CHAIRMAN'S STATEMENT 主席報告書

Dear Shareholders,

The global economic growth momentum remains lackluster given the combined effect of long-term factors such as the global industrial chain adjustment, frequent geopolitical conflicts and tensions in international relations, coupled with cyclical factors such as tightening of monetary policy and rising debt risks. Against this macro backdrop, China's capital market has also been exposed to severe challenges. Investment risks continue to rise due to multiple factors such as weak world economic growth, downward absorption of foreign capital and low investor confidence. Confronted with such market situation, we have responded proactively and flexibly adjusted our investment strategy, adhering to our core investment philosophy of prudence, and recorded relatively stable returns for the year.

In FY2023/2024, we made comprehensive adjustment to optimize out investment strategies in view of changes in market environment and the strategic development needs of the Company. We re-established our four major investment strategies, namely core-holding-centered unlisted equity investment, debt investment, fund investment and listed equity investment.

The core of our unlisted equity investment strategy is to seek long-term returns. We are committed to identifying and investing in unlisted companies with great growth potential, providing them with capital and resources and sharing the dividends of their long-term development. Debt investment strategy aims to achieve stable returns in a volatile market environment. Fund investment strategy, which aims to participate in diversified investment opportunities, utilizes the industry experience and market acumen of professional fund management companies to broadly allocate assets and diversify risks while capturing more investment opportunities. Listed equity investment strategy focuses on seizing short-term investment opportunities in the secondary market. As a result of the adjustments to our strategy, our investment portfolio has become more balanced and efficient, and our ability to withstand risk has been significantly enhanced. We have not only achieved a balance between shortterm and long-term investments, but also strengthened risk management and further optimized our overall investment layout through diversified investments.

各位股東:

在二零二三/二零二四財年,鑒於市場環境的深刻變化與公司戰略發展的需求,我們對投資策略進行了全面的調整與優化。我們重新確立了四大投資策略:以核心持股為中心的非上市權益投資、債權投資、基金投資及上市股權投資。

CHAIRMAN'S STATEMENT 主席報告書

The global economy today is undergoing rapid changes, with technology reshaping the world at an unprecedented speed. As an investment company, we understand that we must keep abreast of technological development to stay ahead in the market among fierce competitions. Therefore, during this fiscal year, we changed the name of the Company to Wealthink Al-Innovation Capital Limited and adopted "華科智能投資有限公 司" as its Chinese name. This not only represents a new brand image, but also highlights our strategic intention to expand our presence in the field of intelligent technology. We firmly believe that by investing in these cutting-edge technologies, we will be able to capitalize on future growth opportunities and propel the Company to achieve leapfrog development. We plan to accurately identify startups with disruptive technologies and promising market prospects through exhaustive market research. At the same time, we will also actively explore strategic cooperation opportunities with industry-leading companies with a view to building a diversified portfolio in key areas such as artificial intelligence and big data.

Amid a volatile market, we have always placed risk management at the core. Over the past year, we continued to strengthen our internal control and compliance management, constantly building up our risk defenses and appropriately resolving various risks and hidden dangers. At the management level of our investment business, we focused on strengthening the post-investment and exit management mechanism of our unlisted investment projects to improve the overall efficiency of post-investment management through systematic implementation of post-investment management and meticulous monitoring of the performance of investment projects. In addition, we have conducted a comprehensive business risk assessment to identify, accurately quantify and systematically prioritize the major risk points that need to be dealt with, and have prepared corresponding risk control plans to ensure the sound development of our investment business.

在全球經濟日新月異的今天,科技正以前所 未有的速度重塑世界。作為投資公司,我們 深知必須緊跟科技發展的步伐,才能在激 烈的市場競爭中保持領先地位。因此,在本 財年,公司更名為Wealthink Al-Innovation Capital Limited,並採納「華科智能投資有限 公司」為本公司中文名稱。這不僅代表了全 新的品牌形象,更彰顯了我們將深入佈局智 能科技領域的戰略意圖。我們堅信,通過投 資這些前沿技術,能夠把握未來的增長機遇, 推動公司實現跨越式發展。我們計劃通過詳 盡的市場調研,精準識別那些具有顛覆性技 術和廣闊市場前景的初創企業。同時,我們 也將積極探索與行業領先企業的戰略合作機 會,以期在人工智能、大數據等關鍵領域構 建多元化的投資組合。

CHAIRMAN'S STATEMENT 主席報告書

Over the past year, we made steady progress amid a complex and volatile market environment and delivered hard-earned results. At present, many authoritative global economic institutions have raised their expectations for China's economic growth, which has undoubtedly injected stronger confidence in our development. We firmly believe that with the steady recovery of the Chinese economy and the maturing of the capital market environment, China's investment market will show new vitality. We will continue to be market-oriented and policy-led, closely follow the pace of national development, serve national strategies and the real economy, and continuously improve our project selection and risk management capabilities, with a view to getting a head start as the market picks up and creating stable and lasting value for our shareholders

WEALTHINK AI OVERVIEW

Wealthink Al-Innovation Capital Limited ("Wealthink AI") is a cross-border investor with a focus on China's fast-growing industries and the best investment opportunities. We leverage our capital strength to invest in targeted companies, with returns primarily generated from interests, dividends and capital appreciation. In FY2023/2024, in view of changes in market environment and the strategic development needs of the Company, we underwent comprehensive adjustments and optimization of our investment strategy. We re-established our four-core investment strategy, namely core-holding-centered unlisted equity investment, debt investment, fund investment and listed equity investment.

INVESTMENT REVIEW

Investment Activities

During the last year, due to the volatile international trading environment, the sluggish internal consumption market and the increasing geopolitical risk, China's economy was still exposed to downward pressure. Against this backdrop, the capital markets in Mainland China and Hong Kong showed relative weakness, which brought certain challenges to our investment business and post-investment management. Confronted by the volatility and uncertainty of the market, we adhered to the principle of investment diversity and risk diversification, prudently evaluated various investment opportunities, and comprehensively adjusted and improved investment strategies. Through various asset categories including investments in unlisted equity, debt, fund and listed equity, we further improved the diversity and stability of our investment portfolio. In addition, under the complex and ever-changing economic situation, we are also striving to identify certain industrial trends and focus our investment on the emerging technology fields while continuing to strengthen strategic execution in the technology field.

