PERFORMANCE AND DEVELOPMENT OF BUSINESS SEGMENTS

Acoustics Business

In 1H 2024, the Group’s acoustics business recorded a revenue of RMB3.46 billion, representing an increase of 4.1% YoY. This was primarily attributed to the recovery of global smartphone market demand, as the smartphone shipment volume returned to growth. Thanks to the increasing adoption of the Group’s high-end acoustics platform in major smartphone models and higher speaker shipment volume, the gross profit margin reached 29.9%, showing a 4.4 ppts increase YoY.

In 1H 2024, the smartphone market sustained the recovery trend that began in 2H 2023, according to the latest preliminary data of the International Data Corporation (“IDC”), the global smartphone shipment grew by 10.4% YoY in the first half of this year. With years of accumulated technological innovations, the Group’s acoustics business integrates hardware, algorithms, and tuning services to meet the application demand of smart devices in multiple scenarios, leading the acoustics industry upgrade continuously. In 1H 2024, the Group’s share of the mid to high end market rose steadily, and the product portfolio continued to improve. Such as the master-level super linear speakers (“SLS”) maintained its high growth momentum, with shipments surpassing 12 million units, up by nearly 200% YoY. The Combo series, an innovative two-in-one acoustic and electromagnetic product, shipped close to 4.5 million units, providing customers with a wide range of product choices. For foldable phones, the Group launched high-performance speakers with industry-leading thinness based on the Group’s high-performance loudspeaker technology platform and adopted innovative material application and structural design. This not only greatly saved stacking space, but also enhanced the performance of the speakers in the mid-to-low frequencies, optimizing the balance between thinness and performance, gaining major market shares in this space.

Interim Review

PSS – automotive & consumer acoustics products Business

PSS related business consolidation contributed a revenue of RMB1.52 billion, with a gross margin of 25.0%. The Group's automotive acoustics business continued to make breakthroughs, and the synergy with PSS has been progressing well. The future automotive market outlines the second growth curve for the Group, and PSS' product portfolio covers high-performance classic car speakers of various sizes, including low, medium, high, and full-range, with cutting-edge tuning technology, providing high quality sound experience for consumers, penetrating first-tier automotive companies globally. According to the China Association of Automobile Manufacturers, domestic automotive sales increased by 6.1% YoY in 1H 2024, with the sales of new energy vehicles ("NEVs") growing rapidly by approximately 32% YoY. After completing the acquisition, the Group will also accelerate its expansion in the domestic market and continue to supply mid-to high-end models to leading NEVs brands. The Group is exploring a vertically integrated solution of loudspeakers, amplifiers, algorithms, and tuning services. Additionally, the collaboration with top global audio brands through brand licensing, provides a wider range of choices for top-tier global automotive companies and end-users.

Optics Business

In 1H 2024, the Group's optics business reported a revenue of RMB2.21 billion, showing a 24.9% YoY increase. This growth was mainly driven by the recovery in demand in the smartphone optics industry, higher shipments, and improved average selling prices of optical lenses and optical modules, as a result of the Group's expansion in the mid-to high-end market. The gross profit margin increased to 4.7%, marking a significant improvement of 21.7 ppts YoY, of which the plastic lens gross margin rose by 27.4 ppts YoY to 16.7% and the optics module gross margin was up by 11.8 ppts YoY to 5.7%.

The premiumization of plastic lenses has been progressing well, with 6P lens maintaining more than 15% of the total shipment and the Group winning the design-in for 7P lens projects. Camera modules also saw steady growth in both shipment volume and ASP, resulting in a revenue increase of 29% YoY. Furthermore, 1G6P hybrid lens shipments rose by nearly 40% YoY to nearly 1.4 million units. The Group's proprietary wafer-level-glass ("WLG") technology has been gaining positive feedback from smartphone OEMs for its outstanding optical performance. The WLG technology has a unique advantage of unibody molding, which greatly improves the production efficiency and precision of micro prisms. To meet customers' demand for innovation in main cameras, telephoto lenses, and micro prisms, the Group is proactively collaborating with customers in the advanced development of more high-end and flagship models. Additionally, the Group placed great importance on inventory management, accelerated operational efficiency, improved production yield, and further reduced unit costs, resulting in a notable increase in gross profit margin.

