### 3. BASIS OF PREPARATION OF CONSOLIDATED FINANCIAL STATEMENTS

#### Going concern basis

As at 31 December 2023, the Group had accumulated losses of approximately MOP210,449,000 (2022: MOP182,663,000), the Group's total borrowings amounted to approximately MOP62,675,000 (2022: MOP81,188,000) while its cash and cash equivalents amounted to approximately MOP4,523,000 (2022: MOP4,739,000) and pledged bank deposits amounted to approximately MOP15,263,000 (2022: MOP29,425,000). The above conditions indicate the existence of material uncertainties which may cast significant doubt about the Group's ability to continue as a going concern.

In view of such circumstances, the directors of the Company have given careful consideration to the future liquidity and performance of the Group and its available sources of financing in assessing whether the Group will have sufficient financial resources to continue as a going concern. Certain measures have been taken to mitigate the liquidity pressure and to improve its financial position which include, but are not limited to, the following:

- (i) The Group is negotiating with several financial institutions and seeking for renewal of the existing bank facilities to finance the Group's working capital and commitments in the foreseeable future;
- (ii) The Group will continue to take active measures to control administrative costs through various channels including human resources optimization and capital expenditure control. This measure may reduce the cash outflows of the Group; and
- (iii) With the release of pandemic control policy by the government during the fourth quarter in 2022, the business environment and construction activities in Macau, especially for the casinos operation in Macau, gradually returned to normal, and now the pandemic basically imposes no impacts on the economic activities in Macau. The Group seized the opportunity to actively place tendering for potential projects to increase the Group's revenue for the coming years.

The directors of the Company have reviewed the Group's cash flow projections prepared by the management. The cash flow projections cover a period of twelve months from the date of this announcement. They are of the opinion that, taking into account the above-mentioned plans and measures, the Group will have sufficient working capital to finance its operations. Accordingly, the directors of the Company are satisfied that it is appropriate to prepare the consolidated financial statements on a going concern basis.

Should the Group failed to achieve the above-mentioned plans and measures, it might not be able to continue to operate as a going concern, and adjustments would have to be made to write down the carrying values of the Group's assets to their recoverable amounts, to provide for any further liabilities which might arise, and to reclassify non-current assets and non-current liabilities as current assets and current liabilities, respectively. The effects of these adjustments have not been reflected in these consolidated financial statements.

#### 4. REVENUE AND SEGMENT INFORMATION

Revenue represents the fair value of amounts received and receivable from the provision of fitting-out and repair and maintenance service by the Group to external customers. The Group's revenue is mainly derived from provision of fitting-out services and repair and maintenance services in Macau.

##### Revenue

##### *Timing of revenue recognition and category of revenue*

	2023 <i>MOP'000</i>	2022 <i>MOP'000</i>
Recognised over time and short-term contracts:		
– provision of fitting-out services	105,456	54,212
Recognised over time and long-term contracts:		
– provision of repair and maintenance services	392	382

Macau	105,763	54,594
Hong Kong	85	–
	<u>105,848</u>	<u>54,594</u>

The customers of the Group are mainly hotel and casino operators and individual customers in Macau. All of the Group's provision of fitting-out services and repair and maintenance services are made directly with the customers. Contracts with the Group's customers are mainly fixed-price contracts.

The Group provides fitting-out and repair and maintenance services to customers. Such services are recognised as a performance obligation satisfied over time as the Group creates or enhances an asset that the customer controls as the asset is created or enhanced. Revenue is recognised for these fitting-out and repair and maintenance services based on the stage of completion of the contract using input method.

The Group's fitting-out and repair and maintenance contracts include payment schedules which require stage payments over the construction period once certain specified milestones are reached. The Group requires certain customers to provide upfront deposits up to 10% of total contract sum, when the Group receives a deposit before fitting-out and repair and maintenance service commences, this will give rise to contract liabilities at the start of a contract, until the revenue recognised on the specific contract exceeds the amount of the deposit.

A contract asset, net of contract liability related to the same contract, is recognised over the period in which the services are performed representing the Group's right to consideration for the services performed because the rights are conditioned on the Group's future performance in achieving specified milestones. The contract assets are transferred to trade receivables when the rights become unconditional.

Retention receivables, prior to expiration of defect liability period, are classified as contract assets, which is usually about one year from the date of the practical completion of the fitting-out and repair and maintenance service. The relevant amount of contract asset is reclassified to trade receivables when the defect liability period expires. The defect liability period serves as an assurance that the construction services performed comply with agreed-upon specifications and such assurance cannot be purchased separately.

***Transaction price allocated to the remaining performance obligations***

The following table shows the aggregate amount of the transaction price allocated to performance obligations that are unsatisfied (or partially unsatisfied) as at the end of each reporting period.

	<b>2023</b> <i>MOP'000</i>	2022 <i>MOP'000</i>
Provision of fitting-out services	<b><u>40,302</u></b>	<u>20,500</u>

Based on the information available to the Group at the end of each reporting period, the directors of the Company expect the transaction price allocated to the above unsatisfied (or partially unsatisfied) contracts in respect of provision of fitting-out and repair and maintenance services as of 31 December 2023 will be recognised as revenue during the year ending 31 December 2024 (2022: was recognised as revenue during the year ended 31 December 2023).

