MANAGEMENT DISCUSSION AND ANALYSIS

Business Review

The Group was established in March 2014 primarily engaging in the development and manufacturing of non-biodegradable automobile plastic parts. In response to the PRC Government's environmental protection policies and regulations relating to restriction and prohibition of the use of non-biodegradable plastics and controlled plastic pollution (the "Policies and Regulations"), we, since 2015, had gradually diversified our business into the development and manufacturing of biodegradable plastic products while maintaining the operation for non-biodegradable automobile plastic parts which accounted for approximately 6.7% and approximately 4.1% of the Group's total revenue during the six months ended 30 June 2024 (the "Period") and the six months ended 30 June 2023 (the "Preceding Period"), respectively.

We made notable achievement in strengthening our brand equity and shareholders' base by listing (the "Listing") of the Company's shares (the "Shares") on The Main Board of the Stock Exchange of Hong Kong (the "Stock Exchange") on 31 March 2023 (the "Listing Date"). This strategic move placed us in a strong position in pursuing our mission to further expand the Group's operations in terms of productivity, innovative technologies and sustainability. We had successfully raised the net proceeds of approximately HK\$155.4 million, which were partly utilised during the Period to actualise our strategic imperatives with details as disclosed in this announcement.

As such, the Group is principally engaged in developing and manufacture of biodegradable plastic products in the Northeast China with its main production base located in Changchun, Jilin province, the PRC. In order to cope with the anticipated growing demand of biodegradable plastic products in the Southeast China, the Group established two production bases in Dongguan, Guangdong province, the PRC and Anji, Zhejiang province, the PRC in 2023, to expand our business into Southeast China. The new Dongguan factory – Phase 1 has operated in full scale during the Period. On the other hand, the Group considered that the Anji factory still has not met the Group's requirements for stable production after the Group leased the Anji factory in 2023 and ordered relevant machineries.

Our biodegradable products mainly comprise (i) biodegradable produce bag rolls; (ii) biodegradable shopping bags; and (iii) biodegradable stretch wraps. During the Period, all our biodegradable products were sold to customers in the PRC, mainly in the Northeast China, which accounted for approximately 79.9% (The Preceding Period: approximately 81.0%) of the Group's total revenue, whilst the sales to other cities in the PRC accounted for the remaining approximately 20.1% (The Preceding Period: approximately 19.0%).

We had contributed the discussion and formulation of the national standard for biodegradable plastic shopping bags, namely, "GB/T 38082-2019", which was issued by The State Administration for Market Regulation of the PRC and The Standardization Administration of the PRC in October 2019. The "GB/T 38082-2019" has remained as the sole and only national standard in the PRC for biodegradable plastic shopping bags since then. In view of our expertise in the industry and the recognition earned from the PRC Government, we have possessed the competitive strength in the areas of production capabilities, technology level and quality control, which positioned us as the market leader in this policy-driven market.

During the Period, we continued to devote resources to further strengthen our production capacity and deepen our cooperation with major research organizations, including the research and development ("R&D") of biodegradable plastic products through collaboration with The Changchun Institute of Applied Chemistry Chinese Academy of Science ("CIAC"), a third-party research institute, in which we owned the rights to the R&D results. The Group also joined as members of those plastic production related industry associations in the PRC, including the Degradable Plastics Committee of China Plastic Processing Industry Association and The Changchun Die & Mold Industry Association so as to embrace the changing market trends and bring new growth momentum to the Group's business development.

Prospects

The development of the biodegradable plastic products market in the PRC is driven by the Policies and Regulations. Since 2021, the PRC Government has gradually imposed the Policies and Regulations in different provinces. During the Period, the PRC Government further imposed the Policies and Regulations in Henan province, which shopping malls, supermarkets, pharmacies, bookstores and other places across Henan province have been prohibited the use of non-biodegradable plastics. In align with the prohibition on use of non-biodegradable plastic products in more provinces in China, the market demand on our biodegradable plastic products has been increased.

Undoubtedly, the PRC Government is committed to uphold a clean and green environment and will continue to strongly support environmental protection industries relating to development and manufacturing of environmental products. It has been clearly stated that the prohibition on the use of non-degradable plastic bags will be expanded to the various marketplaces by the end of 2025. In recent years, the PRC Government has successively issued a series of policies to support the development of biodegradable materials, such as the "Opinions on Further Strengthening the Control of Plastic Pollution(關於進一步加強塑料污染治理的意見)" and "Catalogue of Plastic Products Prohibited or Restricted From Production, Sale and Use (Draft for comments)(禁止、限制生產、銷售和使用的塑料製品目錄(徵求意見稿)", which clearly stipulate and promote the application of biodegradable materials.