The gross profit margin for the combined segment stood at 22.9%, showing a 3.6 ppts increase YoY, of which the gross margins of haptics and precision mechanics both improved between 3-6 ppts each, mainly due to the continuous growth in shipments of high-end haptics products and the Group's continuous optimization of the product mix and emphasis on cost control in precision mechanics. The rapid shipment increase of metal hinges, heat dissipation products, and notebook enclosure business represent key growth drivers for the future.

Interim Review

Electromagnetic Drives Business

In 1H 2024, the electromagnetic drives business saw a notable growth in the gross margin, which was largely fueled by the Group's high performance x-axis motors and product mix improvement. Additionally, RichTap® continues to be highly recognized by numerous customers for its industry-leading algorithms, and professional services. The Group's haptics products are also making significant strides in non-smartphone fields such as games, AR/VR, Intelligent Vehicles, and IoT devices, enabling device manufacturers as well as gaming, audiovisual, and social networking content providers to realize a multi-dimensional premium haptic experience. The Group is promoting the vertical integration of optics modules and proactively accelerating the VCM business with independent production of all key components and integrated solutions for design, simulation, manufacturing, and testing. Leveraging on accumulated technology leadership and production know-how, development with core customers has begun in the first half of the year to achieve mass shipments of high-value VCM motor modules.

Precision Mechanics Business

The Group has maintained stable relationship with various core customers in precision mechanics, which contributed to topline increase in many products, such as metal hinges, heat dissipation components, and the laptop enclosure business, and also fueled the improvement in the gross margin in 1H 2024. The Group has continued to expand the smartphone casing business and engaged in active research and development of emerging categories in cooperation with its customers. As a result, the Group has become the main supplier of high-value structural components for mid-to high-end models and foldable phones to its core customers. This has led to an improvement in ASP and gross profit margin. The Group's vertical integration capability and technological innovation strength in hinge products have been highly recognized by its customers, with shipments of nearly 500,000 units in the first half of 2024. The Group's innovative foldable phone hinge solution sets a new industry standard for hinge technology, achieving unparalleled thinness and improved impact resistance. Sensor and Semiconductor Business

In 1H 2024, revenue from the Sensor and Semiconductor ("SSE") business amounted to RMB389 million, down by 21.2% YoY, mainly due to delay in new projects into 2H 2024. The gross profit margin was 16.4%, up by 5.1 ppts YoY, primarily benefitting from the increase in revenue share of high-margin products.

As a top-three global smartphone micro-electro-mechanical system ("MEMS") microphone manufacturer, the Group has shipped over 7 billion units to date. Leveraging our in-house capabilities, the Group specializes in developing high-performance MEMS microphones, application-specific integrated circuits ("ASICs") and customized microphone modules to better fulfill a variety of industry segments and customer requirements. In 1H 2024, the Group has been promoting the proprietary high-performance MEMS microphone, with shipment proportion of Android mid-to high-end products rising 15 ppts YoY to over 60%, spearheading industry upgrades. Amidst the upcoming artificial intelligence ("AI") boom, robust AI phone features will drive rapid innovation in intelligent voice interaction technology, with MEMS microphones, as core components in voice recognition, driving spec upgrades. As one of the earliest players in the industry to lay out high signal-to-noise ratio microphones and realize mass production, the Group has gained customer recognition for its exceptional product performance and is poised to capture the industry upside created by AI.

Such systems are designed to manage the risk of failure to achieve business objectives, and can provide reasonable assurance against material misstatement or loss. Certain key risk factors affecting the Group are outlined below. The list of these factors is non-exhaustive, and there may be other risks and uncertainties which are not known to the Group or which may be immaterial now but could become material in the future.

Risks Pertaining to the Smartphones Market

A substantial part of the Group's revenue is derived from the smartphone sector of the consumer electronics market. There are uncertainties due to the potential slow-down in global economy and the ensuing dampened consumer sentiment and weaker demand. A decline in global economic conditions, in China and other geographic regions, may affect our operating results and financial performance. To tackle this, the Group is continuously widening its products and technologies platforms to extend its reach to different end applications, including a recent major acquisition made in automotive market, so as to diversify the sources of revenue and profit to reduce its dependency on any single market segment. The growth of electric vehicle (EV) market and existing strategic partnerships with EV brands will lead to new revenue streams.