MESSAGE FROM THE BOARD

As an investment company with a strategic mission to "build a professional, market-oriented and international investment platform", the Group aims to create superior returns for shareholders and more value for the society. The Group follows closely the development trend of Chinese economy, technology and people's livelihood in its investment, and capitalizes on the national strategy by focusing on industries with great development potential, including biotechnology, intelligent manufacturing, new energy, financial technology and blockchain. In FY2023/2024, the global economy slowed down for the third consecutive year due to factors such as adjustments in industrial chains, geopolitical conflicts and tightened monetary policies. China's capital market also faced severe challenges and investment risks were on the rise.

Against this backdrop, the Group flexibly adjusted its investment strategy, adhered to its core investment philosophy of stability and achieved relatively stable returns. In the face of the complex macro environment, the Group persisted in promoting its investment business and comprehensively optimized its investment strategy, establishing four major strategies, namely unlisted equity investment, debt investment, fund investment and listed equity investment, with a focus on core shareholdings. As a result of the adjustments to our strategy, our investment portfolio has become more balanced and efficient, and our ability to withstand risk has been significantly enhanced. We have not only achieved a balance between short-term and long-term investments, but also strengthened risk management and further optimized our overall investment layout through diversified investments. At the same time, the Group focused on sustainable and long-term development and followed ESG concepts in its daily investments to create positive environmental and social impacts.

Section 3 - Climate Action

As a leading investment company, we understand that the impact of climate change has extended to all sectors. Promoting green transformation is not only a social responsibility, but also the only way for achieving sustainable development. Therefore, we actively promote green initiatives in our internal management and operations to support the cause of environmental protection. In our daily operations, we actively take measures to reduce our carbon footprint and energy consumption, such as implementing an energy management system and promoting green offices. In addition, in terms of our investment strategy, we are committed to supporting the development of green business by actively seeking out and investing in companies and projects with sustainable development potential.

To ensure the effectiveness and transparency of our green investments, we have put in place a well-established ESG assessment system and incorporated ESG factors into the investment decision-making process, and regularly assess the environmental and social impact of our investment projects and monitor their sustainable development performance. We firmly believe that green investment not only creates economic value, but also brings positive environmental benefits to the society and contributes to the combat against climate change and the realization of sustainable development. In FY2023/2024, the Group was not aware of any violations of laws and regulations related to air and GHG emissions, discharge to water and land, generation of hazardous and non-hazardous waste, and noise that would have a significant impact on the Group.

In response to China's commitment to the "Dual-Carbon Strategic Goal", the Group has been striving to reduce its carbon footprint during business operations. In FY2023/2024, the Group's GHG emissions were mainly generated from the burning of gasoline by vehicles and electricity consumption. Specifically, the Group's total amount of GHG emissions was approximately 17.74 tonnes carbon dioxide equivalent, representing a decrease of approximately 66.93% as compared with FY2022/2023.

Since the solid waste and sewage generated by the Group were collected and managed collectively by the building property management company where the Group operates, the Group had no detailed records of the amount of waste in FY2023/2024. Due to its business nature, the Group did not generate any hazardous waste in FY2023/2024. The Group's emissions for FY2023/2024 are summarized in Table 1 in the section "Appendix I – Key Performance".

In the process of selecting a supplier, the Administration Department considers a range of criteria and conducts a detailed assessment of suppliers' compliance before entering into an agreement. The Group adheres to the principle of "comparing three or more relevant suppliers" by collecting and requesting quotations from three or more relevant suppliers. We conduct a comprehensive assessment from multiple dimensions, including social, environmental and governmental regulations and standards, and ultimately select the most suitable suppliers for contracting to ensure a stable cooperation. Through a rigorous screening and assessment process, we strive to not only build long-term cooperation relations with our suppliers, but also promote the sustainable development of the supply chain.

供應商篩撰及審查

Six Factors for Evaluating Suppliers

評估供應商的六大因素

Supplier Quality Control

The Group attaches great importance to quality control of our suppliers to ensure the sustainability of our supply chain. We are fully aware that the behavior of our suppliers has farreaching impacts on our overall business and the environment, and have therefore put in place a stringent supplier evaluation and monitoring mechanism to ensure their compliance with our sustainability criteria. During our cooperation, we regularly review and evaluate our suppliers, focusing on monitoring their performance in areas such as environmental management, labor conditions and business ethics. If a supplier is found to have failed to meet the Group's criteria or contractual requirements, we will terminate our cooperation with it and blacklist it. We have set up various feedback channels to encourage our employees and stakeholders to report any identified violations so that corrective actions can be taken in a timely manner. At the same time, we maintain close communication with our suppliers and provide the necessary support to encourage them to improve their ESG management. Through these measures, we not only ensure the quality and reliability of our supply chain, but also promote the improvement of our suppliers' environmental and social responsibility, ultimately realizing the sustainable development of the entire supply chain.

Green Supply Chain

The Group integrates the concept of "green procurement" into the construction of the supplier system, giving priority to local suppliers and giving preference to purchase of environmentally friendly products under the same conditions. By doing so, we hope to reduce the carbon footprint and environmental impact caused by procurement, while at the same time promoting the development of the local economy and creating more job opportunities.