In view of (i) the increase in demand of biodegradable plastic products in compliance with the Policies and Regulations; (ii) a number of favorable policies and initiatives promulgated by the PRC Government; and (iii) the fundamental change to the dining and consumption habits of the local residents in the PRC from eating out to preparing meals at home and/or ordering takeaway which, contributed to the increase of sale of perishable food and fruits, and thus, in turn, stimulated the use of biodegradable shopping bags and biodegradable produce bag rolls, we have confidence that against this backdrop, the prospects for biodegradable plastic products business are optimistic and our Group is well positioned to navigate the business opportunities and challenges ahead.

Financial Review

Revenue

For the Period, the Group's revenue recorded an increase of approximately 8.6% to approximately RMB196.9 million, as compared with approximately RMB181.3 million recorded for the Preceding Period. This positive performance was attributed to the continuing demand for biodegradable plastic products, the effectiveness of the Policies and Regulations, and the fundamental change to the dining and consumption habits of the local residents in the PRC from eating out to preparing meals at home and/or ordering takeaway. This led to the increase in sales of the biodegradable plastic products of the Group including biodegradable produce bag rolls and biodegradable shopping bags.

Cost of Sales

During the Period, the Group's cost of sales amounted to approximately RMB118.5 million, representing an increase of approximately 7.4%, as compared with approximately RMB110.3 million for the Preceding Period. This increase was primarily due to the increase in production costs and raw material costs in line with the increased revenue during the Period.

Gross Profit and Gross Profit Margin

During the Period, as a results of increase in revenue, the Group recorded gross profit amounted to approximately RMB78.4 million, versus approximately RMB71.0 million recorded for the Preceding Period, representing an increase of approximately 10.4%, whilst the gross profit margin for the Period was approximately 39.8%, against approximately 39.1% for the Preceding Period.

Other Income

During the Period, the Group's other income amounted to approximately RMB0.9 million, as compared with approximately RMB2.9 million recorded for the Preceding Period, representing a decrease of approximately 69.0%. Such decrease was mainly attributable to (i) the decrease in the government grants, which amounted to approximately RMB0.4 million for the Period, as compared with approximately RMB1.6 million for the Preceding Period. The government grants included various forms of subsidy granted to the Group by the local government authorities in the PRC for compensation of expenses incurred by the Group during the Period and were made as business supports and awarded to the Group on a discretionary basis and one-off in nature; and (ii) the decrease in interest income, which amounted to approximately RMB0.5 million for the Period, as compared with approximately RMB1.3 million for the Preceding Period.

Selling and Distribution Expenses

The Group's selling and distribution expenses for the Period amounted to approximately RMB2.4 million, representing a decrease of approximately 25.0%, as compared with approximately RMB3.2 million recorded for the Preceding Period. Such decrease was mainly due to the decrease in marketing consultation fee from approximately RMB0.7 million for the Preceding Period to nil for the Period, which was one-off in nature.

Administrative and Other Operating Expenses

During the Period, the Group's administrative and other operating expenses decreased to approximately RMB18.7 million from approximately RMB20.2 million recorded for the Preceding Period. Such decrease of approximately 7.4% was mainly due to combination of the following factors: (i) the decrease in depreciation of right-of-use assets by approximately RMB3.5 million, which were mainly derived from the termination of the lease of Huizhou factory during the second half of 2023, partially offset by additions of lease in Dongguan and Anji factories in 2023; (ii) the decrease in legal and professional fees by approximately RMB3.3 million due to cost control of the Group; partially offset by the increase in the R&D expenses by approximately RMB5.7 million mainly incurred for the R&D projects collaborated with CIAC.

Finance Costs

During the Period, the Group's finance costs amounted to approximately RMB1.7 million, as compared with the amount of approximately RMB2.4 million for the Preceding Period, representing a decrease of approximately 29.2%. Such decrease was mainly due to (i) the decrease in interest on bank loans by approximately RMB0.4 million; and (ii) the decrease in interest on lease liabilities by approximately RMB0.3 million for the Period.

Listing Expenses

The Group did not record listing expenses during the Period, versus the amount of approximately RMB2.3 million for the Preceding Period. Such decrease was due to the completion of the Listing on 31 March 2023. These expenses were non-recurring in nature and treated as one-off expenses.

Income Tax Expenses

The Group's income tax expenses increased from approximately RMB7.2 million for the Preceding Period to approximately RMB8.3 million for the Period, representing an increase of approximately 15.3%, which was mainly attributable to the increase of profit before tax as a result of the positive business performance achieved by the Group for the Period.