Reliance on a Number of Key Customers

The Group's five largest customers, which accounted for 67.3% of the Group's total revenue for 1H 2024, are all related to the consumer electronics industry, characterized by innovation-driven and user experience-oriented business growth. Loss of or changes in market position of any of these customers may materially and adversely affect the Group's business, financial condition and results of operations. Nevertheless, the Group has focused on technology innovation to continuously enhance user experience meeting customers' specification upgrade needs. We have also implemented standardized procedures for handling all forms of customer information to ensure it is not improperly or inadvertently disclosed to third parties. The Group has established strong relationships with these major customers; all of them have been our long-standing customers with good credit records.

Production Disruption due to Unforeseeable Events and Supply Chain Adversities

Geopolitical events among different nations may impose unpredictable impacts to the global markets and the Company, such as disruption to the global supply of commodities including base metals and driving up the commodities' prices. Any continuous increase in the prices of raw materials might lead to margin compression. Furthermore, geopolitical uncertainties may directly or indirectly impact the Group's customers, which in turn may disrupt supply chain and impact end-consumer demand.

Supply chain challenges to meet environmental, health and safety standards, may also adversely affect production schedule which may potentially result in customer dissatisfaction, reputational damage and financial losses.

Key Risk Factors

To address these risks, the Group established the Quality and Operations Committee. The committee actively monitors the regulatory environment and allocates resources to plan and comply with regulatory requirements and customer demands. A robust quality management system has been implemented to ensure that all production facilities are certified under the International Organization for Standardization (ISO) standards for quality management and the International Electrotechnical Commission Quality Assessment System for Electronic Components (IECQ) standards for electronic component quality. The Company conducts internal and external audits every year to ensure the efficacy of its product quality and procurement channels. Additionally, the Group has adopted long-standing Supplier Code of Conduct, requiring suppliers to maintain compliance with various standards, including labor and human rights protections, health and safety regulations, and environmental safeguards. This proactive approach not only mitigates risks but also enhances the overall resilience of the supply chain.

Operational, Technology Obsolescence and ESG Considerations

The Group's operations comprised design and delivery of innovative technology solutions. Our business remains dedicated to advancing miniature components while developing cutting-edge products and technologies platforms. However, changes in technological design and performance specifications or related external factors linked with environmental, social, and governance (ESG) considerations may have various levels of negative impact on our operational outcome. In meeting future design specifications and production quality requirements, the Group has implemented robust processes to ensure standards are met.

The Group ensures that its new technology solutions and miniature components align with sustainability standards. This includes applying eco-friendlier materials, promoting energy efficiency, and considering the recyclability of products. Changes in environmental regulations or shifts in consumer preferences towards more sustainable products could impact the Group's operations and lead to product obsolescence, necessitating a proactive approach to environmental considerations in product design and development. The Group has established a quality management system that ensures all products undergo thorough testing to meet customer requirements and international standards. This system, as part of our operational "big data" system, is continuously evaluated and improved internally.

The Group's annual budget includes significant investment in R&D in order to build sustainable technology roadmaps and intellectual property portfolios. As data security is a critical concern, the Group treats information security as a strategic priority. The Group has implemented comprehensive measures to protect data assets from breaches, leaks, and hacks, which are also essential for maintaining customer trust and avoiding reputational damage. Moreover, adhering to social standards and regulations, such as the Ethical Trading Initiative and Social Accountability 8000 International Standard, the Group constantly considers social impact of its technologies, ensuring social equalities and that positive contributions are made to society.

ESG and Climate Change

Many governments, regulators, investors, employees, customers and other stakeholders are increasingly focused on ESG considerations relating to businesses, such as climate change, suppliers' complying with ESG criteria and human resources management. In addition, the Company makes statements about its goals and initiatives through its various non-financial reports, information provided on its website, press statements and other communications. Responding to these ESG considerations and implementation of these initiatives involves risks and opportunities.

Key Risk Factors

The Company has published stand-alone annual Sustainability Reports since 2012. Continuously, ESG-related reporting obligations and compliance practices are to evolve, which may expose the Group to increased costs, reputational aspects and other potential adverse effects, such as attention on climate change. Climate change presents significant acute and transition risks to businesses and communities globally. Prolonged and extreme weather increase operational complexities, as well as manufacturing and maintenance cost. Furthermore, employees' health may also be impacted. Trending customers' preference for green products may impact revenue due to change in product demands. And, enactment of more stringent laws and regulations to environmental impact may also increase our compliance costs.