供應商質量監控

本集團十分重視對供應商的質量監控,以確 保供應鏈的可持續發展。我們深知供應商的 行為對整體業務及環境有深遠影響,因此制 定了嚴格的供應商評估和監控機制,確保其 符合我們的可持續發展標準。在合作過程中, 我們定期對供應商進行審查和評估,重點監 控其在環境管理、勞動條件和商業道德等方 面的表現。若發現供應商未能符合本集團的 標準或合同要求,我們將終止與之合作,並 將其列入黑名單。我們設立了多種反饋渠道, 鼓勵員工和利益相關方報告任何發現的違規 行為,以便及時採取糾正措施。同時,我們與 供應商保持緊密溝通,提供必要的支持,鼓 勵其提升ESG管理水平。通過這些措施,我 們不僅確保供應鏈的質量和可靠性,還推動 了供應商在環境和社會責任方面的改進,最 終實現整個供應鏈的可持續發展。

綠色供應鏈

本集團將「綠色採購」的理念融入供應商體系的搭建,優先考慮本地供應商,並在同等條件下優先購買環保產品。通過這種做法,我們希望減少從採購產生的碳足跡及對環境的影響,同時促進當地經濟的發展並創造更多就業機會。

Section 2 - Social Investment

Based on social development, the Group endeavors to give back to the society through practical actions and opportunities to contribute to the society. Through the formulation of relevant policies, the Group actively encourages its employees to participate in various activities to help those in need in society. By making donations to specific organizations, we protect the environment and create more possibilities for the poor, thus contributing to the common progress and development of society.

Case Study: Computer Donation Public Welfare Activities

On 27 March 2024, in responding to the call for environmental protection and reuse of resources, the Group decided to donate computer equipment to Caritas Computer Workshop. The donated computer equipment totaled 1 desktop computer, 9 LCD monitors and 3 laptops. The refurbished computers will be distributed to poor people or non-profit organizations. We hope the donations can be used to the greatest extent and transferred to those in need. This initiative will not only help reduce the waste of resources and the burden on the environment, but also provide more opportunities and possibilities for the beneficiaries and promote social equity and development. The Group will continue to pay attention to social needs and actively promote similar environmental and social responsibility initiatives.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters

Investments at fair value through profit or loss using level 3 fair value measurement

Refer to Notes 6 and 21 to the consolidated financial statements.

The Group measured its investments at fair value through profit or loss with the changes in fair value recognised in the consolidated profit or loss. This fair value measurement is significant to our audit because the balance of investments at fair value through profit or loss using level 3 fair value measurement of HK\$5,995,996,000 as at 31 March 2024 is material to the consolidated financial statements. In addition, the Group's fair value measurement involves application of judgement and is based on assumptions and estimates.

Our audit procedures included, among others:

- Assessing the competence, independence and integrity of the external valuers engaged by the Company;
- Obtaining the external valuation reports and meeting with the external valuers to discuss and challenge the valuation process, methodologies used and market evidence to support significant judgements and assumptions applied in the valuation model;
- Checking key assumptions and input data in the valuation model to supporting evidence;
- Checking arithmetical accuracy of the valuation model; and
- Assessing the disclosure of the fair value measurement in the consolidated financial statements.

We consider that the Group's fair value measurement of the investments at fair value through profit or loss using level 3 fair value measurement is supported by the available evidence.

KEY AUDIT MATTERS (Continued)

Debt investments

Refer to Note 22 to the consolidated financial statements.

The Group tested the amount of debt investments for impairment. This impairment test is significant to our audit because the balance of debt investments of HK\$3,749,489,000 as at 31 March 2024 is material to the consolidated financial statements. In addition, the Group's impairment test involves application of judgement and is based on assumptions and estimates.

Our audit procedures included, among others:

- Evaluating the Group's impairment assessment;
- Assessing the financial information of the debt investments;
- Obtaining and checking to evidence to support the Group's impairment assessment;
- Checking subsequent settlements from the debtors;
- Assessing the value of the collateral for the debts;
- Assessing the disclosure of the Group's exposure to credit risk in the consolidated financial statements;
- Assessing the competence, independence and integrity of the external valuer engaged by the Company;
- Obtaining the external valuation reports and meeting with the external valuer to discuss and challenge the valuation process, methodologies used and market evidence to support significant judgments and assumptions applied in the valuation model;
- Checking key assumptions and input data in the valuation model to supporting evidence; and
- Checking arithmetical accuracy of the valuation model.

We consider that the Group's impairment test for debt investments is supported by the available evidence.

關鍵審計事項(續)

3. MATERIAL ACCOUNTING POLICIES

These consolidated financial statements have been prepared in accordance with HKFRSs issued by the HKICPA, accounting principles generally accepted in Hong Kong and the applicable disclosures required by the Rules Governing the Listing of Securities on the Stock Exchange (the "Listing Rules") and by the Hong Kong Companies Ordinance.

These consolidated financial statements have been prepared under the historical cost convention, as modified by investments and derivative which are carried at their fair values.

The preparation of consolidated financial statements in conformity with HKFRSs requires the use of certain key assumptions and estimates. It also requires the directors to exercise its judgements in the process of applying the accounting policies. The areas involving critical judgements and areas where assumptions and estimates are significant to these consolidated financial statements, are disclosed in note 4 to the consolidated financial statements.

The material accounting policies applied in the preparation of these consolidated financial statements are set out below.

Consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries made up to 31 March. Subsidiaries are entities over which the Group has control. The Group controls an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The Group has power over an entity when the Group has existing rights that give it the current ability to direct the relevant activities, i.e. activities that significantly affect the entity's returns.

3. MATERIAL ACCOUNTING POLICIES

(Continued)

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. (Continued)

Consolidation (Continued)

When assessing control, the Group considers its potential voting rights as well as potential voting rights held by other parties, to determine whether it has control. A potential voting right is considered only if the holder has the practical ability to exercise that right.

Subsidiaries are consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date the control ceases.

The gain or loss on the disposal of a subsidiary that results in a loss of control represents the difference between (i) the fair value of the consideration of the sale plus the fair value of any investment retained in that subsidiary and (ii) the Company's share of the net assets of that subsidiary plus any remaining goodwill relating to that subsidiary and any related accumulated foreign currency translation reserve.

Intragroup transactions, balances and unrealised profits are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Associates

Associates are entities over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of an entity but is not control or joint control over those policies. The existence and effect of potential voting rights that are currently exercisable or convertible, including potential voting rights held by other entities, are considered when assessing whether the Group has significant influence. In assessing whether a potential voting right contributes to significant influence, the holder's intention and financial ability to exercise or convert that right is not considered.

