- 2. The Company defines a premium IoT PaaS customer as a customer as of a given date that contributed more than US\$100,000 of IoT PaaS revenue during the immediately preceding 12-month period.
- 3. The Company calculates DBNER of IoT PaaS for a trailing 12-month period by first identifying all customers in the prior 12-month period (i.e., those have placed at least one order for IoT PaaS during that period), and then calculating the quotient from dividing the IoT PaaS revenue generated from such customers in the current trailing 12-month period by the IoT PaaS revenue generated from the same group of customers in the prior 12-month period. The Company's DBNER may change from period to period, due to a combination of various factors, including changes in the customers' purchase cycles and amounts and the Company's customer mix, among other things. DBNER indicates the Company's ability to expand customer use of the Tuya platform over time and generate revenue growth from existing customers.

Mr. Xueji (Jerry) Wang, Founder and Chief Executive Officer of Tuya, commented, "I'm pleased that in the third quarter, we delivered robust financial performance across all our business segments, featuring high growth, stable margins and tight operating budget control. These solid results reaffirm our position as a growing and profitable smart cloud platform leader with a clear strategy and strong execution capabilities. Our performance was driven by robust demand from existing customers, as reflected in a Dollar-Based Net Expansion Rate of 124%. We also strengthened global partnerships, particularly in Europe and emerging markets, and expanded our developer community to 1.26 million registered developers. Looking ahead, we remain focused on empowering developers and delivering innovative solutions to meet the growing demand for smart products."

Mr. Yi (Alex) Yang, Co-Founder and Chief Financial Officer of Tuya, added, "Third quarter financial results were solid, highlighted by an approximately 34% year-over-year revenue increase, a non-GAAP operating margin of approximately 9%, and a non-GAAP net profit margin of approximately 25%. Importantly, we generated an operating cash flow of \$23.9 million, strengthening our net cash balance to further increase to around \$1.02 billion. This solid financial position supports our growth initiatives as we continue invest in product innovation, and user experience enhancements to meet evolving market needs. We believe these efforts, combined with strong execution and focus on long-term growth, will unlock meaningful value as we move forward."

The difference between loss from operations and net loss in the third quarter of 2024 was primarily because of a US\$13.0 million interest income achieved mainly due to well implemented treasury strategies on the Company's cash, time deposits and treasury securities recorded as short-term and long-term investments.

Use of Non-GAAP Financial Measures

In evaluating the business, the Company considers and uses non-GAAP financial measures, such as non-GAAP operating expenses, non-GAAP (loss)/profit from operations (including non-GAAP operating margin), non-GAAP net profit (including non-GAAP net margin), and non-GAAP basic and diluted net profit per ADS, as supplemental measures to review and assess its operating performance. The presentation of non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with generally accepted accounting principles in the United States of America ("U.S. GAAP").

The Company defines non-GAAP financial measures by excluding the impact of share-based compensation expenses, credit-related impairment of long-term investments and litigation costs from the respective GAAP financial measures. The Company presents the non-GAAP financial measures because they are used by the management to evaluate its operating performance and formulate business plans. The Company also believes that the use of the non-GAAP financial measures facilitates investors' assessment of its operating performance.

Non-GAAP financial measures are not defined under U.S. GAAP and are not presented in accordance with U.S. GAAP. Non-GAAP financial measures have limitations as analytical tools. One of the key limitations of using the aforementioned non-GAAP financial measures is that they do not reflect all items of expenses that affect the Company's operations. Share-based compensation expenses, credit-related impairment of long-term investments and litigation costs have been and may continue to be incurred in the business and are not reflected in the presentation of non-GAAP measures. Further, the non-GAAP financial measures may differ from the non-GAAP information used by other companies, including peer companies, and therefore their comparability may be limited. The Company compensates for these limitations by reconciling the non-GAAP measures to the most directly comparable U.S. GAAP measures, all of which should be considered when evaluating the Company's performance. The Company encourages you to review its financial information in its entirety and not rely on a single financial measure.

Reconciliations of Tuya's non-GAAP financial measures to the most comparable U.S. GAAP measures are included at the end of this press release.