The Group has this year established the Sustainability Committee and a comprehensive Climate Change Policy has been implemented to drive sustainability progress and manage climate impacts through mitigation, adaptation, and resilience strategies. Our commitment to integrating climate-related issues into our sustainability management system includes the ISO standard of environmental management and energy management. To enhance long-term energy conservation opportunities, the Group continues to adopt energy-saving technologies, establish energy-efficiency facilities and develop sustainable products.

Liquidity and Interest Rate Risk

The Group manages liquidity risk by maintaining an adequate level of cash and cash equivalents through continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The Group is exposed to interest rate risks on its bank loans for working capital and CAPEX that are associated with the expansion of the Group. The Group focuses on mitigating the liquidity and interest rate risks, with an appropriate mix of RMB/USD borrowings that are constantly reviewed and adjusted. The Group's USD deposits served as a natural hedge to the risk of interest rate volatilities to some extent. The Group also maintains an appropriate mix of fixed/floating rate debts, an even debt repayment profile and a diversified source of funding, including the issuance of long term five-year and ten-year unsecured notes. As at 30 June 2024, over 95% of debts were fixed rate debts.

The Group's financial assets include cash and cash equivalents, short term fixed deposit, pledged bank deposits, restricted bank deposits, trade and other receivables, amounts due from related companies, derivative financial instruments, financial assets at fair value through profit or loss and equity instruments at fair value through other comprehensive income, which represent the Group's maximum exposure to credit risk in relation to financial assets. The credit risk on liquidity is limited because the counterparties are established banks with good credit-ratings.

Foreign Exchange Risks

Given our international operations and presence, the Group faces foreign exchange exposures including transaction and translation exposures, and is exposed to exchange rate risks that could impact financial reporting results. The Group's reporting currency is RMB and our sales to overseas customers are predominantly denominated in USD.

It is the Group's consistent policy to centralize foreign exchange management to monitor total foreign currency exposure, to net off affiliate positions, and, if necessary, to consolidate hedging transactions with banks. The cash inflow to the Group in denomination of the two currencies, namely RMB and USD, are mostly, over time, in balanced proportions. In addition, various bank facilities have been arranged in these two currencies, to meet our daily operating expenses and capital investment requirements. Hence, in our operating business model, the Group's revenue is mostly matched to the currencies of the outlay. As far as possible, the Group aims to achieve natural hedging by investing and borrowing in the functional currencies. Where a natural hedge is not possible, the Group will mitigate foreign exchange risks via appropriate foreign exchange contracts.

Key Risk Factors

On-going Global Trade Frictions

Prolonged trade frictions might lead to a slowdown of the global consumer electronic and automotive markets and a decline in the orders by the key customers of the Group, which could have a material adverse effect on the Group's business, results of operations and financial conditions. Furthermore, other related laws and regulations including export controls, economic sanctions and similar regulations may include restrictions and prohibitions on the sale or supply of certain products and on the transfer of parts, components, and related technical information and know-how to certain countries, regions, governments, persons and entities.

The Group is committed to complying with applicable laws and regulations related to export controls and economic sanctions. As at the date of this interim report, the Group's results of operations have not been materially affected by the expansion of relevant laws and regulations such as export control and economic sanctions, or the new rules or measures adopted to counteract them. Nevertheless, depending on future developments in the global trade tensions, there is no assurance that such regulations, rules, or measures will not have an adverse impact on the Group's business and operations.

The Group has implemented the trade control compliance management system and has set up a trade compliance committee for overall management of the Group's trade compliance activities initiatives. A Trade Compliance Department has also been established to coordinate with and support other departments on trade compliance matters. The Group's dedication to R&D to develop proprietary innovative technologies, and the Group's strategy in integrating R&D all over the world with our diversified manufacturing bases should help to continue to provide the best solutions to customers and mitigate some of the adverse business impact of the trade frictions.

SUSTAINABILITY GOVERNANCE

With a continuous focus on enhancing the existing governance structure and ever-changing compliance environment, the Group has been actively preparing to meet the climate-related requirements set by HKEx, and the Ministry of Finance of the People's Republic of China, and for Premium Sound Solutions ("PSS") in particular, the European Union Corporate Sustainability Reporting Directive ("CSRD"). As the latest part of our commitment to sustainable development, the Group has established a dedicated Sustainability Committee in 2024, defining its Terms of Reference and appointing leadership to drive ESG initiatives forward. In June 2024, the Group hosted a Sustainability Working Group ("SWG") meeting chaired by the EVP which included a broader representation of senior management. The purpose of the meeting was to review the Group's ESG performance and make recommendations where necessary.