**Segment information**

Operating segments are identified on the basis of internal reports about components of the Group that are regularly reviewed by the chief operating decision maker (the "CODM"), being the executive directors of the Company, in order for the CODM to allocate resources and to assess performance. No operating segments identified by the CODM have been aggregated in arriving at the reportable segments of the Group.

Specifically, the Group's reportable and operating segments under HKFRS 8 *Operating Segments* are as follows:

- fitting-out services; and
- repair and maintenance services.

The CODM makes decisions according to the operating results of each segment. No analysis of segment asset and segment liability is presented as the CODM does not regularly review such information for the purposes of resources allocation and performance assessment. Therefore, only segment revenue and segment results are presented.

As at 1 January 2022, contract assets and contract liabilities amounted to MOP91,557,000 and MOP4,064,000, respectively.

The Group has rights to considerations from customers for the provision of fitting-out services. Contract assets arise when the Group has right to consideration for completion of fitting-out services and not yet billed under the relevant contracts, and their right is conditioned on factors other than passage of time. Any amount previously recognised as a contract asset is reclassified to trade receivables when such right becomes unconditional other than the passage of time. Remaining rights and performance obligations in a particular contract is accounted for and presented on a net basis, as either a contract asset or a contract liability. If the progress payment exceeds the revenue recognised to date under the input method, then the Group recognises a contract liability for the difference.

The Group also requires certain customers to provide upfront deposits up to 10% of total contract sum, when the Group receives a deposit before fitting-out service commences, this will give rise to contract liabilities at the start of a contract, until the revenue recognised on the specific contract exceeds the amount of the deposit.

Included in carrying amounts of contract assets/contract liabilities as stated above comprises retention money of MOP18,876,000 (2022: MOP70,637,000) as at 31 December 2023.

Retention money is unsecured and interest-free and represented the monies withheld by customers of contract works recoverable after the completion of defects liability period of the relevant contracts or in accordance with the terms specified in the relevant contracts, usually being 1 year from the date of completion of respective fitting-out services projects. Accordingly, in respect to the uncompleted project as at the end of each reporting period, the respective retention money is expected to be recovered beyond twelve months from the end of each reporting period.

### **BASIS FOR DISCLAIMER OF OPINION**

#### **Multiple Uncertainties Relating to Going Concern**

As described in the consolidated financial statements, the Group had a net loss of approximately MOP27,786,000 for the year ended 31 December 2023 and as at 31 December 2023, the Group’s total borrowings amounted to approximately MOP62,675,000, of which current borrowings amounted to approximately MOP62,675,000, while its cash and cash equivalents amounted to approximately MOP4,523,000 and pledged bank deposits amounted to approximately MOP15,263,000. As at the date of this report, the Group defaulted on payment of certain bank borrowings, which also triggered cross-default of other bank borrowings, such that they will become due for immediate repayment. These conditions, together with other matters described in the consolidated financial statements, indicate the existence of material uncertainties which may cast significant doubt about the Group’s ability to continue as a going concern.

The directors of the Company have been undertaking a number of measures to improve the Group’s liquidity pressure and the financial position of the Group which are set out in the consolidated financial statements. The consolidated financial statements had been prepared by the directors of the Company on a going concern basis, the validity of which depends on the outcome of those plans and measures, which are subject to multiple uncertainties, including (i) the successful negotiations with the lenders for the renewal of extension for repayment of outstanding bank borrowings; (ii) the collection of outstanding trade receivables, other receivables, deposits and prepayments and contract assets balances; (iii) successfully

managing the impact of the COVID-19 outbreak on the Group's operations from time to time and generate sufficient cash flows from its operations. We are unable to determine whether the use of the going concern assumption in the preparation of the consolidated financial statements is appropriate.

Should the Group fail to achieve the abovementioned measures, it might not be able to continue to operate as a going concern, and adjustments would have to be made to write down the carrying values of the Group's assets to their recoverable amounts, to provide for any further liabilities which might arise and to reclassify non-current assets and non-current liabilities as current assets and current liabilities. The effects of these adjustments have not been reflected in these consolidated financial statements.

## **PROSPECTS**

Post the COVID-19 pandemic, Macau experienced a surge in visitor numbers following the reopening of its borders. This influx of visitors has had a positive impact on upstream customers in construction industries such as catering, hotels, and tourism, prompting them to reinvest in their businesses. In addition, matters related to traffic and gaming license renewal have been successfully resolved. These developments are expected to generate a noteworthy increase in catering, hotels, and gaming projects, thereby further enhancing the overall fitting-out and repair and maintenance services industry. Besides, the engineering industry has shown significant signs of recovery since January 1, 2023. The Macao Special Administrative Region (MSAR) entered into a Concession Agreement on Operating Games of Luck in Casinos in the Macao Special Administrative Region with six awardees. The agreement stipulates that the enterprises are committed to investing at least MOP118.8 billion in exploring overseas customer markets and developing non-gaming projects in ten categories, including conferences and exhibitions, entertainment, sports events, cultural arts, health and wellness, and themed amusement parks. Given these positive indications, the Group firmly believes that there will be a substantial increase in hotel and gaming projects, which will greatly enhance the Group's financial performance.