3. MATERIAL ACCOUNTING POLICIES

(Continued)

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. (Continued)

Associates (Continued)

Investment in an associate is accounted for in the consolidated financial statements by the equity method and is initially recognised at cost. Identifiable assets and liabilities of the associate in an acquisition are measured at their fair values at the acquisition date. The excess of the cost of acquisition over the Group's share of the net fair value of the associate's identifiable assets and liabilities is recorded as goodwill. The goodwill is included in the carrying amount of the investment and is tested for impairment together with the investment at the end of each reporting period when there is objective evidence that the investment is impaired. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of acquisition is recognised in consolidated profit or loss.

The Group's share of an associate's post-acquisition profits or losses is recognised in consolidated profit or loss, and its share of the post-acquisition movements in reserves is recognised in the consolidated reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate. If the associate subsequently reports profits, the Group resumes recognising its share of those profits only after its share of the profits equals the share of losses not recognised.

The gain or loss on the disposal of an associate that results in a loss of significant influence represents the difference between (i) the fair value of the consideration of the sale plus the fair value of any investment retained in that associate and (ii) the Group's share of the net assets of that associate plus any remaining goodwill relating to that associate and any related accumulated foreign currency translation reserve. If an investment in an associate becomes an investment in a joint venture, the Group continues to apply the equity method and does not remeasure the retained interest.

(Continued)

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. (Continued)

Associates (Continued)

Unrealised profits on transactions between the Group and its associates are eliminated to the extent of the Group's interests in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group.

Joint arrangements

A joint arrangement is an arrangement of which two or more parties have joint control. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control. Relevant activities are activities that significantly affect the returns of the arrangement. When assessing joint control, the Group considers its potential voting rights as well as potential voting rights held by other parties, to determine whether it has joint control. A potential voting right is considered only if the holder has the practical ability to exercise that right.

A joint arrangement is either a joint operation or a joint venture. A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement.

3. MATERIAL ACCOUNTING POLICIES (Continued)

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. (Continued)

Joint arrangements (Continued)

Investment in a joint venture is accounted for in the consolidated financial statements by the equity method and is initially recognised at cost. Identifiable assets and liabilities of the joint venture in an acquisition are measured at their fair values at the acquisition date. The excess of the cost of acquisition over the Group's share of the net fair value of the joint venture's identifiable assets and liabilities is recorded as goodwill. The goodwill is included in the carrying amount of the investment and is tested for impairment together with the investment at the end of each reporting period when there is objective evidence that the investment is impaired. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of acquisition is recognised in consolidated profit or loss.

The Group's share of a joint venture's post-acquisition profits or losses is recognised in consolidated profit or loss, and its share of the post-acquisition movements in reserves is recognised in the consolidated reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in a joint venture equals or exceeds its interest in the joint venture, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the joint venture. If the joint venture subsequently reports profits, the Group resumes recognising its share of those profits only after its share of the profits equals the share of losses not recognised.

Foreign currency translation

(a) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in Hong Kong dollars ("HK\$"), which is the Company's functional and presentation currency.

(b) Transactions and balances in each entity's financial statements

Transactions in foreign currencies are translated into the functional currency on initial recognition using the exchange rates prevailing on the transaction dates. Monetary assets and liabilities in foreign currencies are translated at the exchange rates at the end of each reporting period. Gains and losses resulting from this translation policy are recognised in profit or loss.

Non-monetary items that are measured at fair values in foreign currencies are translated using the exchange rates at the dates when the fair values are determined.

When a gain or loss on a non-monetary item is recognised in other comprehensive income, any exchange component of that gain or loss is recognised in other comprehensive income. When a gain or loss on a non-monetary item is recognised in profit or loss, any exchange component of that gain or loss is recognised in profit or loss.

Foreign currency translation (Continued)

(c) Translation on consolidation

The results and financial position of all the Group entities that have a functional currency different from the Company's presentation currency are translated into the Company's presentation currency as follows:

- Assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position;
- (ii) Income and expenses are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the exchange rates on the transaction dates); and
- (iii) All resulting exchange differences are recognised in the exchange reserve.

On consolidation, exchange differences arising from the translation of the net investment in foreign entities and of borrowings are recognised in the exchange reserve. When a foreign operation is sold, such exchange differences are recognised in consolidated profit or loss as part of the gain or loss on disposal.

Equipment

Equipment are stated at cost less accumulated depreciation and impairment losses.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are recognised in profit or loss during the period in which they are incurred.

Depreciation of equipment is calculated at rates sufficient to write off their cost less their residual values over the estimated useful lives on a straight-line basis. The principal annual rates are as follows:

Motor vehicle	33 ¹ / ₃ %
Computer equipment	25%
Office equipment	25%
Furniture	25%
Leasehold improvements	331/3%

The residual values, useful lives and depreciation method are reviewed and adjusted, if appropriate, at the end of each reporting period.

The gain or loss on disposal of equipment is the difference between the net sales proceeds and the carrying amount of the relevant asset, and is recognised in profit or loss.

3. MATERIAL ACCOUNTING POLICIES (Continued)

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. (Continued)

Leases

Leases are recognised as right-of-use assets and corresponding lease liabilities when the leased assets are available for use by the Group. Right-of-use assets are stated at cost less accumulated depreciation and impairment losses. Depreciation of right-of-use assets is calculated at rates to write off their cost over the shorter of the asset's useful life and the lease term on a straight-line basis. The principal annual rate of buildings is 25% to 33½%.

Right-of-use assets are measured at cost comprising the amount of the initial measurement of the lease liabilities, lease payments prepaid, initial direct costs and the restoration costs. Lease liabilities include the net present value of the lease payments discounted using the interest rate implicit in the lease if that rate can be determined, or otherwise the Group's incremental borrowing rate. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease term so as to produce a constant periodic rate of interest on the remaining balance of the lease liability.

Payments associated with short-term leases and leases of low-value assets are recognised as expenses in profit or loss on a straight-line basis over the lease terms. Short-term leases are leases with an initial lease term of 12 months or less. Low-value assets are assets of value below United States dollars ("US\$") 5,000.

Intangible assets

Cryptocurrencies with indefinite useful life is stated at cost less any impairment losses. Impairment is reviewed annually or when there is any indication that cryptocurrencies has suffered an impairment loss.