In our efforts to combat climate change, the Group has taken proactive actions as well. In 2024, we have engaged a third-party ESG professional consultant who will assist us in conducting a comprehensive climate risk assessment and implementing mitigation actions. This process will commence with climate gap analysis and scenario analysis, and will include our recently acquired strategic automotive business, PSS. Apart from identifying gaps and improvement areas within the current climate-related disclosure framework, PSS's sustainability efforts will be consolidated into the Group. For example, PSS has already set forth a renewable energy transition plan marked by a strategic phased implementation, and has started to explore, validate and implement use of recycled plastics.

The Group recognises the importance of adapting to the evolving ESG landscape. We are dedicated to increasing positive impacts while mitigating negative ones. Regular meetings and training sessions have been conducted for the Board and SWG to disseminate updates and facilitate internal discussions. This ensures that the Group remains informed and actively participates in the evolving disclosure landscape. Furthermore, the published annual ESG Report is verified by an independent qualified agency every year.

OPERATIONAL EXCELLENCE AND SOCIAL PERFORMANCE

Customers Experience

In January 2024, the Group made a strong presence at International Consumer Electronics Show ("CES") 2024, presenting dozens of innovative products in areas such as automotive, XR, acoustics, optics, haptics, precision manufacturing, sensors, and semiconductors that showcased the company's technological prowess and leadership in sensory experience technologies. The Group has consistently championed product and technological innovation, leading the way in sensory experience technologies across a wide range of domains. This year, the Group also has been named among the Top 10 domestic MEMS companies in the latest ranking released by the MEMS Branch of the China Semiconductor Industry Association once again. This continued recognition is a testament to the Group's technological prowess and market dominance, particularly in the field of MEMS microphones. Going forward, the Group will adopt an even more open stance, continuing to drive the advancement of sensory experience technologies.

The Group's Quality and Operations Committee have optimised our lean operations system and driven the execution of our product lines. The goal has been to deliver high-quality products that meet customer satisfaction, ensuring customer success. We have remained steadfast in our pursuit of continuous improvement, eliminating waste, and gradually approaching the theoretical limits of 0 Parts per Million (PPM) and zero inventory.

Sustainability

Suppliers' Management

We established the Group's Supply Chain Committee, consisting of senior management members, to oversee the entire supplier assessment, selection, and evaluation process. This committee is responsible for developing cost models, creating a roadmap, and accelerating the implementation of our supplier management policies.

We ensure that all our suppliers adhere to our Code of Conduct and CSR Commitment, meeting our standards in labor and human rights, health and safety, chemical management, environmental protection, and anti-corruption. These standards are based on various international principles such as the Electronic Industry Code of Conduct, Ethical Trading Initiative, and the Social Accountability 8000 International Standard. We actively encourage our suppliers to implement similar regulatory and monitoring practices with their own suppliers (our second-tier suppliers) in accordance with our Code.

Furthermore, we guarantee that all minerals used in production are 100% conflict-free. This requirement aligns with Regulation EU 2017/821, which mandates supply chain due diligence obligations for union importers of tin, tantalum, tungsten, ores, and gold originating from conflict-affected and high-risk areas.

Talent Management

The Group attaches great importance to talent attraction, retention, and development. For talent acquisition, the Group's comprehensive student recruitment tour included visits to more than 50 universities. Through this extensive outreach program, the Group was able to tap into a diverse talent pool and assess the skills and potential of these candidates. As part of our effort to help new employees adjust to our corporate culture and facilitate their career development and business success, the Group offers one-to-one training on professional knowledge, as well as travel and accommodation assistance.

Employee engagement is a key component of the Group's talent retention and development practices. The Group organised outdoor employee training in May, 2024 in order to express gratitude for the team's unwavering efforts and contributions, foster camaraderie, enhance cohesion, and enrich the employees' cultural life outside of work. Through this training, the Group not only strengthened the bonds between team members, but also improved the overall collaborative capabilities of the team. More importantly, the Group intended to promote the positive attitude and team spirit of the members when facing challenges.

