CONTINUING CONNECTED TRANSACTIONS IN RELATION TO THE ENTERING INTO OF THE ENGINEERING SERVICES FRAMEWORK AGREEMENT

ENGINEERING SERVICES FRAMEWORK AGREEMENT

The Board is pleased to announce that on 10 July 2024 (after trading hours), Dongjie Construction, an indirect non-wholly owned subsidiary of the Company, entered into the Engineering Services Framework Agreement with Big Data Company, pursuant to which Big Data Company agreed to provide software development and construction automation engineering project services to Dongjie Construction.

The annual cap under the Engineering Services Framework Agreement is RMB9,210,000 (equivalent to HK\$9,946,800) for the period from 1 January 2024 to 31 December 2024 (both dates inclusive).

LISTING RULES IMPLICATIONS

As at the date of this announcement, Big Data Company is a controlled subsidiary of Qingdao Haifa Group, which is the ultimate holding company and one of the controlling shareholders of the Company and indirectly holds 62.25% of the issued share capital of the Company. Big Data Company is therefore a connected person of the Company and the entering into of the Engineering Services Framework Agreement between Dongjie Construction and Big Data Company and the transactions thereunder will constitute continuing connected transactions of the Company under Chapter 14A of the Listing Rules.

Given the applicable percentage ratios (as defined under Rule 14.07 of the Listing Rules) in respect of the annual cap under the Engineering Services Framework Agreement are more than 5% but less than 25% and the transaction consideration is less than HK\$10,000,000-, the transactions contemplated under the Engineering Services Framework Agreement are subject to the annual review, reporting and announcement requirements under Chapter 14A of the Listing Rules but are exempt from the independent shareholders' approval requirement.

The Board hereby announces that on 10 July 2024 (after trading hours), Dongjie Construction, an indirect non-wholly owned subsidiary of the Company, entered into the Engineering Services Framework Agreement with Big Data Company, pursuant to which Big Data Company agreed to provide software development and construction automation engineering project services to Dongjie Construction. The annual cap under the Engineering Services Framework Agreement is RMB9,210,000 (equivalent to HK\$9,946,800) for the period from 1 January 2024 to 31 December 2024 (both dates inclusive).

ENGINEERING SERVICES FRAMEWORK AGREEMENT

The principal terms of the Engineering Services Framework Agreement are summarised as below:

Date : 10 July 2024

Parties : (1) Dongjie Construction; and
(2) Big Data Company

Term:

The period from the Effective Date to 31 December 2024 (both dates inclusive).

Subject matters:

Big Data Company and its subsidiaries (collectively referred to as the “Party B Group”) will provide software development and construction automation engineering project services to Dongjie Construction and its subsidiaries (collectively referred to as the “Party A Group”), including but not limited to the software development for construction project industry platform, and intelligent engineering project services for constructions such as parks, communities, hospitals, hotels and office buildings.

Pricing:

The pricing of the services for each project under the Engineering Services Framework Agreement shall be determined with reference to the market price or, in the absence of such market price, the agreed price. As the Party B Group may need to go through a tendering process conducted by the Party A Group in order to be selected as a project service provider, the Party B Group will participate in the project tendering process conducted by the Party A Group in accordance with the normal procedures and requirements, and will provide quotations based on the design, equipment, quality standards and construction requirements of individual projects, together with its estimated costs, including the service fee of purchaser and/or the contractor and/or the service provider (if any). If the Party B Group requires products and services (if any) from purchaser and/or the contractor and/or the service provider (if any), the Party B

Group will obtain quotations from at least three different purchasers and/or contractors and/or service providers based on the project's specific requirements and reasonable factors such as market conditions, competition, gross margin, direct and indirect costs, opportunity costs, project duration and all relevant risk factors (including customer risk) to preliminarily estimate the costs required for the respective components.