3. MATERIAL ACCOUNTING POLICIES

(Continued)

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. (Continued)

Recognition and derecognition of financial instruments

Financial assets and financial liabilities are recognised in the statement of financial position when the Group becomes a party to the contractual provisions of the instruments.

Financial assets are derecognised when the contractual rights to receive cash flows from the assets expire; the Group transfers substantially all the risks and rewards of ownership of the assets; or the Group neither transfers nor retains substantially all the risks and rewards of ownership of the assets but has not retained control on the assets. On derecognition of a financial asset, the difference between the asset's carrying amount and the sum of the consideration received is recognised in profit or loss.

Financial liabilities are derecognised when the obligation specified in the relevant contract is discharged, cancelled or expires. The difference between the carrying amount of the financial liability derecognised and the consideration paid is recognised in profit or loss.

Financial assets

Financial assets are recognised and derecognised on a trade date basis where the purchase or sale of an asset is under a contract whose terms require delivery of the asset within the timeframe established by the market concerned, and are initially recognised at fair value, plus directly attributable transaction costs except in the case of investments at fair value through profit or loss. Transaction costs directly attributable to the acquisition of investments at fair value through profit or loss are recognised immediately in profit or loss.

Financial assets (Continued)

Financial assets of the Group are classified as under the following categories:

- Financial assets at amortised cost; and
- Investments at fair value through profit or loss.

(a) Financial assets at amortised cost

Financial assets (including accounts and other receivables and debt investments) are classified under this category if they satisfy both of the following conditions:

- the assets are held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

They are subsequently measured at amortised cost using the effective interest method less loss allowance for expected credit losses.

- 按攤銷成本列賬的財務資產;及
- 按公平值計入損益賬的投資。

(a) 按攤銷成本列賬的財務資產

倘財務資產(包括應收賬款及其 他應收款項及債務投資)同時符 合下列兩項條件則歸入此分類:

- 一 資產乃按目的為持有資產以 收取合約現金流量的業務模 式持有;及
- 一 資產的合約條款於特定日期 產生僅為支付本金及未償還 本金利息的現金流量。

有關資產其後使用實際利率法按 攤銷成本減預期信貸虧損的虧損 撥備計量。

3. MATERIAL ACCOUNTING POLICIES

(Continued)

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. (Continued)

Financial assets (Continued)

(b) Investments at fair value through profit or loss

Financial assets are classified under this category if they do not meet the conditions to be measured at amortised cost and the conditions of debt investments at fair value through other comprehensive income unless the Group designates an equity investment that is not held for trading as at fair value through other comprehensive income on initial recognition.

Investments at fair value through profit or loss are subsequently measured at fair value with any gains or losses arising from changes in fair values recognised in profit or loss. The fair value gains or losses recognised in profit or loss are net of any interest income and dividend income. Interest income and dividend income are recognised in profit or loss.

Loss allowances for expected credit losses

The Group recognises loss allowances for expected credit losses on financial assets at amortised cost. Expected credit losses are the weighted average of credit losses with the respective risks of a default occurring as the weights.

If, at the end of the reporting period, the credit risk on a financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to the portion of lifetime expected credit losses that represents the expected credit losses that result from default events on that financial instrument that are possible within 12 months after the reporting period.

The amount of expected credit losses or reversal to adjust the loss allowance at the end of the reporting period to the required amount is recognised in profit or loss as an impairment gain or loss.

(b) 按公平值計入損益賬的投資

除非本集團於初步確認時指定非持作買賣的股本投資為按公平值計入其他全面收益,否則倘財務資產並不符合按攤銷成本計量的條件,亦不符合按公平值計入其他全面收益的債務投資的條件,則歸入此分類。

按公平值計入損益賬之投資其後 按公平值計量,而公平值變動產 生的任何收益或虧損於損益確認。 於損益確認的公平值收益或虧損 乃扣除任何利息收入及股息收入。 利息收入及股息收入於損益確認。

預期信貸虧損之虧損撥備

本集團按攤銷成本確認財務資產之預期信貸虧損之虧損撥備。預期信貸虧損 為信貸虧損之加權平均數,發生違約情況之風險為加權考慮因素。

倘於報告期末某項財務工具之信貸風險自初步確認以來並無大幅增加,本集團按相等於全期預期信貸虧損部分之金額計量該財務工具之虧損撥備,即該財務工具可能於報告期後12個月內發生違約事件而導致之預期信貸虧損。

預期信貸虧損金額或旨在將報告期末 之虧損撥備調整至所需金額而撥回之 金額於損益確認為減值收益或虧損。

3. MATERIAL ACCOUNTING POLICIES (Continued)

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. (Continued)

Cash and cash equivalents

For the purpose of the consolidated statement of cash flows, cash and cash equivalents represent cash at bank and on hand, demand deposits with banks and other financial institutions, and short-term highly liquid investments which are readily convertible into known amounts of cash and subject to an insignificant risk of change in value. Bank overdrafts which are repayable on demand and form an integral part of the Group's cash management are also included as a component of cash and cash equivalents.

Financial liabilities and equity instruments

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument under HKFRSs. An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities. The accounting policies adopted for specific financial liabilities and equity instruments are set out below.

Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred, and subsequently measured at amortised cost using the effective interest method.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

Accounts and other payables

Accounts and other payables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method unless the effect of discounting would be immaterial, in which case they are stated at cost.

3. MATERIAL ACCOUNTING POLICIES

(Continued)

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. (Continued)

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss are initially recognised and subsequently measured at fair value with any gains or losses arising from changes in fair values recognised in profit or loss.

Equity instruments

Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

Revenue

Revenue is measured at the fair value of the consideration received in the ordinary course of the Group's activities.

Revenue is recognised when it is probable that future economic benefits will flow to the Group and the amount of revenue can be measured reliably, on the following bases:

- (i) Dividend income is recognised when the shareholders' rights to receive payment are established.
- (ii) Interest income is recognised on a time-proportion basis using the effective interest method. When a loan and receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loan and receivables are recognised using the original effective interest rate.

