Explanations on major accounting information and financial indicators of the Company:

The decreases in operating income, net profit attributable to shareholders of the Company and net profit attributable to shareholders of the Company after deducting extraordinary profit and loss were mainly due to the fierce competition for existing customers in the market of LCD display panels segment of the green and service-oriented electronic manufacturing business, resulting in the year-on-year decrease in income and the expansion of new customers not reaching expectations; and the decrease in net cash flow from operating activities was mainly due to the year-on-year decrease in cash received from the sale of goods and rendering of services.

#### **III. MANAGEMENT DISCUSSION AND ANALYSIS**

#### 3.1 The discussion and analysis on the operation

In the first half of 2024, the Company's overall operating results declined signification due to the comprehensive impact of factors such as intensified customer market competition, shift in business model and adjustment of product and business structure in some business segments. During the Reporting Period, the Company recorded revenue of RMB1,250,346,500, total loss of RMB36,574,300 and net loss attributable to the parent company of RMB68,198,100.

During the Reporting Period, fierce competition for existing customers in the market of LCD display panels segment of the green and service-oriented electronic manufacturing business resulted in corresponding year-on-year decline in revenue and profit, and the expansion of new customers failed to meet expectations. In order to cope with changes in the market and customer demand, the Company actively adjusted its product structure to expand new customers in the field of automotive electronics and other areas, striving to achieve new breakthroughs. The Company's industrial internet and intelligent manufacturing business segment adjusted its product and business structure and has not yet reached the expected market scale, which had a certain impact on the net profit attributable to owners of the parent company.

### **3.2** Analysis of investments

## 3.2.1 Overall analysis of equity investment

In the first half of 2024, the Company proceeded with investments in fixed assets and relevant projects in a prudent, standardized and disciplined manner as required by the Board and in strict compliance with the annual capital expenditure budget and actual operating situation.

#### 3.2.2 Analysis of major subsidiaries and investee companies

#### (1) Information of major subsidiaries

From January to June 2024, the Company endeavored to work on the development of its three main businesses and spared no effort to develop markets, with its major subsidiaries operating in an orderly manner. Electronics Equipment Company is undergoing operating loss due to the adjustment of product and business structure and has not yet reached the expected market scale, but the amount of loss has been narrowed compared with the same period of the previous year. Communication Technology Company is in a loss position during the period due to increased R&D investment and product structure adjustment. The Company will optimise and iterate the existing technology of industrial Internet and intelligent manufacturing and other businesses, combined with practical applications and user needs, dynamically adjust the product direction, and continue to develop in the new energy, military technological reform and other fields based on the advantages of the industry, and strive to make new breakthroughs in the smart instrument assembly automation industry, warehousing and logistics industry, and actively expand the market of information technology application innovation. The current operating results of Electronic Manufacture Company and Chengdu Electronic Technology have been greatly affected due to fierce competition for existing customers in the market of LCD display panels segment, resulting in the year-on-year decrease in income and the expansion of new customers not reaching expectations. The Company will endeavour to maintain the stability of the existing business, and actively respond to changes in the market and customer demand, and actively adjust the product structure to expand new customers in the field of automotive electronics and other areas, striving to achieve new breakthroughs. The overview of major subsidiaries is set out below:

#### **NOTES:**

#### (I) Basis of preparation

The financial statements have been prepared in accordance with the basic and specific standards of the Accounting Standards for Business Enterprises, the Application Guidance for Accounting Standard for Business Enterprises, interpretations of the Accounting Standards for Business Enterprises and other relevant regulations issued by the Ministry of Finance (hereinafter collectively referred to as "**CAS**"), and the disclosure requirements in the Preparation Convention of Information Disclosure by Companies Offering Securities to the Public No. 15 – General Provisions on Financial Reporting issued by the China Securities Regulatory Commission. In addition, the financial statements comply with the applicable disclosure provisions of the rules governing the listing of securities issued by The Stock Exchange of Hong Kong Limited and with the applicable disclosure provisions of the Hong Kong Companies Ordinance.

#### (II) Going concern

This financial statement is prepared on a going concern basis.

#### (III) Segment information

The Company established 3 reportable segments on the basis of the internal organisational structure, management requirement and internal report system, namely, smart transportation and safe city, green and service-oriented electronic manufacturing, industrial internet and intelligent manufacturing. Each segment provides different products and service, or engages in business operations from different areas. Due to the different demands of each segment for different technology and marketing strategy, the Company's management monitors the different segments in respect of their business activities separately, and evaluate the operating results on a regular basis in order to allocate resources and evaluate their performance.

The transfer price between different segments is based on the actual transaction price, and the costs which shall be jointly assumed by each segment are allocated in proportion. Assets are allocated in accordance with business operations of various segments and the location where such assets are situated. Segment liabilities include the liabilities incurred for business activities of a segment which shall be assumed on its own. If the costs related to a joint liability involving certain operating segments, the liability and relevant costs would be allocated to such segments in proportion.

Non-current assets are classified according to the areas where the assets belong. All the non-current assets of the Company are located in the China Mainland.