Community Care

The Group is committed to addressing societal challenges and establishing positive relationship with the communities where it operates through compassionate and practical initiatives and partnerships with various stakeholders. We continued to engage with the local community in order to positively influence economic and social development and give back to the communities in which we operate by participating in charitable events. In 1H2024, a volunteering team in Hong Kong office collaborated with a local Eco-work group to recycle and further processing 4,800 pieces of plastic bottles into sustainable products.

ENVIRONMENTAL IMPACTS

The Group has actively conducted a comprehensive performance analysis as part of its commitment to addressing climate change, as updated in its Climate Change Policy. This evaluation has involved a thorough assessment of the Group's progress and sustainability initiatives to ensure effective action plans and strategies are implemented. The Group has been reviewing its existing environmental targets, including carbon emissions, energy consumption, waste diversion, and water consumption. Through this review, the Group aims to align its operations with low-carbon practices and make meaningful contributions to the fight against climate change. Furthermore, target setting is in progress as the Group strives to establish clear goals and objectives for climate change mitigation and sustainability which allows the Group to track progress and measure the effectiveness of its initiatives.

(incorporated in the Cayman Islands with limited liability)

INTRODUCTION

We have reviewed the condensed consolidated financial statements of AAC Technologies Holdings Inc. (the “Company”) and its subsidiaries set out on pages 42 to 75, which comprise the condensed consolidated statement of financial position as of 30 June 2024 and the related condensed consolidated statement of profit or loss, condensed consolidated statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the six-month period then ended, and notes to the condensed consolidated financial statements. The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and International Accounting Standard 34 “Interim Financial Reporting” (“IAS 34”) issued by International Accounting Standards Board. The directors of the Company are responsible for the preparation and presentation of these condensed consolidated financial statements in accordance with IAS 34. Our responsibility is to express a conclusion on these condensed consolidated financial statements based on our review, and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

SCOPE OF REVIEW

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 “Review of Interim Financial Information Performed by the Independent Auditor of the Entity” issued by the Hong Kong Institute of Certified Public Accountants. A review of these condensed consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the condensed consolidated financial statements are not prepared, in all material respects, in accordance with IAS 34.

3. SEGMENT INFORMATION

Operating and reportable segments are identified on the basis of internal reports about components of the Group that are regularly reviewed by the Group’s key operating decision makers in order to allocate resources to the segments and assess their performance.

The Group’s operating and reportable segments under IFRS 8 “Operating Segment” are acoustics products, electromagnetic drives and precision mechanics, optics products, PSS – automotive & consumer acoustics products, sensor and semiconductor products and other products, which represent the major types of products manufactured and sold by the Group. 7. TAXATION (continued)

The Group is operating in certain jurisdictions where the Pillar Two Rules are effective. However, as the Group's estimated effective tax rates of most of the jurisdictions in which the Group operates are higher than 15 per cent, after taking into account the adjustments under The Global Anti-Base Erosion Rules ("GloBE Rules") based on management's best estimate, the management of the Group has not made relevant disclosures of qualitative and quantitative information about the Group's exposure to the Pillar Two income taxes as the exposure is insignificant to the Group, while for the Group's estimated effective tax rate of a jurisdiction in which the Group operates is lower than 15 per cent, after taking into account the adjustments under GloBE Rules, the management considers the exposure to the top-up tax is insignificant to the Group.

Under the law of PRC on Enterprise Income Tax (the "EIT Law") and Implementation Regulation of the EIT Law, the tax rate of the PRC subsidiaries is 25%, for both periods, unless the group entities entitle to other preferential tax treatment granted by the relevant PRC tax authority.

The PRC dividend withholding tax is calculated at the applicable rate in accordance with the relevant laws and regulations in the PRC.

According to a joint circular of Ministry of Finance and the State Taxation Administration of the PRC, Cai Shui [2008] No. 1, the accumulated undistributed profits earned by foreign invested enterprise prior to 1 January 2008 can be exempted from EIT when they are distributed to foreign investor after 2008. Whereas, dividend distributed out of the profits generated thereafter, shall be subject to EIT at 10% and withheld by the PRC subsidiary, pursuant to Articles 3 and 27 of the EIT Law and Article 91 of its Implementation Regulation. According to the arrangement between the Mainland of China and the Hong Kong Special Administrative Region for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to the Taxes on Income, the withholding tax rate on dividend paid by a PRC resident enterprise to a Hong Kong resident enterprise is further reduced to 5% if the Hong Kong resident enterprise holds at least 25% equity interests in the PRC resident enterprise and it is considered as the beneficial owner of the dividend, and remains at 10% otherwise.

