# CHARACTERISTICS OF THE GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and The Stock Exchange of Hong Kong Limited take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

For the six months ended 31 October 2023 (herein referred to as the "Reporting Period"), the revenue of the Group amounted to approximately HK\$46.5 million from continuing operations (For the same period of 2022: HK\$85.1 million), representing a decrease of approximately 45.4% compared to the corresponding period in 2022. Net loss attributable to owners of the Company from continuing operations during the Reporting Period was approximately HK\$11.7 million (For the same period of 2022: net profit attributable to owners of the Company from continuing operations of approximately HK\$21.2 million). The decrease in revenue was mainly due to the decrease in contract revenue generated from scaffolding, fitting out and other auxiliary services for construction and buildings work during the Reporting Period. Also, the decrease in net loss attributable to owners of the Company from continuing operations was mainly due to the significant decrease in operating and administrative expenses for the Reporting Period as compared to the corresponding period in 2022.

# Scaffolding, Fitting out and Other Auxiliary Services for Construction and Buildings Work

This segment includes scaffolding services, fitting out and other auxiliary services for construction and buildings work. During the Reporting Period, revenue from this segment was approximately HK\$22.9 million, representing a significant decrease of approximately HK\$62.3 million as compared to the corresponding period in 2022, due to the number of completed projects was increased and the number of new awarded contracts was decreased in last year.

# Scaffolding Services

In recent years, a number of large-scale infrastructure projects have been carried out by the HKSAR to boost the construction industry and well-being of the society. For this purpose, a multi-pronged strategy has been adopted by the government to maintain a steady and sustainable land supply with the aim to meet the continuing housing needs.

On the other hand, in the past few years, the entire scaffolding industry encountered the major difficulty of shortage in supply of skilled workers and experienced personnel. Such shortage resulted in rising labour costs and diminishing profit margins throughout the industry, which further intensified competition within the scaffolding sector. However, it is worth mentioning that the Group's patented scaffolding system, which is known as "Pik-Lik", has played a crucial role in saving manpower and enhancing efficiency in the industry.

Leveraging the widespread recognition of the impeccable quality of services and the strong relationships nurtured with clientele, the Group receives positive feedback and prominent business support and takes pride in being one of the leading scaffolding service providers in Hong Kong. During the Reporting Period, the Group provided scaffolding services to 40 ongoing projects, 37 of which were completed on schedule and nil new contracts were awarded

#### Fitting out Services

For the fitting out services, the Group mainly provided fitting out services to commercial institutions and luxury residence end-users during the Reporting Period. The Group has also extended its scope of services to include ceiling work and to date, it has been receiving encouraging feedback from its clients. The competition of fitting out services is keen. The Group will continue to proactively acquire new contracts.

Other Auxiliary Services for Construction and Buildings Work

For other auxiliary services for construction and buildings work, the Group mainly provided gondolas, parapet railings and access equipment installation and maintenance services. The Group has been actively cultivating its gondolas rental business over the past several years and has gained positive 'worth-of-mouth' in the market. This has enabled the Group to secure a stable number of new contracts despite the competitive local market.

# **Money Lending Business**

The Group has reviewed and flexibly adjusted the business strategies, which is to enhance the requirements of the loan granted to the borrowers. For example, the borrowers have to provide the asset proof or income proof to prove they have the ability to repay the loan. As the requirements of the loan granted to the borrowers are higher and the risk for the loan borrowings are lower, the related interest rate will become lower. Thus, the Group recorded a decrease of the revenue in this segment during the Reporting Period.

The business segment recorded an increase of revenue to the Group and the Group recorded a turnover of approximately HK\$23.6 million during the Reporting Period (For the same period of 2022: approximately HK\$22.7 million). The principal amount of the loans granted ranged from HK\$0.3 million to HK\$25.0 million with interest rates ranging from 7.0% to 40.6% per annum during the Reporting Period.

#### Securities Investment Business

In order to capture possible returns from the financial market, the Group has formed the investment committee in year 2015/2016 and continued investing in Hong Kong-listed securities during the Reporting Period. Due diligence was conducted on every contemplated investment and each investment was taken into serious consideration to ensure quality risk control and maximise shareholders' benefits.

As at 31 October 2023, the total value of the Group investment portfolio was approximately HK\$48.7 million (30 April 2023: approximately HK\$47.5 million). The Group recorded a net fair value gain of approximately HK\$1.0 million (For the same period of 2022: approximately HK\$6.9 million) and net gain on disposal of approximately HK\$0.3 million (For the same period of 2022: net loss on disposal of approximately HK\$4.7 million) for its investment portfolio during the Reporting Period, which was mainly due to the volatility of the stock market in Hong Kong.

### **Assets Management Business**

The Disposal Group carried out the business of assets management in Hong Kong. #### BUSINESS OUTLOOK

Looking forward, Hong Kong's economy will likely grow more slowly than previously expected both in 2023 and 2024 as challenges from uncertainty of China's economy and the impact of high interest rates. It also led to a decline in the Hong Kong property market.

In the past decade, the scaffolding industry has become increasingly competitive. Furthermore, the costs have become high together with rising labour costs, but productivity has suffered decline as well. In the face of a phenomenon of ageing workers, young generation unwilling to join the industry due to hard labour work and higher requirement of technological qualifications, which has affected recruitment of talents in the industry, and with heavier government regulations, without favourable factors such as labour imports, the carrying capacity of the industry may be challenged. These reflect a lack of confidence in the prospect of the scaffolding industry.

On the other hand, in response to demand from market development, many contractors have adopted the use of metal scaffolds instead of bamboo scaffolds nowadays. The general higher durability of metal scaffolds and the possibility of calculating load bearing capacity have shortened the time for training of workers. Hence, bamboo scaffolds may be eliminated in Hong Kong in the future. According to recent trend, modern metal scaffolds have been adopted by the industry, especially for high-end shopping malls which are aware of exterior appearance. Therefore, the future direction of the scaffolding business will be led by the adoption of mixed scaffolds and metal scaffolds.

Due to the current unclear economic situation in Hong Kong, the Group is reviewing its existing assets structure and business strategies and may make adjustment to our existing assets structure, with the aim to consolidate our resources, so as to be flexibly prepared for uncertainties in the future. The Group will strictly adhere to its cost control policy, and swiftly adjust business strategies of its scaffolding business in response to ever-changing market dynamics in order to generate better financial returns for shareholders.

Finally, we will actively explore all suitable investment opportunities to diversify the Group's business horizons and will work hard to strengthen overall business development. The Group's business strategy is in line with the general direction of the government's overall strategic development plans for property construction, infrastructure investment and financial market development.