Payment terms:

The transactions under the Engineering Services Framework Agreement will be paid and settled in cash or other mutually agreed methods, and shall be paid and settled according to the time and manner agreed in the specific engineering project service contracts being entered into. The relevant payment and settlement terms shall not be less favourable than the market terms available to the Party A Group from an Independent Third Party or the market terms granted by the Party B Group to an Independent Third Party.

Annual cap:

Set out below is the annual cap for the transactions contemplated under the Engineering Services Framework Agreement:

**1 January 2024 to
31 December 2024
(both dates inclusive)**

Annual Cap	RMB9,210,000 (equivalent to HK\$9,946,800)
------------	--

The annual cap is determined based on:

- (i) the total contract sum of projects already contracted between Party A Group and Party B Group, which is approximately RMB13,847,580;
- (ii) the project contracts that are in final stage of negotiation between the Party A Group and the Party B Group, which is approximately RMB7,000,000; and
- (iii) the total contract amount expected to be completed in 2024 from projects in (i) and (ii) above, which is approximately RMB9,203,103.

REASONS FOR AND BENEFITS OF ENTERING INTO THE ENGINEERING SERVICES FRAMEWORK AGREEMENT

The Party A Group is mainly engaged in the engineering contracting business of building construction and municipal projects, as well as design and construction of architectural and decoration works, design, production and installation of curtain walls, windows and doors, and steel structure works. The Party B Group has expertise in engineering management services and software development services. As both the Party A Group and the Party B Group are members of Qingdao Haifa Group and share the same interest, on the basis of fair market price, the selection of the Party B Group as the project subcontractor is expected to be able to provide convenient, high-quality, high-efficiency, and cost-effective engineering services to the Party A Group, which are of great benefit to improving the market competitiveness and profitability of both parties.

Mr. Jiang Hongchang, Ms. Dong Fang and Mr. Liu Yutao have abstained from voting on the Board resolution to approve the Engineering Services Framework Agreement due to conflict of interests. Save as the aforementioned, no Director has material interest in the Engineering Services Framework Agreement and therefore no other Director has abstained from voting on the relevant board resolution.

The independent non-executive Directors are of the view that the terms of the Engineering Services Framework Agreement and the transactions contemplated thereunder are on normal commercial terms and are fair, reasonable and in the interests of the Company and its shareholders as a whole.

INTERNAL CONTROL

The Group has adopted the following internal control procedures to govern the continuing connected transactions of the Group under the Engineering Services Framework Agreement and the annual cap:

- (i) the tender and audit department of the Company will closely monitor and record the actual transaction amounts of the continuing connected transactions under the Engineering Services Framework Agreement to ensure that the annual cap will not be exceeded;
- (ii) the tender and audit department of the Company will compare the prices and terms with those of other construction projects of similar nature and scale entered into and/or tenders and/or quotations obtained by the Group from Independent Third Parties, or compare the prices and terms with the market prices or benchmarks for transactions of similar nature, in order to ensure the expenses by the Group are fair and reasonable and no less favourable than those offered by Independent Third Parties;
- (iii) the contract department and project department of the Company will submit the construction plan, price comparison report, and status report to the executive Directors before entering into an individual contract;
- (iv) the Company's auditor will review the continuing connected transactions (which are subject to the annual review and disclosure requirements under the Listing Rules) annually and confirm whether (a) the transactions under the Engineering Services Framework Agreement have been approved by the Board; (b) the transactions were entered into in accordance with the Engineering Services Framework Agreement; and (c) the annual cap has not been exceeded; and
- (v) the independent non-executive Directors will perform annual review (which are subject to the annual review and disclosure requirements under the Listing Rules) to confirm the transactions under the Engineering Services Framework Agreement are conducted (a) in the ordinary and usual course of business of the Group; (b) on normal commercial terms or better; and (c) in accordance with the Engineering Services Framework Agreement governing them on terms that are fair and reasonable and in the interests of the shareholders as a whole.

The Board believes that the above internal control procedures are appropriate and can ensure the transactions are entered into in accordance with the Engineering Services Framework Agreement and the prices payable by the Company will not be less favourable than those payable under transactions with Independent Third Parties.