In addition, certain PRC subsidiaries were officially endorsed as High-New Technology Enterprises ("HNTE") till the dates ranging from 2024 to 2025 (six months ended 30 June 2023: 2023 to 2024). Pursuant to the EIT Law, those PRC subsidiaries entitled as HNTE shall be entitled to a preferential tax rate of 15% till the expiry of the HNTE status for the respective PRC subsidiaries.

In March 2021, the Ministry of Finance and the State Administration of Taxation released No. 13 announcement of 2021 named "Announcement on Further Improving the Policy on Pre-tax Deduction of Research and Development Expenses", according to which certain PRC subsidiaries engaged in manufacturing industry are entitled to an additional 100% tax deduction on eligible research and development expenses incurred by them for both periods.

Pursuant to relevant laws and regulations in Singapore, one of the Group's subsidiaries is entitled to a concessionary tax rate under Development and Expansion Incentive which is granted based on the fulfilment of carrying out qualifying business activities. This incentive program is effective from 1 January 2019 for 10-year period.

Taxation in Europe mainly represents the corporate income tax calculated at the rate of 25% on the estimated assessable profits of the subsidiaries of the Company which was incorporated in Belgium.

Pursuant to the relevant laws and regulations in Vietnam, one of the Group's subsidiaries is entitled to concessionary tax rate which is granted based on the fulfilment of carrying qualifying business activities. This tax holiday for the subsidiary will expire in 2027.

Taxation in other jurisdictions are calculated at the rates prevailing in the respective jurisdictions.

Weighted average number of ordinary shares for the purpose of calculating diluted earnings per share	1,176,624	1,186,755

Notes:

- During the six months ended 30 June 2024, the computation of diluted earnings per share did not consider the effect of contingent settlement provision as the Directors of the Company consider the effect is anti-dilutive (six months ended 30 June 2023: Adjustment to the share of loss of subsidiaries based on dilution of their loss per share arising from the effect of contingent settlement provision).
- The weighted average number of shares has been calculated taking into account the shares repurchased by the Group or held by the 2016 Trustee and 2023 Trustee (both as defined in note 19) under share award scheme of the Company.

The computation of diluted earnings per share for the six months ended 30 June 2024 and 2023 did not consider the effect arising from the unvested restricted shares granted by a subsidiary as set out in note 19 as the exercise would result in an increase in earnings per share.

(ii) Right-of-use assets

During the six months ended 30 June 2024, apart from the acquisition PSS Group as detailed in note 21, the addition to the right-of-use assets represents the renewal of several lease agreements and new lease agreements for the use of land and buildings ranging from 2 to 9 years (six months ended 30 June 2023: 3 to 6 years). The Group is required to make fixed future payment and, in certain cases, is required to make prepayments. On lease commencement, the Group recognised RMB40,223,000 (six months ended 30 June 2023: RMB54,421,000) of right-of-use assets, and RMB40,190,000 (six months ended 30 June 2023: RMB54,046,000) of lease liabilities. Notes to the Condensed Consolidated Financial Statements

For the six months ended 30 June 2024

10. MOVEMENTS IN PROPERTY, PLANT AND EQUIPMENT, RIGHT-OF-USE ASSETS AND INVESTMENT PROPERTIES (continued)

Impairment assessment (continued)

The recoverable amount of cash-generated unit was determined based on a value in use calculation. During the six months ended 30 June 2023, that calculation uses cash flow projections based on financial budgets approved by the management of the respective subsidiary covering the following 5 years with a pre-tax discount rate of 11.7%. The cash flows beyond 5-year period are extrapolated using 3% growth rate for the relevant industry. Another key assumption for the value in use calculated is the budgeted gross margin, which is determined based on the cash-generating units' past performance and management expectations for the market development. The estimated cash flows and discount rate were subject to higher degree of estimation uncertainties in both years due to uncertainty on the volatility in financial markets, including potential disruptions of the Group's operations.

Based on the result of the assessment, management of the Group determined that the carrying amount of the relevant assets did not exceed the recoverable amount based on the value in use and believed that any reasonably possible change in any of these assumptions would not result in significant impairment loss, and concluded that no impairment loss had been recognised for the six months ended 30 June 2023.