按公平值計入損益賬之財務負債

按公平值計入損益賬之財務負債初步確認,其後按公平值計量,而公平值變動所產生的任何收益或虧損則於損益中確認。

股權工具

本公司所發行之股權工具乃按已收所 得款項扣除直接發行成本後記錄。

收益

收益乃按本集團於日常業務中已收代 價之公平值計算。

收益於有關未來經濟利益有很大可能 流入本集團及有關收益能可靠地計量 時根據以下基準予以確認:

- (i) 股息收入於確立股東收取付款之權利時予以確認。
- (ii) 利息收入根據實際利率法按時間 比例確認。倘貸款及應收款項出 現減值,則本集團將賬面值減至 可收回金額,即按工具原實際利 率貼現之估計未來現金流量,並 繼續將所貼現金額撥為利息收入。 減值貸款及應收款項之利息收入 使用原實際利率確認。

3. MATERIAL ACCOUNTING POLICIES (Continued)

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. (Continued)

Employee benefits

(a) Employee leave entitlements

Employee entitlements to annual leave and long service leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave and long service leave as a result of services rendered by employees up to the end of the reporting period.

Employee entitlements to sick leave and maternity leave are not recognised until the time of leave.

(b) Pension obligations

The Group participates in a mandatory provident fund scheme in Hong Kong which is a defined contribution retirement scheme available to all employees, generally funded through payments to trustee-administered funds. Contributions to the schemes by the Group and employees are calculated as a percentage of employees' basic salaries. The retirement benefit scheme cost charged to profit or loss represents contributions payable by the Group to the funds.

(c) Termination benefits

Termination benefits are recognised at the earlier of the dates when the Group can no longer withdraw the offer of those benefits and when the Group recognises restructuring costs and involves the payment of termination benefits.

(Continued)

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. (Continued)

Employee benefits (Continued)

(d) Bonus

The expected costs of bonus payments are recognised as a liability when the Group has a present legal or constructive obligation as a result of services rendered by employees and a reliable estimate of the obligations can be made.

Liabilities for bonus are measured at the amounts expected to be paid when they are settled.

Share-based payments

The Group issues equity-settled share-based payments to certain director and employees.

Equity-settled share-based payments to director and employees are measured at the fair value (excluding the effect of non market-based vesting conditions) of the equity instruments at the date of grant. The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of shares that will eventually vest and adjusted for the effect of non market-based vesting conditions.

When the share options are exercised, the amount previously recognised in share-based payment reserve will be transferred to share capital and share premium. When the share options are forfeited or lapsed after the vesting date or are still not exercised at the expiry date, the amount previously recognised in share-based payment reserve will be transferred to retained profits/accumulated losses.

於購股權獲行使時,先前在股份支付款項儲備中確認之款項將轉移至股本及股份溢價。當購股權於歸屬日後遭沒收或失效或於到期日尚未獲行使,先前在股份支付款項儲備中確認之款項將轉移至保留盈利/累計虧損。

FOR THE YEAR ENDED 31 MARCH 2024 截至二零二四年三月三十一日止年度

3. MATERIAL ACCOUNTING POLICIES (Continued)

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. (Continued)

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are capitalised as part of the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

To the extent that funds are borrowed generally and used for the purpose of obtaining a qualifying asset, the amount of borrowing costs eligible for capitalisation is determined by applying a capitalisation rate to the expenditures on that asset. The capitalisation rate is the weighted average of the borrowing costs applicable to the borrowings of the Group that are outstanding during the period, other than borrowings made specifically for the purpose of obtaining a qualifying asset.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

Taxation

Income tax represents the sum of the current tax and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit recognised in profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

借款成本

收購、建造或生產合資格資產(即需要一長段時間作準備以達致其擬定用金或出售之資產)直接應佔之借款成本,直發充資本作為該等資產之部分成本,直至該等資產大致上可用作擬定用途或出售為止。在特定借款撥作合資格資資本之世前暫時用作投資所賺取之投資收入,乃自合資格撥充資本之借款成本中扣除。

以一般性借入資金用於獲取合資格資產為限,可撥充資本之借款成本數額乃透過該項資產支出所採用之資本化率而釐定。資本化率乃適用於本集團借款(於有關期間內尚未償還)之借款成本之加權平均數,惟特別為獲取合資格資產而作出之借款則除外。

所有其他借款成本按其產生期間於損 益中確認。

税項

所得税指即期税項及遞延税項之總和。

應付即期稅項乃按年內應課稅溢利計算。應課稅溢利與損益賬確認的溢利不同,此乃由於前者不包括於其他年度應課稅或可扣稅之收入或開支項目,並且不包括從未課稅或可扣稅之項目。本集團之即期稅項負債使用報告期末前已頒佈或實質已頒佈之稅率計算。

3. MATERIAL ACCOUNTING POLICIES

(Continued)

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. (Continued)

Taxation (Continued)

Deferred tax is recognised on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences, unused tax losses or unused tax credits can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised, based on tax rates that have been enacted or substantively enacted by the end of the reporting period. Deferred tax is recognised in profit or loss, except when it relates to items recognised in other comprehensive income or directly in equity, in which case the deferred tax is also recognised in other comprehensive income or directly in equity.

遞延税項資產之賬面值乃於各報告期 末進行檢討,並於預期將不可能有充裕 之應課税溢利以抵銷所有或部分將予 收回之資產時調減。

遞延稅項乃根據於報告期末已頒佈或 實質已頒佈之稅率,按預期在負債償還 或資產變現期間適用之稅率計算。遞延 稅項乃於損益內確認,惟倘遞延稅項與 於其他全面收益或直接於權益確認之 項目相關,在此情況下遞延稅項亦會在 其他全面收益或直接於權益內確認。

3. MATERIAL ACCOUNTING POLICIES (Continued)

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. (Continued)

Taxation (Continued)

The measurement of deferred tax assets and liabilities reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

Segment reporting

Operating segments and the amounts of each segment item reported in the consolidated financial statements are identified from the financial information provided regularly to the Group's most senior executive management for the purpose of allocating resources and assessing the performance of the Group's various lines of business.

