On track	Recorded a decrease

⁶ This increase is partly due to the business needs in FY22/23.

COMPANY POLICIES

Guided by its approach to maintaining responsible corporate governance as demonstrated by the Sustainability Policy, the Group exerts considerable efforts to ensuring that the necessary policies are in place in order to facilitate compliance with relevant legislation and promote best practices for employees to adopt. Thus, the Group commits to regularly reviewing current procedures and revising company policies to streamline internal processes and keep abreast of the changing business landscape. The following table lists out the formulated policies that are implemented within its operations.

Established Company Policies
Ethical Governance
<ul style="list-style-type: none"> • Anti-Fraud and Anti-Bribery Policy • Compliance Policies and Procedures • Code of Conduct (within Human Resources Manual) • Corporate Governance Policy • Human Rights Policy • Information Security Policy • Personal Data Privacy Policy • Risk Management Policy • Whistleblowing Procedure
Quality Product and Service
<ul style="list-style-type: none"> • Code of Practice for Suppliers • Complaints Handling Policy • Customer Services Code of Conduct Policy • Insurance Management Policy and Procedures • New Supplier Assessment Procedures • Operations Procedures – Internal Audit • Operations Procedures – Customer Satisfaction • Quality Manual ISO 9001:2015 • Sales Policy • Technical Procedures – Tender Review and Project Initiation • Technical Procedures – Selection and Appointment of Suppliers • Technical Procedures – Inspections
Dedicated Workforce
<ul style="list-style-type: none"> • Equal Opportunity Policy (within Human Resources Manual) • Health and Safety Policy • Learning and Development Policy • Office and Warehouse Contingency Procedures • Office Occupational Health and Safety Guidelines (created by the Occupational Safety and Health Council) • Operations Procedures – Infrastructure & Working Environment • Smoke-Free Workplace Policy • Staff Handbook
Corporate Citizen
<ul style="list-style-type: none"> • Social Investment Policy
Green Operations
<ul style="list-style-type: none"> • Climate Change Policy • Environmental Policy • Sustainable Purchasing Policy

LAWS, RULES AND REGULATIONS

The Group recognises the importance of and is committed to having an effective governance system. Its Compliance Policies and Procedures outline its goals to maintain the highest standards of diligence in all areas of public accountability and conduct its activities in accordance with relevant regulatory requirements, internal policies and procedures. The Group’s Corporate Governance Policy also requires members of the senior management, who have been delegated responsibilities, to use their best endeavours to ensure that operations are in strict compliance with applicable laws, rules and regulations. The following table provides a summary of all laws, rules and regulations that have a significant impact on its operations.

Applicable Laws, Rules and Regulations	Compliance
Ethical Governance	
<ul style="list-style-type: none"> ● Listing Rules ● Companies Ordinance (Cap. 622 of the Laws of Hong Kong) ● Securities and Futures Ordinance (Cap. 571 of the Laws of Hong Kong) ● Competition Ordinance (Cap. 619 of the Laws of Hong Kong) ● Trade Descriptions Ordinance (Cap. 362 of the Laws of Hong Kong) ● Prevention of Bribery Ordinance (Cap. 201 of the Laws of Hong Kong) ● Personal Data (Privacy) Ordinance (Cap. 486 of the Laws of Hong Kong) ● Employment of Children Regulations (Cap. 57B of the Laws of Hong Kong) ● Employment of Young Persons (Industry) Regulations (Cap. 57C of the Laws of Hong Kong) 	<p>During the Reporting Period, the Group was not aware of any material violations of laws, rules and regulations relating to bribery, extortion, fraud, and child and forced labour that had a significant impact on the Group.</p>
Quality Product and Service	
<ul style="list-style-type: none"> ● Motor Vehicles (First Registration Tax) Ordinance (Cap. 330 of the Laws of Hong Kong) ● Road Traffic (Registration and Licensing of Vehicles) Regulations (Cap. 374E of the Laws of Hong Kong) ● Factories and Industrial Undertakings Ordinance (Cap. 59 of the Laws of Hong Kong) ● Factories and Industrial Undertakings (Loadshifting Machinery) Regulation (Cap. 59AG of the Laws of Hong Kong) ● Factories and Industrial Undertakings (Lifting Appliances and Lifting Gear) Regulations (Cap. 59J of the Laws of Hong Kong) ● Code of Practice on Safe Use of Excavators 	<p>During the Reporting Period, the Group was not aware of any material violations of laws, rules and regulations relating to health and safety, advertising, labelling and privacy matters relating to products and services provided and methods of redress that had a significant impact on the Group.</p>
Dedicated Workforce	
<ul style="list-style-type: none"> ● Employment Ordinance (Cap. 57 of the Laws of Hong Kong) ● Minimum Wage Ordinance (Cap. 608 of the Laws of Hong Kong) ● Mandatory Provident Fund Schemes Ordinance (Cap. 485 of the Laws of Hong Kong) ● Employees’ Compensation Ordinance (Cap. 282 of the Laws of Hong Kong) ● Occupational Safety and Health Ordinance (Cap. 509 of the Laws of Hong Kong) ● Sex Discrimination Ordinance (Cap. 480 of the Laws of Hong Kong) 	<p>During the Reporting Period, the Group was not aware of any material violations of laws, rules and regulations relating to compensation and dismissal, recruitment and promotion, working hours, rest periods, equal opportunity, diversity, anti-discrimination, occupational health and safety and other safety treatments that had a significant impact on the Group.</p>