Profit for the Period

The Group recorded a profit for the Period of approximately RMB48.2 million, as compared the profit for the Preceding Period of approximately RMB38.6 million. The increase in profit by approximately 24.9% for the Period was mainly resulted from (i) the increase in gross profit derived from the increase in revenue for the Period; and (ii) the decrease in listing expenses during the Period.

Property, Plant and Equipment

The property, plant and equipment of the Group slightly decreased to approximately RMB97.4 million as at 30 June 2024, as compared with approximately RMB99.8 million as at 31 December 2023, which was due to depreciation of property, plant and equipment of approximately RMB5.1 million; partially offset by the additions on property, plant and equipment of approximately RMB2.7 million for the Period.

Right-of-Use Assets

The right-of-use assets of the Group slightly decreased to approximately RMB10.2 million as at 30 June 2024, as compared with approximately RMB11.7 million as at 31 December 2023. Such decrease was due to the depreciation of right-of-use assets of approximately RMB2.3 million charged for the Period. The decrease in depreciation expenses was due to combination of early termination of lease in Huizhou factory during the second half of 2023, partially offset by additions of lease in Dongguan and Anji factories in 2023.

Inventories

As at 30 June 2024, the inventories balance of the Group amounted to approximately RMB31.3 million, as compared with the balance of approximately RMB21.2 million as at 31 December 2023. The increase in inventories balance of the Group was due to maintaining higher raw material levels for cost control during procurement.

Trade and Other Receivables

As at 30 June 2024, the trade and other receivables of the Group amounted to approximately RMB112.1 million, as compared with approximately RMB108.7 million recorded as at 31 December 2023. Such increase of approximately 3.1% was mainly attributed by the increase in sales orders of the Group for the Period.

Trade and Other Payables

As at 30 June 2024, the trade and other payables of the Group amounted to approximately RMB63.0 million, as compared with approximately RMB44.5 million as at 31 December 2023. Such increase of approximately 41.6% was mainly attributable to (i) the increase in production costs and maintaining higher raw material levels to cope with the increased sales during the Period; and (ii) the increase in amount due to a director by approximately RMB7.9 million for operating purpose, which is unsecured, interest-free and repayable on demand. The amount was fully settled in August 2024.

Liquidity and Financial Resources and Capital Structure

The Group exercised a high level of prudence through stringent review of liquidity, risk exposure and market conditions and reacted swiftly to identify and mitigate risks.

As at 30 June 2024, the Group had maintained liquidity with cash and cash equivalents of approximately RMB381.7 million, as compared with approximately RMB315.7 million as at 31 December 2023.

As at 30 June 2024 the Group had interest-bearing borrowings of approximately RMB59.4 million, against approximately RMB49.7 million as at 31 December 2023. Details of the profile, currencies, maturity and interest rates of the borrowings are set out in note 13 to the condensed consolidated financial statements in this announcement.

The Group's gearing ratio as at 30 June 2024 was approximately 14.3%, compared to approximately 13.7% as at 31 December 2023. The gearing ratio equals to total debts divided by total equity, whereby total debts include interest-bearing borrowings and lease liabilities. The gearing ratio was stable among two periods.

During the Period, the Group financed its operations with loan facilities provided by banks and financial institutions and internal cash flows. The Directors considered that the Group maintained adequate liquidity position for its business operations with sufficient buffer for contingencies.

Treasury Policies

The Group implemented prudent treasury policies to maintain strong flexibility and capability to fund its business operations and manage unexpected contingencies. During the Period, the management performed credit assessments and evaluation of financial status of its customers to mitigate the Group's credit risk exposure while closely monitored the Group's liquidity position to ensure availability of sufficient financial resources to meet with the Group's funding requirements and commitments.

Exchange Rate Exposure

The majority of the Group's transactions, assets and liabilities were denominated in RMB. Since the exchange rate risk was not significant, the Group did not commit to any financial instruments to hedge against its foreign exchange exposure during the Period. The Directors and senior management closely monitor the foreign exchange exposure of the Group and will consider appropriate financial derivatives as and when necessary.

As at 30 June 2024, the Group's interest-bearing borrowings and lease liabilities were secured by charges over the following assets of the Group:

Human Resources

As at 30 June 2024, the Group had a total of 188 employees as compared with 158 employees as at 30 June 2023, all our employees stationed in the PRC. The increase in employees was mainly due to the establishment of two factories in Dongguan and Anji in 2023. Total staff costs (including Directors' emoluments) for the Period amounted to approximately RMB7.1 million, versus approximately RMB6.5 million as recorded for the Preceding Period.