Individually material operating segments are not aggregated for financial reporting purposes unless the segments have similar economic characteristics and are similar in respect of the nature of products and services, the nature of productions processes, the type or class of customers, the methods used to distribute the products or provide the services, and the nature of the regulatory environment. Operating segments which are not individually material may be aggregated if they share a majority of these criteria.

 - (viii) The entity, or any member of a group of which it is a part, provides key management personnel services to the Company or to a parent of the Company.

Impairment of assets

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets except investments and receivables to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of any impairment loss. Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

可收回金額乃公平值減出售成本與使 用價值兩者中較高者。在評估使用價值 時,估計日後現金流量按反映當時市場 對貨幣時值之評估及資產特定風險的 税前貼現率折算至其現值。

3. MATERIAL ACCOUNTING POLICIES

(Continued)

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. (Continued)

Impairment of assets (Continued)

If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset or cash-generating unit in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

Non-current assets held for sale

Non-current assets or disposal group are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the assets or disposal group are available for immediate sale in their present condition. The Group must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets or disposal group classified as held for sale are measured at the lower of the assets' or disposal group's previous carrying amount and fair value less costs to sell.

倘減值虧損其後撥回,資產或現金產生單位之賬面值乃增至其經重新估計超可收回金額,惟已增加賬面值不得超過於過往年度並無確認資產或現金產生單位減值虧損而釐定之賬面值(扣餘對強力確認,惟倘相關資產以重估價值別賬,在此情況下減值虧損撥回視作重估價值增加處理。

持作出售之非流動資產

倘非流動資產或出售組別之賬面值主 要通過銷售交易而非通過持續使用 回,則其將分類為持作出售。僅於出售 機會相當高及資產或出售組別可於現 況下即時出售時,本條件方被視為 成。本集團必須對出售作出承擔,而 告預期應可於分類日期起計一年內符 合確認為已完成出售之資格。

分類為持作出售之非流動資產或出售 組別按資產或出售組別之過往賬面值 與公平值減出售成本之間的較低者計 量。

3. MATERIAL ACCOUNTING POLICIES (Continued)

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. (Continued)

Provisions and contingent liabilities

Provisions are recognised for liabilities of uncertain timing or amount when the Group has a present legal or constructive obligation arising as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made. Where the time value of money is material, provisions are stated at the present value of the expenditures expected to settle the obligation.

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events are also disclosed as contingent liabilities unless the probability of outflow is remote.

Events after the reporting period

Events after the reporting period that provide additional information about the Group's position at the end of the reporting period or those that indicate the going concern assumption is not appropriate are adjusting events and are reflected in the consolidated financial statements. Events after the reporting period that are not adjusting events are disclosed in the notes to the consolidated financial statements when material.

4. CRITICAL JUDGEMENT AND KEY ESTIMATES 4. 重大判斷及關鍵估計

Critical judgement in applying accounting policies

In the process of applying the accounting policies, the Directors have made the following judgement that has the most significant effect on the amounts recognised in the consolidated financial statements:

Assessment of the Company's status as an investment entity under HKFRS 10

In preparing the consolidated financial statements, significant judgment has been applied by the management in the determination of the Company's status as an investment entity under Amendments to HKFRS 10 "Consolidated Financial Statements". Management have assessed the definition of an investment entity under HKFRS 10 and given that the performance of the investments in associates are not measured on a fair value basis, management have concluded that the Company does not fall within the definition of an investment entity under HKFRS 10.

於應用會計政策的過程,董事已作出以 下對綜合財務報表確認金額造成最重 大影響的判斷:

於編製綜合財務報表時,管理層就根據香港財務報告準則第10號「綜合財務報表」之修訂釐定本公司作為投資實體時已作出重大判斷。管理層已評估香港財務報告準則第10號對投資實體之定義,而基於在聯營公司之投資表現並結論,認為本公司不屬於香港財務報告準則第10號所界定之投資實體。

FOR THE YEAR ENDED 31 MARCH 2024 截至二零二四年三月三十一日止年度

4. CRITICAL JUDGEMENT AND KEY ESTIMATES (Continued)

Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

(a) Fair value of investments at fair value through profit or loss not quoted in an active market and underlying investments of investment in an associate

In the absence of quoted market prices in an active market, the directors estimate the fair value of the Group's investments at fair value through profit or loss and underlying investments of investment in an associate, details of which are set out in notes 21 and 20 to the consolidated financial statements respectively, by considering information from a variety of sources, including the latest published financial information, the historical data on market volatility as well as the price and industry and sector performance of the Group's investments at fair value through profit or loss and underlying investments of investment in an associate.

(b) Expected credit losses ("ECL") of debt investments and bad and doubtful debts

The Group makes impairment loss for debt investments and bad and doubtful debts based on assessments of the recoverability of debt investments and receivables, including the current creditworthiness and the past collection history of each debtor. Impairments arise where events or changes in circumstances indicate that the balances may not be collectible. The identification of debt investments and bad and doubtful debts requires the use of judgement and estimates. Where the actual result is different from the original estimate, such difference will impact the carrying value of debt investments and receivables and doubtful debt expenses in the year in which such estimate has been changed.

4. 重大判斷及關鍵估計(續)

估計不確定因素的主要來源

下文詳述於報告期末有關日後的主要 假設及估計不確定因素的其他主要來 源,而有關假設及不確定因素會造成下 一個財政年度的資產及負債賬面值極 有可能作出重大調整之重大風險。

(a) 並無活躍市場報價的按公平值計 入損益賬之投資及於聯營公司之 投資之相關投資公平值

(b) 債務投資及呆壞賬的預期信貸虧 損(「預期信貸虧損」)

5 FINANCIAI RISK MANAGEMENT

The Group's activities expose it to a variety of financial risks: foreign currency risk, price risk, credit risk, liquidity risk and interest rate risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

(a) Foreign currency risk

The Group has certain exposure to foreign currency risk as certain investments at fair value through profit or loss, other receivables, bank balances, other payables and borrowings are denominated in Renminbi ("RMB"). The Group currently does not have a foreign currency hedging policy in respect of foreign currency transactions, assets and liabilities. The Group will monitor its foreign currency exposure closely and will consider hedging significant foreign currency exposure should the need arise.