Applicable Laws, Rules and Regulations	Compliance
Green Operations	
<ul style="list-style-type: none"> ● Air Pollution Control (Non-road Mobile Machinery) (Emission) Regulation (Cap. 311Z of the Laws of Hong Kong) ● Noise Control Ordinance (Cap. 400 of the Laws of Hong Kong) ● Waste Disposal Ordinance (Cap. 354 of the Laws of Hong Kong) ● Water Pollution Control Ordinance (Cap. 358 of the Laws of Hong Kong) ● Hazardous Chemicals Control Ordinance (Cap. 595 of the Laws of Hong Kong) 	<p>During the Reporting Period, the Group was not aware of any material violations of laws, rules and regulations relating to air and GHG emissions, noise emissions, discharges into water and land and generation of hazardous and non-hazardous waste that had a significant impact on the Group.</p>

PERFORMANCE DATA SUMMARY

The table below sets out quantitative information regarding some of the records in relation to emissions, use of resources and employment data of the Group:

Key Performance Indicators	Unit	2020/21	2021/22	2022/23
Environmental				
GHG				
NOx Emissions	kg	383.86	598.48	573.21
SOx Emissions	kg	0.47	0.91	0.94
PM Emissions	kg	37.07	47.31	45.74
GHG Emissions - Scope 1	tCO ₂ e	80.44	153.00	158.89
GHG Emissions - Scope 2	tCO ₂ e	36.14	42.38	39.91
GHG Emissions (Scope 1 & 2)	tCO ₂ e	116.58	195.38	198.80
GHG Emissions Intensity by Revenue ⁷	tCO ₂ e / HKD Million	0.24	0.49	0.73
GHG Emissions Intensity by FTE	tCO ₂ e / Person	0.54	1.09	1.49
Energy Consumption				
Electricity Usage	kWh	97,660.87	108,670.49	100,828.94
Petroleum Usage	Litre	2,567.72	7,996.59	8,324.84
Diesel Usage	Litre	27,204.43	48,993.85	50,667.36
Total Energy Usage	MJ	1,487,894.17	2,550,901.79	2,591,511.70
Energy Usage Intensity by Revenue	MJ / HKD Million	3,062.79	6,455.04	9,527.72
Energy Usage Intensity by FTE	MJ / Person	6,920.44	14,171.68	19,485.05
Water Consumption⁸				
Water Usage	m ³	571.51	3,370.99	3,975.56
Water Usage Intensity by Revenue	m ³ / HKD Million	1.18	8.42	14.62
Water Usage Intensity by FTE	m ³ / Person	2.66	18.49	29.89
Non-hazardous Waste				
Non-hazardous Waste Generated	Tonne	95.00	480.00	25.00
Non-hazardous Waste Generated Intensity by Revenue	Tonne / HKD Million	0.20	1.21	0.09
Non-hazardous Waste Generated Intensity by FTE	Tonne / Person	0.44	2.67	0.19
Scrap Metals Recycled	kg	178,030.00	53,360.00	87,620.00
Paper Disposed	Tonne (Piece)	0.51 (102,500)	0.24 (47,500)	0.56 (111,000)
Paper Recycled	Tonne (Piece)	0.12 (25,000)	N/A	0.02 (5,000)

⁷The total revenue for the Group in FY22/23 is HK\$271.997 million.

⁸All water usage figures for FY21/22 have been recalculated due to inconsistencies in the calculation methodology.

STOCK EXCHANGE ESG GUIDE CONTENT INDEX

Aspects, General Disclosures and KPIs	Description	Relevant Chapter or Explanation
Mandatory Disclosure Requirements		
Governance Structure		
	<p>A statement from the board containing the following elements:</p> <ul style="list-style-type: none"> i) a disclosure of the board’s oversight of ESG issues; ii) the board’s ESG management approach and strategy, including the process used to evaluate, prioritise and manage material ESG-related issues (including risks to the issuer’s businesses); and iii) how the board reviews progress made against ESG-related goals and targets with an explanation of how they relate to the issuer’s businesses. 	Sustainability at TLMC - ESG Management, ESG Strategies, Stakeholder Engagement and Materiality Assessment
Reporting Principles		
	<p>A description of, or an explanation on, the application of the following Reporting Principles in the preparation of the ESG Report:</p> <p>Materiality: The ESG report should disclose: (i) the process to identify and the criteria for the selection of material ESG factors; and (ii) if a stakeholder engagement is conducted, a description of significant stakeholders identified, and the process and results of the issuer’s stakeholder engagement.</p> <p>Quantitative: Information on the standards, methodologies, assumptions and/or calculation tools used, and source of conversion factors used, for the reporting of emissions/energy consumption (where applicable) should be discussed.</p> <p>Consistency: The issuer should disclose in the ESG report any changes to the methods or KPIs used, or any other relevant factors affecting a meaningful comparison.</p>	<p>About This Report</p> <p>Sustainability at TLMC - Stakeholder Engagement, Materiality Assessment</p> <p>Performance Data Summary</p>
Reporting Boundary		
	<p>A narrative explaining the reporting boundaries of the ESG report and describing the process used to identify which entities or operations are included in the ESG report. If there is a change in the scope, the issuer should explain the difference and reason for the change.</p>	About This Report