17. CAPITAL CONTRIBUTION FROM NON-CONTROLLING INTERESTS OF A SUBSIDIARY AND CONTINGENT SETTLEMENT PROVISION

In accordance with the agreement between the Group and certain non-controlling interests of a subsidiary, on occurrence or non-occurrence of future events including the separate listing condition, certain non-controlling interests of a subsidiary are entitled to require the Group for capital repayment plus a premium. A contingent settlement provision has been recognised against the equity as the Group has a contractual obligation to deliver cash.

According to the share transfer agreement dated 10 May 2022, AAC Technologies Limited (“AAC HK”) agreed to purchase 48,289,693 shares of AAC Optics (Changzhou) Co., Ltd. (“AAC Optics”), which represents approximately 0.7133% of the total number of shares issued by AAC Optics, from an independent strategic investor (the “Seller”) at a consideration of RMB130,000,000 which was equal to the principal amount of the capital from the Seller in 2020. The gross obligation of RMB130,000,000 was derecognised against the equity upon the return of the capital contribution from that strategic investor. This transaction resulted in changes in the Group’s interest in AAC Optics from 80.38% to 81.10%. In addition, the Seller also entered into share transfer agreements with other strategic investors to transfer in aggregate 0.8232% interest in AAC Optics. As a result of these transactions, the contingent settlement provisions amounted to RMB147,789,000, which represented the consideration paid by AAC HK and the forfeiture of interests that the Seller was originally entitled to, were derecognised. The difference between the amounts of the contingent settlement provisions derecognised and the consideration paid amounting to RMB17,789,000 was credited directly in equity and attributed to owners of the Company in 2022.

According to the Company’s announcement dated 16 December 2022, the Company decided to delay the timetable for the proposed spin-off and separate listing, and, the Shanghai Stock Exchange accepted the application initiated by AAC Optics to withdraw the application documents in relation to the proposed spin-off and separate listing. The Company considered that the proposed spin-off and separate listing, if it proceeds, will be commercially beneficial to the Company and AAC Optics, and the Company intends to continue to pursue the proposed spin-off and separate listing when, amongst others, market conditions improve.

According to the Company’s announcement dated 15 September 2023, AAC Technology Information Consultancy (Changzhou) Co., Ltd. (“AAC TIC”), an indirectly wholly owned subsidiary of the Company, AAC Optics and certain second round strategic investors (“2023 Selling Investors”) entered into separate share transfer agreements, and the 2023 Selling Investors agreed to sell their entire equity interest in AAC Optics to AAC TIC. The 2023 Selling Investors in aggregate held approximately 7.1670% of the equity interest in AAC Optics, and the aggregate consideration under the share transfer agreements was approximately RMB1,448,990,000. Completion under each of the share transfer agreements would take place immediately upon AAC TIC having paid the consideration in full in September 2023 to each of the 2023 Selling Investors pursuant to the share transfer agreements. As a result of these transactions, the contingent settlement provision amounted to RMB1,448,990,000, which represents the considerations paid by AAC TIC, were derecognised. The amount by which the non-controlling interests were adjusted, amounting to RMB141,868,000, was credited directly in equity and attributed to owners of the Company in 2023. After completion of the share transfer agreements and as at 31 December 2023, AAC Optics is held (i) as to approximately 88.2620% indirectly by the Company; (ii) 2% by the share incentive platforms of AAC Optics, of which 0.1649% of the shares are vested but still held under the platforms; and (iii) approximately 9.7380% by the 5 remaining strategic investors in aggregate.

23. FAIR VALUE MEASUREMENTS OF FINANCIAL INSTRUMENTS

Some of the Group's financial instruments are measured at fair value for financial reporting purposes. The Directors of the Company have set up an investment committee, which is headed up by the Chief Innovation Officer of the Company, to determine the appropriate valuation techniques and inputs for fair value measurements.

In estimating the fair value, the Group uses market-observable data to the extent it is available. For instruments with significant unobservable inputs under Level 3, the Group engages third party qualified valuers to perform the valuation. The investment committee works closely with the qualified external valuers to establish the appropriate valuation techniques and inputs to the model. The Chief Innovation Officer reports the investment committee's findings to the Directors of the Company every quarter to explain the cause of fluctuations in the fair value.