As at 31 March 2024, if RMB had strengthened/ weakened 0.5% against HK\$ with all other variables held constant, profit after tax for the year would have been HK\$14,187,000 (2023: HK\$10,197,000) higher/lower, arising mainly as a result of the foreign exchange gains/losses on translation of certain investments at fair value through profit or loss, other receivables, bank balances, other payables and borrowings denominated in RMB.

5. 財務風險管理

本集團業務面對多種財務風險:外匯風險、價格風險、信貸風險、流動資金風險及利率風險。本集團整體的風險管理計劃專注於財務市場的不可預測性,並尋求降低對本集團財務表現的潛在不利影響。

(a) 外匯風險

於二零二四年三月三十一日,倘人民幣兑港幣升值/貶值0.5%,而所有其他變量維持不變一種持不夠後盈利將增加/減少港幣14,187,000元(二零二三年:港幣10,197,000元),主要由於換計之民幣列值的若干按公平值計入民幣列值的若干按公平值計銀元。其他應付款項及借款產生外匯收益/虧損所致。

FOR THE YEAR ENDED 31 MARCH 2024 截至二零二四年三月三十一日止年度

5. FINANCIAL RISK MANAGEMENT (Continued) 5. 財務風險管理(續)

(b) Price risk

The Group's investments at fair value through profit or loss are measured at fair value at the end of each reporting period. Therefore, the Group is exposed to equity security price risk. The Directors manage this exposure by maintaining a portfolio of investments with difference risk profiles.

As at 31 March 2024, if the fair value of the investments increase/decrease by 10%, profit before tax would have been HK\$658,036,000 (2023: HK\$665,822,000) higher/lower, arising as a result of the fair value gain/loss of the investments.

(c) Credit risk

As at 31 March 2024, the Group's maximum exposure to credit risk in the event of the counterparties fail to perform their obligations in relation to each class of recognised financial assets is the carrying amount of these assets as stated in the consolidated statement of financial position.

The credit risk on bank balances is limited because most of the counterparties are banks with investmentgrade credit-ratings assigned by international creditrating agencies.

(b) 價格風險

本集團按公平值計入損益賬之投 資乃於各報告期末按公平值計量。 因此,本集團面臨股本證券價格 風險。董事通過維持不同風險的 投資組合來管理該風險。

於二零二四年三月三十一日,倘投資公平值增加/減少10%,因投資公平值收益/虧損,稅前盈利將增加/減少港幣658,036,000元(二零二三年:港幣665,822,000元)。

(c) 信貸風險

於二零二四年三月三十一日,本 集團就交易對方未能履行其與各 類已確認財務資產之責任相關之 信貸風險最大為列於綜合財務狀 況表之該等資產之賬面值。

由於大部分交易對方均為獲國際 信貸評級機構授予投資級信貸評 級之銀行,故因銀行結存而承受 之信貸風險實為有限。

FOR THE YEAR ENDED 31 MARCH 2024 截至二零二四年三月三十一日止年度

5. FINANCIAL RISK MANAGEMENT (Continued)

5. 財務風險管理(續)

(c) Credit risk (Continued)

The Group exposed to the credit risk if the counterparty to a financial instrument would fail to perform its obligation. The Group considers its exposure to credit risk increased because of the higher investment amount in debt securities. The directors have overall responsibility for overseeing the credit quality of the debt portfolio. The management delegated investment teams responsible for monitoring processes to ensure that follow-up actions are taken to recover doubtful debts. Financial positions of the underlying companies are closely monitored by regularly reviewing their financial and operation results and assessing their abilities to fulfill the repayment obligations.

In order to minimise the credit risk, the Group reviews the recoverable amount of each loan, dividend, interest and other receivables at the end of the reporting period to ensure that adequate impairment losses are made for irrecoverable amounts.

The Group uses three categories for debt investments, accounts, loan receivables and others which reflect their credit risk and how the provision for ECL is determined for each of those categories. The credit loss allowance includes ECL for financial instruments that may default in the next 12-month period for financial instruments that have not observed a significant increase in credit risk since initial recognition ("Stage 1") or over a lifetime period for financial instruments that have observed a significant increase in credit risk since initial recognition ("Stage 2"). The allowance also includes lifetime ECL for financial instruments where there is objective evidence of credit-impairment at the end of the reporting period ("Stage 3").

(c) 信貸風險(續)

為盡量降低信貸風險,本集團於報告期末審閱各項貸款、股息、利息、及其他應收款項之可收回金額,以確保就不可收回金額作出 足夠減值虧損撥備。

(e) Interest rate risk

The Group's debt investments, loan receivables, other receivables, other payables and borrowings bear interests at fixed interest rates and therefore are subject to fair value interest rate risks.

The Group's exposure to interest-rate risk arises from its bank balances and bank borrowings. These balances bear interests at variable rates varied with the then prevailing market condition.

As at 31 March 2024, if interest rates at that date had been 25 basis points higher/lower with all other variables held constant, profit for the year would have been HK\$637,000 (2023: HK\$1,351,000) lower/ higher, arising mainly as a result of higher/lower interest on bank borrowings.

Notes:

- (a) During the year, there were no changes in the valuation techniques used except the following investments:
 - (i) 華建實業投資有限公司

(ii) 德興市益豐再生有色金屬有限責任公司

The valuation technique was changed from "Market comparable companies" to "Latest transaction price" as the transaction price was arrived within a year and constituted an appropriate reference for the most recent valuation.

(iii) 深圳量旋科技有限公司

The valuation technique was changed from "Latest transaction price" to "Market comparable companies" as the transaction price was arrived at for more than a year ago and no longer constituted an appropriate reference for the most recent valuation and "Market comparable companies" is a more appropriate approach to value fair value of a company that is under development stage with great growth potential in the future.

(iv) Value Internet Fund I

The valuation technique was changed from "Latest transaction price" to "Share of net assets" as the transaction price was arrived at for more than a year ago and no longer constituted an appropriate reference for the most recent valuation and "Share of net assets" is a more appropriate approach.