Aspects, General Disclosures and KPIs	Description	Relevant Chapter or Explanation
“Comply or Explain” Provisions		
A. Environmental		
Aspect A1: Emissions		
General Disclosure	Information on: (a) the policies; and (b) compliance with relevant laws, rules and regulations that have a significant impact on the issuer relating to air and greenhouse gas emissions, discharges into water and land, and generation of hazardous and non-hazardous waste.	Green Operations - Environmental Compliance, Environmental Impact and Resource Efficiency and Climate Change Adaptation Company Policies Laws, Rules and Regulations
KPI A1.1	The types of emissions and respective emissions data.	Green Operations - Environmental Impact and Resource Efficiency Performance Data Summary
KPI A1.2	Direct (Scope 1) and energy indirect (Scope 2) greenhouse gas emissions (in tonnes) and, where appropriate, intensity (e.g. per unit of production volume, per facility).	Green Operations - Environmental Impact and Resource Efficiency Performance Data Summary
KPI A1.3	Total hazardous waste produced (in tonnes) and, where appropriate, intensity (e.g. per unit of production volume, per facility).	Green Operations - Environmental Impact and Resource Efficiency Performance Data Summary
KPI A1.4	Total non-hazardous waste produced (in tonnes) and, where appropriate, intensity (e.g. per unit of production volume, per facility).	Green Operations - Environmental Impact and Resource Efficiency Performance Data Summary
KPI A1.5	Description of emissions target(s) set and steps taken to achieve them.	Green Operations - Environmental Impact and Resource Efficiency and Climate Change Adaptation
KPI A1.6	Description of how hazardous and non-hazardous wastes are handled, and a description of reduction target(s) set and steps taken to achieve them.	Green Operations - Environmental Impact and Resource Efficiency The Group will consider analysing material waste records, and implementing waste reduction targets, where material.
Aspect A2: Use of Resources		
General Disclosure	Policies on the efficient use of resources, including energy, water and other raw materials.	Green Operations - Environmental Impact and Resource Efficiency Company Policies
KPI A2.1	Direct and/or indirect energy consumption by type (e.g. electricity, gas or oil) in total (kWh in '000s) and intensity (e.g. per unit of production volume, per facility).	Green Operations - Environmental Impact and Resource Efficiency Performance Data Summary
KPI A2.2	Water consumption in total and intensity (e.g. per unit of production volume, per facility).	Green Operations - Environmental Impact and Resource Efficiency Performance Data Summary
KPI A2.3	Description of energy use efficiency target(s) set and steps taken to achieve them.	Green Operations - Environmental Impact and Resource Efficiency and Climate Change Adaptation
KPI A2.4	Description of whether there is any issue in sourcing water that is fit for purpose, water efficiency target(s) set and steps taken to achieve them.	Green Operations - Environmental Impact and Resource Efficiency The Group will consider analysing water consumption records, and implementing water reduction targets, where material.
KPI A2.5	Total packaging material used for finished products (in tonnes) and, if applicable, with reference to per unit produced.	The Group did not use packaging material to support its operations during the Reporting Period.

Aspects, General Disclosures and KPIs	Description	Relevant Chapter or Explanation
“Comply or Explain” Provisions		
Aspect A3: The Environment and Natural Resources		
General Disclosure	Policies on minimising the issuer’s significant impacts on the environment and natural resources.	Green Operations - Environmental Compliance, Environmental Impact and Resource Efficiency and Climate Change Adaptation Company Policies
KPI A3.1	Description of the significant impacts of activities on the environment and natural resources and the actions taken to manage them.	Green Operations - Environmental Compliance, Environmental Impact and Resource Efficiency and Climate Change Adaptation
Aspect A4: Climate Change		
General Disclosure	Policies on identification and mitigation of significant climate-related issues which have impacted, and those which may impact, the issuer.	Green Operations - Climate Change Adaptation Company Policies
KPI A4.1	Description of the significant climate-related issues which have impacted, and those which may impact, the issuer, and the actions taken to manage them.	Green Operations - Climate Change Adaptation
B. Social		
Aspect B1: Employment		
General Disclosure	Information on: (a) the policies; and (b) compliance with relevant laws, rules and regulations that have a significant impact on the issuer relating to compensation and dismissal, recruitment and promotion, working hours, rest periods, equal opportunity, diversity, anti-discrimination, and other benefits and welfare.