During the Period, the Group remunerated its employees and Directors with reference to the duties, responsibilities, experience and competence of individual employee as well as prevailing market practices. The remuneration policy of the Group is formulated by the remuneration committee and subject to regular review annually, which also applies to Directors. In addition to salaries, discretionary bonuses and other fringe benefits, employees of the Group and all Directors (including independent non-executive Directors) may also be granted share options of the Company pursuant to the terms and conditions of the Company's share option scheme adopted on 9 March 2023 as incentives and rewards for their contribution to the Group.

USE OF PROCEEDS

The Shares were listed on the Stock Exchange on the Listing Date, a total of 190,000,000 offer Shares were allotted and issued and the net proceeds raised therefrom amounted to approximately HK\$155.4 million.

There were no changes in the intended use of net proceeds as disclosed previously in the Prospectus, 2022 and 2023 Annual Report. Up to 30 June 2024, the net proceeds had been utilised as follows:

As disclosed in the Prospectus, it was mentioned that the net proceeds would be utilised for establishing new biodegradable production lines at the Changchun Production Base in 2023 and targeted to complete our entire expansion of our Changchun Production Base by the second quarter of 2024. The Company recognised there would be a delay in the use of proceeds from the Listing. The reasons for such delay were decided after considering several factors, including the persistent economic, financial, and geopolitical complexities worldwide, the challenging business environment in the PRC during 2023, and the foreseeable unstable market conditions in 2024. Additionally, minor changes in our Southeast China expansion plan and the establishment of our Anji factory also contributed to the decision. In the fourth quarter of 2023, the Board conducted a strategic review of establishing our new biodegradable production lines at the Changchun Production Base given the aforementioned factors and decided to delay the plan. This decision was made after considering that (i) we have an established position in Northeast China and (ii) a majority of our customers located in the Northeast are recurring customers. Therefore, the Directors consider that carrying out the Southeast China expansion plan should be prioritised in our strategic formulation. Nevertheless, despite the delay, the Company has commenced the trial production for the new production machines and equipment purchased during 2023 in Changchun Production Base. Although the Company has not completed our entire expansion of our Changchun Production Base by the second quarter of 2024, the Company had and would continue the plan to expand our Changchun Production Base.

As disclosed in the Prospectus, it was mentioned that the net proceeds would be utilised to establish the Huizhou Production Base in Southeast China in 2023. The Company recognised there was a delay in the use of proceeds from the Listing when it decided to deliver equipment and machinery originally ordered for the Huizhou factory site to the Dongguan factory. The reasons for such delay were principally due to (i) an unexpected delay in obtaining approval from Huizhou Development and Reform Bureau (the local branch of the National Development and Reform Commission) regarding the Huizhou factory site, although the Company had ordered the necessary machinery, carried out planning, and submitted the application for the new factory in the first half of 2023. However, as of August 2023, the Group had not obtained all necessary approvals; (ii) during the material period, the Company became aware of an alternative and available factory site in Dongguan, which is (a) nearby to the Huizhou factory (less than 100 kilometres from the original site) and within the same province; (b) with better local government support, which was later evident as the Group was able to obtain all necessary approvals to commence trial production before 31 December 2023; and (iii) lower rental payments per square metre than the Huizhou factory. Hence, the Board conducted a strategic review of the establishment of the Huizhou Production Base in the fourth quarter of 2023 and adjusted our expansion plan by entering into a rental agreement with Dongguan in the second half of 2023, terminating the lease of the factory in Huizhou, and relocating our equipment and machinery to Dongguan to avoid causing a material delay in our Southeast China expansion plan as stated in the Prospectus. As of the date of this announcement, the Company has not received feedback or approval from Huizhou Development and Reform Bureau and therefore has not obtained all necessary approvals regarding establishing factory site in Huizhou. The Company has utilized internal funds to establish factory in Dongguan without utilizing the net proceeds raised from Listing because the purposes were slightly different from the expansion plan set out in the Prospectus. The Southeast China factory was originally planned to be set up in Huizhou, instead of Dongguan, despite these two cities both being located within Guangdong province. Due to the aforementioned factors, the Company decided to use internal funds for the initial investment (i.e. Phase 1 operation).

Considering the aforementioned, the Company considers it more appropriate to determine the actual allocation of the unutilised proceeds after reviewing the full-year financial situation of 2024 and will publish an announcement to revise the unutilised use of proceeds (where applicable) in accordance with the Listing Rules as appropriate.

As at 30 June 2024, the unutilised net proceeds of approximately HK\$104.1 million were deposited into licensed banks in Hong Kong and PRC, respectively.
